- Via the application of exclusions. This approach is relevant to

PAI 4 (Exposure to companies active in the fossil fuel sector),

PAI 5 (Share of non-renewable energy consumption and production) and

PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste and radioactive waste ratio),

PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:  
- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:  
PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste ratio),  
PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Machinery, Tools, Heavy Vehicles, Trains & Ships industry based in France on the subject of Climate mitigation (PAIs 1, 2 and 3). We also held an engagement on the subject of Workers (PAI 10) with an issuer in the Specialty Retailers industry based in Spain. Additionally, we engaged with an issuer based in the United Kingdom in the Personal & Household Products & Services industry on the subject of Sustainable food and water (PAIs 7 and 8).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	24
Corporate Governance	16
Human Rights	12
Natural Capital and Biodiversity	9
Diversity and Inclusion	5
Human Capital Management	5

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country

RELX PLC ORDINARY 14.4397P	Industrial	2.03	United Kingdom

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI Europe (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 72%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 38% was invested in sustainable investments with an environmental objective and 34% was invested in sustainable investments with a social objective. These

# SFDR Periodic Report (continued)

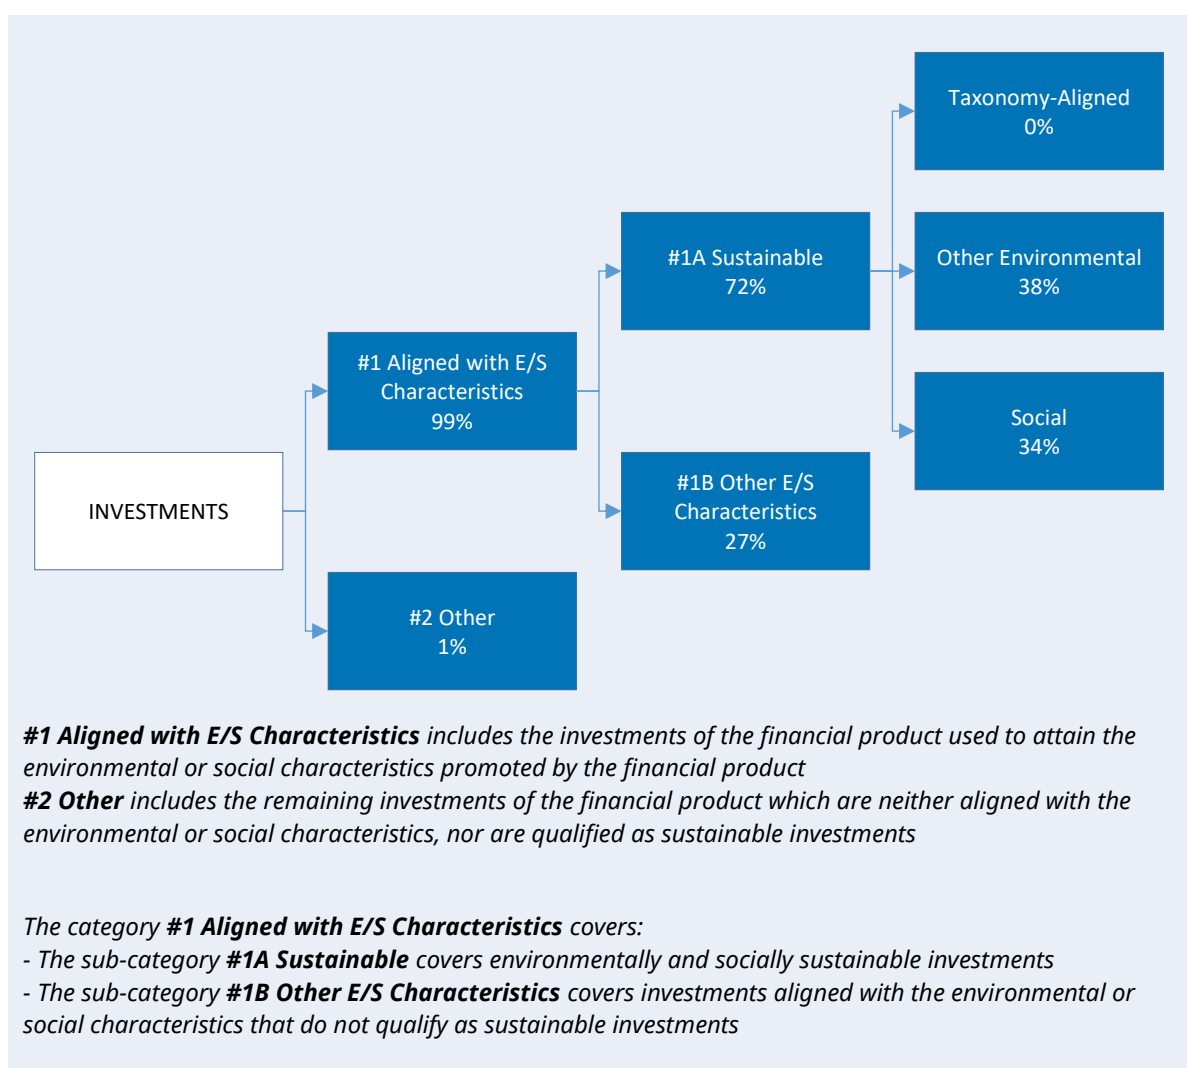

Reference Period: 1 January 2025 - 31 December 2025

percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets
Financial	Banking	16.23
Financial	Insurance	4.47
Industrial	Capital Goods	14.83
Industrial	Commercial & Professional Services	3.25
Industrial	Transportation	1.41
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	11.14
Health Care	Health Care Equipment & Services	4.26
Information Technology	Software & Services	6.13
Information Technology	Semiconductors & Semiconductor Equipment	4.76
Information Technology	Technology Hardware & Equipment	1.34
Consumer Staples	Food, Beverage & Tobacco	6.91
Consumer Staples	Household & Personal Products	2.86
Materials	Materials	7.38

Consumer Discretionary	Consumer Discretionary Distribution & Retail	2.06
Consumer Discretionary	Consumer Services	1.31
Communication Services	Media & Entertainment	2.77
Communication Services	Telecommunication Services	1.12
Utilities	Utilities	2.83
Cash	Cash	2.00

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

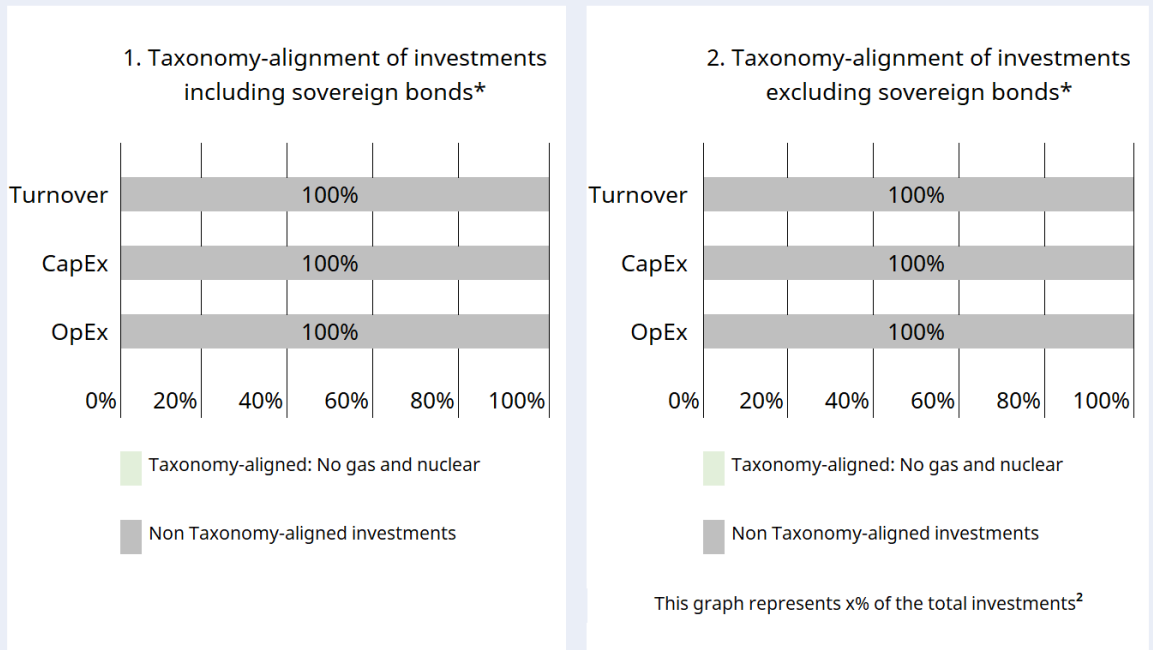

Taxonomy-aligned activities are expressed as a share of:

**- turnover**  
reflecting the share of revenue from green activities of investee companies

**- capital expenditure**  
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 38%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 34%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Alternative Energy

**Legal Entity Identifier :** 549300IS8ME9YA6EM043

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> 92%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

On 21 May 2025 the Fund's name changed from Schroder ISF Global Energy Transition to Schroder ISF Global Alternative Energy.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund invested at least 90% of its assets in sustainable investments. The Fund invested at least 75% of its assets in companies worldwide that generated at least 50% of their revenue from activities that contributed towards the global transition towards lower-carbon and more sustainable sources of energy, such as lower-carbon energy production, distribution, storage, transport and associated supply chain, material provider and technology companies.

The Fund also invested in other companies worldwide that generated a lower percentage of their revenue from these activities where the Investment Manager considered they are playing critical roles in the energy transition. All companies held by the Fund were deemed to be sustainable investments by the Investment Manager.

The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which were cash and money market instruments used with the aim of managing the Fund more efficiently.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund invested 92% of its assets in sustainable investments. This percentage represents the Fund's holdings at the end of the reference period. The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager assessed whether a certain percentage of the relevant issuer's revenues, capital expenditure or operating expenditure or market share contributed to an environmental or social objective (as applicable). At least 75% of issuers generated at least 50% of their revenue from activities that contributed towards the global transition towards lower-carbon and more sustainable sources of energy. The Investment Manager manually added companies that met certain criteria with revenue exposure of below 50% to the Fund's investment universe.

The Investment Manager used different sustainability indicators to measure the contribution at an investee company level. In particular, the Investment Manager used a quantitative screening tool to identify companies that derive a certain percentage of their revenues capital expenditure, operating expenditure or market share from their main activity that is associated with specific energy transition activities: including (1) renewable energy equipment; (2) renewable energy generation; (3) transmission and distribution; (4) batteries, storage and other equipment; (5) hydrogen; (6) electrical equipment and energy; and (7) clean mobility.

Subsequently, the Investment Manager used a number of indicators to derive a sustainability score out of ten for each company. Based on this score, each company was placed within one of the following categories: (1) Best-in-class, (2) Neutral and (3) Laggard. The indicators used to determine the score included but were not limited to metrics such as carbon intensity, board gender diversity and management remuneration. The information was drawn from company management meetings,

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

publicly available corporate information as well as the Investment Manager’s internal proprietary tools.

The Investment Manager invested 42% of the portfolio in issuers classified as Best-in-class and 50% of the portfolio in issuers classified as Neutral. These figures were calculated as at the end of the reference period. The Fund did not invest in any companies classified as Laggards during the reference period.

• **...and compared to previous periods?**

**Sustainable investments**

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	92
Jan 2024 - Dec 2024	95
Jan 2023 - Dec 2023	93
Jan 2022 - Dec 2022	92

**Best-in-class**

*This table details the percentage of assets invested in Best-in-class and Neutral, year on year*

Period	Fund (%)
Jan 2025- Dec 2025	Best-in-class – 42 Neutral – 50
Jan 2024 - Dec 2024	Best-in-class – 47 Neutral – 48
Jan 2023 - Dec 2023	Best-in-class – 53 Neutral – 40
Jan 2022 - Dec 2022	Best-in-class – 53 Neutral – 39

For 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of was calculated as at the end of the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager’s approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more ‘global norms’ thereby causing significant environmental or social harm; these companies comprise Schroders’ ‘global norms’ breach list. Schroders’ determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The ‘global norms’ breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund’s investment exclusions is to be found under “Sustainability-Related Disclosure” on the Fund’s webpage

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

The Fund's exclusions regarding:

- Fossil fuels: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production). The Fund did not invest in any company directly involved in fossil fuels. During the reference period, PAIs were also considered through the integration of the teams' proprietary sustainability assessment as part of the investment process. The Fund considered climate change criteria in its analysis as part of the 'environmental management' component of the stakeholder analysis. This covered greenhouse gas emissions, avoided emissions, carbon footprint and greenhouse gas intensity of investment companies: PAI 1, 2 and 3.

As part of our analysis, we considered how a firm is managing its environmental footprint (including its impact on the climate), as well as its potential exposure to the effects of long-term climate change. While no single climate change metric determined the overall assessment of a company's environmental management score, the Fund evaluated a variety of different metrics – from both internal and external data sources (including a Schroders' proprietary tool) – to determine whether a company is adequately managing its climate and environmental risks. PAIs 12 (Unadjusted gender pay gap) and 13 (Board gender diversity) were considered as part of our investment process using data from a Schroders' proprietary tool.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Electrical Utilities & IPPs industry based in Spain on the subject of Climate adaptation (PAIs 1, 2, 3, 4, 5 and 6). We also held an engagement on the subject of Purpose, strategy and capital allocation (PAI 10) with an issuer in the Machinery, Tools, Heavy Vehicles, Trains & Ships industry based in Switzerland. Additionally, we engaged with an issuer based in Belgium in the Chemicals industry on the subject of Circular economy, pollution and waste (PAI 9).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	8
Human Rights	7
Corporate Governance	6
Natural Capital and Biodiversity	3
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below. All figures represent the Fund's holdings at the end of the reference period.

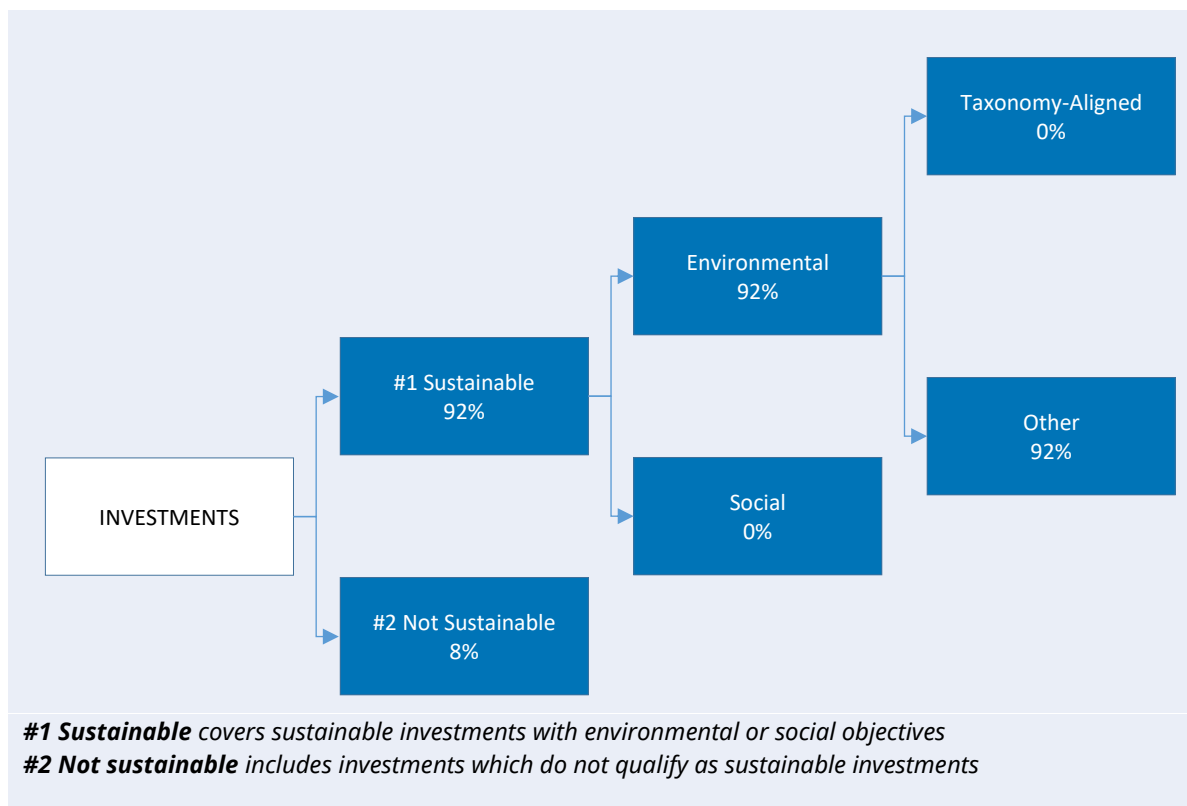

#1 Sustainable are investments in companies worldwide that generated a certain percentage of their revenue (for 75% of the assets of the Fund, at least 50%) from activities that contributed towards the global transition towards lower-carbon sources of energy, such as lower-carbon energy production, distribution, storage, transport and associated supply chain, material provider and technology companies or are playing critical roles in the energy transition. The Fund invested 92% of its assets in

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

sustainable investments. All the sustainable investments had an environmental objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash and warrants used with the aim of managing the Fund more efficiently

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	37.85
Industrial	Commercial & Professional Services	1.67
Utilities	Utilities	22.26
Information Technology	Semiconductors & Semiconductor Equipment	12.08
Information Technology	Technology Hardware & Equipment	6.69
Materials	Materials	9.63
Consumer Discretionary	Automobiles & Components	3.58
Cash Equivalents	Treasury Bills	3.25
Cash	Cash	2.22
Financial	Financial Services	0.78

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

All sustainable investments made by the Fund had environmental objectives that were not aligned with the EU Taxonomy.

## What was the share of socially sustainable investments?

There were no sustainable investments with a social objective.

## What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash and warrants used with the aim of managing the Fund more efficiently

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- The Fund invested in companies that did not cause significant environmental or social harm;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Fund invested at least 90% of its assets in companies that generated a certain percentage of revenue from activities that contributed towards the global transition towards lower-carbon sources of energy;
- The Investment Manager engaged with issuers held in the portfolio and on average aimed to meet or speak with company management once every six months. During these meetings sustainability topics were regularly discussed alongside business trends and financial performance; and
- During the reference period the Investment Manager conducted 25 dedicated sustainability engagements across the investible universe on a number of different topics, including but not limited to climate change, human rights and corporate governance.

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Cities  
**Legal Entity Identifier :** 1D8UMR1OQ0TSCJYQ0716

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes
  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 11%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	<input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 88%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • How did the sustainability indicators perform?

The Fund invested 99% of its assets in sustainable investments. This percentage represents the Fund's holdings at the end of the reference period. The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

### • ...and compared to previous periods?

#### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	99
Jan 2024 - Dec 2024	98
Jan 2023 - Dec 2023	98
Jan 2022 - Dec 2022	98

#### GHG reduction targets

*This table details the percentage of equity holdings that had GHG reduction targets, a constituent of the Environmental part of the proprietary sustainability score.*

Date	Equity Holdings (%)
31 Dec 2025	99
31 Dec 2024	90
31 Dec 2023	89
31 Dec 2022	93

For 2022 the percentage was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of was calculated as at the end of the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for

### • How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our->

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

human rights, anti-corruption and anti-bribery matters.

[sustainable-investment-policies-disclosures-voting-reports/group-exclusions/](#).

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to  
PAI 4 (Exposure to companies active in the fossil fuel sector),  
PAI 5 (Share of non-renewable energy consumption and production) and  
PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:  
- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schrodgers' 'global norms' breach list which covers:  
PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste ratio),  
PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schrodgers Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Real Estate Operations industry based in Germany on the subject of Value chain diversity and inclusion (PAIs 10, 12 and 13). We also held an engagement on the subject of Executive remuneration (PAIs 10, 12 and 13) with an issuer in the Real Estate Operations industry based in Japan. Additionally, we engaged with an issuer based in Japan in the Real Estate Operations industry on the subject of Climate Change (PAIs 1, 2, 3, 4, 5 and 6).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	4
Diversity and Inclusion	3
Corporate Governance	3

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

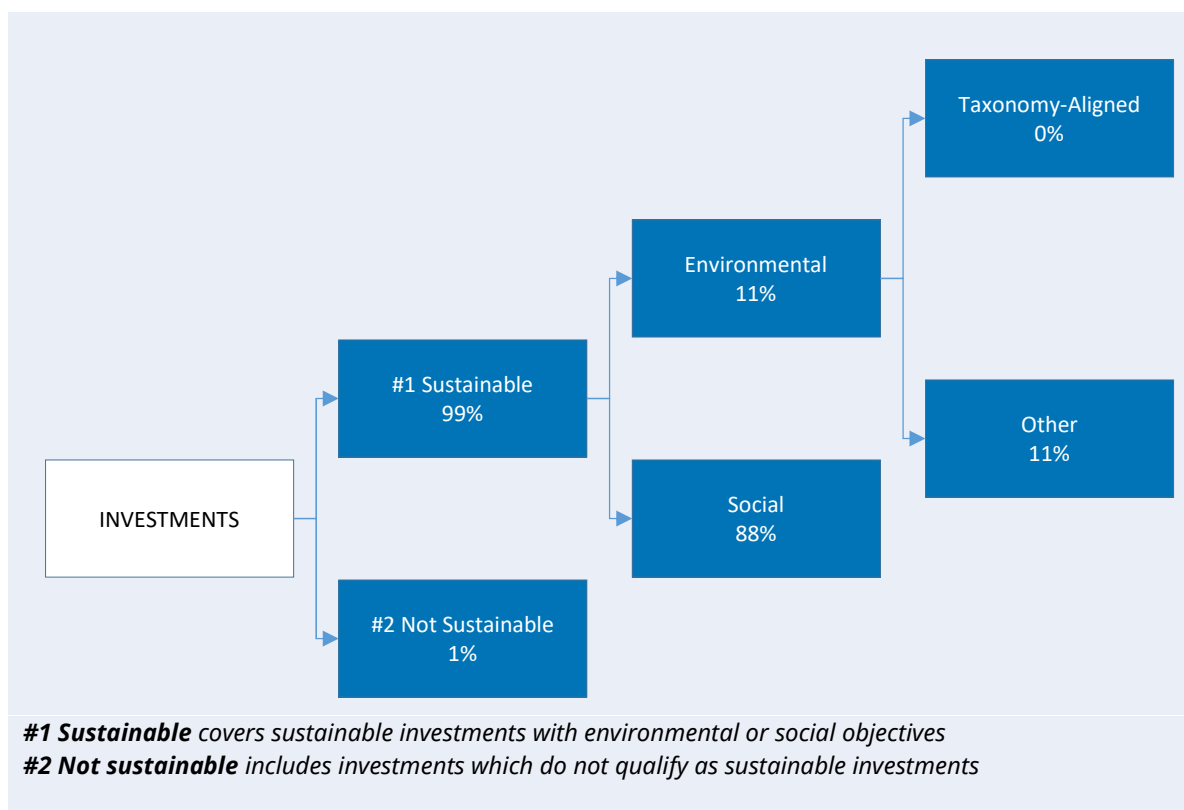

The Fund's investments that were used to meet its sustainable investment objective are summarised below, all figures represent the Fund's holdings at the end of the reference period.

#1 Sustainable are investments in real estate companies worldwide that contributed to an urban environment that provide a good quality of life for residents while minimising costs to the planet and using resources efficiently. The Fund invested 99% of its assets in sustainable investments. Within this, 11% was invested in sustainable investments with an environmental objective and 88% was invested in sustainable investments with a social objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Real Estate	Equity Real Estate Investment Trusts (REITs)	80.55
Real Estate	Real Estate Management & Development	15.00
Cash	Cash	1.58
Communication Services	Telecommunication Services	1.12
Information Technology	Software & Services	0.97
Industrial	Capital Goods	0.77

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

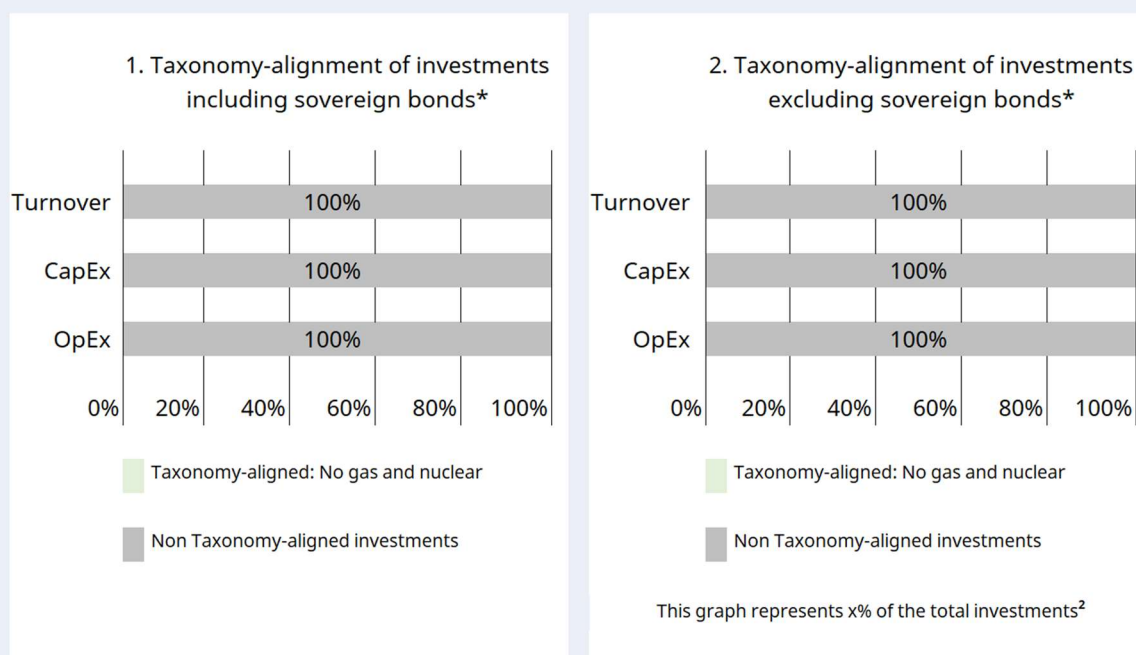

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## • **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 11%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 88%.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- The Fund invested in companies that did not cause significant environmental or social harm;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Fund invested at least 90% of its assets in real estate companies worldwide that contributed towards more environmentally resilient and innovative cities and infrastructure;
- The Investment Manager engaged with issuers held in the portfolio and on average aimed to meet or speak with company management once a year. During these meetings sustainability topics were regularly discussed alongside business trends and financial performance; and
- During the reference period, the Investment Manager conducted 53 dedicated sustainability engagements across the investible universe on a number of different topics, including but not limited to climate change which includes building efficiency and emissions and corporate governance including remuneration and independence.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Climate Change Equity

**Legal Entity Identifier :** TA82R10NRIZRTKERSH09

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 78% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall level of avoided emissions than the MSCI All Country World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

Avoided emissions are measured by Schroders' proprietary tool that provides an estimate of the future emissions saved indirectly by companies' products and services through the substitution of high carbon activities with lower carbon alternatives. It does this by identifying certain carbon-avoiding activities and industries that if adopted would contribute to reducing economy-wide emissions. Schroders' proprietary tool uses third party data as well as Schroders own estimates and assumptions and the outcome may differ from other sustainability tools and measures. The level of avoided emissions of the Fund is the aggregate avoided emissions of all issuers in the Fund's portfolio covered by Schroders' proprietary tool. Avoided emissions are calculated per million dollars of investment and expressed as tons CO<sub>2</sub>e / \$M investment.

The Fund also invested at least 40% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

Disclaimer: Certain information © MSCI ESG Research LLC. Reproduced by permission.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • How did the sustainability indicators perform?

The Fund's level of avoided emissions for the reference period was 278 tCO<sub>2</sub>e/\$M and the benchmark's level of avoided emissions for the reference period was 19 tCO<sub>2</sub>e/\$M. This means that the Fund's level of avoided emissions at the end of the reference period, was higher than the benchmark's level of avoided emissions.

The Investment Manager invested 78% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

### • ...and compared to previous periods?

#### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	78
Jan 2024 - Dec 2024	69
Jan 2023 - Dec 2023	63
Aug 2022 - Dec 2022	52

#### Avoided emissions

This table details the Fund's and benchmark's level of avoided emissions, year on year.

Period	Fund (tCO <sub>2</sub> e/\$M)	Benchmark (tCO <sub>2</sub> e/\$M)
Jan 2025 - Dec 2025	278	19
Jan 2024 - Dec 2024	173	15
Jan 2023 - Dec 2023	202	34
Jan 2022 - Dec 2022	207	10

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

For 2022 the avoided emissions value was calculated as at the end of the reference period.

For 2023 and 2024 the value is calculated as an average based on quarter-end data.

From 2025 the value is calculated with respect to the Fund's holdings at the end of the reference period.

## **• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:
  - Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),
- PAI 8 (Emissions to water),
- PAI 9 (Hazardous waste and radioactive waste ratio),
- PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),
- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

The Fund's exclusions regarding:

- Fossil fuels: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production). The Fund did not invest in companies on the Carbon Underground 200 list or companies with significant exposure to fossil fuels defined as those with 5% or more of their revenues coming from fossil fuel extraction and production.

During the reference period, PAIs were also considered through integration in the investment process. The Fund considered climate change criteria at the stock level as part of the sustainability assessment in the investment process over the period. This covered greenhouse gas emissions, carbon footprint, greenhouse gas intensity of investment companies: PAI 1, 2 & 3. As part of our analysis, we considered how a firm manages its environmental footprint (including its impact on the climate), as well as its potential exposure to the effects of long-term climate change. While no single climate change metric determined the overall assessment of a company's environmental management score, the Fund evaluated a variety of different metrics – from both internal and external data sources (including a Schroders' proprietary tool) – to determine whether a company was adequately managing its climate and environmental risks. PAIs 12 (Unadjusted gender pay gap) and 13 (Board gender diversity) were considered as part of our investment process using data from a Schroders' proprietary tool.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Electrical Utilities & IPPs industry based in the USA on the subject of Climate solutions (PAIs 1, 2, 3 and PAI 4 in table 2). We also held an engagement on the subject of Corporate Governance (PAIs 10, 12 and 13) with an issuer in the Automobiles & Auto Parts industry

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

based in Germany. Additionally, we engaged with an issuer based in the United Kingdom in the Specialty Retailers industry on the subject of Workers (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	19
Corporate Governance	14
Human Rights	14
Human Capital Management	8
Natural Capital and Biodiversity	5
Diversity and Inclusion	4

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 100%. The Fund maintained a higher overall level of avoided emissions than the MSCI All Country World (Net TR) Index and so the Fund's investments that were measured by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's overall level of avoided emissions (whether such individual investment had a high or low level).

#1A includes the percentage invested in sustainable investments, which is equal to 78%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 44% was invested in sustainable investments with an environmental objective and 34% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

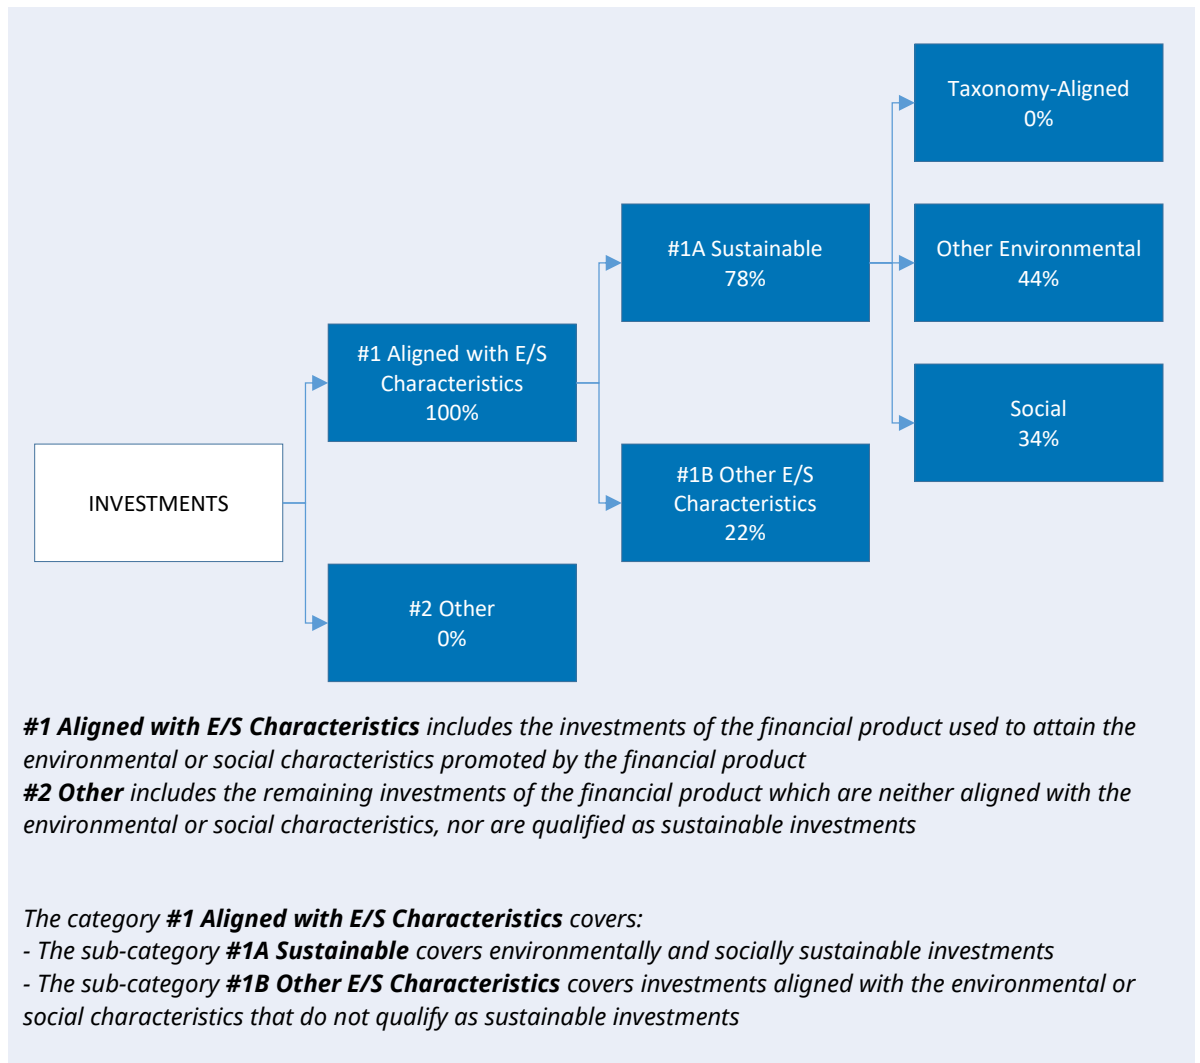

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	29.53
Industrial	Commercial & Professional Services	3.61
Industrial	Transportation	1.92
Information Technology	Semiconductors & Semiconductor Equipment	7.97
Information Technology	Software & Services	7.85
Information Technology	Technology Hardware & Equipment	6.66
Consumer Discretionary	Consumer Discretionary Distribution & Retail	7.36
Consumer Discretionary	Automobiles & Components	3.44
Consumer Discretionary	Consumer Durables & Apparel	2.18
Utilities	Utilities	8.45
Communication Services	Media & Entertainment	5.61
Consumer Staples	Consumer Staples Distribution & Retail	3.69
Consumer Staples	Food, Beverage & Tobacco	1.78
Materials	Materials	3.84
Financial	Insurance	2.87
Financial	Financial Services	0.85
Real Estate	Equity Real Estate Investment Trusts (REITs)	1.50
Cash	Cash	0.89

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

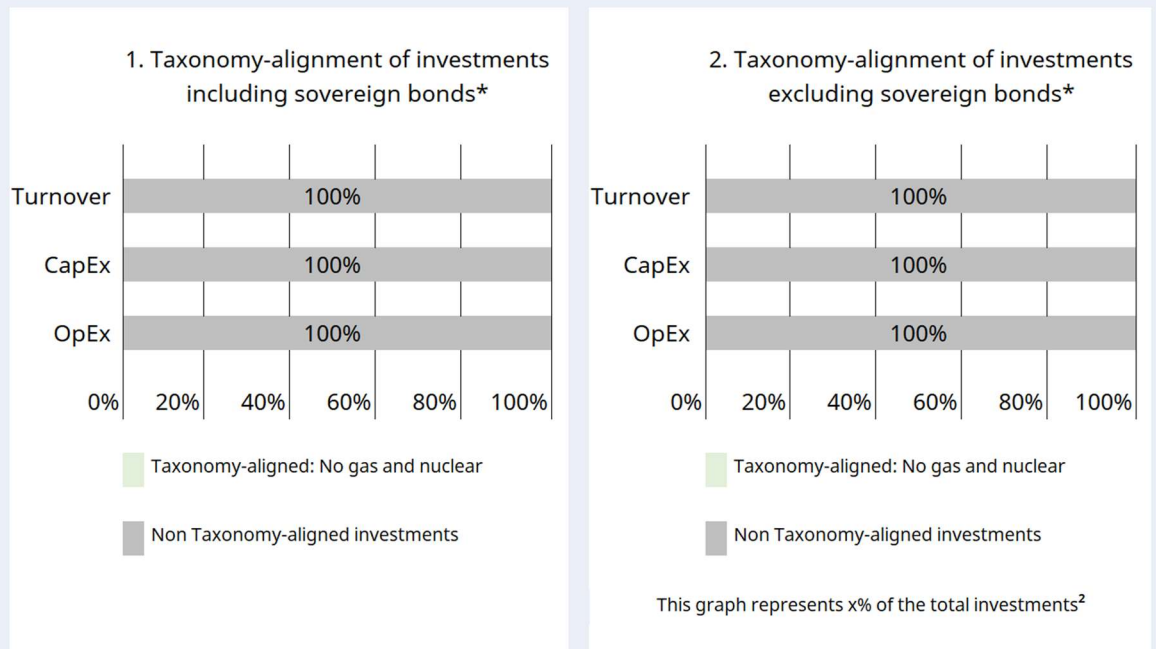

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 44%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 34%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the avoided emissions of the Fund when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf> ). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Climate Leaders

**Legal Entity Identifier :** 549300VTE2QMTP9FYD10

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 77% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invested in companies that have set targets in relation to the decarbonisation of their business consistent with limiting climate change under the Paris Agreement.

The Fund also invested at least 50% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 3.9% and the benchmark's sustainability score at the end of the reference period was -1.8%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 77% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	77
Jan 2024 - Dec 2024	76
Jan 2023 - Dec 2023	62
Aug 2022 - Dec 2022	60

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	3.9	-1.8
Jan 2024 - Dec 2024	4.2	-2.1
Jan 2023 - Dec 2023	4.4	-2.9
Jan 2022 - Dec 2022	3.8	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

### Decarbonisation targets:

Year on year, the Investment Manager monitored compliance with the characteristic to invest in companies that had set targets in relation to the decarbonisation of their business by reviewing the Fund's investments' specific scope 1 and 2 emissions reduction targets on a periodic basis.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

communities through telecommunication services;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to

PAI 4 (Exposure to companies active in the fossil fuel sector),

PAI 5 (Share of non-renewable energy consumption and production) and

PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste and radioactive waste ratio),

PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

The Fund's exclusions regarding:

- Fossil fuels: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

renewable energy consumption and production). The Fund did not invest in any company directly involved in fossil fuels.

- The Fund did not invest in companies on the Carbon Underground 200 list or companies with significant exposure to fossil fuels defined as those with 5% or more of their revenues coming from fossil fuel extraction and production.

During the reference period, PAIs were also considered through the integration of the teams' sustainability assessment in our investment process. The Fund considered climate change criteria at the stock level as part of the sustainability assessment in the investment process over the period. This covered greenhouse gas emissions, carbon footprint, greenhouse gas intensity of investment companies and energy consumption intensity per high impact climate sector investing in companies without carbon emission reduction initiatives (PAIs 1, 2, 3, 6 and PAI 4 from Annex 1 Table 2). As part of our analysis, we considered how a firm is managing its environmental footprint (including its impact on the climate), as well as how the company plans to reduce its GHG emissions. No single metric determined the overall assessment of a company's climate profile. The Fund evaluated a variety of different metrics – from both internal and external data sources (including Schroders' proprietary tool) – to determine whether a company is adequately managing its climate and environmental risks. PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity) were considered as part of our good governance framework using data from our internal proprietary tool.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Electrical Utilities & IPPs industry based in the USA on the subject of Climate mitigation (PAIs 1, 2 and 3). We also held an engagement on the subject of Purpose, strategy and capital allocation (PAI 10) with an issuer in the Diversified Retail industry based in the USA. Additionally, we engaged with an issuer based in the United Kingdom in the Personal & Household Products & Services industry on the subject of Workers (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	32
Human Rights	21
Corporate Governance	18
Natural Capital and Biodiversity	10
Diversity and Inclusion	9
Human Capital Management	9

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country
MICROSOFT CORPORATION COMMON STOCK USD0.0000125	Information Technology	5.36	United States

SIEMENS AG NPV (REGISTERED)	Industrial	1.88	Germany

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

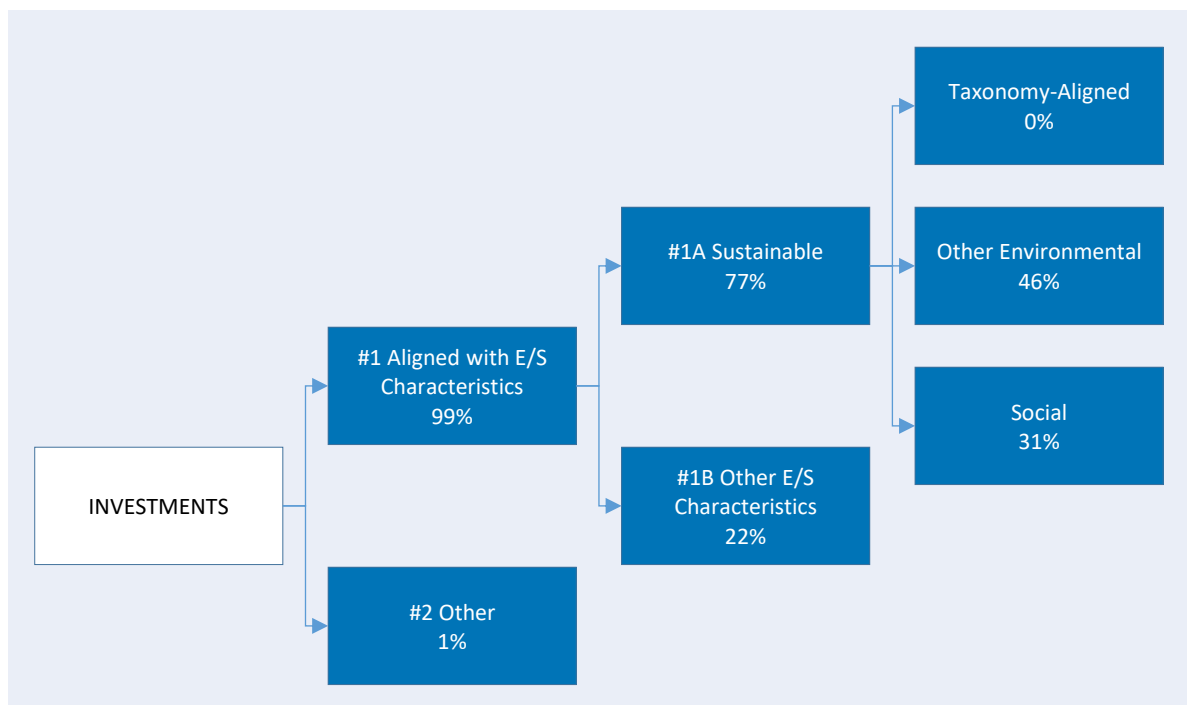

#1A includes the percentage invested in sustainable investments, which is equal to 77%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 46% was invested in sustainable investments with an environmental objective and 31% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	12.57
Information Technology	Semiconductors & Semiconductor Equipment	10.74
Information Technology	Technology Hardware & Equipment	3.26
Financial	Banking	8.84
Financial	Financial Services	4.83
Industrial	Capital Goods	12.21
Industrial	Transportation	1.32
Consumer Discretionary	Consumer Discretionary Distribution & Retail	5.18
Consumer Discretionary	Consumer Durables & Apparel	4.54
Consumer Discretionary	Automobiles & Components	1.72
Consumer Discretionary	Consumer Services	1.34
Communication Services	Media & Entertainment	10.44
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	5.96
Health Care	Health Care Equipment & Services	1.64
Consumer Staples	Household & Personal Products	5.05
Consumer Staples	Food, Beverage & Tobacco	1.61
Consumer Staples	Consumer Staples Distribution & Retail	0.48
Utilities	Utilities	2.96
Cash	Cash	2.11
Materials	Materials	1.70
Real Estate	Equity Real Estate Investment Trusts (REITs)	1.51

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 46%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 31%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the decarbonisation targets set by companies when selecting the assets held by the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Consumer Trends

**Legal Entity Identifier :** 5493000OPXVHAW8N3B55

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 59% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>	

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

On 08 April 2025 the Fund's name changed from Schroder ISF Changing Lifestyles to Schroder ISF Global Consumer Trends.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was -1.7% and the benchmark's sustainability score at the end of the reference period was -1.8%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Contraception
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 59% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	59
Jan 2024 - Dec 2024	77
Jan 2023 - Dec 2023	62
Aug 2022 - Dec 2022	67

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	-1.7	-1.8
Jan 2024 - Dec 2024	0.8	-2.1
Jan 2023 - Dec 2023	0.2	-2.9
Jan 2022 - Dec 2022	-0.3	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

applications; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:  
- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):  
PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

PAIs were considered through integration in the investment research, stock selection and portfolio construction parts of the investment process. For example, in assessing an issuer's overall environmental score, PAIs 1, 2, 3, 4, 5 and 6 were included. In assessing an issuer's overall social score,

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

PAIs 12 and 13 were included.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Specialty Retailers industry based in the USA on the subject of Workers (PAI 10). We also held an engagement on the subject of Climate mitigation (PAIs 1, 2 and 3) with an issuer in the Personal & Household Products & Services industry based in the United Kingdom. Additionally, we engaged with an issuer based in Spain in the Specialty Retailers industry on the subject of Transparency, risk and reporting (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	15
Human Rights	13
Corporate Governance	8
Natural Capital and Biodiversity	7
Human Capital Management	4
Diversity and Inclusion	3

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country

LVMH EUR0.3	Consumer Discretionary	2.94	France
BEIERSDORF AG	Consumer Staples	2.93	Germany

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

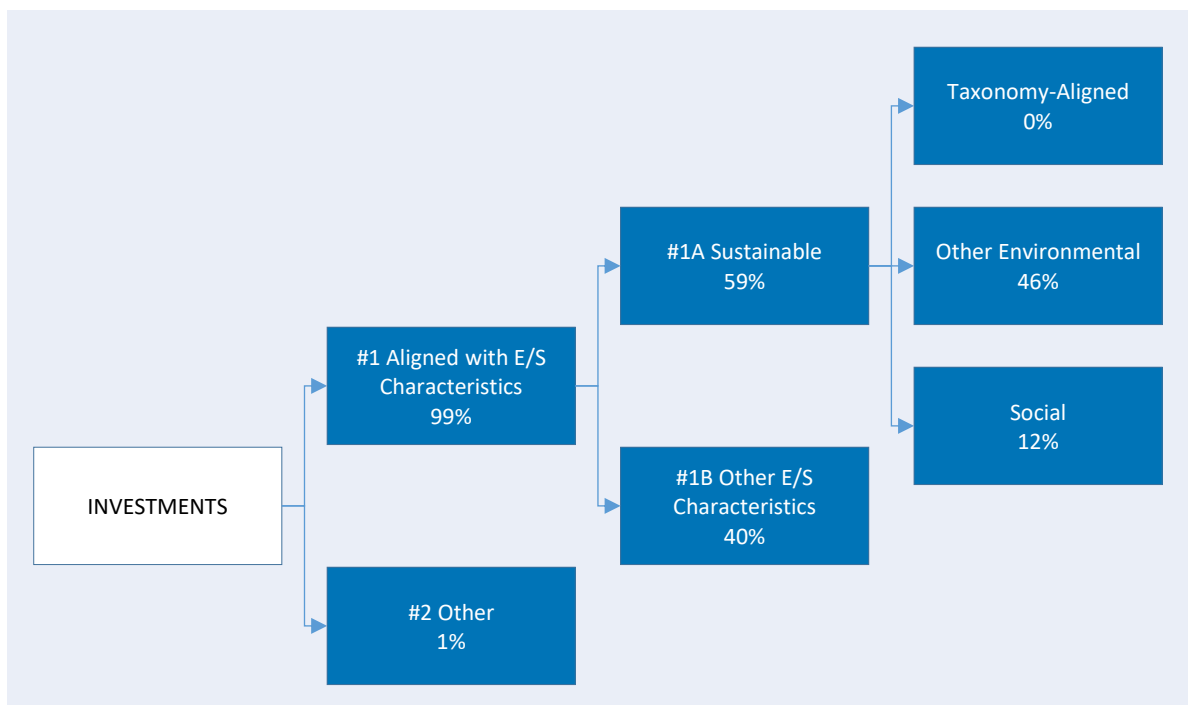

#1A includes the percentage invested in sustainable investments, which is equal to 59%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 46% was invested in sustainable investments with an environmental objective and 12% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Consumer Discretionary	Consumer Durables & Apparel	15.03
Consumer Discretionary	Consumer Discretionary Distribution & Retail	12.66
Consumer Discretionary	Consumer Services	7.94
Consumer Discretionary	Automobiles & Components	2.35
Consumer Staples	Food, Beverage & Tobacco	10.23
Consumer Staples	Household & Personal Products	8.20
Consumer Staples	Consumer Staples Distribution & Retail	6.78
Communication Services	Media & Entertainment	19.67
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	4.67
Health Care	Health Care Equipment & Services	2.10
Information Technology	Consumer Discretionary Distribution & Retail	3.84
Information Technology	Software & Services	1.21
Financial	Financial Services	4.36
Cash	Cash	0.98

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

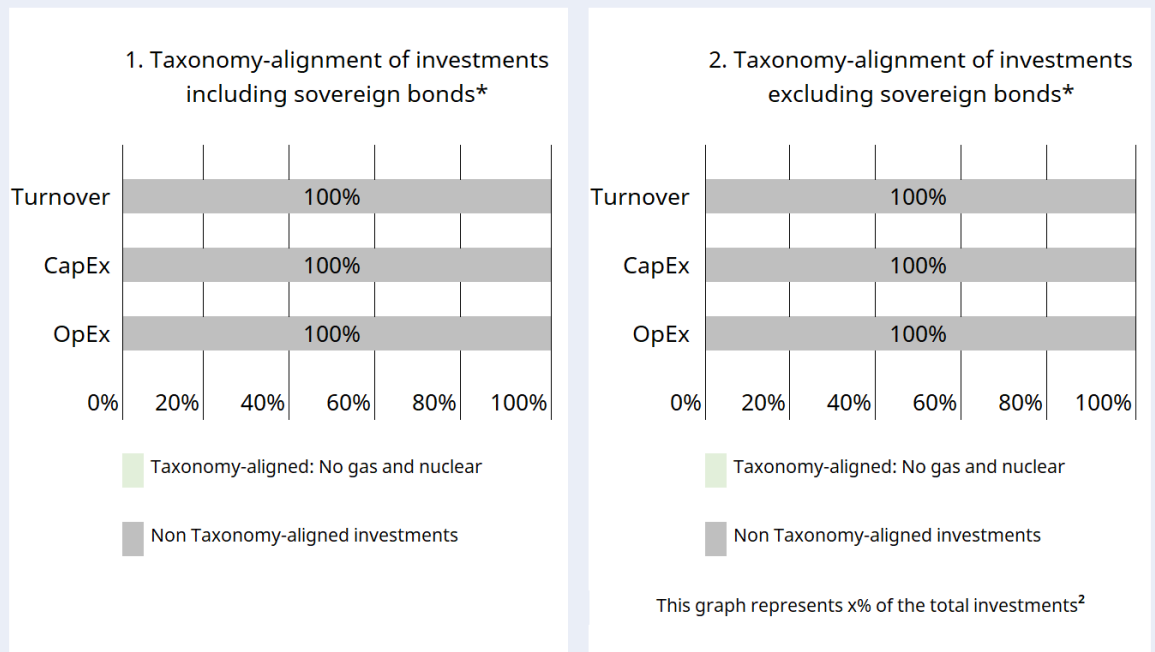

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 46%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 12%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf> ). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Emerging Market Opportunities

**Legal Entity Identifier :** JU8KRPJWHOMRDHDKVI22

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 65% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 0.6% and the benchmark's sustainability score at the end of the reference period was -3.8%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Financial Inclusion
- High Salaries
- Innovation
- Water Access

The Investment Manager invested 65% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

As this is our first reporting period, this question is not applicable.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	65
Jan 2024 - Dec 2024	62
Jan 2023 - Dec 2023	54
Aug 2022 - Dec 2022	52

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	0.6	-3.8
Jan 2024 - Dec 2024	1.4	-3.3
Jan 2023 - Dec 2023	0.4	-2.9
Jan 2022 - Dec 2022	0.5	-3.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

On 19 December 2025 the Fund's benchmark changed from MSCI Emerging Markets (Net TR) index to MSCI Emerging Markets 10/40 (Net TR) index.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

to the average living wage;

- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schrodgers' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schrodgers.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schrodgers' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to

PAI 4 (Exposure to companies active in the fossil fuel sector),

PAI 5 (Share of non-renewable energy consumption and production) and

PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste and radioactive waste ratio),

PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises***

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## ***and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:
  - PAI 7 (Activities negatively affecting biodiversity-sensitive areas),
  - PAI 8 (Emissions to water),
  - PAI 9 (Hazardous waste ratio),
  - PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),
  - PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and
  - PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

The emerging markets investment team has a number of proprietary tools to aid ESG analysis. At the company level, Schroders proprietary tool is the main repository for the team's ESG analysis. Schroders

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

proprietary tools provide a systematic framework for analysing a company's relationship with its stakeholders and the sustainability of its business model. It contains more than 250 metrics drawn from company reports and other sources that assess a company's performance in specific areas. PAIs 1, 2, 3, 9 and 13 were specifically considered as part of the Schroders proprietary tool analysis where appropriate and material to the business. In the case of PAI 8 and 12 the availability of data was very limited so it was not widely used within Schroders proprietary tool but monitored instead at the overall portfolio level. We reviewed the PAI data in the PAI dashboard regularly as part of the monthly ESG risk meeting which formally reviews portfolio level ESG characteristics.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Software & IT Services industry based in China on the subject of Customers and consumers (PAI 10). We also held an engagement on the subject of Climate mitigation (PAIs 1, 2 and 3) with an issuer in the Machinery, Tools, Heavy Vehicles, Trains & Ships industry based in China. Additionally, we engaged with an issuer based in China in the Software & IT Services industry on the subject of Relationship with shareholders (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	10
Human Rights	7
Corporate Governance	3
Human Capital Management	2
Diversity and Inclusion	1
Natural Capital and Biodiversity	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	9.66	Taiwan
TENCENT HOLDINGS LIMITED HKD0.00002	Communication Services	6.65	China
SAMSUNG ELECTRONICS COMPANY LIMITED KRW100	Information Technology	4.22	South Korea
AXIS BANK LIMITED INR2	Financial	2.40	India
HON HAI PRECISION INDUSTRY COMPANY LIMITED TWD10	Information Technology	2.38	Taiwan
CONTEMPORARY AMPEREX TECHNOLOGY LT CNY1	Industrial	2.15	China
SK HYNIX INCORPORATED KRW5000	Information Technology	2.09	South Korea
TRIP.COM GROUP LIMITED HKD0.0005	Consumer Discretionary	2.02	China
ITAU UNIBANCO HOLDING SA PREFERENCE SHARES NPV	Financial	1.95	Brazil
MIDEA GROUP CO LTD-A (CNY)	Consumer Discretionary	1.81	China
TENCENT MUSIC ENTERTAINM-ADR 2 ORD	Communication Services	1.76	China
KIA CORPORATION KRW5000	Consumer Discretionary	1.66	South Korea
AIA GROUP LIMITED NPV	Financial	1.59	Hong Kong
LPP SA PLN2	Consumer Discretionary	1.58	Poland
MAHINDRA AND MAHINDRA LIMITED INR5 (DEMAT)	Consumer Discretionary	1.55	India

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

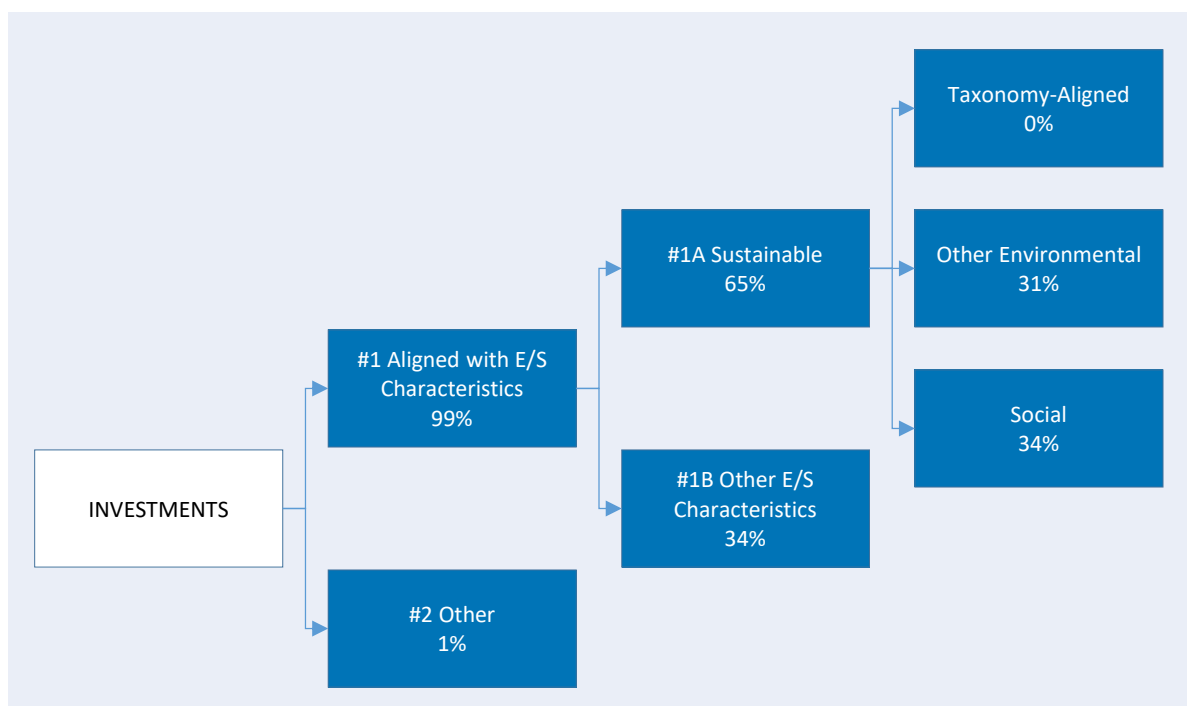

#1A includes the percentage invested in sustainable investments, which is equal to 65%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 31% was invested in sustainable investments with an environmental objective and 34% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	15.26
Information Technology	Technology Hardware & Equipment	11.82
Information Technology	Software & Services	0.37
Financial	Banking	10.31
Financial	Financial Services	6.39
Financial	Insurance	3.74
Consumer Discretionary	Automobiles & Components	6.64
Consumer Discretionary	Consumer Services	5.54
Consumer Discretionary	Consumer Discretionary Distribution & Retail	3.49
Consumer Discretionary	Consumer Durables & Apparel	3.39
Industrial	Capital Goods	7.80
Industrial	Transportation	2.41
Industrial	Commercial & Professional Services	2.18
Communication Services	Media & Entertainment	8.68
Materials	Materials	2.78
Cash	Cash	2.55
Utilities	Utilities	2.00
Real Estate	Real Estate Management & Development	1.35
Consumer Staples	Food, Beverage & Tobacco	1.03
Consumer Staples	Household & Personal Products	0.21
Energy	Oil & Gas Exploration & Production	1.00
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	0.65
Health Care	Health Care Equipment & Services	0.24
Cash Equivalents	Treasury Bills	0.18

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 31%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 34%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Emerging Markets Smaller Companies

**Legal Entity Identifier :** 549300F4FWZAJKH8YQ10

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 73% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets Small Cap (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 4.3% and the benchmark's sustainability score at the end of the reference period was -4.8%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Connectivity
- High Salaries
- Innovation
- Medicine
- Water Access

The Investment Manager invested 73% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

As this is our first reporting period, this question is not applicable.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	73
Jan 2024 - Dec 2024	72
Jan 2023 - Dec 2023	62
Aug 2022 - Dec 2022	59

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	4.3	-4.8
Jan 2024 - Dec 2024	5.6	-2.5
Jan 2023 - Dec 2023	4.3	-1.3
Jan 2022 - Dec 2022	1.9	-2.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

The emerging markets investment team has a number of proprietary tools to aid ESG analysis. At the company level, Schroders proprietary tool is the main repository for the team's ESG analysis. Schroders proprietary tools provide a systematic framework for analysing a company's relationship with its

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

stakeholders and the sustainability of its business model. It contains more than 250 metrics drawn from company reports and other sources that assess a company's performance in specific areas. PAIs 1, 2, 3, 9 and 13 were specifically considered as part of the Schroders proprietary tool analysis where appropriate and material to the business. In the case of PAI 8 and 12 the availability of data was very limited so it was not widely used within Schroders proprietary tool but monitored instead at the overall portfolio level. We reviewed the PAI data in the PAI dashboard regularly as part of the monthly ESG risk meeting which formally reviews portfolio level ESG characteristics.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Transport Infrastructure industry based in Vietnam on the subject of Transparency, risk and reporting (PAI 10). We also held an engagement on the subject of Climate mitigation (PAIs 1, 2 and 3) with an issuer in the Electronic Equipment & Parts industry based in Taiwan.

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	3
Corporate Governance	1
Human Rights	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country

NETEASE CLOUD MUSIC INC USD0.0001	Communication Services	1.79	China

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets Small Cap (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 73%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

# SFDR Periodic Report (continued)

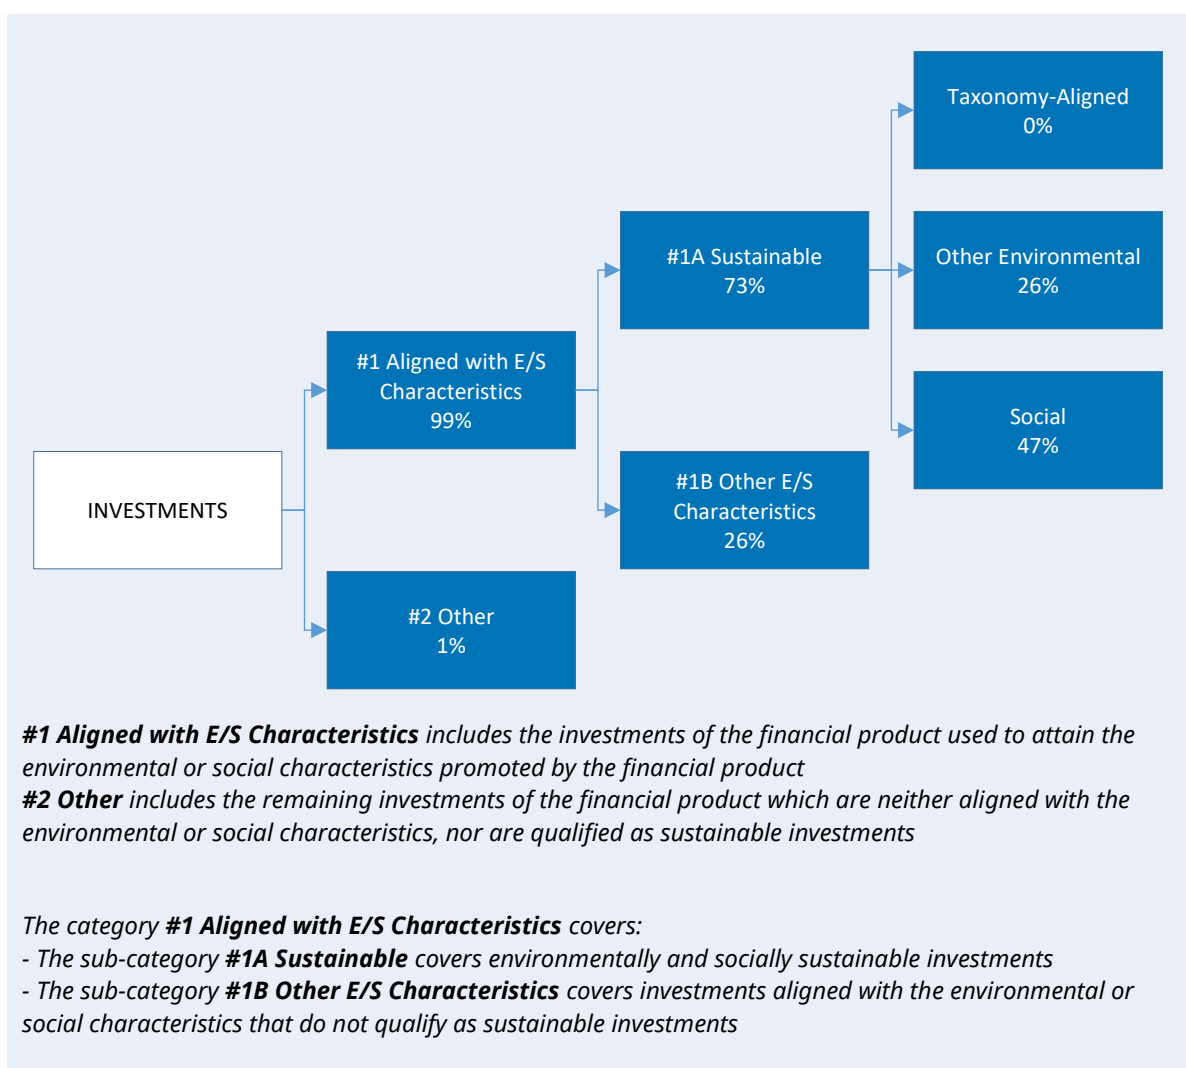

Reference Period: 1 January 2025 - 31 December 2025

Of the Fund's sustainable investments, 26% was invested in sustainable investments with an environmental objective and 47% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

## • In which economic sectors were the investments made?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Technology Hardware & Equipment	12.66
Information Technology	Semiconductors & Semiconductor Equipment	5.10
Information Technology	Software & Services	1.58
Financial	Financial Services	7.96
Financial	Banking	7.90
Financial	Insurance	1.89
Consumer Discretionary	Consumer Durables & Apparel	7.49
Consumer Discretionary	Consumer Services	6.20
Consumer Discretionary	Consumer Discretionary Distribution & Retail	2.30
Consumer Discretionary	Automobiles & Components	1.55
Industrial	Commercial & Professional Services	5.00
Industrial	Transportation	4.97
Industrial	Capital Goods	4.18
Health Care	Health Care Equipment & Services	4.92
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	3.53
Consumer Staples	Consumer Staples Distribution & Retail	6.33
Consumer Staples	Food, Beverage & Tobacco	0.55
Real Estate	Real Estate Management & Development	2.57
Real Estate	Equity Real Estate Investment Trusts (REITs)	1.60
Utilities	Utilities	3.79
Communication Services	Media & Entertainment	3.54
Materials	Materials	2.54
Cash	Cash	1.69
Cash Equivalents	Treasury Bills	0.17

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 26%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 47%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

**Legal Entity Identifier :** 6367002HMP4ST6LJGW14

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 48%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 48%</b>	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund invested at least 90% of its assets in sustainable investments, which are investments in companies worldwide that the Investment Manager expected to contribute positive impact by advancing an environmental or social objective linked to one or more of the UN SDGs, and to deliver returns to shareholders over the long term. The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

The Investment Manager selected companies from a universe of eligible companies that were determined as meeting the Investment Manager's impact criteria. The impact criteria included an assessment of the company's contribution to the UN SDGs alongside the Investment Manager's assessment of the company via its proprietary scorecard. The investment process was aligned with the Operating Principles for Impact Management.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund invested 96% of its assets in sustainable investments. This percentage represents the Fund's holdings at the end of the reference period. The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used a combination of a revenue based approach in this assessment, by considering whether a certain percentage of the relevant issuer's revenues, capital expenditure or operating expenditure contributed to an environmental or social objective and specific sustainability key performance indicators to assess the investment's contribution to an environmental or social objective. The Investment Manager used different sustainability indicators to measure the contribution at an investee company level. In particular, the Investment Manager used a quantitative screening tool to identify companies that derive a certain minimum percentage of their revenues from whose main activity is contributing to an environmental or social objective. In addition, there was a detailed impact assessment of every company via the completion of a proprietary scorecard. The impact scorecard focused on the impact that a company's products and services were expected to have.

The Investment Manager considered different aspects of impact such as: what outcome and UN SDGs the company is contributing to; who is served by the outcome (such as the relevant stakeholder or industry); an assessment of our expected contribution (including Schroders influence and engagement); and consideration of impact risks. The assessment included tracking Key Performance Indicators (KPIs) that are used to measure and monitor the company's impact over time via an annual review. Examples of the indicators include CO2 emissions avoided per annum, Number of patients reached, Accessible loans provided and Share of secondary raw materials used.

Once these steps were completed, the company and scorecard were then validated and approved by Schroders' Impact Assessment Group (IAG), in order for the company to be eligible for inclusion in the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Fund's investible universe. The IAG consists of members from Schroders' impact and sustainable investment teams and members of the investment team.

As at the end of the reference period, the companies in the Fund were aligned with the following four key impact areas; (1) 21% in inclusion; (2) 29% in health and wellness; (3) 38% in sustainable infrastructure; and (4) 12% in responsible consumption.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

### Impact Areas

*This table details the percentage of assets invested in each key impact area, year on year.*

Period	Fund (%)	Period	Inclusion (%)	Health and wellness (%)	Sustainable Infrastructure (%)	Responsible Consumption (%)	Environment (%)
Jan 2025 - Dec 2025	96	Jan 2025 - Dec 2025	21	29	38	12	n/a*
Jan 2024 - Dec 2024	100	Jan 2024 - Dec 2024	32	22	21	10	15

For 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

\*From 2025 Environment is no longer considered a separate key impact area as it is felt these SDGs can be grouped into the remaining four areas.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Semiconductors & Semiconductor Equipment industry based in Germany on the subject of Climate mitigation (PAIs 1, 2 and 3). We also held an engagement on the subject of Customers and consumers (PAI 10) with an issuer in the Pharmaceuticals industry based in Denmark. Additionally, we engaged with an issuer based in Japan in the Consumer Goods Conglomerates industry on the subject of Boards and management (PAIs 12 and 13).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	17
Human Rights	11
Corporate Governance	7
Human Capital Management	3
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

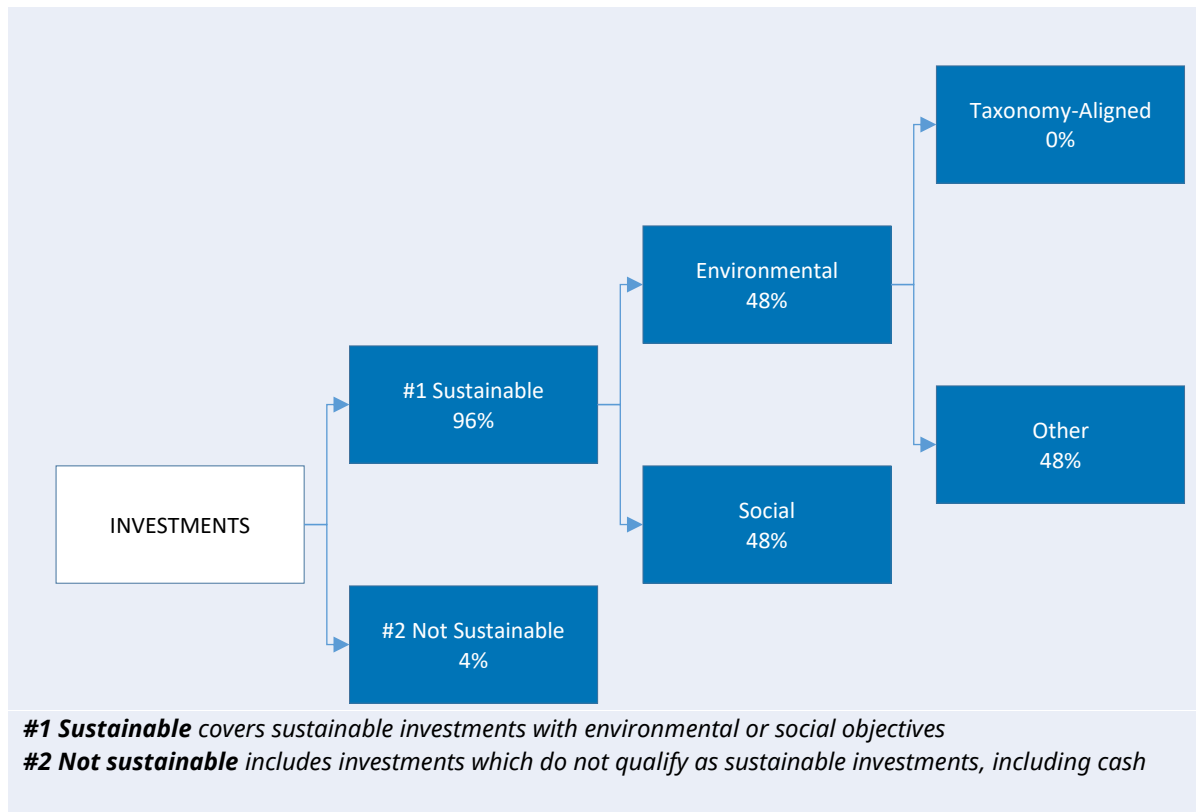

The Fund's investments that were used to meet its sustainable investment objective are summarised below. All figures represent the Fund's holdings at the end of the reference period.

#1 Sustainable are investments in companies which were expected to contribute towards the advancement of one or more of the UN SDGs, to be managed in the interests of all stakeholders, and to deliver returns to shareholders over the long term. The Fund invested 96% of its assets in sustainable investments. Within this, 48% was invested in sustainable investments with an environmental objective and 48% was invested in sustainable investments with a social objective.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	17.75
Industrial	Commercial & Professional Services	10.02

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

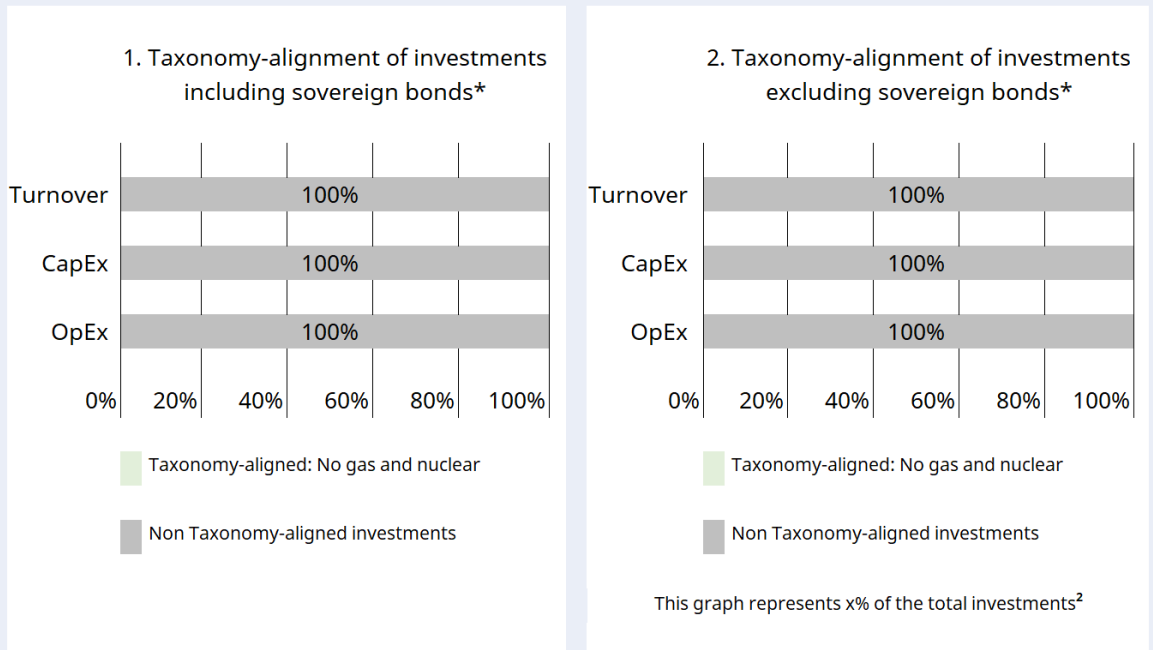

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 48%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 48%.

## What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- The Fund invested in companies that did not cause significant environmental or social harm;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Fund invested at least 90% of its assets in sustainable investments, which were investments in companies worldwide that the Investment Manager expected to contribute positive impact by advancing an environmental or social objective linked to one or more of the UN SDGs, and to deliver returns to shareholders over the long term;
- During the reference period the Investment Manager conducted a number of engagements across the key themes such as climate change, diversity and inclusion, human rights and natural capital. Of particular note were a number of impact engagements, focused on increasing the impact of, or improving the impact measurement of, products and services offered by companies in the investible universe. A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Innovation  
**Legal Entity Identifier :** 549300CM155Z70045B78

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 78% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

On 08 April 2025 the Fund's name changed from Schroder ISF Global Disruption to Schroder ISF Global Innovation.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 3.8% and the benchmark's sustainability score at the end of the reference period was -1.8%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 78% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Aug 2022 - Dec 2022	49

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	3.8	-1.8
Jan 2024 - Dec 2024	4.1	-2.1
Jan 2023 - Dec 2023	4.0	-2.9
Jan 2022 - Dec 2022	1.9	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

applications; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:  
- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):  
PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).  
PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

reduction initiatives) were included as part of a company's overall environmental score.

These PAIs, amongst others, are embedded within our investment process, informing our view on business risk and long-term growth drivers. PAI 13 (Board gender diversity) was also considered as part of our assessment of good governance, management quality and company strategy. During the reference period, PAI 6, PAI 4 from Annex 1 Table 2 and PAI 14 from Annex 1 Table 3 (Number of identified cases of severe human rights issues and incidents) were considered relative to industry peers and poor performance issuers on these metrics / indicators received higher risk scores in our assessment and formed the basis of our engagement activities.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Software & IT Services industry based in China on the subject of Human Rights (PAI 10). We also held an engagement on the subject of Climate mitigation (PAIs 1, 2 and 3) with an issuer in the Pharmaceuticals industry based in Denmark. Additionally, we engaged with an issuer based in the USA in the Software & IT Services industry on the subject of Transparency, risk and reporting (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	31
Human Rights	31
Corporate Governance	20
Human Capital Management	13
Natural Capital and Biodiversity	12
Diversity and Inclusion	11

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country
MICROSOFT CORPORATION COMMON STOCK USD0.0000125	Information Technology	6.55	United States
ALPHABET INCORPORATED CL A NPV	Communication Services	4.54	United States

RECRUIT HOLDINGS COMPANY LIMITED NPV	Industrial	1.57	Japan

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schrodgers Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index and so the Fund's investments that were scored by Schrodgers' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

positive or a negative score).

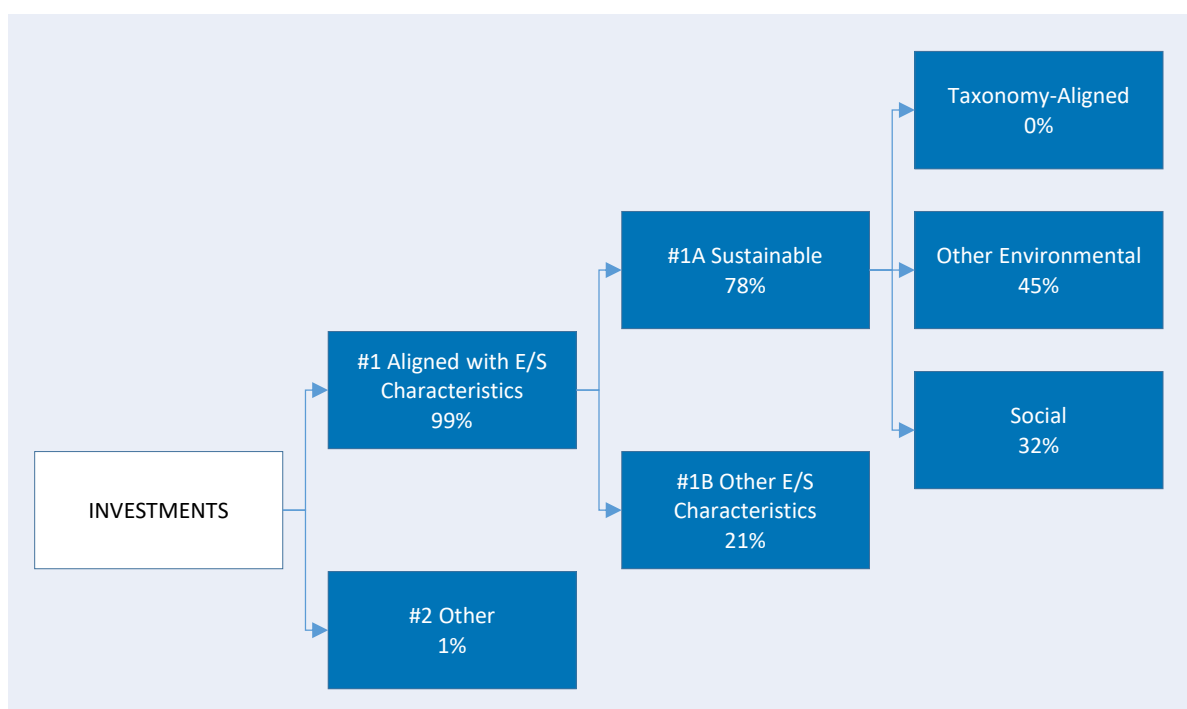

#1A includes the percentage invested in sustainable investments, which is equal to 78%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 45% was invested in sustainable investments with an environmental objective and 32% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	18.86
Information Technology	Software & Services	15.56
Information Technology	Technology Hardware & Equipment	7.13
Information Technology	Consumer Discretionary Distribution & Retail	2.52
Communication Services	Media & Entertainment	14.98
Communication Services	Telecommunication Services	0.33
Consumer Discretionary	Consumer Discretionary Distribution & Retail	5.23
Consumer Discretionary	Consumer Durables & Apparel	4.82
Consumer Discretionary	Consumer Services	1.33
Consumer Discretionary	Automobiles & Components	1.17
Health Care	Health Care Equipment & Services	5.51
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	4.59
Industrial	Capital Goods	5.83
Industrial	Commercial & Professional Services	2.66
Industrial	Transportation	0.30
Financial	Financial Services	5.13
Financial	Banking	0.96
Cash	Cash	1.29
Utilities	Utilities	0.91
Real Estate	Equity Real Estate Investment Trusts (REITs)	0.59
Consumer Staples	Food, Beverage & Tobacco	0.15
Consumer Staples	Household & Personal Products	0.13

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 45%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 32%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Smaller Companies

**Legal Entity Identifier :** EENRPPON8BRF9XDB514

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 73% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the S&P Developed Small Cap (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 1.6% and the benchmark's sustainability score at the end of the reference period was 0.0%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Connectivity
- Financial Inclusion
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 73% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	73
Jan 2024 - Dec 2024	60
Jan 2023 - Dec 2023	62
Aug 2022 - Dec 2022	58

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	1.6	0.0
Jan 2024 - Dec 2024	1.7	-0.3
Jan 2023 - Dec 2023	2.0	-0.2
Jan 2022 - Dec 2022	1.1	-0.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGCC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schrodgers' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schrodgers.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schrodgers' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:  
- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:  
PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste ratio),  
PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Construction & Engineering industry based in Japan on the subject of Purpose, strategy and capital allocation (PAI 10). We also held an engagement on the subject of Climate mitigation (PAIs 1, 2 and 3) with an issuer in the Electronic Equipment & Parts industry based in Taiwan.

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

<b>Engagement Theme</b>	<b># Issuers</b>
Corporate Governance	6
Climate Change	3
Diversity and Inclusion	2
Human Rights	1
Natural Capital and Biodiversity	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 97%. The Fund maintained a higher overall sustainability score than the S&P Developed Small Cap (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

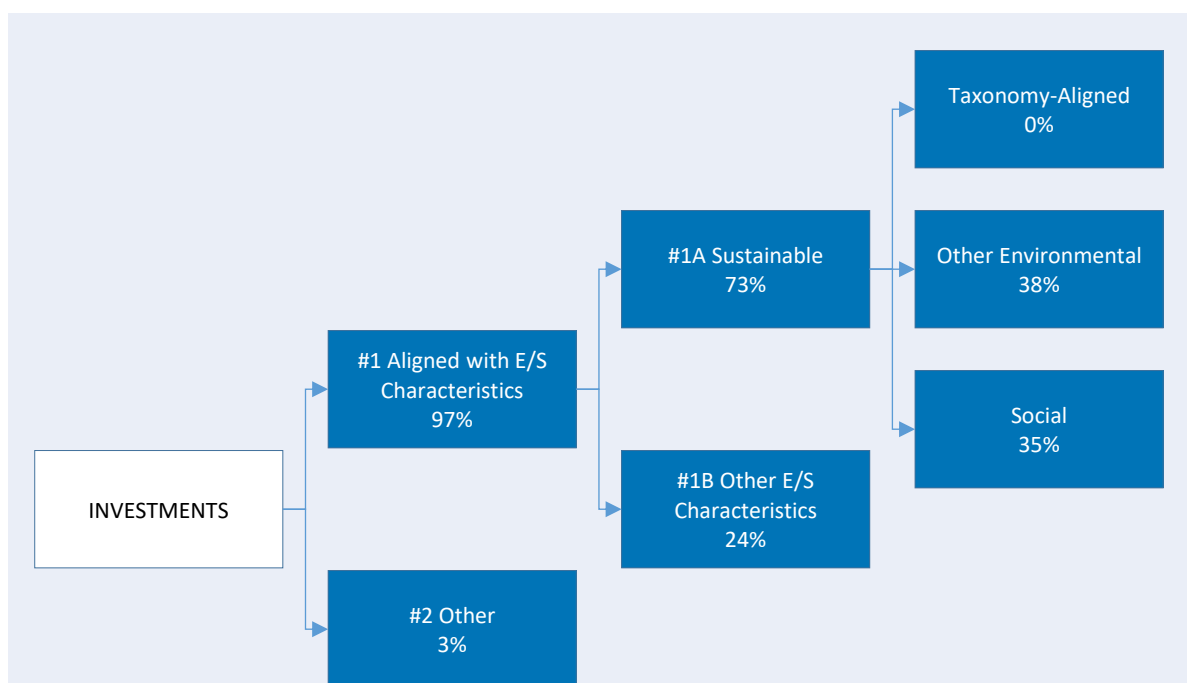

#1A includes the percentage invested in sustainable investments, which is equal to 73%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 38% was invested in sustainable investments with an environmental objective and 35% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	16.25
Industrial	Commercial & Professional Services	6.49
Industrial	Transportation	1.50
Information Technology	Technology Hardware & Equipment	9.63
Information Technology	Software & Services	7.98
Information Technology	Semiconductors & Semiconductor Equipment	2.77
Financial	Banking	6.58
Financial	Financial Services	3.76
Financial	Insurance	3.43
Health Care	Health Care Equipment & Services	10.40
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	1.52
Consumer Discretionary	Consumer Durables & Apparel	3.99
Consumer Discretionary	Consumer Services	3.19
Consumer Discretionary	Consumer Discretionary Distribution & Retail	1.70
Consumer Discretionary	Automobiles & Components	0.30
Real Estate	Equity Real Estate Investment Trusts (REITs)	3.63
Real Estate	Real Estate Management & Development	0.65
Materials	Materials	4.08
Communication Services	Media & Entertainment	3.19
Communication Services	Telecommunication Services	0.62
Cash	Cash	3.14
Consumer Staples	Consumer Staples Distribution & Retail	1.46
Consumer Staples	Food, Beverage & Tobacco	0.97
Utilities	Gas Utilities	1.41
Utilities	Utilities	0.34
Energy	Oil & Gas Exploration & Production	1.03

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

**- turnover**  
reflecting the share of revenue from green activities of investee companies

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 38%.

## **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 35%.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund’s engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question ‘How did this financial product consider principal adverse impacts on sustainability factors?’. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Sustainable Food and Water

**Legal Entity Identifier :** 549300KTYV51C0X44G74

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 72%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	<input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 25%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund invested at least 90% of its assets in sustainable investments. The Fund invested in companies worldwide that the Investment Manager expected to contribute towards the provision of sustainable food and water including water management, agricultural equipment, food security, agricultural inputs, food production, processing, packaging and distribution, food and water retail and recycling. All companies held by the Fund were deemed to be sustainable investments by the Investment Manager. The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which was cash.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund invested 97% of its assets in sustainable investments. This percentage represents the Fund's holdings at the end of the reference period. The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to measure the contribution at an investee company level. In particular, the Investment Manager used a quantitative screening tool to identify companies that derive a minimum of 50% of their revenues from whose main activity is associated and are directly contributing to the provision of food and water. The Fund invested in companies involved in making the global food and water system more sustainable, as defined by companies driving positive change across at least one of the six key sustainability areas (food security, GHG emissions, water usage, biodiversity, physical pollution and waste, and health and nutrition). The Investment Manager manually added companies that met certain criteria with revenue exposure below 50% to the Fund's investment universe. Examples of indicators used to assess sustainability included GHG emissions reduction targets, water usage assessments, records of environmental damage or water usage and product exposure to sustainable food and water solutions.

Subsequently, the Investment Manager used a number of indicators to derive a sustainability score out of ten for each company. Based on this score, each company was placed within one of the following categories: (1) Best-in-class, (2) Neutral and (3) Laggard. The indicators used to determine the score included but were not limited to metrics such as carbon intensity, board gender diversity and management remuneration. The information was drawn from company management meetings, publicly available corporate information as well as the Investment Manager's internal proprietary tools.

The Investment Manager invested 70% of the portfolio in issuers classified as Best-in-class and 28% of the portfolio in issuers classified as Neutral. These figures were calculated as at the end of the reference period. The Fund did not invest in any companies classified as Laggards during the reference period.

### • *...and compared to previous periods?*

**Sustainable investments**

**Best-in-class**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	97
Jan 2024 - Dec 2024	96
Jan 2023 - Dec 2023	94
Jan 2022 - Dec 2022	94

*This table details the percentage of assets invested in Best-in-class and Neutral, year on year*

Period	Fund (%)
Jan 2025 - Dec 2025	Best-in-class – 70 Neutral – 28
Jan 2024 - Dec 2024	Best-in-class – 62 Neutral – 34
Jan 2023 - Dec 2023	Best-in-class – 60 Neutral – 34
Jan 2022 - Dec 2022	Best-in-class – 61 Neutral – 31

For 2022 the percentage of was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of was calculated as at the end of the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**• How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager’s approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more ‘global norms’ thereby causing significant environmental or social harm; these companies comprise Schroders’ ‘global norms’ breach list. Schroders’ determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The ‘global norms’ breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund’s investment exclusions is to be found under “Sustainability-Related Disclosure” on the Fund’s webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## *How were the indicators for adverse impacts on sustainability factors taken into account?*

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to

PAI 4 (Exposure to companies active in the fossil fuel sector),

PAI 5 (Share of non-renewable energy consumption and production) and

PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste and radioactive waste ratio),

PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:  
- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The Fund's exclusions regarding:

- Fossil fuels: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions) were considered via the application of an exclusion screen where companies that are deemed by the Investment Manager to contribute significantly to climate change are excluded from the investible universe.

During the reference period, PAIs were also considered through integration in the investment process. The Fund considered greenhouse gas emissions, carbon footprint, greenhouse gas intensity of investment companies and activities negatively affecting biodiversity-sensitive areas (PAI 1, 2, 3 and 7) in its analysis as part of the 'environmental management' component of the stakeholder analysis.

As part of our analysis, we consider how a firm is managing its environmental footprint (including its impact on the climate), its negative impact on biodiversity, as well as its potential exposure to the effects of long-term climate change. While no single metric determines the overall assessment of a company's environmental management score, the Fund evaluated a variety of different metrics – from both internal and external data sources (including a Schroders' proprietary tool) – to determine whether a company is adequately managing its climate and environmental risks. PAIs 12 (Unadjusted gender pay gap) and 13 (Board gender diversity) were considered as part of our investment process using data from a Schroders' proprietary tool.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Food & Drug Retailing industry based in the United Kingdom on the subject of Overarching approach to human rights (PAI 10). We also held an engagement on the subject of Climate adaptation (PAIs 1, 2, 3, 4, 5 and 6) with an issuer in the Food & Drug Retailing industry based in the United Kingdom. Additionally, we engaged with an issuer based in Singapore in the Food & Tobacco industry on the subject of Deforestation (PAIs 7 and 8).

The Investment Manager meets with companies on a regular basis to discuss market dynamics, company fundamentals and sustainability issues. Alongside these regular company engagements, where sustainability is usually discussed but not always the sole reason for contact, the Investment Manager also undertakes dedicated sustainability engagements in collaboration with our Sustainable Investment team. These engagements are dedicated solely to ESG issues.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below. The number of engagements in the table below refer to the dedicated sustainability engagements where sustainability issues are either the entire focus of the company meeting or discussed for a significant portion of the meeting.

Engagement Theme	# Issuers
Climate Change	8
Human Rights	7
Natural Capital and Biodiversity	7
Corporate Governance	2
Human Capital Management	2

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

Reference Period: 1 January 2025 - 31 December 2025

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country
MOWI ASA NOK7.50	Consumer Staples	4.22	Norway
CARREFOUR SA EUR2.50	Consumer Staples	4.17	France
SAINSBURY (J.) PLC ORDINARY 28.571428P	Consumer Staples	4.14	United Kingdom
KEMIRA OYJ NPV	Materials	3.98	Finland
NUTRIEN LIMITED COMMON NPV	Materials	3.73	Canada
TESCO PLC 6.33333P	Consumer Staples	3.37	United Kingdom
SCHOUW AND COMPANY A/S DKK10	Consumer Staples	3.17	Denmark
DARLING INGREDIENTS INCORPORATED COMMON STOCK USD0.01	Consumer Staples	3.16	United States
INGREDION INCORPORATED COMMON STOCK USD0.01	Consumer Staples	3.10	United States
GLANBIA PLC EUR0.06 (IRISH LISTING)	Consumer Staples	3.01	Ireland
AGCO CORP COMMON STOCK USD0.01	Industrial	2.94	United States
SMURFIT WESTROCK PLC	Materials	2.92	United States
DSM FIRMENICH AG EUR0.01	Materials	2.89	Switzerland
SMITH(A.O.)INCORPORATE COMMON STOCK USD1	Industrial	2.83	United States
FIRST RESOURCES LIMITED NPV	Consumer Staples	2.77	Indonesia

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

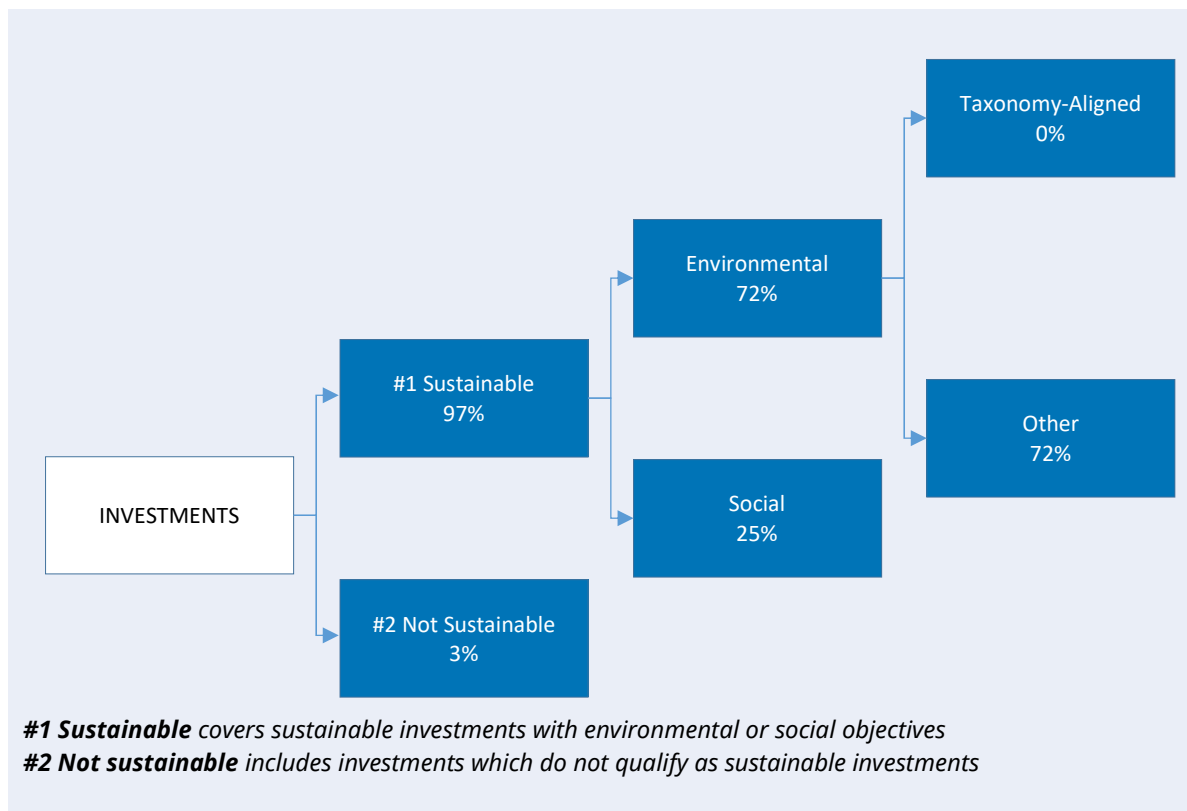

The Fund's investments that were used to meet its sustainable investment objective are summarised below, all figures represent the Fund's holdings at the end of the reference period.

#1 Sustainable are investments in companies worldwide that the Investment Manager expected to contribute towards the provision of sustainable food and water including water management, agricultural equipment, agricultural inputs, food security, food production, processing, packaging and distribution, food and water retail and recycling. The Fund invested 97% of its assets in sustainable investments. Within this, 72% was invested in sustainable investments with an environmental objective and 25% was invested in sustainable investments with a social objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Consumer Staples	Food, Beverage & Tobacco	33.40
Consumer Staples	Consumer Staples Distribution & Retail	12.65
Consumer Staples	Household & Personal Products	1.71
Materials	Materials	28.71
Industrial	Capital Goods	18.30
Industrial	Commercial & Professional Services	1.26
Industrial	Transportation	0.40
Cash	Cash	2.82
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	0.75

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 72%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 25%.

## What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- The Fund invested in companies that did not cause significant environmental or social harm;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Fund invested at least 90% of its assets in companies worldwide that the Investment Manager expected to contribute towards the provision of sustainable food and water including water management, agricultural equipment, agricultural inputs, food production, processing, packaging and distribution, food and water retail and recycling;
- The Investment Manager engaged with issuers held in the portfolio and on average aimed to meet or speak with company management once every six months. During these meetings sustainability topics were regularly discussed alongside business trends and financial performance;
- During the reference period the Investment Manager conducted 26 dedicated sustainability engagements across the investible universe on a number of different topics, including but not limited to climate change, natural capital and biodiversity, human capital management, human rights, and corporate governance; and
- In particular the Investment Manager engaged with companies that have the greatest exposure to commodity-driven deforestation. In line with firm wide policies the Fund is seeking to eliminate commodity-driven deforestation activities from the Fund's portfolio by 2025.

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Sustainable Growth

**Legal Entity Identifier :** 0NL750Z6XT6U5506U359

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 76% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 50% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 3.4% and the benchmark's sustainability score at the end of the reference period was -1.8%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Connectivity
- Donations
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 76% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	76
Jan 2024 - Dec 2024	74
Jan 2023 - Dec 2023	66
Aug 2022 - Dec 2022	59

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	3.4	-1.8
Jan 2024 - Dec 2024	3.2	-2.1
Jan 2023 - Dec 2023	4.3	-2.9
Jan 2022 - Dec 2022	4.1	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based on the monetary value of the sum donated;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

applications; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to

PAI 4 (Exposure to companies active in the fossil fuel sector),

PAI 5 (Share of non-renewable energy consumption and production) and

PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste and radioactive waste ratio),

PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:  
- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:  
PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste ratio),  
PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, output from our proprietary stakeholder framework was used which incorporates several PAIs as a component of our evaluation of companies' sustainability characteristics. For example, PAIs 2, 3, 4, 5, 6 (Greenhouse gas emissions) and PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental assessment. These PAIs, amongst others, are embedded within our investment process, informing our view on business risk and long-term growth drivers. PAI 13 (Board gender diversity) was also considered as part of our assessment of Good Governance, management quality and company strategy.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

During the reference period, PAI 7 (Activities negatively affecting biodiversity-sensitive areas) and PAI 14 from Annex 1 Table 3 (Number of identified cases of severe human rights issues and incidents) were considered and poor performance issuers on these metrics / indicators frequently contributed to companies being deemed uninvestible for this strategy. In carbon-intensive industries, our assessment of PAI 6 and PAI 4 from Annex 1 Table 2 were important contributors to our overall evaluation and inclusion in our investible universe.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Banking Services industry based in Italy on the subject of Customers and consumers (PAI 10). We also held an engagement on the subject of Climate mitigation (PAIs 1, 2 and 3) with an issuer in the Machinery, Tools, Heavy Vehicles, Trains & Ships industry based in France. Additionally, we engaged with an issuer based in Japan in the Consumer Goods Conglomerates industry on the subject of Boards and management (PAIs 12 and 13).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	26
Human Rights	25
Corporate Governance	16
Natural Capital and Biodiversity	11
Human Capital Management	8
Diversity and Inclusion	8

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country

EMERSON ELECTRIC COMPANY COMMON STOCK USD1	Industrial	2.40	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 100%. The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 76%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

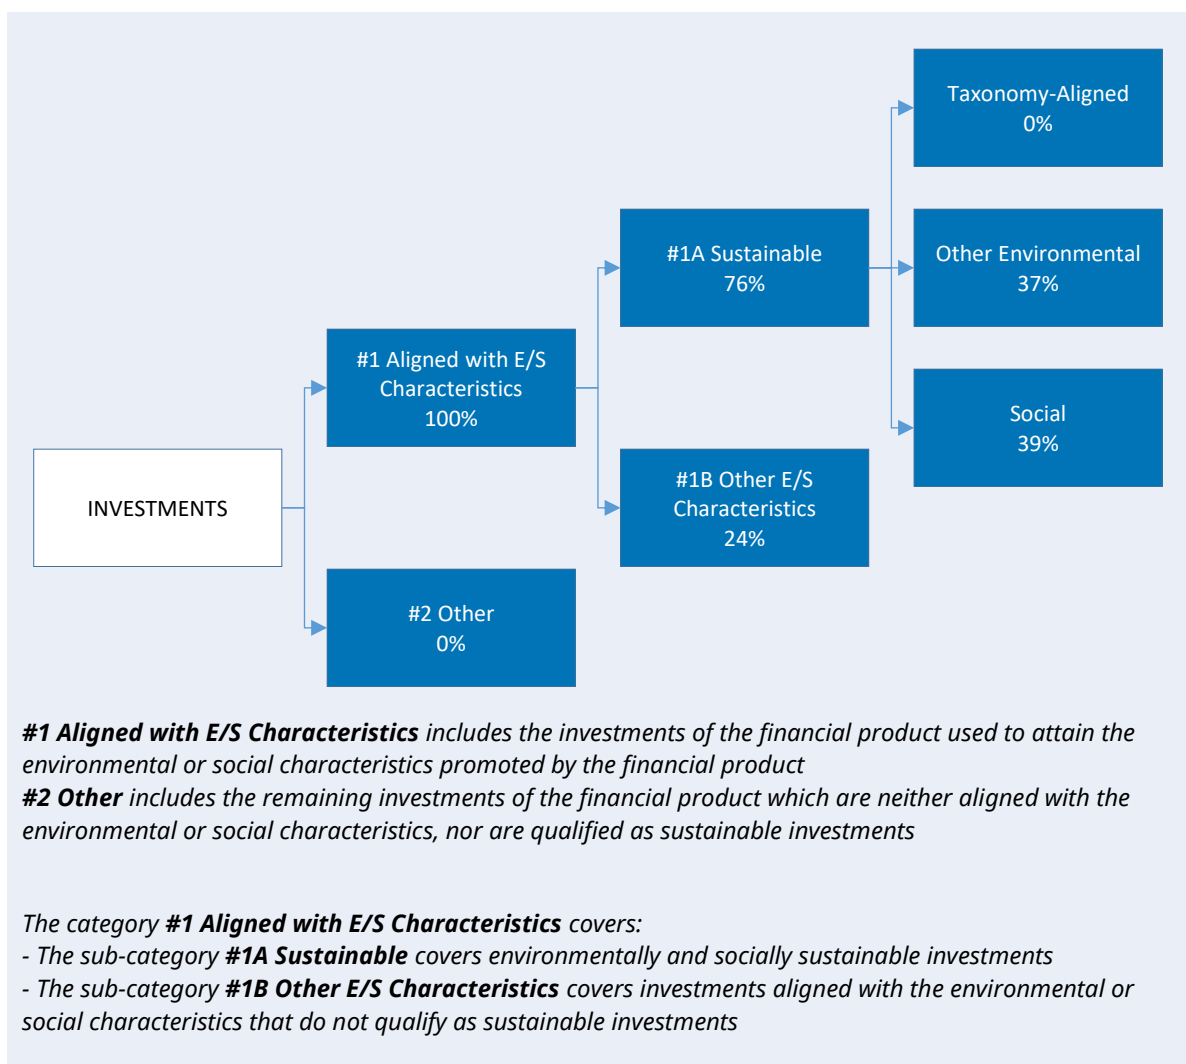

of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 37% was invested in sustainable investments with an environmental objective and 39% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	14.01
Information Technology	Semiconductors & Semiconductor Equipment	12.10
Information Technology	Technology Hardware & Equipment	6.08
Information Technology	Consumer Discretionary Distribution & Retail	0.92
Financial	Banking	9.07
Financial	Financial Services	7.36
Industrial	Capital Goods	11.60
Industrial	Commercial & Professional Services	4.53
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	9.40
Health Care	Health Care Equipment & Services	3.16
Consumer Discretionary	Consumer Discretionary Distribution & Retail	4.05
Consumer Discretionary	Consumer Services	3.07
Consumer Discretionary	Consumer Durables & Apparel	1.71
Communication Services	Media & Entertainment	6.55
Consumer Staples	Household & Personal Products	4.23
Consumer Staples	Consumer Staples Distribution & Retail	0.42
Materials	Materials	1.51
Cash Equivalents	Treasury Bills	0.16
Cash	Cash	0.08

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

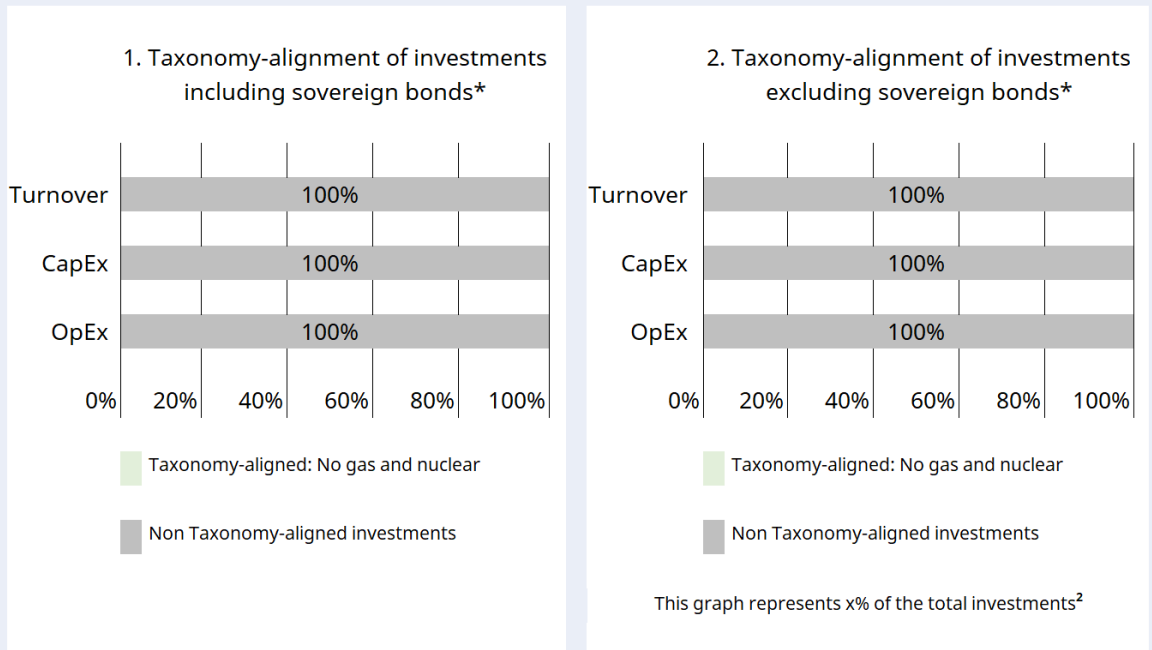

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### • *What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?*

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 37%.

### • *What was the share of socially sustainable investments?*

The share of sustainable investments with a social objective was 39%.

### • *What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Sustainable Value

**Legal Entity Identifier :** 549300F4GDD1IL4MMG90

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 80% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 50% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 3.1% and the benchmark's sustainability score at the end of the reference period was -1.5%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Connectivity
- Financial Inclusion
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 80% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	80
Jan 2024 - Dec 2024	86
Jan 2023 - Dec 2023	79
Aug 2022 - Dec 2022	78

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	3.1	-1.5
Jan 2024 - Dec 2024	4.2	-1.9
Jan 2023 - Dec 2023	3.0	-2.9
Jan 2022 - Dec 2022	4.0	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

(R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schrodgers.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schrodgers' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schrodgers' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to

PAI 4 (Exposure to companies active in the fossil fuel sector),

PAI 5 (Share of non-renewable energy consumption and production) and

PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste and radioactive waste ratio),

PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:  
- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:  
PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste ratio),  
PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

This is done via the sustainability framework which uses a "triple lens" approach that involves Schroders' proprietary tools, external third-party data and qualitative on-desk analysis to incorporate several PAIs in our sustainability analysis of each stock. As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 13 (Board gender diversity) was included as part of a company's overall governance assessment and we considered the ratio of female to male board members in investee companies, expressed as a percentage of all board members.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Telecommunications Services industry based in the United Kingdom on the subject of Transparency, risk and reporting (PAI 10). We also held an engagement on the subject of Climate adaptation (PAIs 1, 2, 3, 4, 5 and 6) with an issuer in the Automobiles & Auto Parts industry based in the USA. Additionally, we engaged with an issuer based in the United Kingdom in the Pharmaceuticals industry on the subject of Circular economy, pollution and waste (PAI 9).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	18
Climate Change	14
Human Rights	7
Natural Capital and Biodiversity	6
Diversity and Inclusion	5
Human Capital Management	2

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country
GLAXOSMITHKLINE GBP0.3125	Health Care	3.52	United States
BRISTOL-MYERS SQUIBB COMPANY COMMON STOCK USD0.10	Health Care	3.32	United States

ITV PLC ORDINARY 10P	Communication Services	2.60	United Kingdom
PRUDENTIAL PLC ORDINARY 5P	Financial	2.55	Hong Kong

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 80%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

# SFDR Periodic Report (continued)

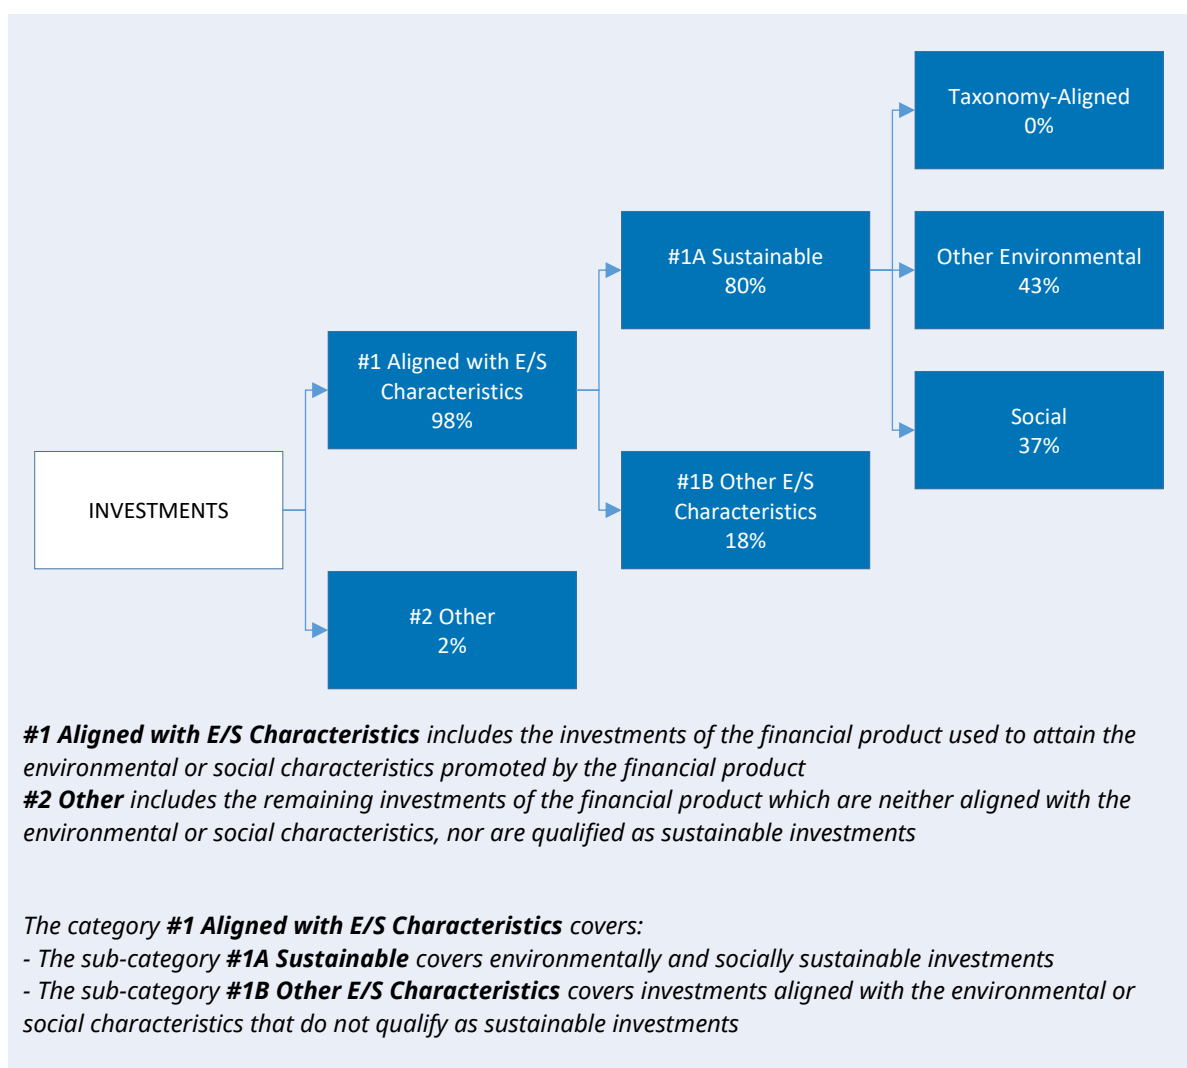

Reference Period: 1 January 2025 - 31 December 2025

Of the Fund's sustainable investments, 43% was invested in sustainable investments with an environmental objective and 37% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

## • In which economic sectors were the investments made?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Banking	12.40
Financial	Insurance	6.65
Financial	Financial Services	1.74
Consumer Discretionary	Consumer Durables & Apparel	9.52
Consumer Discretionary	Automobiles & Components	5.25
Consumer Discretionary	Consumer Discretionary Distribution & Retail	4.40
Communication Services	Telecommunication Services	9.18
Communication Services	Media & Entertainment	8.29
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	9.17
Health Care	Health Care Equipment & Services	5.90
Information Technology	Technology Hardware & Equipment	5.00
Information Technology	Semiconductors & Semiconductor Equipment	3.90
Information Technology	Consumer Discretionary Distribution & Retail	0.91
Consumer Staples	Consumer Staples Distribution & Retail	5.92
Consumer Staples	Household & Personal Products	2.78
Industrial	Commercial & Professional Services	2.27
Industrial	Capital Goods	1.29
Real Estate	Equity Real Estate Investment Trusts (REITs)	3.28
Cash	Cash	2.15

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

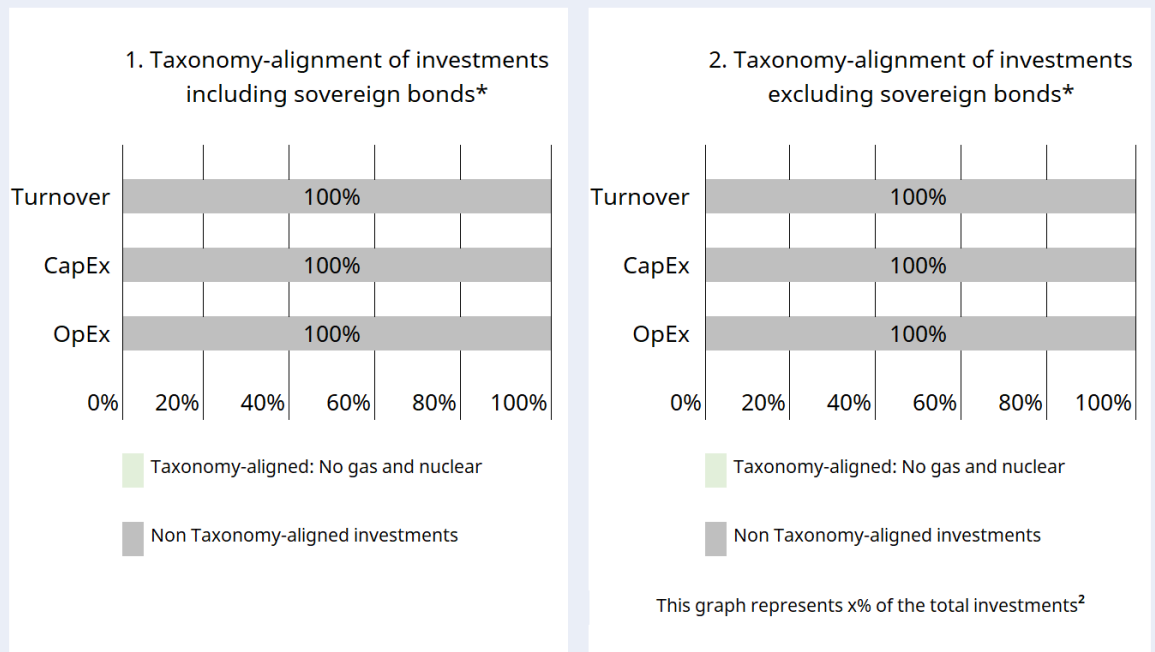

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 43%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 37%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Healthcare Innovation

**Legal Entity Identifier :** 549300TNMZCDF65WHW57

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 96% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund invested at least 80% of its assets in healthcare and medical related companies worldwide that the Investment Manager considered contributed towards the advancement of one or more of the UN SDGs by promoting growth in healthcare provision and medical treatments and improving healthcare standards using an innovation-led approach. The Fund invested in other companies in industries adjacent to healthcare or healthcare related services. The Fund also invested in cash, which the Investment Manager deemed to be neutral under its sustainability criteria.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The Fund invested at least 75% of its assets in sustainable investments until 31 March 2025 and invested at least 80% of its assets in sustainable investments from 1 April 2025 to the end of the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund invested 96% of its assets in sustainable investments. This percentage represents the Fund's holdings at the end of the reference period. The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to measure the impact contribution at an investee company level. In particular, the Investment Manager assessed a company's contribution to the UN SDGs, by identifying companies with a material or accelerating exposure to activities that contributed to better healthcare outcomes or adjacencies such as fitness and wellbeing that are increasingly recognised as contributors to long-term health. A company's assessment considered a number of factors, including, but not limited to, the percentage of healthcare-related activities contributing to revenues and R&D spend or implied in the company valuation. At the end of the reference period, 96% of the Fund was invested into companies with alignment to the SDGs, of this 92% of the portfolio was aligned to SDG 3 Good Health and Wellbeing.

### • *...and compared to previous periods?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	96
Jan 2024 - Dec 2024	94
Jan 2023 - Dec 2023	93
Jan 2022 - Dec 2022	93

## UN SDG 3 alignment

This table details the Fund's estimated UN SDG 3 alignment, year on year.

Period	UN SDG	Fund (%)
Jan 2025 - Dec 2025	3	92
Jan 2024 - Dec 2024	3	87
Jan 2023 - Dec 2023	3	85
Jan 2022 - Dec 2022	3	89

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

The 2022 alignment percentage was calculated based on holdings at the end of the reference period using the version of our proprietary tool as at February 2023. For 2023 and 2024 the alignment percentage represents the average over the reference period, based on quarter-end data. For 2025 the alignment percentage has been based on the data for the end of the reference period.

From 1 January 2023, the Fund disclosed under Article 8 (prior to that date it disclosed under Article 9).

### • **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund invested at least 80% of its assets in healthcare and medical related companies worldwide that contribute towards the advancement of one or more of the UN SDGs by promoting growth in healthcare provision and medical treatments and improving healthcare standards using an innovation led approach.

### • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders'

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:  
- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- UNGC violators and Schroders' 'global norms' breach list which covers:  
PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste ratio),  
PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As a thematic fund orientated towards the provision of healthcare products and services, we paid particular attention to those indicators considered material to companies operating in these industries, specifically PAI 6 (Energy consumption intensity per high impact climate sector), 8 (Emissions to water), and 9 (Hazardous waste and radioactive waste ratio). PAIs 12 (Unadjusted gender pay gap) and 13 (Board gender diversity) were considered using data from our internal proprietary tool.

In addition, Schroders' proprietary tool, which is used as part of screening the investment universe and for providing a maximum that can be invested in each company, incorporates several PAIs as a component of its scoring methodology. For example, PAI 2, 3, 8, 9 and PAI 4 from Annex 1 Table 2 were included as part of a company's overall environmental score. These PAIs, amongst others, were embedded within our investment process, informing our view on business risk and long-term growth drivers. PAI 13 was also considered as part of our assessment of good governance, management quality and company strategy. During the reference period, PAIs 2 and PAI 4 from Annex 1 Table 2 were considered relative to industry peers and poor performance issuers on these metrics/ indicators received higher risk scores in our assessment and formed the basis of our engagement activities.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Pharmaceuticals industry based in Switzerland on the subject of Customers and consumers (PAI 10). We also held an engagement on the subject of Climate mitigation (PAIs 1, 2 and 3) with an issuer in the Healthcare Equipment & Supplies industry based in Germany. Additionally, we engaged with an issuer based in Switzerland in the Biotechnology & Medical Research industry on the subject of Boards and management (PAIs 12 and 13).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Human Rights	17
Corporate Governance	10
Climate Change	10
Diversity and Inclusion	7
Human Capital Management	5

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Natural Capital and Biodiversity

5

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country
ELI LILLY AND COMPANY COMMON STOCK NPV	Health Care	7.30	United States
ABBVIE INCORPORATED COMMON STOCK USD0.01	Health Care	4.86	United States
ASTRAZENECA PLC ORDINARY USD0.25	Health Care	4.57	United Kingdom
THERMO FISHER SCIENTIFIC INCORPORATED COMMON STOCK USD1	Health Care	3.90	United States
UNITEDHEALTH GROUP INCORPORATED COMMON STOCK USD0.01	Health Care	3.84	United States
ROCHE HOLDING AG NPV	Health Care	3.81	United States
MEDTRONIC PLC USD0.10	Health Care	2.92	United States
BOSTON SCIENTIFIC CORPORATION COMMON STOCK USD0.01	Health Care	2.89	United States
TEVA PHARMACEUTICAL INDUSTRIES LIMITED SPONSORED ADR (EACH CONVERT INTO 1 ORDINARY ILS0.10)	Health Care	2.66	Israel
STRYKER CORP COM STK USD0.10	Health Care	2.53	United States
INTUITIVE SURGICAL COMMON STOCK USD0.001	Health Care	2.53	United States
CVS HEALTH CORPORATION COMMON STOCK USD0.01	Health Care	2.42	United States
NOVO NORDISK CLASS B DKK0.1	Health Care	2.08	Denmark
UCB SA EUR3	Health Care	1.98	Belgium
SANOFI EUR2	Health Care	1.96	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

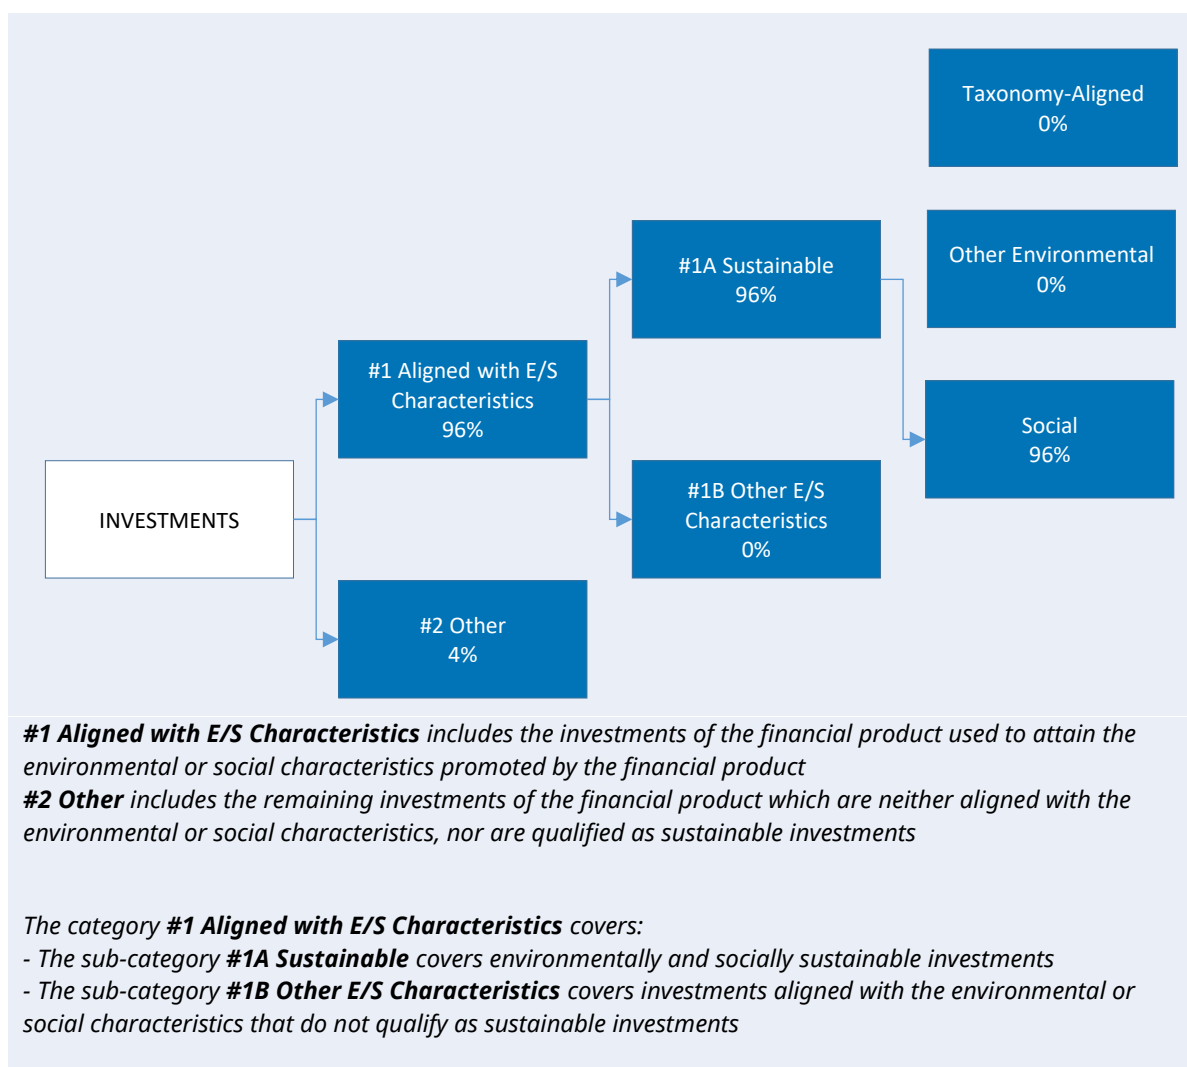

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 96%. The percentage represents the Fund's holdings as at the end of the reference period. Included in #1 and #1A Sustainable are investments in healthcare and medical related companies worldwide that were expected to contribute towards the advancement of one or more of the UN SDGs by promoting growth in healthcare provision and medical treatments and improving healthcare standards using an innovation-led approach. All the sustainable investments had a social objective.

#2 Other includes cash, which was treated as neutral for sustainability purposes and investments in companies in industries adjacent to healthcare or healthcare related services.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	62.84
Health Care	Health Care Equipment & Services	32.79
Cash	Cash	3.00
Cash Equivalents	Treasury Bills	0.74
Information Technology	Technology Hardware & Equipment	0.63

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

All sustainable investments made by the Fund had social objectives and so there were no sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

## What was the share of socially sustainable investments?

All sustainable investments made by the Fund had social objectives.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes and investments in companies in industries adjacent to healthcare or healthcare related services.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Fund invested at least 80% of its assets in healthcare and medical related companies worldwide that contribute towards the advancement of one or more of the UN SDGs by promoting growth in healthcare provision and medical treatments and improving healthcare standards using an innovation-led approach; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Indian Equity

**Legal Entity Identifier :** EBELRBOUMD6RMWOVEX67

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 67% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI India (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 3.1% and the benchmark's sustainability score at the end of the reference period was -9.2%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- Financial Inclusion
- High Salaries
- Power Provision

The Investment Manager invested 67% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	67
Jan 2024 - Dec 2024	65
Jan 2023 - Dec 2023	70
Jan 2022 - Dec 2022	33

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	3.1	-9.2
Jan 2024 - Dec 2024	2.0	-6.2
Jan 2023 - Dec 2023	3.3	-5.3
Jan 2022 - Dec 2022	4.2	-11.6

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to

PAI 4 (Exposure to companies active in the fossil fuel sector),

PAI 5 (Share of non-renewable energy consumption and production) and

PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste and radioactive waste ratio),

PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

providers and proprietary research, where relevant.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders’ ‘global norms’ breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

The Asian Equities investment team used a proprietary tool which provides a framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions). By expanding our information sources beyond company reporting, we build a more robust and balanced picture of a company’s performance and reduce our reliance on corporate disclosure.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

period are:

We engaged with an issuer in the Banking Services industry based in India on the subjects of Just Transition and Resilience (PAIs 1, 2, 3, 4, 5 and 6) and Communities (PAI 10). We also held an engagement on the subject of Nature-related risk and management (PAIs 7, 8 and 9) with an issuer in the Passenger Transportation Services industry based in India.

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	6
Diversity and Inclusion	2
Human Rights	1
Corporate Governance	1
Natural Capital and Biodiversity	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country
HDFC BANK LIMITED INR1	Financial	9.31	India

The list above represents the average of the Fund's holdings at each quarter-end during the reference

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 103%. The Fund maintained a higher overall sustainability score than the MSCI India (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 67%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 9% was invested in sustainable investments with an environmental objective and 58% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

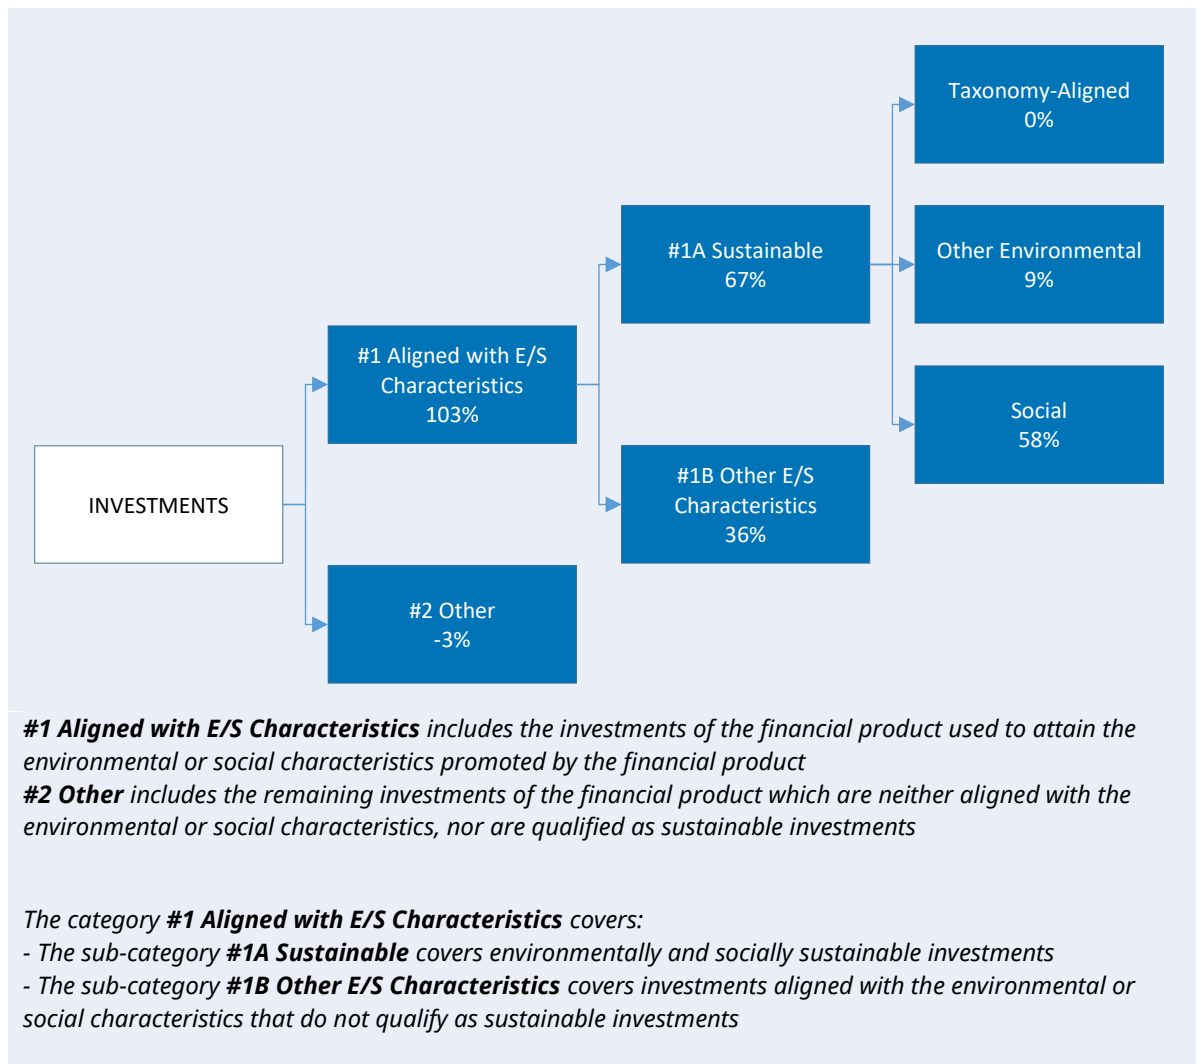

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets
Financial	Banking	21.18
Financial	Financial Services	7.12

Cash	Other	0.25
Cash	Cash	-2.29

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

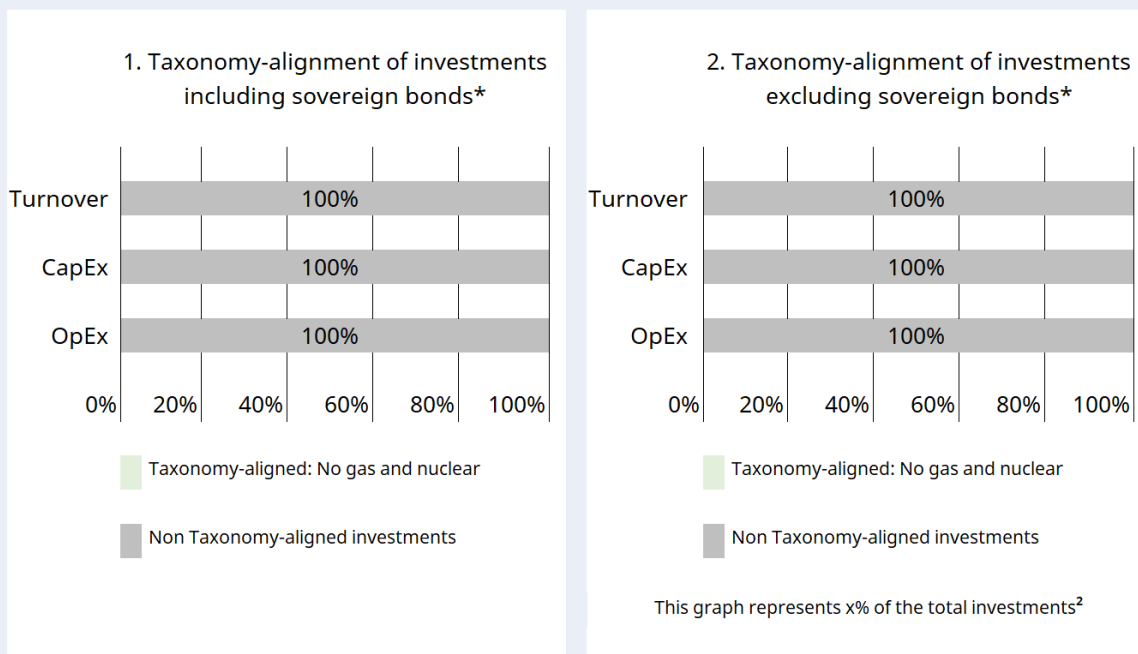

Taxonomy-aligned activities are expressed as a share of:

**- turnover**  
reflecting the share of revenue from green activities of investee companies

**- capital expenditure**  
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### • *What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?*

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 9%.

### • *What was the share of socially sustainable investments?*

The share of sustainable investments with a social objective was 58%.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund’s engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question ‘How did this financial product consider principal adverse impacts on sustainability factors?’. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Indian Opportunities

**Legal Entity Identifier :** 549300ISB6Y5VVS1WQ05

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 63% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI India (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was -0.5% and the benchmark's sustainability score at the end of the reference period was -9.2%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- Financial Inclusion
- High Salaries
- Medicine

The Investment Manager invested 63% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	63
Jan 2024 - Dec 2024	61
Jan 2023 - Dec 2023	62
Jan 2022 - Dec 2022	31

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	-0.5	-9.2
Jan 2024 - Dec 2024	0.8	-6.2
Jan 2023 - Dec 2023	-1.9	-5.3
Jan 2022 - Dec 2022	-5.6	-11.6

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to

PAI 4 (Exposure to companies active in the fossil fuel sector),

PAI 5 (Share of non-renewable energy consumption and production) and

PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste and radioactive waste ratio),

PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:  
- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:  
PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste ratio),  
PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

The Asian Equities investment team used a proprietary tool which provides a framework for analysing a company's relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions). By expanding our information sources beyond company reporting, we build a more robust and balanced picture of a company's performance and reduce our reliance on corporate disclosure.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint,

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Passenger Transportation Services industry based in India on the subjects of Climate mitigation (PAIs 1, 2 and 3) and Nature-related risk and management (PAIs 7, 8 and 9). Additionally, we engaged with an issuer based in India in the Banking Services industry on the subject of Communities (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	9
Diversity and Inclusion	2
Human Rights	1
Natural Capital and Biodiversity	1
Corporate Governance	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country

MULTI COMMODITY EXCHANGE OF INDIA LIMITED INR10	Financial	1.34	India
BAJAJ FINANCE LTD INR1	Financial	1.33	India
PERSISTENT SYSTEMS LTD	Information Technology	1.32	India

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 97%. The Fund maintained a higher overall sustainability score than the MSCI India (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 63%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

# SFDR Periodic Report (continued)

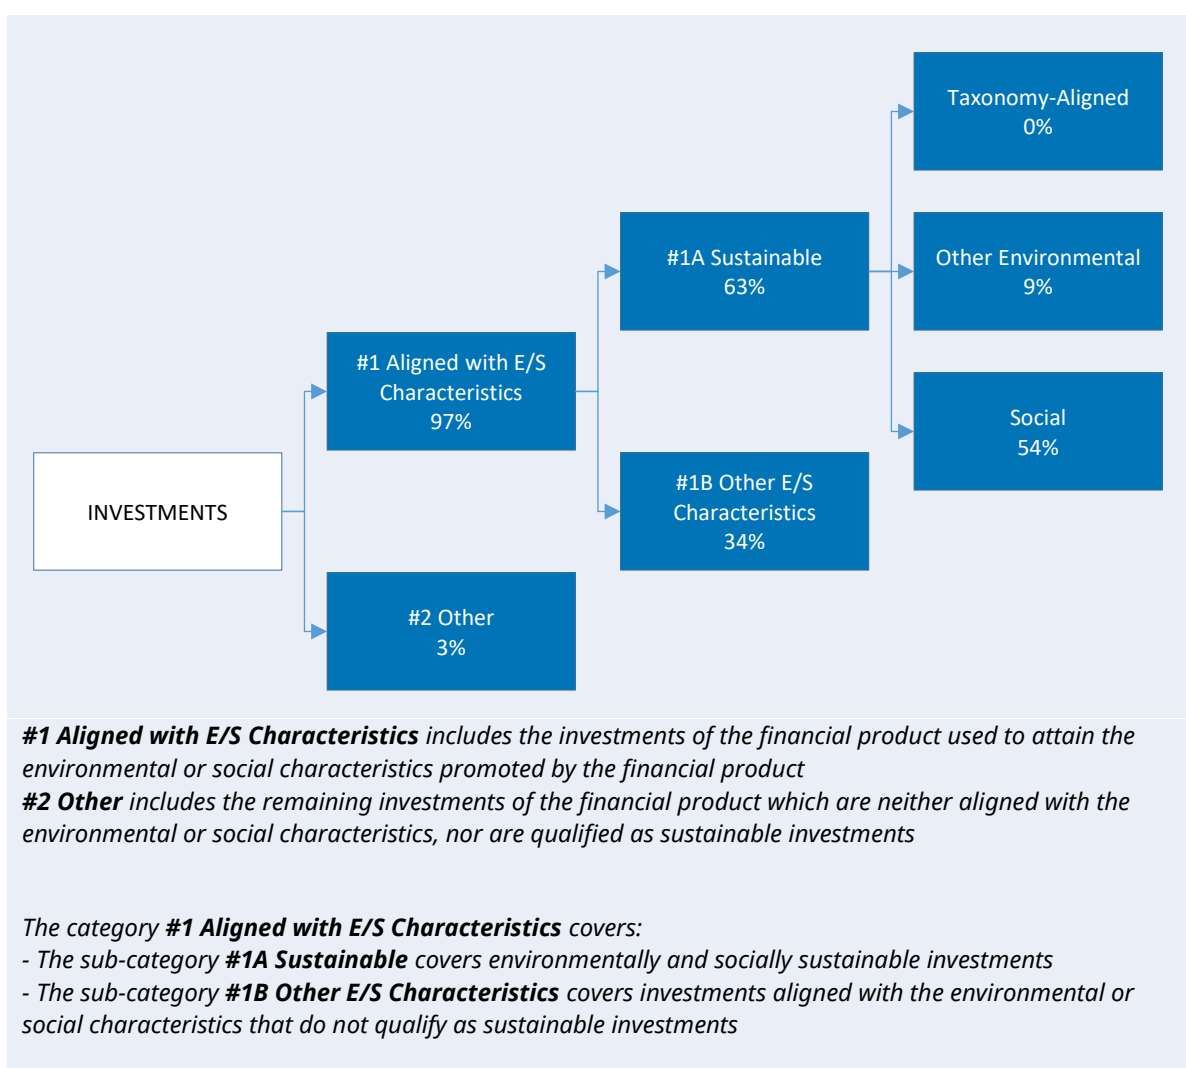

Reference Period: 1 January 2025 - 31 December 2025

Of the Fund's sustainable investments, 9% was invested in sustainable investments with an environmental objective and 54% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets
Financial	Banking	16.08
Financial	Financial Services	7.08

Consumer Staples	Food, Beverage & Tobacco	1.95
Consumer Staples	Consumer Staples Distribution & Retail	0.60
Consumer Staples	Household & Personal Products	0.49
Energy	Oil & Gas Refining & Marketing	2.97
Cash	Cash	2.22
Utilities	Utilities	1.25

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

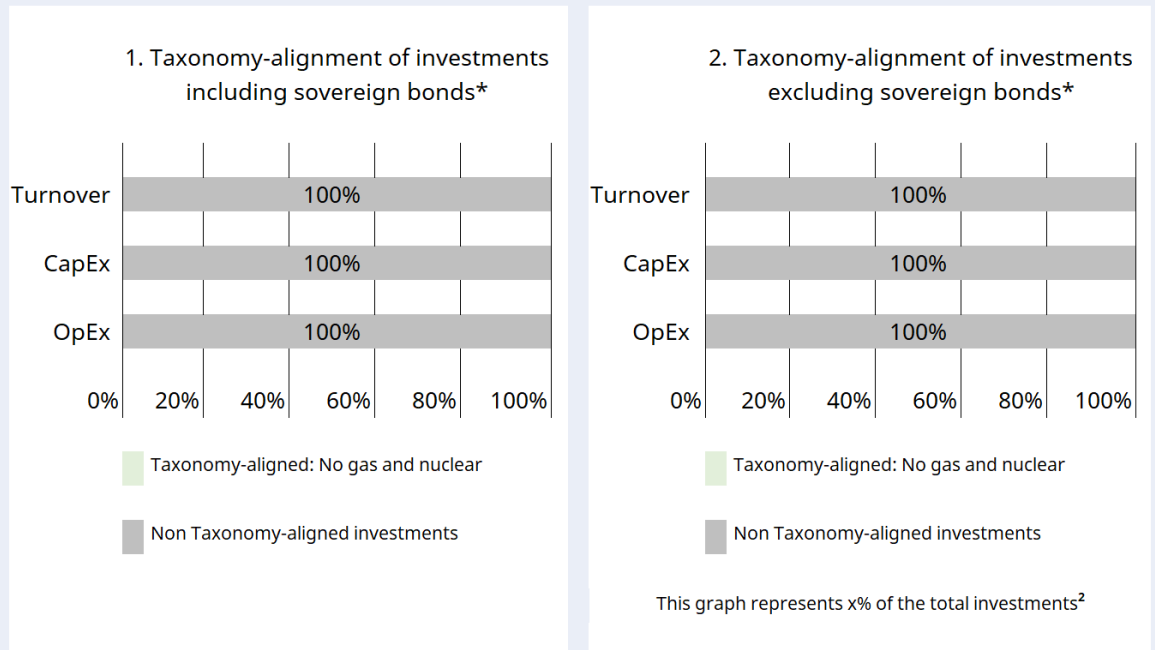

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 9%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 54%.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund’s engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question ‘How did this financial product consider principal adverse impacts on sustainability factors?’. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Japanese Opportunities

**Legal Entity Identifier :** GGI5GYUNQ0FQ074VII96

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 55% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Tokyo Stock Exchange 1st Section (TOPIX) (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • How did the sustainability indicators perform?

The Fund's sustainability score at the end of the reference period was -0.2% and the benchmark's sustainability score at the end of the reference period was -3.0%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Connectivity
- Financial Inclusion
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 55% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

As this is our first reporting period, this question is not applicable.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	55
Jan 2024 - Dec 2024	51
Jan 2023 - Dec 2023	48
Sep 2022 - Dec 2022	44

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	-0.2	-3.0
Jan 2024 - Dec 2024	0.4	-2.6
Jan 2023 - Dec 2023	0.2	-3.2
Jan 2022 - Dec 2022	0.3	-3.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

On 22 December 2025 the Fund's benchmark changed from Tokyo Stock Exchange 1st Section index (TOPIX) (Net TR) to Tokyo Stock Price Index Net TR.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schrodgers' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schrodgers.com/en-lu/lu/individual/fund-centre>

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

During the reference period, PAIs were also considered through integration in the investment process.

PAIs were considered through our ESG integrated process in both the analysis of individual companies and portfolio construction. Individual analysts were primarily responsible for financial forecasts and ESG assessment through the use of Schroders proprietary tools. The analysts' views on ESG factors covering multiple PAIs were quantified by our analysts, alongside fundamental financial factors.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Machinery, Tools, Heavy Vehicles, Trains & Ships industry based in Japan on the subject of Purpose, strategy and capital allocation (PAI 10). We also held an engagement on the subject of Engagement and representation (PAI 10) with an issuer in the Chemicals industry based in Japan. Additionally, we engaged with an issuer based in Japan in the Automobiles & Auto Parts industry on the subject of Climate mitigation (PAIs 1, 2 and 3).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	13
Climate Change	6
Diversity and Inclusion	4
Human Capital Management	4
Natural Capital and Biodiversity	3

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country
SUMITOMO MITSUI FINANCIAL GROUP INCORPORATED NPV	Financial	4.23	Japan
T&D HOLDINGS INCORPORATED NPV	Financial	4.08	Japan
ORIX CORPORATION NPV	Financial	2.68	Japan
C. UYEMURA & CO LTD NPV	Materials	2.63	Japan
ITOCHU CORPORATION NPV	Industrial	2.40	Japan
SUZUKI MOTOR CORPORATION JPY50	Consumer Discretionary	2.27	Japan
STARTS CORPORATION INCORPORATED NPV	Real Estate	2.10	Japan
TOKIO MARINE HOLDINGS INCORPORATED NPV	Financial	2.06	Japan
BELC COMPANY LIMITED NPV	Consumer Staples	1.95	Japan
FUKUOKA FINANCIAL GROUP INCORPORATED NPV	Financial	1.83	Japan
NICHIAS CORPORATION NPV	Industrial	1.77	Japan
NEXON COMPANY LIMITED NPV	Communication Services	1.69	Japan
AIR WATER INCORPORATED NPV	Materials	1.66	Japan
YOKOHAMA RUBBER COMPANY LTD	Consumer Discretionary	1.63	Japan
ABC-MART INCORPORATED NPV	Consumer Discretionary	1.63	Japan

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the Tokyo Stock Exchange 1st Section (TOPIX) (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 55%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 30% was invested in sustainable investments with an

# SFDR Periodic Report (continued)

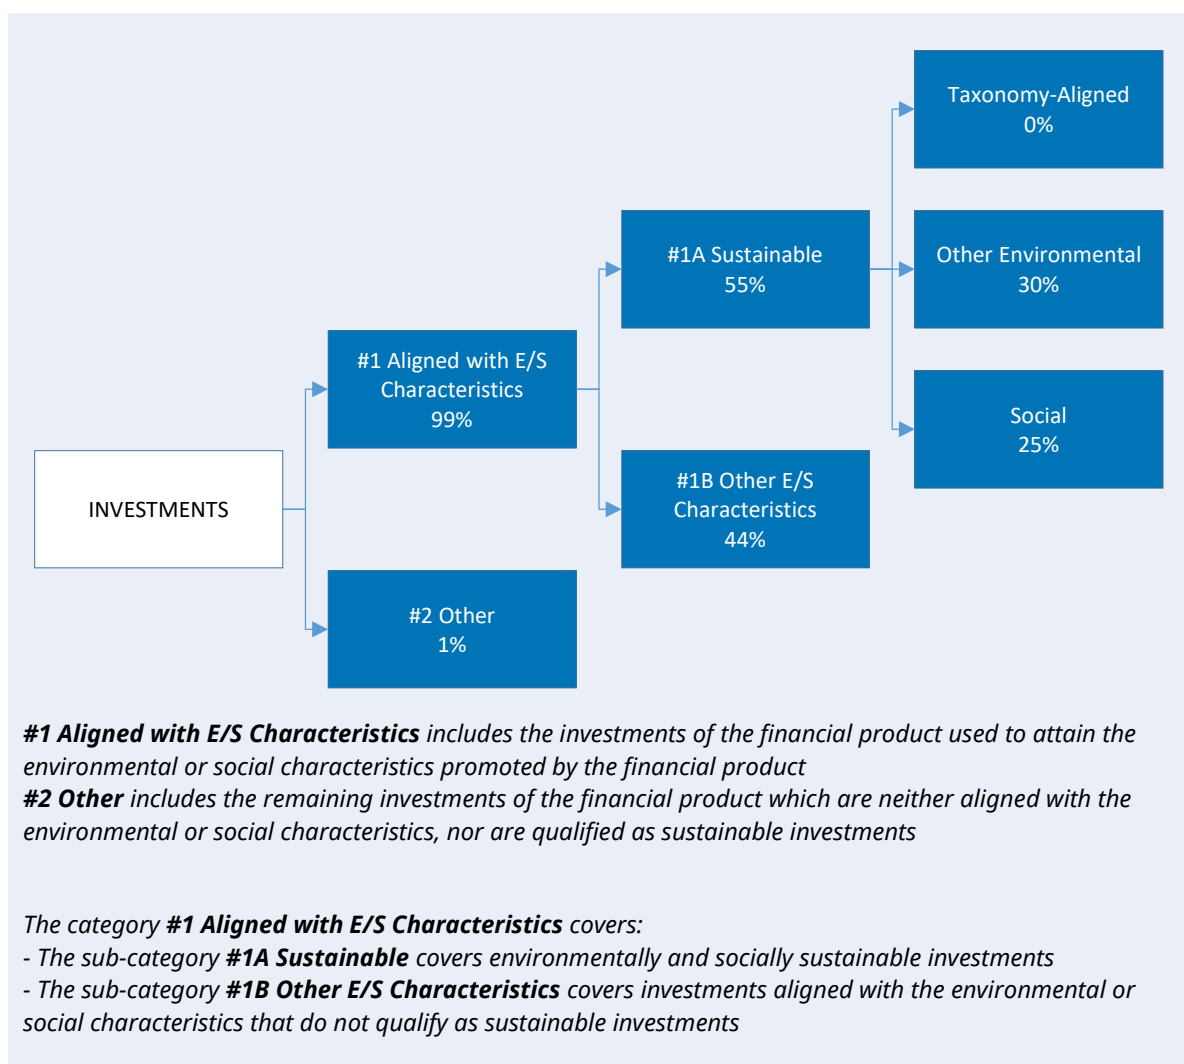

Reference Period: 1 January 2025 - 31 December 2025

environmental objective and 25% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	20.83
Industrial	Commercial & Professional Services	0.89
Industrial	Transportation	0.81
Consumer Discretionary	Automobiles & Components	11.25
Consumer Discretionary	Consumer Discretionary Distribution & Retail	3.14
Consumer Discretionary	Consumer Durables & Apparel	2.34
Consumer Discretionary	Consumer Services	0.09
Financial	Banking	6.97
Financial	Insurance	6.14
Financial	Financial Services	3.58
Materials	Materials	13.34
Materials	Industrial Gases	1.66
Information Technology	Technology Hardware & Equipment	5.41
Information Technology	Software & Services	3.50
Information Technology	Semiconductors & Semiconductor Equipment	3.26
Real Estate	Real Estate Management & Development	4.83
Consumer Staples	Consumer Staples Distribution & Retail	3.41
Consumer Staples	Food, Beverage & Tobacco	0.69
Health Care	Health Care Equipment & Services	1.80
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	1.33
Communication Services	Media & Entertainment	1.69
Communication Services	Telecommunication Services	1.13
Cash	Cash	1.43
Cash	Margin Cash	0.03
Energy	Oil & Gas Refining & Marketing	0.46

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

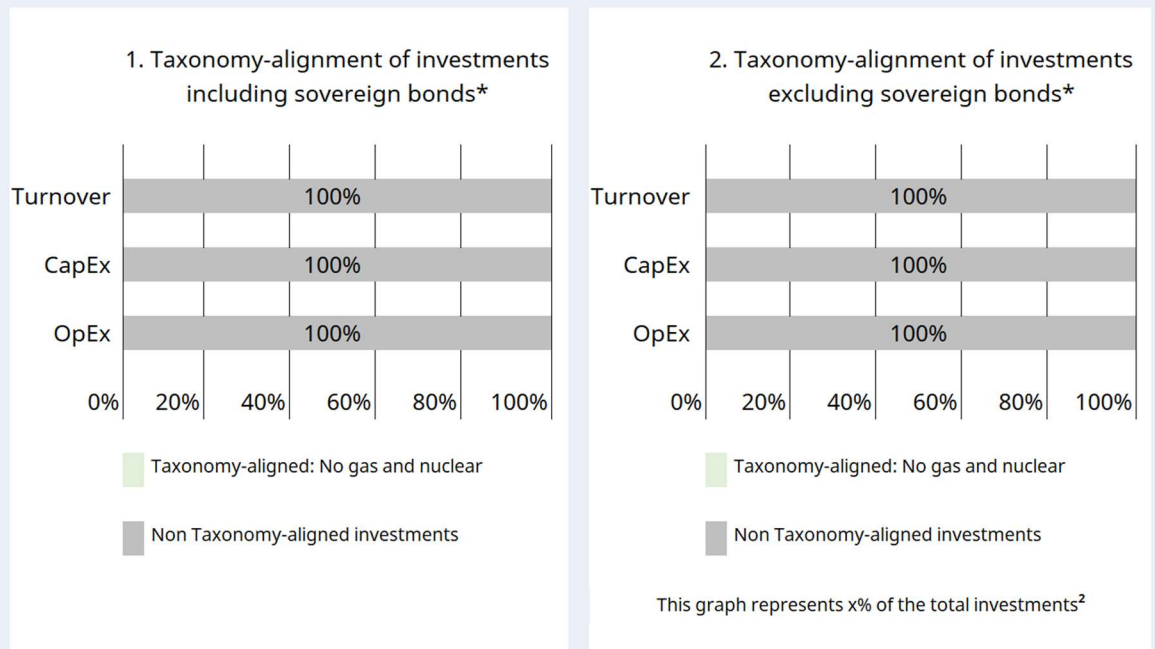

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 30%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 25%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf> ). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Japanese Smaller Companies

**Legal Entity Identifier :** S39CY7QBBMJNLVU5NJ44

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 58% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Russell Nomura Small Cap (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 0.5% and the benchmark's sustainability score at the end of the reference period was -1.8%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Connectivity
- Financial Inclusion
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 58% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	58
Jan 2024 - Dec 2024	57
Jan 2023 - Dec 2023	54
Aug 2022 - Dec 2022	53

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	0.5	-1.8
Jan 2024 - Dec 2024	0.6	-1.0
Jan 2023 - Dec 2023	1.7	-1.2
Jan 2022 - Dec 2022	1.7	-1.9

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

(R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to

PAI 4 (Exposure to companies active in the fossil fuel sector),

PAI 5 (Share of non-renewable energy consumption and production) and

PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste and radioactive waste ratio),

PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schrodgers' 'global norms' breach list were not categorised as sustainable investments. Schrodgers' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schrodgers PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schrodgers' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

PAIs were considered through our ESG integrated process in both the analysis of individual companies and portfolio construction. Individual analysts were primarily responsible for financial forecasts and ESG assessment through the use of Schrodgers proprietary tools. The analysts' views on ESG factors

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

covering multiple PAIs were quantified by our analysts, alongside fundamental financial factors.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Electronic Equipment & Parts industry based in Japan on the subjects of Health, safety and wellbeing (PAI 10) and Climate mitigation (PAIs 1, 2 and 3). Additionally, we engaged with an issuer based in Japan in the Electronic Equipment & Parts industry on the subject of Purpose, strategy and capital allocation (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	7
Diversity and Inclusion	1
Human Capital Management	1
Climate Change	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country
SHINMAYWA INDUSTRIES LTD JPY50	Industrial	2.47	Japan
HAMAKYOREX COMPANY LIMITED NPV	Industrial	2.46	Japan
TANSEISHA COMPANY LIMITED NPV	Industrial	2.27	Japan
MUSASHINO BANK LIMITED (THE) NPV	Financial	2.26	Japan
TAKUMA CO LTD	Industrial	2.21	Japan
METAWATER COMPANY LIMITED NPV	Industrial	2.20	Japan
NIPPON DENSETSU KOGYO COMPANY LIMITED NPV	Industrial	2.08	Japan
TAIHEI DENGYO KAISHA LIMITED NPV	Industrial	2.04	Japan
JAPAN MATERIAL CO LTD NPV	Information Technology	1.92	Japan
TAKARA STANDARD CO LTD	Industrial	1.91	Japan
HOCHIKI CORPORATION NPV	Information Technology	1.89	Japan
TECHMATRIX CORPORATION NPV	Information Technology	1.87	Japan
KRAFTIA CORP	Industrial	1.86	Japan
NISHI-NIPPON FINANCIAL HOLDING INCORPORATED NPV	Financial	1.84	Japan
S&B FOODS INCORPORATED NPV	Consumer Staples	1.79	Japan

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 96%. The Fund maintained a higher overall sustainability score than the Russell Nomura Small Cap (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 58%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 29% was invested in sustainable investments with an environmental objective and 29% was invested in sustainable investments with a social objective. These

# SFDR Periodic Report (continued)

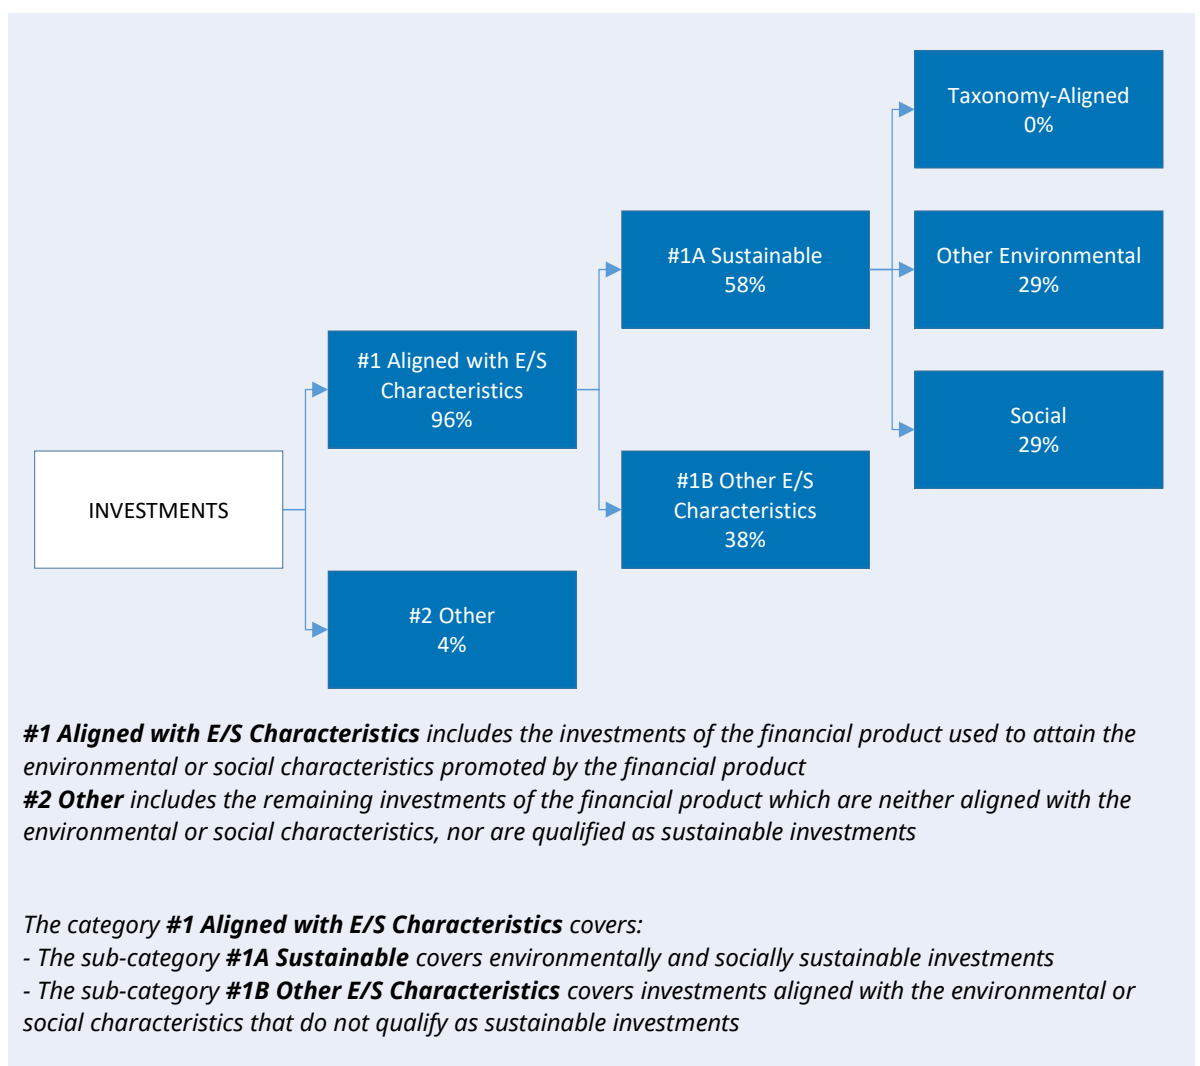

Reference Period: 1 January 2025 - 31 December 2025

percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	28.06
Industrial	Commercial & Professional Services	7.46
Industrial	Transportation	4.06
Information Technology	Software & Services	9.62
Information Technology	Technology Hardware & Equipment	7.12
Information Technology	Semiconductors & Semiconductor Equipment	3.95
Consumer Discretionary	Consumer Services	3.83
Consumer Discretionary	Consumer Discretionary Distribution & Retail	2.82
Consumer Discretionary	Automobiles & Components	1.77
Consumer Discretionary	Consumer Durables & Apparel	0.63
Materials	Materials	8.41
Financial	Banking	4.10
Financial	Financial Services	2.48
Communication Services	Media & Entertainment	3.65
Communication Services	Telecommunication Services	1.58
Real Estate	Real Estate Management & Development	3.35
Cash	Cash	2.88
Consumer Staples	Food, Beverage & Tobacco	2.82
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	0.82
Health Care	Health Care Equipment & Services	0.60

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

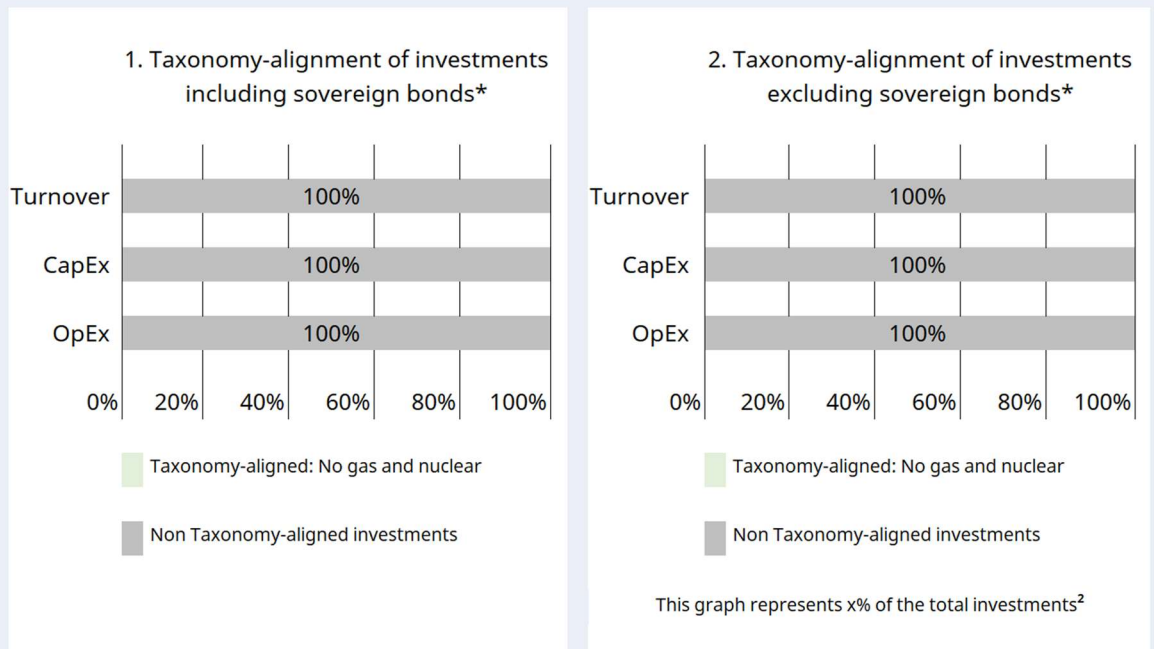

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 29%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 29%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf> ). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Nordic Micro Cap  
**Legal Entity Identifier :** 549300LG1HXZURKG0379

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 86% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Nordic Micro Cap (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 4.1% and the benchmark's sustainability score at the end of the reference period was -0.1%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 86% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	86
Jan 2024 - Dec 2024	88
Jan 2023 - Dec 2023	89
Aug 2022 - Dec 2022	88

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	4.1	-0.1
Jan 2024 - Dec 2024	3.2	0.8
Jan 2023 - Dec 2023	2.9	0.7
Jan 2022 - Dec 2022	2.5	0.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

applications; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:  
- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):  
PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

reduction initiatives) were included as part of a company's overall environmental score.

As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Textiles & Apparel industry based in Sweden on the subject of Boards and management (PAIs 12 and 13). We also held an engagement on the subject of Corporate culture and oversight of human capital (PAI 10) with an issuer in the Software & IT Services industry based in Finland.

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	2
Human Capital Management	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country
RAYSEARCH LABORATORIES AB SERIES 'B' NPV	Health Care	3.17	Sweden
PLEJD SEK0.15	Industrial	3.16	Sweden
Dynavox Group AB	Information Technology	2.92	Sweden

CARASENT SEK0.006913	Health Care	2.34	Sweden
VBG GROUP CLASS B	Industrial	2.29	Sweden
LAGERCANTZ GROUP AB-B SHS SEK0.7	Information Technology	2.17	Sweden
NEW WAVE GROUP CLASS B SEK3	Consumer Discretionary	2.10	Sweden

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 94%. The Fund maintained a higher overall sustainability score than the MSCI Nordic Micro Cap (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 86%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 75% was invested in sustainable investments with an

# SFDR Periodic Report (continued)

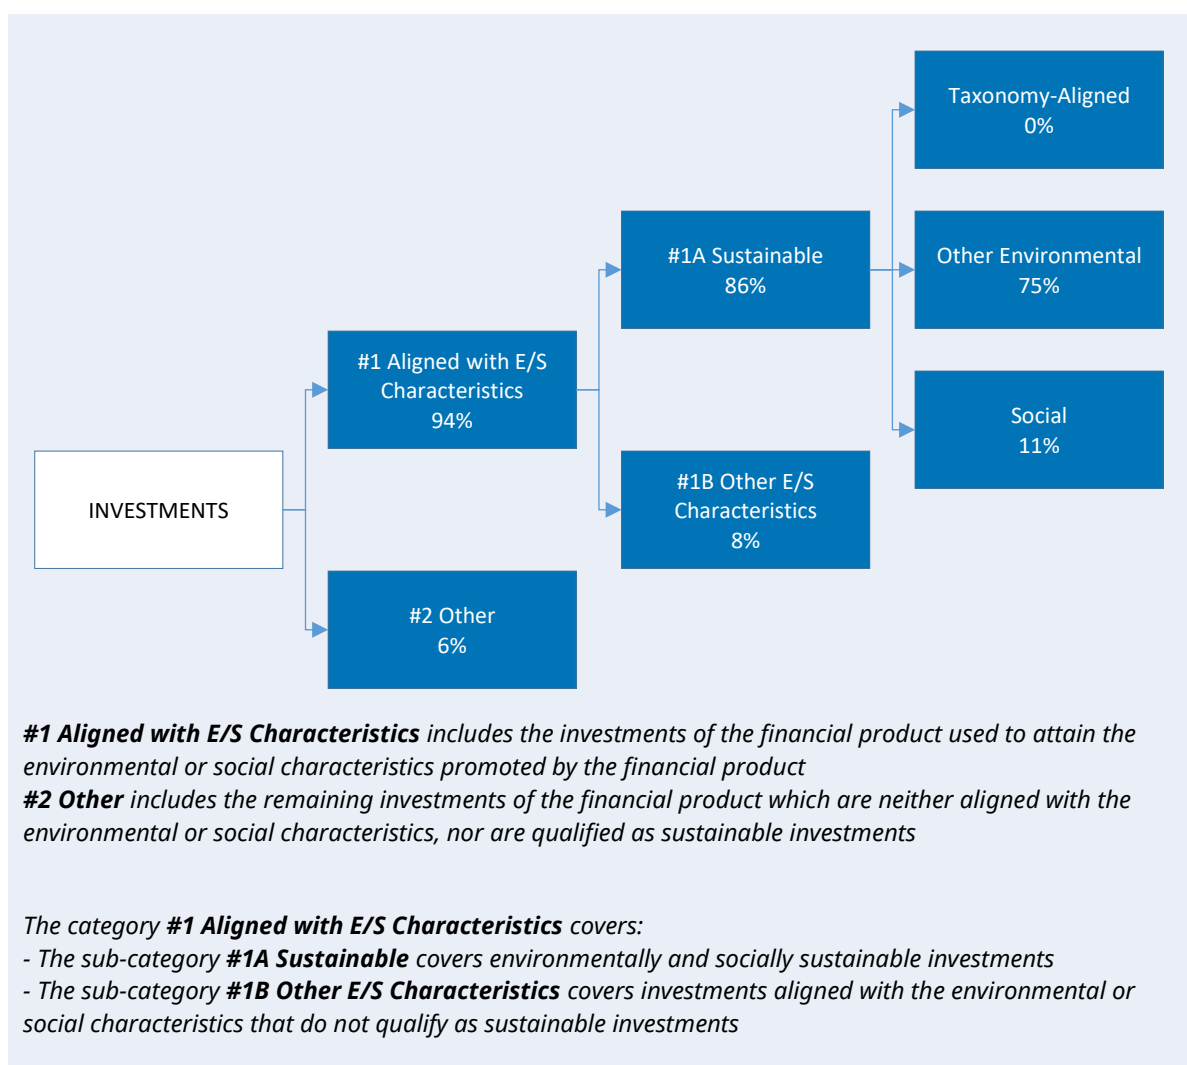

Reference Period: 1 January 2025 - 31 December 2025

environmental objective and 11% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets
Health Care	Health Care Equipment & Services	25.65
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	11.08
Information Technology	Technology Hardware & Equipment	15.43
Information Technology	Software & Services	13.59
Information Technology	Semiconductors & Semiconductor Equipment	0.15
Industrial	Capital Goods	13.22
Industrial	Commercial & Professional Services	2.27
Communication Services	Media & Entertainment	6.11
Consumer Discretionary	Consumer Durables & Apparel	3.65
Consumer Discretionary	Consumer Discretionary Distribution & Retail	1.66
Cash	Cash	4.51
Materials	Materials	2.47
Unassigned		0.17
Consumer Staples	Food, Beverage & Tobacco	0.05

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

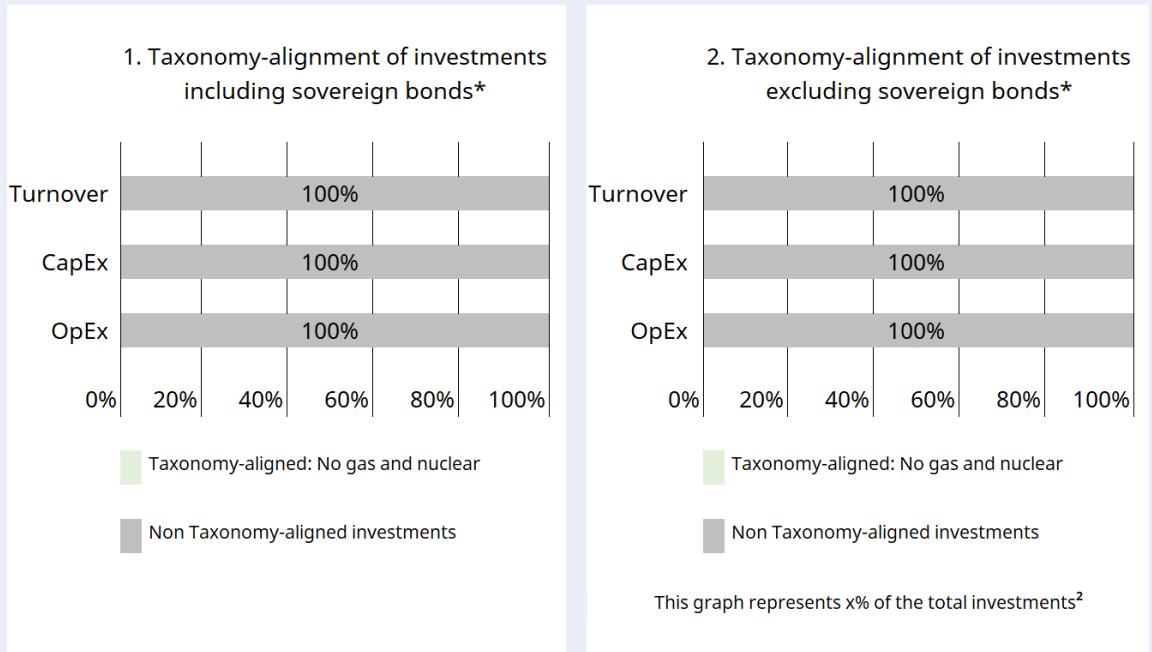

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

greenhouse gas emission levels corresponding to the best performance.

## • How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 75%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 11%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schrodgers’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schrodgers’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schrodgers’

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

***promoted?***

This question is not applicable for this Fund.

**• *How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

**• *How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Nordic Smaller Companies

**Legal Entity Identifier :** 5493006ZHNOXP7Z2DS89

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 88% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Nordic Smaller Companies (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 4.4% and the benchmark's sustainability score at the end of the reference period was -0.5%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Financial Inclusion
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 88% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	88
Jan 2024 - Dec 2024	87
Jan 2023 - Dec 2023	85
Aug 2022 - Dec 2022	83

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	4.4	-0.5
Jan 2024 - Dec 2024	3.7	-0.6
Jan 2023 - Dec 2023	2.6	-1.9
Jan 2022 - Dec 2022	1.7	-2.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

applications; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:  
- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):  
PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).  
PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

reduction initiatives) were included as part of a company's overall environmental score.

As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Pharmaceuticals industry based in Denmark on the subject of Value chain diversity and inclusion (PAIs 10, 12 and 13).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country
Dynavox Group AB	Information Technology	4.85	Sweden

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 96%. The Fund maintained a higher overall sustainability score than the MSCI Nordic Smaller Companies (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 88%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 60% was invested in sustainable investments with an environmental objective and 28% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

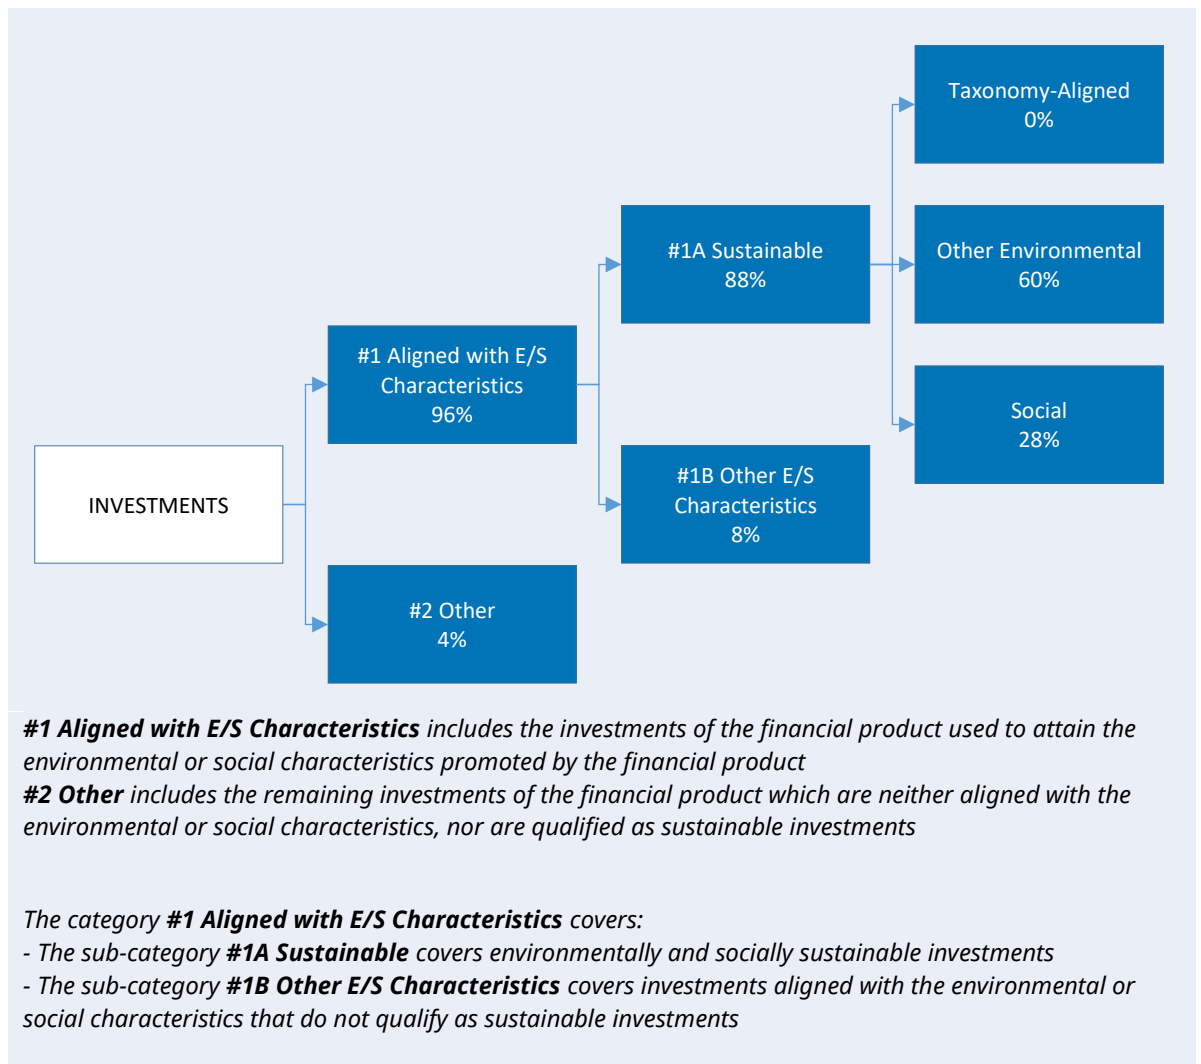

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets
Health Care	Health Care Equipment & Services	16.61
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	16.10
Industrial	Capital Goods	13.05
Industrial	Commercial & Professional Services	7.62
Industrial	Transportation	1.65

Consumer Staples	Food, Beverage & Tobacco	0.69
Consumer Staples	Consumer Staples Distribution & Retail	0.16
Real Estate	Real Estate Management & Development	0.24

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

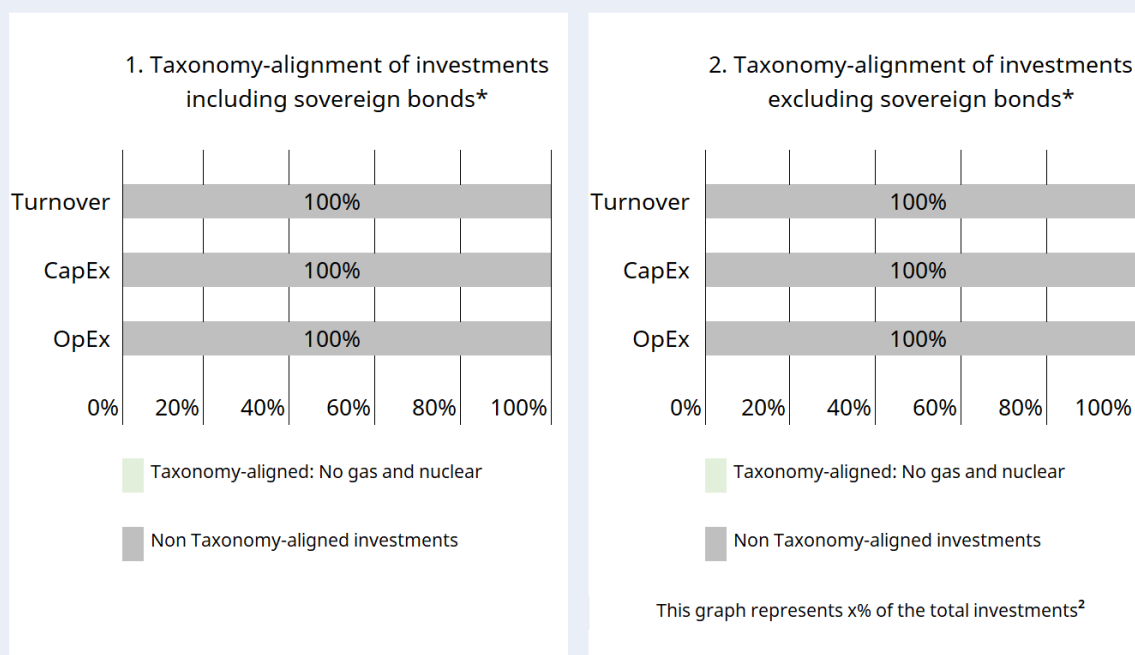

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 60%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 28%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf> ). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Robotics and Automation

**Legal Entity Identifier :** 549300DYPXYJ7UC4NK03

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 76% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

On 08 April 2025 the Fund's name changed from Schroder ISF Smart Manufacturing to Schroder ISF Robotics and Automation.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 3.5% and the benchmark's sustainability score at the end of the reference period was -1.8%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 76% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Jan 2025 - Dec 2025	3.5	-1.8
Jan 2024 - Dec 2024	1.1	-2.1
Jan 2023 - Dec 2023	0.7	-2.9
Jan 2022 - Dec 2022	-0.6	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

applications; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:  
- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):  
PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schrodgers' 'global norms' breach list were not categorised as sustainable investments. Schrodgers' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schrodgers PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schrodgers' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

PAIs were considered through integration in the investment research, stock selection and portfolio construction parts of the investment process. For example, in assessing an issuer's overall environmental score, PAIs 1, 2, 3, 4, 5 and 6 were included. In assessing an issuer's overall social score,

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

PAIs 12 and 13 were included.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Chemicals industry based in the United Kingdom on the subject of Climate mitigation (PAIs 1, 2 and 3). We also held an engagement on the subject of Customers and consumers (PAI 10) with an issuer in the Machinery, Tools, Heavy Vehicles, Trains & Ships industry based in the USA. Additionally, we engaged with an issuer based in Japan in the Consumer Goods Conglomerates industry on the subject of Boards and management (PAIs 12 and 13).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	17
Human Rights	14
Corporate Governance	9
Human Capital Management	6
Natural Capital and Biodiversity	4
Diversity and Inclusion	3

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country
MICROSOFT CORPORATION COMMON STOCK USD0.0000125	Information Technology	7.18	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 97%. The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 76%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

# SFDR Periodic Report (continued)

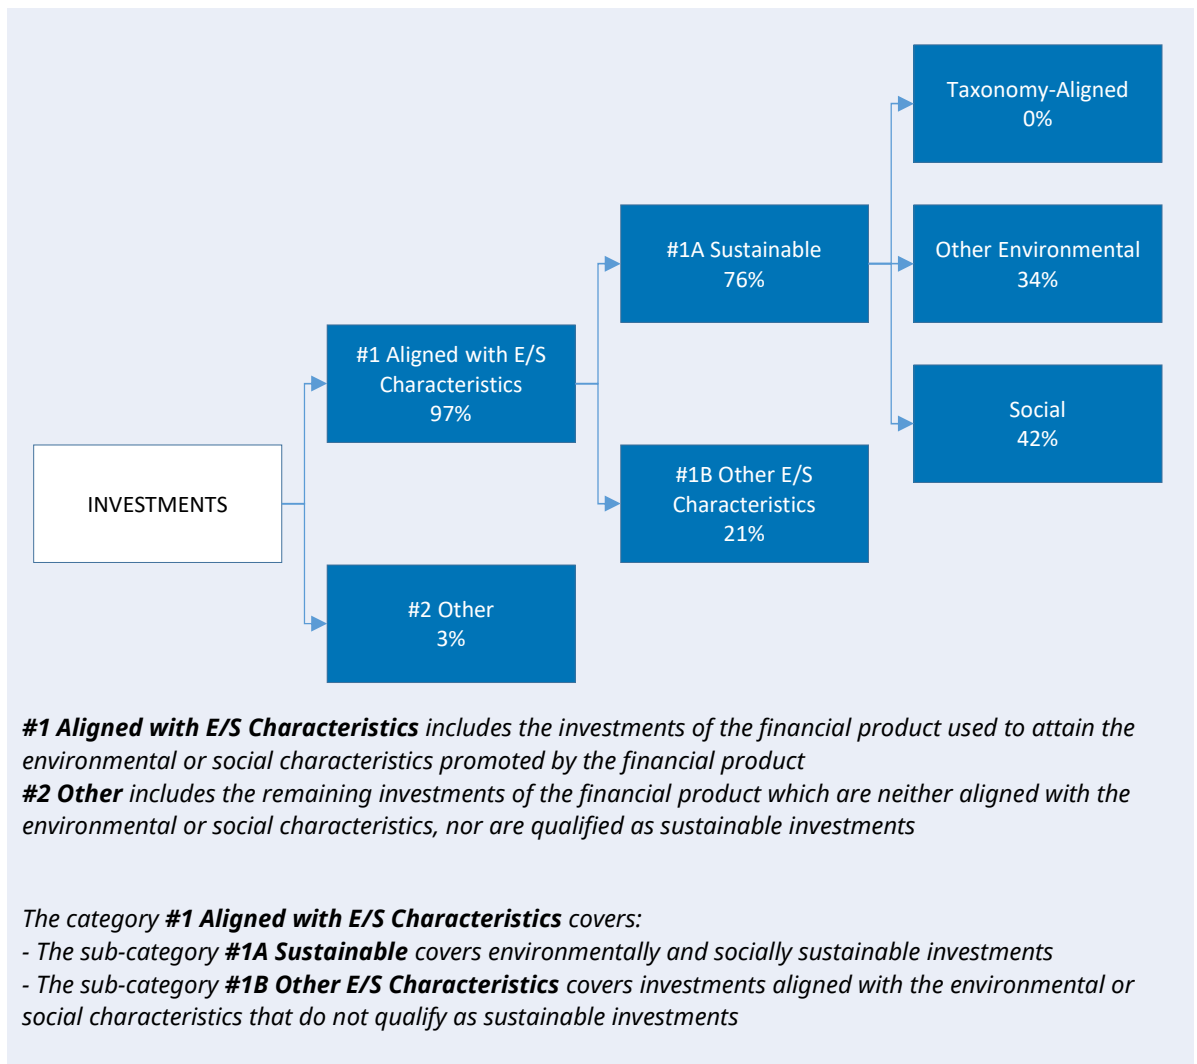

Reference Period: 1 January 2025 - 31 December 2025

Of the Fund's sustainable investments, 34% was invested in sustainable investments with an environmental objective and 42% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schrodgers' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schrodgers proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schrodgers' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

## • In which economic sectors were the investments made?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	48.54
Industrial	Commercial & Professional Services	4.65
Information Technology	Software & Services	16.72
Information Technology	Semiconductors & Semiconductor Equipment	12.15
Information Technology	Technology Hardware & Equipment	4.95
Health Care	Health Care Equipment & Services	5.24
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	2.01
Materials	Industrial Gases	2.30
Cash	Cash	2.15
Communication Services	Media & Entertainment	0.99
Energy	Oil & Gas Equipment & Services	0.29

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

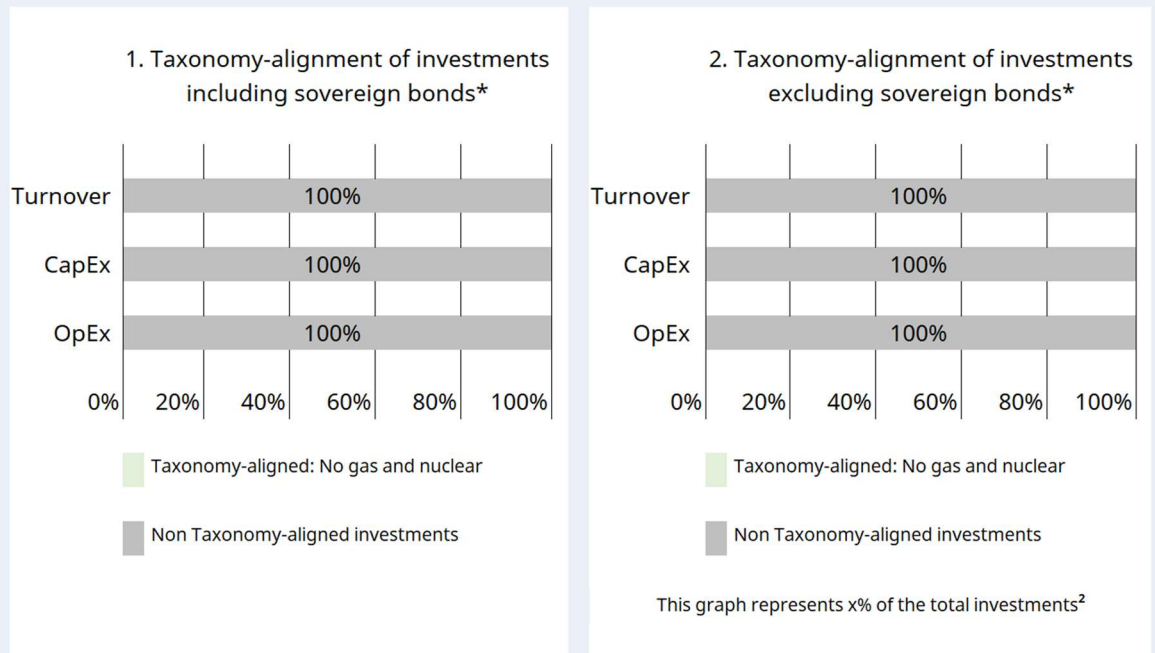

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

greenhouse gas emission levels corresponding to the best performance.

## • How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 34%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 42%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • How does the reference benchmark differ from a broad market index?

This question is not applicable for this Fund.

### • How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

***promoted?***

This question is not applicable for this Fund.

**• *How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

**• *How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable Asian Equity

**Legal Entity Identifier :** 549300B7ECKLDTN5I839

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 68% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invested at least 40% of its assets in sustainable investments until 31 March 2025. The Fund then invested at least 50% of its assets in sustainable investments from 1 April 2025 to the end of the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 2.0% and the benchmark's sustainability score at the end of the reference period was -2.7%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 68% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

investments are measured by reference to the sustainability score in Schroders' proprietary tool.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	68
Jan 2024 - Dec 2024	74
Jan 2023 - Dec 2023	62
Aug 2022 - Dec 2022	61

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	2.0	-2.7
Jan 2024 - Dec 2024	3.8	-2.4
Jan 2023 - Dec 2023	4.1	-2.6
Jan 2022 - Dec 2022	4.0	-3.1

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

(R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schrodgers.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schrodgers' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schrodgers' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to

PAI 4 (Exposure to companies active in the fossil fuel sector),

PAI 5 (Share of non-renewable energy consumption and production) and

PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste and radioactive waste ratio),

PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:  
- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

The Asian Equities investment team used a proprietary tool which provides a framework for analysing a company's relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions). By expanding our information sources beyond company reporting, we build a more robust and balanced picture of a company's performance and reduce our reliance on corporate disclosure.

PAIs were also considered post-investment through engagement where the Investment Manager

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Automobiles & Auto Parts industry based in South Korea on the subjects of Climate mitigation (PAIs 1, 2 and 3) and Relationship with shareholders (PAI 10). We also held an engagement on the subject of Customers and consumers (PAI 10) with an issuer in the Software & IT Services industry based in China.

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	15
Human Rights	9
Corporate Governance	4
Human Capital Management	3
Natural Capital and Biodiversity	3
Diversity and Inclusion	2

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	9.38	Taiwan
TENCENT HOLDINGS LIMITED HKD0.00002	Communication Services	5.61	China
POP MART INTERNATIONAL GROUP NPV REGS 144A	Consumer Discretionary	3.44	China
SAMSUNG ELECTRONICS COMPANY LIMITED KRW100	Information Technology	3.32	South Korea
ALIBABA GROUP HOLDING LIMITED USD0.000003125	Consumer Discretionary	3.27	China

ICICI BANK LIMITED SPONSORED ADR (EACH REPRESENTS 2 ORDINARY INR10)	Financial	1.40	India
TRUE CORPORATION NON-VOTING DR PCL THB4	Communication Services	1.33	Thailand

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schrodgers Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan (Net TR) Index and so the Fund's investments that were scored by Schrodgers' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

positive or a negative score).

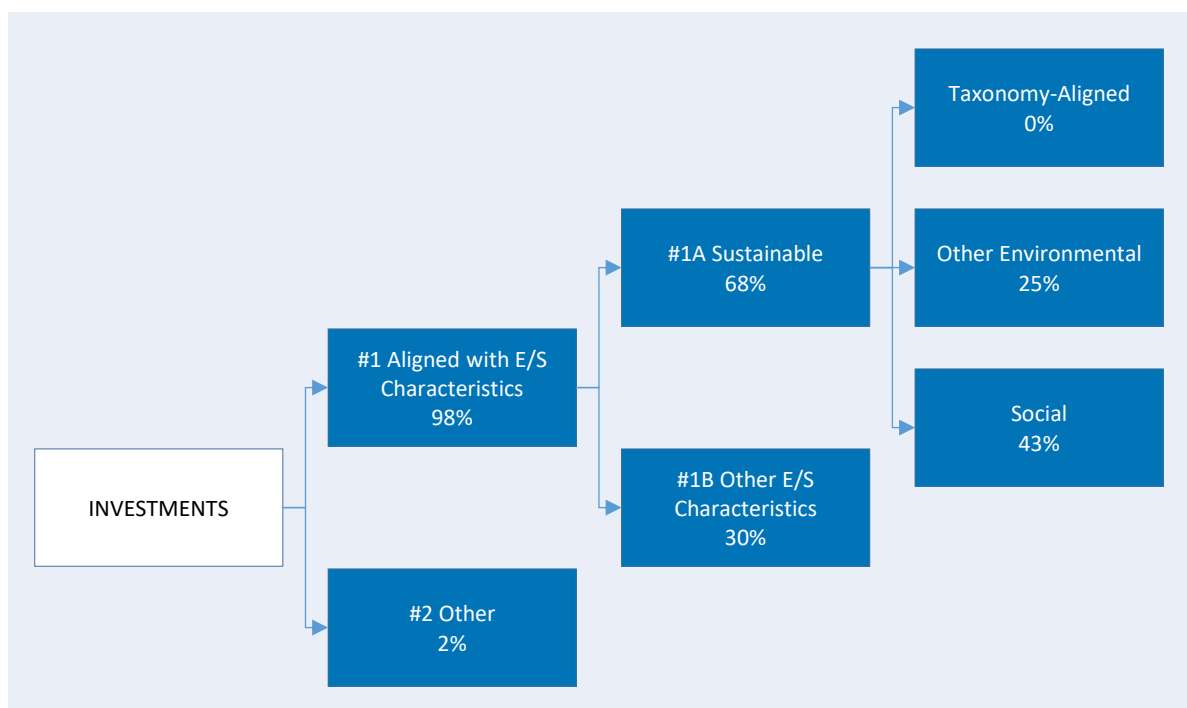

#1A includes the percentage invested in sustainable investments, which is equal to 68%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 25% was invested in sustainable investments with an environmental objective and 43% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	15.14
Information Technology	Technology Hardware & Equipment	6.04
Information Technology	Software & Services	1.30
Consumer Discretionary	Consumer Discretionary Distribution & Retail	8.57
Consumer Discretionary	Consumer Services	5.29
Consumer Discretionary	Automobiles & Components	3.47
Consumer Discretionary	Consumer Durables & Apparel	2.45
Financial	Banking	11.17
Financial	Insurance	3.94
Financial	Financial Services	3.39
Communication Services	Media & Entertainment	6.29
Communication Services	Telecommunication Services	5.59
Health Care	Health Care Equipment & Services	5.46
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	4.15
Industrial	Capital Goods	6.44
Industrial	Commercial & Professional Services	1.70
Industrial	Transportation	1.06
Materials	Materials	2.96
Utilities	Utilities	2.25
Real Estate	Real Estate Management & Development	1.33
Consumer Staples	Food, Beverage & Tobacco	0.75
Consumer Staples	Consumer Staples Distribution & Retail	0.25
Cash	Cash	0.93
Cash	Other	0.06

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 25%.

**What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 43%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable Global Growth and Income

**Legal Entity Identifier :** 549300UPXPBL5GB7UE22

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 77% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 50% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 3.4% and the benchmark's sustainability score at the end of the reference period was -1.8%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Connectivity
- Financial Inclusion
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 77% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	77
Jan 2024 - Dec 2024	70
Jan 2023 - Dec 2023	61
Aug 2022 - Dec 2022	55

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	3.4	-1.8
Jan 2024 - Dec 2024	2.3	-2.1
Jan 2023 - Dec 2023	2.3	-2.9
Jan 2022 - Dec 2022	1.7	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

applications; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to

PAI 4 (Exposure to companies active in the fossil fuel sector),

PAI 5 (Share of non-renewable energy consumption and production) and

PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste and radioactive waste ratio),

PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:  
- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:  
PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste ratio),  
PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

PAI metrics were integrated into our analysis of companies' stakeholder relationships which is central to our stock selection for this fund. Output from our proprietary stakeholder framework was used which incorporates several PAIs as a component of our evaluation of companies' sustainability characteristics. For example, PAIs 1, 2, 3, 4, 5, 6 (Greenhouse gas emissions) and PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental assessment. These PAIs, amongst others, are embedded within our investment process, informing our view on business risk and long-term growth drivers. PAI 13 (Board gender diversity) was also considered as part of our assessment of Good Governance, management

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

quality and company strategy.

During the reference period, PAI 7 (Activities negatively affecting biodiversity-sensitive areas) and PAI 14 from Annex 1 Table 3 (Number of identified cases of severe human rights issues and incidents) were considered and poor performance issuers on these metrics/ indicators frequently contributed to companies being deemed uninvestible for this strategy. In carbon-intensive industries, our assessment of PAI 6 and PAI 4 from Annex 1 Table 2 were important contributors to our overall evaluation and inclusion in our investible universe.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Semiconductors & Semiconductor Equipment industry based in Taiwan on the subject of Climate mitigation (PAIs 1, 2 and 3). We also held an engagement on the subject of Workers (PAI 10) with an issuer in the Specialty Retailers industry based in Spain. Additionally, we engaged with an issuer based in the USA in the Investment Banking & Investment Services industry on the subject of Purpose, strategy and capital allocation (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	23
Human Rights	16
Corporate Governance	12
Natural Capital and Biodiversity	9
Human Capital Management	6
Diversity and Inclusion	5

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country
MICROSOFT CORPORATION COMMON STOCK USD0.0000125	Information Technology	6.52	United States
ALPHABET INCORPORATED CL A NPV	Communication Services	4.61	United States
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	4.03	Taiwan
MORGAN STANLEY COMMON STOCK USD0.01	Financial	3.06	United States
INDUSTRIA DE DISEÑO TEXTIL SA EUR0.03	Consumer Discretionary	2.80	Spain
SAP SE NPV	Information Technology	2.78	Germany

BANCO BILBAO VIZCAYA ARGENTARIA SA EUR0.49	Financial	2.50	Spain
INTESA SANPAOLO SPA EUR0.52	Financial	2.41	Italy
HITACHI LIMITED NPV	Industrial	2.40	Japan
ASML HOLDING NV EUR0.09 (POST SPLIT)	Information Technology	2.37	Netherlands
AUTOMATIC DATA PROCESSING INCORPORATED COMMON STOCK USD0.10	Industrial	2.37	United States
RELX PLC ORDINARY 14.4397P	Industrial	2.32	United Kingdom
SIEMENS AG NPV (REGISTERED)	Industrial	2.28	Germany
MASTERCARD INCORPORATED CLASS A COMMON STOCK USD0.0001	Financial	2.28	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 77%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

# SFDR Periodic Report (continued)

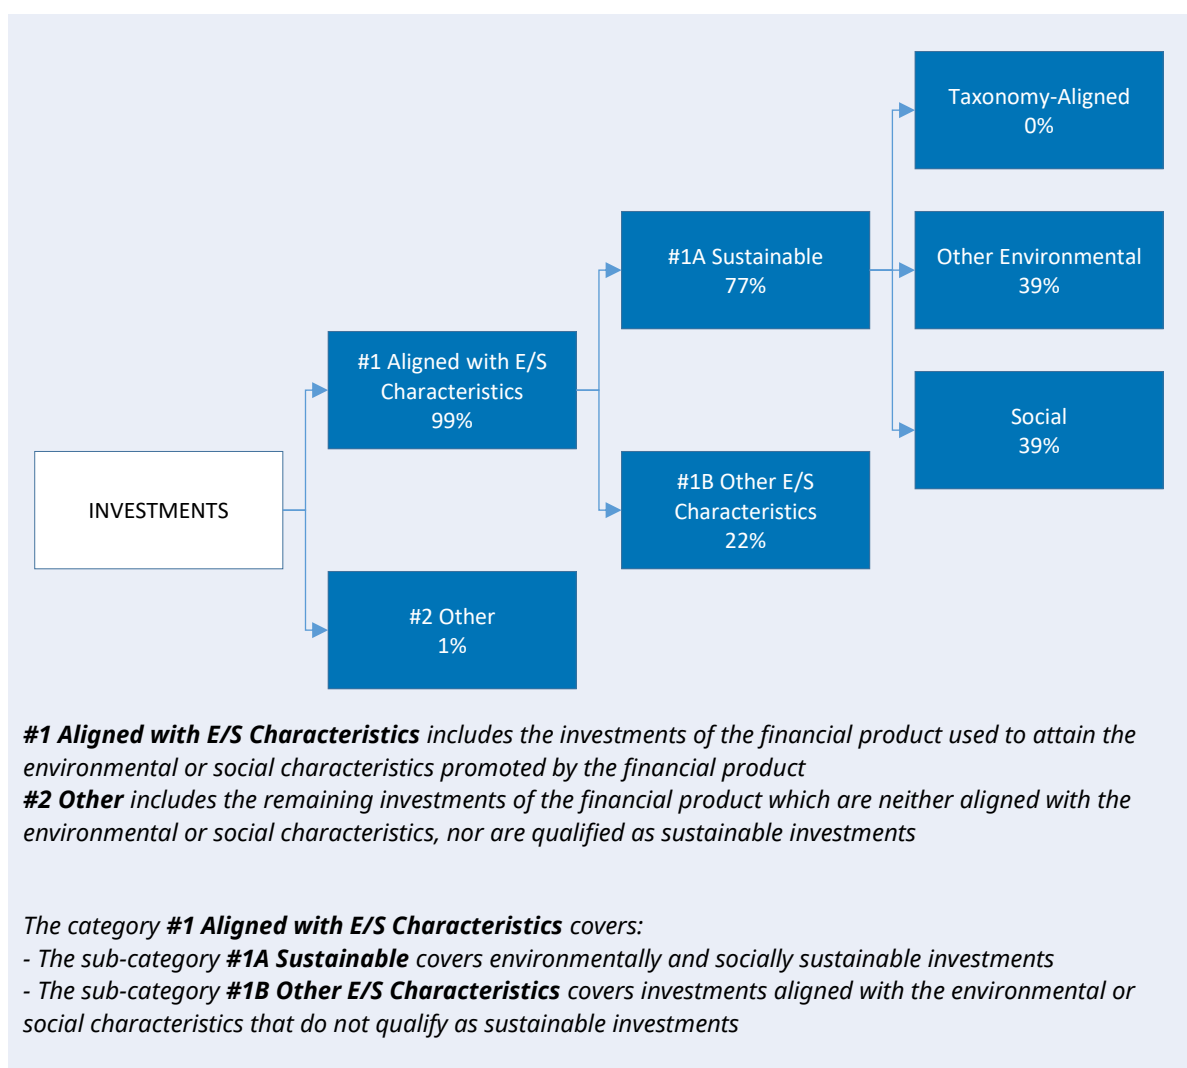

Reference Period: 1 January 2025 - 31 December 2025

Of the Fund's sustainable investments, 39% was invested in sustainable investments with an environmental objective and 39% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

## • In which economic sectors were the investments made?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Banking	12.77
Financial	Financial Services	10.76
Financial	Insurance	3.60
Information Technology	Software & Services	11.98
Information Technology	Semiconductors & Semiconductor Equipment	11.71
Industrial	Capital Goods	12.60
Industrial	Commercial & Professional Services	5.09
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	8.56
Health Care	Health Care Equipment & Services	0.93
Communication Services	Media & Entertainment	6.72
Consumer Discretionary	Consumer Discretionary Distribution & Retail	2.80
Consumer Discretionary	Consumer Services	1.76
Consumer Discretionary	Automobiles & Components	1.12
Consumer Discretionary	Consumer Durables & Apparel	0.38
Consumer Staples	Household & Personal Products	4.79
Materials	Materials	1.55
Real Estate	Equity Real Estate Investment Trusts (REITs)	1.46
Cash	Cash	1.27
Cash Equivalents	Treasury Bills	0.16

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

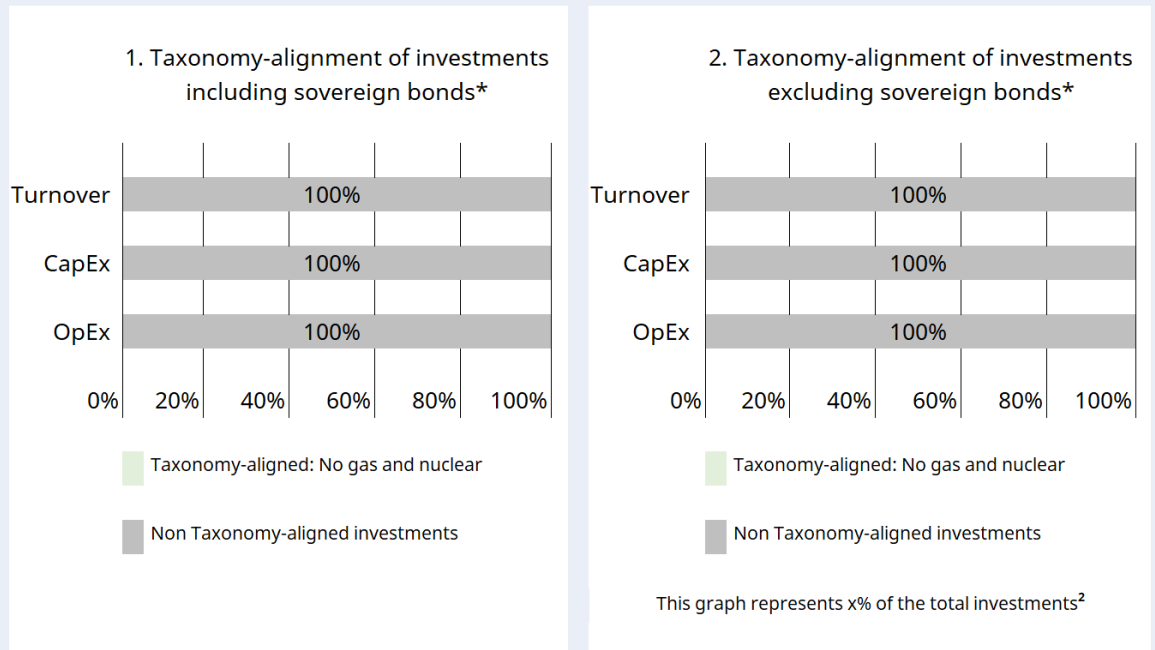

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 39%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 39%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 12 August 2025

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable Infrastructure

**Legal Entity Identifier :** 549300LQDLCTMJKBFO18

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 69%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	<input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 29%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 12 August 2025

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund invested at least 90% of its assets in sustainable investments, which are investments in companies worldwide that the Investment Manager expected to contribute towards the development of global sustainable infrastructure such as sustainable infrastructure assets including regulated energy utilities, renewable energy, water and waste utilities, rail and communications infrastructure.

The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

No reference benchmark has been designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2025 to 12 August 2025, when the Fund was liquidated.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund invested 98% of its assets in sustainable investments. This percentage represents the Fund's holdings at the end of the reference period. The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager assessed whether a certain percentage of the relevant issuer's revenues, capital expenditure or operating expenditure contributed to an environmental or social objective (as applicable). The Investment Manager used several sustainability indicators at an investee company level to measure its contribution to the Fund's sustainability objective. The Fund focused on companies principally involved in more sustainable regulated energy utilities, renewable energy, water and waste utilities, rail and communications infrastructure and avoided less sustainable and lower growth oil & gas infrastructure, roads, airports and port activities. The Investment Manager used a revenue alignment to UN SDGs including UN SDG 6 (Clean Water and Sanitation), UN SDG 7 (Affordable and Clean Energy), UN SDG 9 (Industry, Innovation and Infrastructure), UN SDG 11 (Sustainable Cities and Communities), UN SDG 12 (Responsible Consumption and Production) and UN SDG 13 (Climate Action) using a Schrodgers' proprietary tool as well as the proportion of capital expenditure which contributes to environmental objectives using company reports as well as desk and third party estimates. In addition, the Investment Manager reviewed both company specific and overall portfolio externalities using another Schrodgers' proprietary tool and the portfolio and constituent holdings were also reviewed against external third party ESG ratings.

### • *...and compared to previous periods?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 12 August 2025

## Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 – Aug 2025	98
Jan 2024 - Dec 2024	99

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### • How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

### How were the indicators for adverse impacts on sustainability factors taken into account?

(PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 12 August 2025

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to

PAI 4 (Exposure to companies active in the fossil fuel sector),

PAI 5 (Share of non-renewable energy consumption and production) and

PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste and radioactive waste ratio),

PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 12 August 2025

proprietary research, where relevant.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders’ ‘global norms’ breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

- Emissions and emissions intensity (PAI 1-3) were a particular focus, both absolute and relative to the benchmark. Science based targets, temperature alignment, environmentally contributing capex and emissions intensity (g CO<sub>2</sub>/KWh for power generation) were assessed via various data sources.

- Schroders’ proprietary tools incorporate several PAIs as a component of their scoring methodology. In assessing an issuer’s overall environmental score, PAIs 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) were included. In assessing an issuer’s overall social score, PAIs 12 (Unadjusted gender pay gap) and 13 (Board gender diversity) were included.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 12 August 2025

- PAIs were considered using the proprietary tools as part of analyst coverage of companies. In addition, the issuers' scores and the aggregate impact on the portfolio were considered by the fund managers as part of portfolio construction.

- While individual PAI data was reviewed on an adhoc basis, the entire portfolio and investible universe was reviewed on at least a quarterly basis which can result in some changes to the investible universe (new inclusions and exclusions).

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Electrical Utilities & IPPs industry based in the USA on the subject of Climate mitigation (PAIs 1, 2 and 3). We also held an engagement on the subject of Purpose, strategy and capital allocation (PAI 10) with an issuer in the Electrical Utilities & IPPs industry based in Spain. Additionally, we engaged with an issuer based in the United Kingdom in the Multiline Utilities industry on the subject of Investment in the workforce (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	8
Corporate Governance	3
Human Capital Management	2
Natural Capital and Biodiversity	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 12 August 2025

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 12 Aug 2025**

Largest Investments	Sector	% Assets	Country
NATIONAL GRID PLC ORDINARY 11.395P	Utilities	6.00	United Kingdom
IBERDROLA SA EUR0.75	Utilities	5.85	Spain

UNITED UTILITIES GROUP PLC ORDINARY 5P	Utilities	2.83	United Kingdom

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

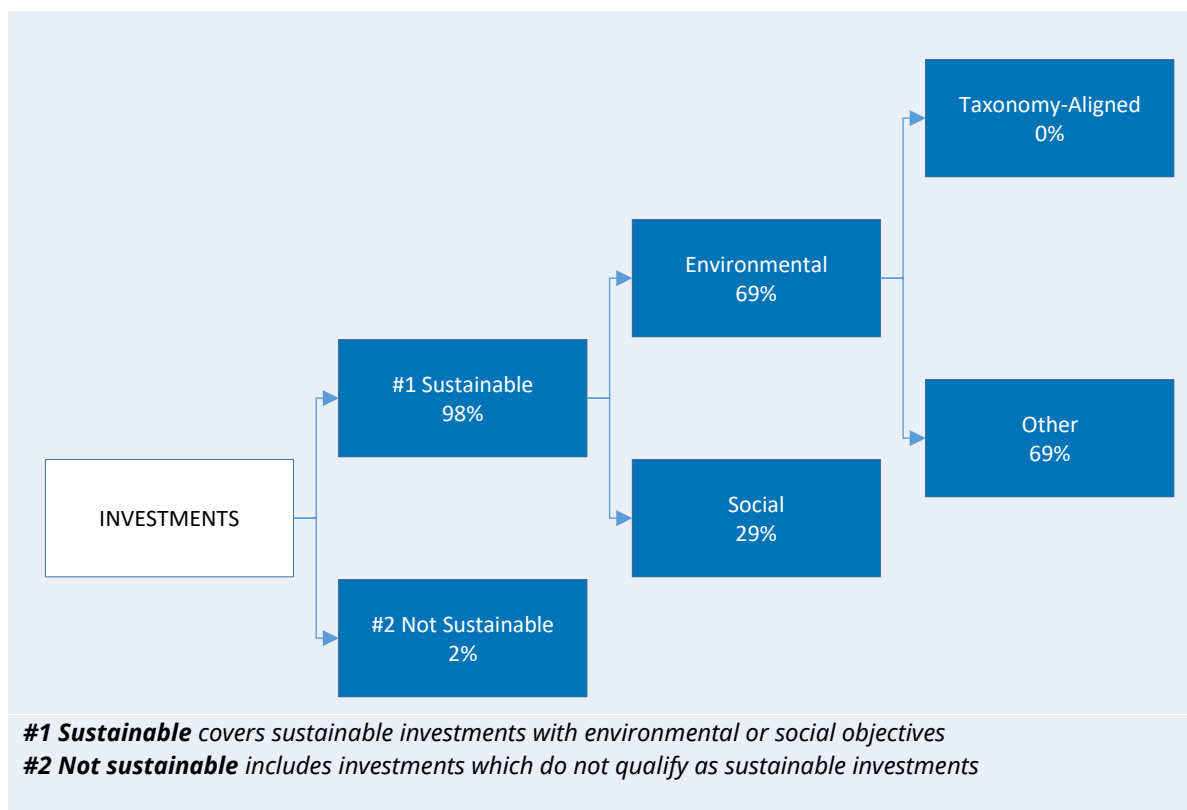

The Fund's investments that were used to meet its sustainable investment objective are summarised below, all figures represent the Fund's holdings as at the final month end during the reference period.

#1 Sustainable are investments in companies worldwide that the Investment Manager expects to contribute towards the development of global sustainable infrastructure. The Fund invested 99% of its assets in sustainable investments. Within this, 69% was invested in sustainable investments with an environmental objective and 29% was invested in sustainable investments with a social objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 12 August 2025

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Utilities	Utilities	76.96
Industrial	Transportation	10.1
Financial	Real Estate	7.85
Communication Services	Telecommunication Services	3.85

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 12 August 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

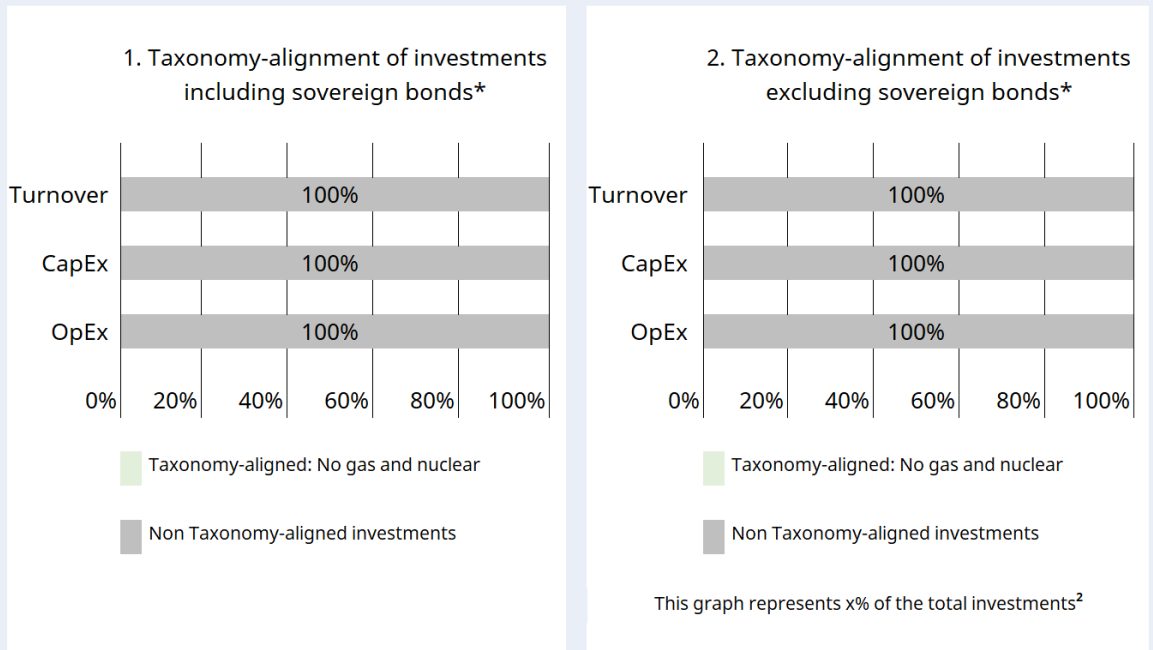

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 12 August 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 12 August 2025

## • How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 69%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 29%.

## What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 12 August 2025

relevant investments from the date they were removed.

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- The Fund invested in companies that did not cause significant environmental or social harm;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Fund invested at least 90% of its assets in sustainable investments, which are investments in companies worldwide that the Investment Manager expected to contribute towards the development of global sustainable infrastructure such as sustainable infrastructure assets including regulated energy utilities, renewable energy, water and waste utilities, rail and communications infrastructure; and
- During the reference period the Investment Manager conducted 14 dedicated sustainability engagements across the investible universe on a number of different topics, including but not limited to decarbonisation and executive compensation. In particular the Investment Manager engaged with companies to understand how companies would fulfil their net zero and renewable energy commitments.

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 12 August 2025

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable Multi-Factor Equity

**Legal Entity Identifier :** 5493007XNHSEG8Q50Z18

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 72% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained

i) a higher overall sustainability score than the MSCI AC World (Net TR) Index, based on the Investment Manager's rating system; and

ii) at least a 50% lower carbon intensity score below that of the MSCI AC World (Net TR) Index, based on the Weighted Average Carbon Intensity (WACI). This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

Carbon intensity is a measure of a portfolio's exposure to carbon-intensive companies. It is expressed as the carbon emissions per million dollars of revenue and displayed as metric tons CO<sub>2</sub>e / \$M revenue. The carbon intensity is measured using data from a third party provider. Where a data point is not available, the provider may make use of estimated data.

The Fund also invested at least 50% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

Disclaimer: Certain information @ MSCI ESG Research LLC. Reproduced by permission.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 3.6% and the benchmark's sustainability score at the end of the reference period was -1.8%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- High Salaries
- Innovation
- Medicine

The Fund's carbon intensity score for the reference period was 39 CO<sub>2</sub>e/\$M and the benchmark's carbon intensity score for the reference period was 111 CO<sub>2</sub>e/\$M. This means that the Fund's carbon intensity score at the end of the reference period was at least 50% lower than the benchmark's carbon intensity score.

The Investment Manager invested 72% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	72
Jan 2024 - Dec 2024	68
Jan 2023 - Dec 2023	62
Aug 2022 - Dec 2022	49

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	3.6	-1.8
Jan 2024 - Dec 2024	4.6	-2.1
Jan 2023 - Dec 2023	5.1	-2.9
Jan 2022 - Dec 2022	3.3	-4.6

### Carbon intensity score

*This table details whether the fund maintained at least a 50% lower carbon intensity score, relative to the benchmark, year on year.*

Period	Fund (CO <sub>2</sub> e/\$M)	Benchmark (CO <sub>2</sub> e/\$M)
Jan 2025 - Dec 2025	39	111
Jan 2024 - Dec 2024	53	119
Jan 2023 - Dec 2023	56	214
Jan 2022 - Dec 2022	72	159

For 2022 the carbon intensity value was calculated as an average over the last three months of the reference period.

For 2023 and 2024 the value is calculated as an average based on quarter-end data.

From 2025 the value is calculated with respect to the Fund's holdings at the end of the reference period.

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

**• *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),
- PAI 8 (Emissions to water),
- PAI 9 (Hazardous waste and radioactive waste ratio),
- PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders’ ‘global norms’ breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company’s overall environmental score.

Our proprietary sustainability framework, which is applied within our Fund’s quantitative investment process, considered several key aspects:

- Greenhouse Gas Emissions: We assessed the emissions of investment companies, including their carbon footprint, to evaluate their impact on climate change: PAIs 1, 2, 3 and 4.

- Fossil Fuel Sector Exposure: We analysed the exposure of companies to the fossil fuel sector, considering their involvement in activities related to fossil fuels: PAIs 1, 2, 3, and 4.

- Biodiversity and Environmental Impact: We evaluated activities that have a negative impact on

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

biodiversity-sensitive areas, as well as emissions to water and hazardous waste: PAIs 7, 8 and 9.  
- Gender Pay Gap and Board Diversity: We considered the unadjusted gender pay gap and the diversity of boards within the companies we invest in: PAIs 12 and 13.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Banking Services industry based in the United Kingdom on the subject of Climate oversight (PAIs 1, 2, 3, 4, 5 and 6). We also held an engagement on the subject of Workers (PAI 10) with an issuer in the Food & Tobacco industry based in Switzerland. Additionally, we engaged with an issuer based in Japan in the Consumer Goods Conglomerates industry on the subject of Boards and management (PAIs 12 and 13).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	54
Corporate Governance	40
Human Rights	39
Diversity and Inclusion	21
Natural Capital and Biodiversity	21
Human Capital Management	18

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country
APPLE INCORPORATED COMMON STOCK NPV	Information Technology	5.06	United States
NVIDIA CORPORATION COMMON STOCK USD0.001	Information Technology	4.40	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 100%. The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

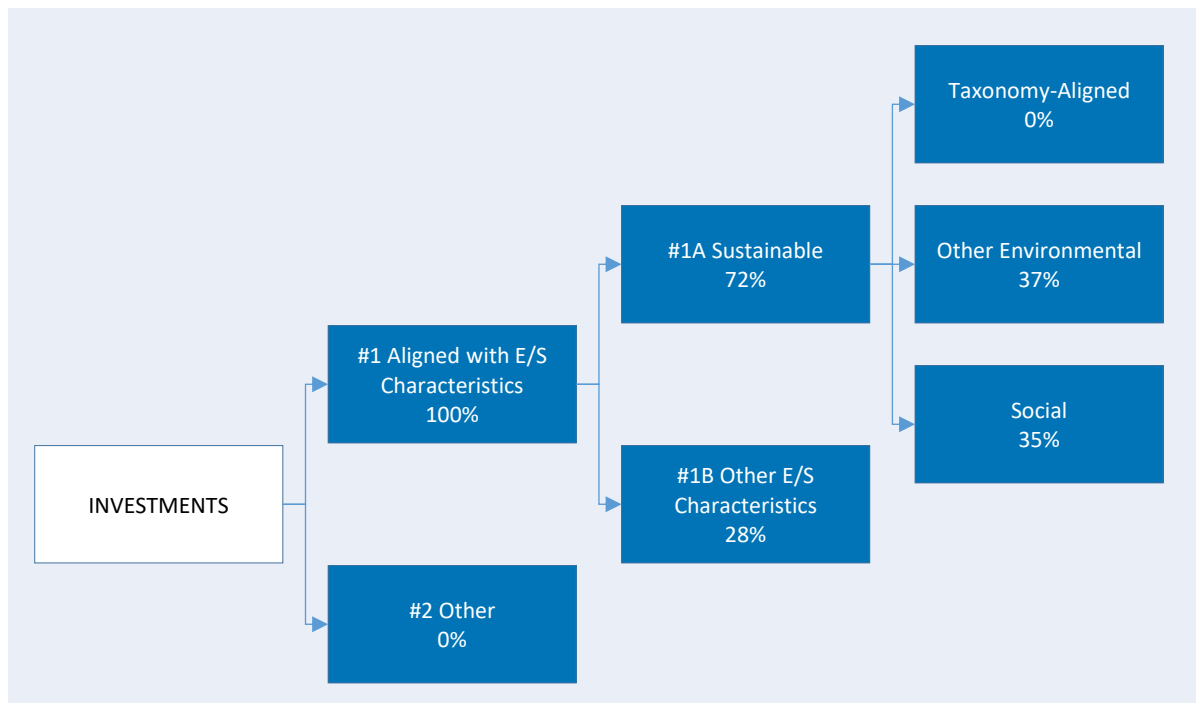

#1A includes the percentage invested in sustainable investments, which is equal to 72%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 37% was invested in sustainable investments with an environmental objective and 35% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	9.83

Cash	Margin Cash	0.02

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

**- turnover**  
reflecting the share of revenue from green activities of investee companies

**- capital expenditure**  
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure** (OpEx) reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 37%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 35%.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score and carbon intensity of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund’s engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question ‘How did this financial product consider principal adverse impacts on sustainability factors?’. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Swiss Small & Mid Cap Equity

**Legal Entity Identifier :** VBUW7DMTWG11EOSYCC70

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 73% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a positive absolute sustainability score, based on Schroders' proprietary tool.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 2.5%. This means that the Fund's score at the end of the reference period was higher than zero. The sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Financial Inclusion
- High Salaries
- Innovation
- Medicine
- Power Provision

The Investment Manager invested 73% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

### • *...and compared to previous periods?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	73
Jan 2024 - Dec 2024	73
Jan 2023 - Dec 2023	81
Aug 2022 - Dec 2022	79

## Sustainability score

*This table details the Fund's sustainability score, year on year*

Period	Fund (%)
Jan 2025 - Dec 2025	2.5
Jan 2024 - Dec 2024	1.8
Jan 2023 - Dec 2023	3.0
Jan 2022 - Dec 2022	3.7

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

### **• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

revenue; and

- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders'

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

As part of the issuer level due diligence process, via company analysis from meetings with management

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

teams and on desk analysis of annual reports and statements, several PAIs were considered.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Machinery, Tools, Heavy Vehicles, Trains & Ships industry based in Switzerland on the subject of Purpose, strategy and capital allocation (PAI 10). We also held an engagement on the subject of Climate mitigation (PAIs 1, 2 and 3) with an issuer in the Food & Tobacco industry based in Switzerland. Additionally, we engaged with an issuer based in Switzerland in the Computers, Phones & Household Electronics industry on the subject of Board diversity and inclusion (PAI 13).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	4
Diversity and Inclusion	2
Climate Change	2
Human Rights	1
Natural Capital and Biodiversity	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country
SCHINDLER HOLDING AG PARTICIPATING CERTIFICATES CHF0.10	Industrial	5.63	Switzerland
LINDT & SPRUENGLI AG PARTICIPATING CERTIFICATES CHF10	Consumer Staples	4.94	Switzerland
SANDOZ GROUP AG CHF0.05	Health Care	4.15	Switzerland
HELVETIA BALOISE HOLDING AG CHF0.1	Financial	3.89	Switzerland
JULIUS BAER GROUP LIMITED CHF0.02	Financial	3.85	Switzerland
GALDERMA GROUP N AG CHF0.01	Health Care	3.56	Switzerland
STRAUMANN HOLDING AG CHF0.01	Health Care	3.42	Switzerland
ACCELLERON N AG CHF0.01	Industrial	3.25	Switzerland
BELIMO HOLDING AG-REG CHF1	Industrial	2.70	Switzerland
GALENICA SANTE LIMITED NPV 144A	Health Care	2.55	Switzerland
BARRY CALLEBAUT AG CHF0.02 (REGISTERED)	Consumer Staples	2.54	Switzerland
SFS GROUP AG CHF0.10	Industrial	2.52	Switzerland
ALSO HOLDING AG CHF1 (REGISTERED)	Information Technology	2.36	Switzerland
SGS SA CHF0.04	Industrial	2.35	Switzerland
ZEHNDER GROUP AG CHF0.05 (REGISTERED)	Industrial	2.28	Switzerland

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 100%. The Fund maintained a positive absolute sustainability score, and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 73%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 38% was invested in sustainable investments with an environmental objective and 34% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

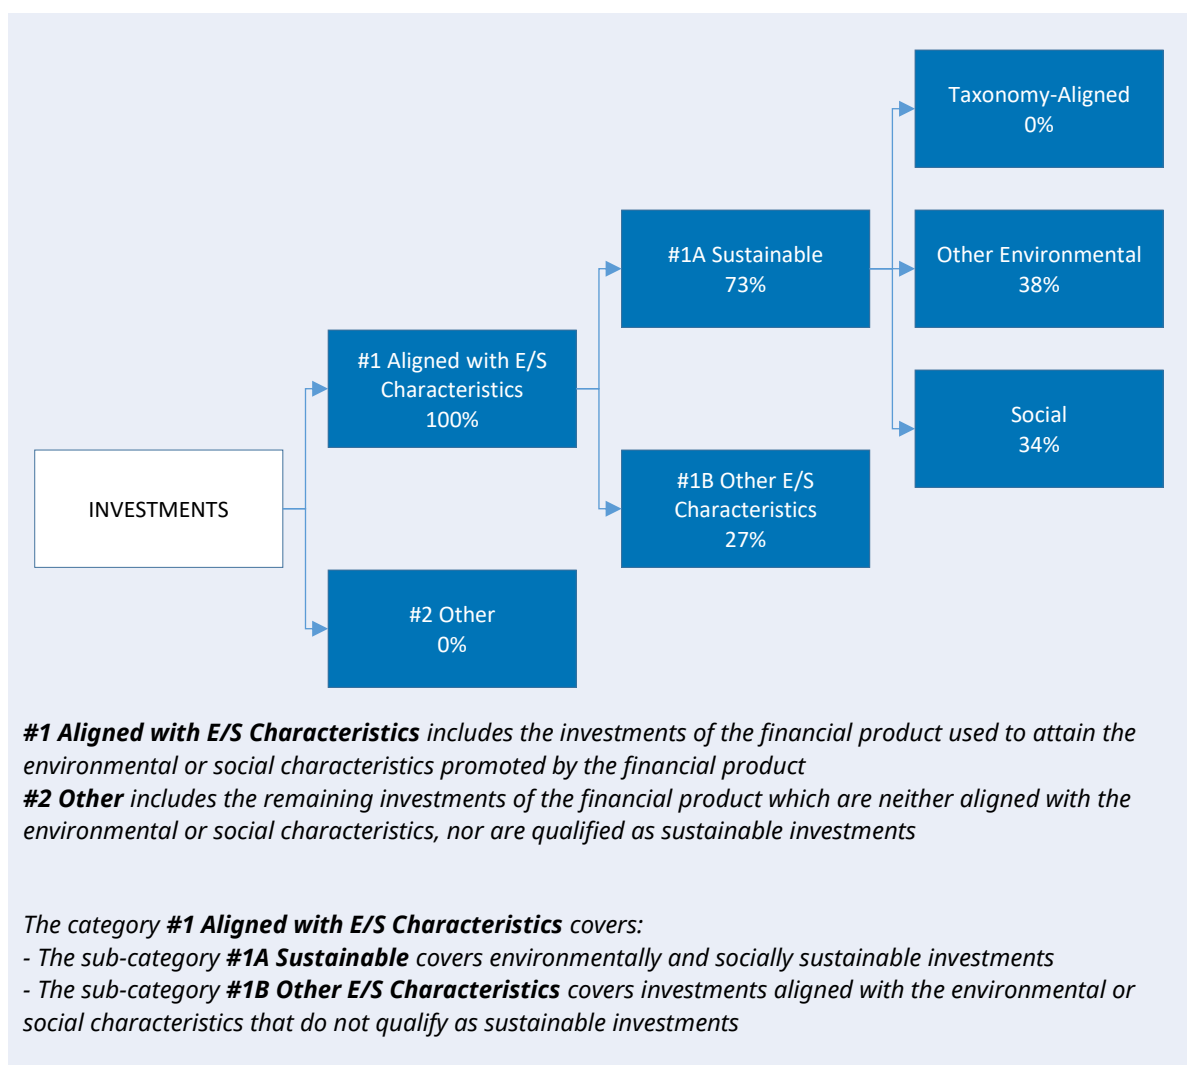

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	30.22
Industrial	Commercial & Professional Services	2.35
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	12.63
Health Care	Health Care Equipment & Services	9.43
Financial	Financial Services	7.77
Financial	Insurance	5.77
Financial	Banking	1.77
Consumer Staples	Food, Beverage & Tobacco	10.46
Information Technology	Technology Hardware & Equipment	6.14
Information Technology	Software & Services	1.98
Information Technology	Semiconductors & Semiconductor Equipment	1.52
Materials	Materials	2.84
Consumer Discretionary	Consumer Durables & Apparel	2.41
Utilities	Utilities	2.26
Real Estate	Real Estate Management & Development	1.74
Cash	Cash	0.36
Communication Services	Media & Entertainment	0.36

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 38%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 34%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF US Small & Mid-Cap Equity

**Legal Entity Identifier :** 9NVHRLTYJON1ZJWFO660

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 64% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the S&P Mid Cap 400 Lagged (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 1.4% and the benchmark's sustainability score at the end of the reference period was -1.0%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 64% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	64
Jan 2024 - Dec 2024	58
Jan 2023 - Dec 2023	58
Aug 2022 - Dec 2022	57

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	1.4	-1.0
Jan 2024 - Dec 2024	1.7	-0.7
Jan 2023 - Dec 2023	1.5	-1.5
Jan 2022 - Dec 2022	1.4	-0.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

applications; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:  
- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):  
PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

reduction initiatives) were included as part of a company's overall environmental score.

We reviewed the PAI data in the PAI dashboard on a monthly basis during the reference period and flagged adverse impacts of PAIs relevant to our strategy which may be of concern.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Oil & Gas industry based in the USA on the subject of Climate oversight (PAIs 1, 2, 3, 4, 5 and 6).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the S&P Mid Cap 400 Lagged (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

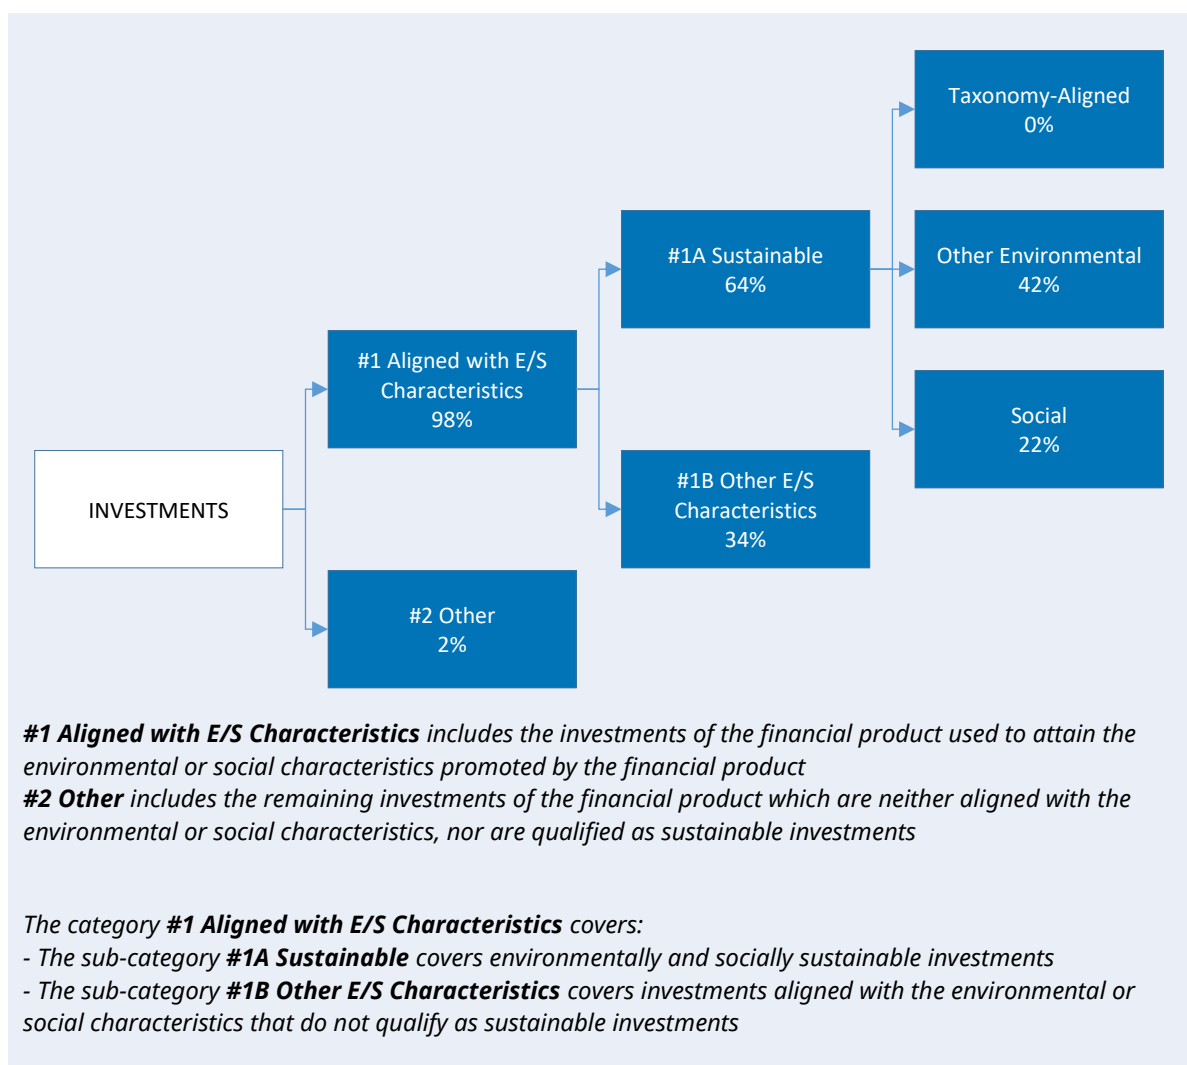

#1A includes the percentage invested in sustainable investments, which is equal to 64%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 42% was invested in sustainable investments with an environmental objective and 22% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	12.14
Industrial	Commercial & Professional Services	7.41
Industrial	Transportation	1.54
Information Technology	Technology Hardware & Equipment	9.03
Information Technology	Software & Services	8.47
Information Technology	Semiconductors & Semiconductor Equipment	3.38
Financial	Banking	5.77
Financial	Insurance	5.69
Financial	Financial Services	3.79
Health Care	Health Care Equipment & Services	9.30
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	2.31
Consumer Discretionary	Consumer Services	4.58
Consumer Discretionary	Consumer Durables & Apparel	3.03
Consumer Discretionary	Consumer Discretionary Distribution & Retail	2.40
Consumer Discretionary	Automobiles & Components	0.99
Materials	Materials	4.26
Energy	Oil & Gas Exploration & Production	2.08
Energy	Oil & Gas Equipment & Services	1.46
Real Estate	Equity Real Estate Investment Trusts (REITs)	3.45
Cash	Cash	2.65
Communication Services	Media & Entertainment	1.38
Communication Services	Telecommunication Services	1.02
Utilities	Utilities	1.78
Utilities	Gas Utilities	0.21
Consumer Staples	Food, Beverage & Tobacco	1.57
Consumer Staples	Household & Personal Products	0.32

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

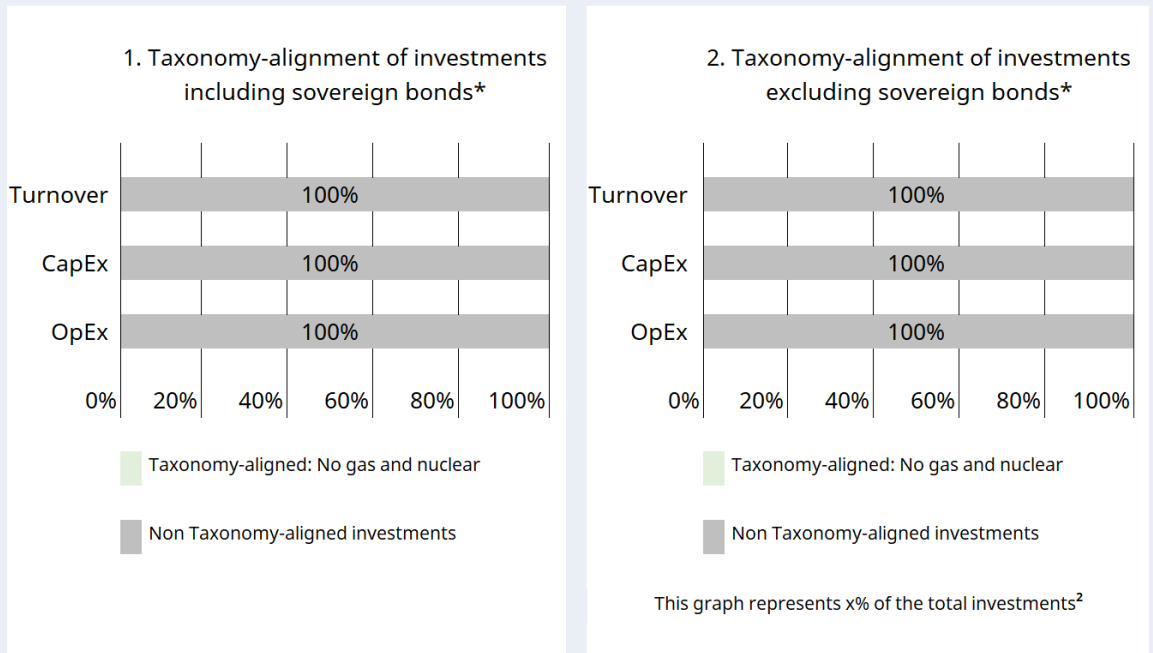

Taxonomy-aligned activities are expressed as a share of:

**- turnover**  
reflecting the share of revenue from green activities of investee companies

**- capital expenditure**  
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure** (OpEx) reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 42%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 22%.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund’s engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question ‘How did this financial product consider principal adverse impacts on sustainability factors?’. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF US Smaller Companies Impact

**Legal Entity Identifier :** RHJGQ85DVCNQ0T8OGL26

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 34%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 62%</b>	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund invested at least 90% of its assets in sustainable investments. The Fund invested in small-sized US companies that the Investment Manager expected to contribute towards the advancement of an environmental or social objective linked to one or more of the UN SDGs, and to deliver returns to shareholders over the long term. The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which was cash.

The Investment Manager selected companies from a universe of eligible companies that were determined as meeting the Investment Manager's impact criteria. The impact criteria included an assessment of the company's contribution to the UN SDGs alongside the Investment Manager's assessment of the company via its proprietary scorecard. The investment process was aligned with the Operating Principles for Impact Management.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • How did the sustainability indicators perform?

The Fund invested 96% of its assets in sustainable investments. This percentage represents the Fund's holdings at the end of the reference period. The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used a combination of a revenue based approach in this assessment, by considering whether a certain percentage of the relevant issuer's revenues, capital expenditure or operating expenditure contributed to an environmental or social objective and specific sustainability key performance indicators to assess the investment's contribution to an environmental or social objective. The Investment Manager used different sustainability indicators to measure the contribution at an investee company level. In particular, the Investment Manager used a quantitative screening tool to identify companies that derive a certain minimum percentage of their revenues from whose main activity is contributing to an environmental or social objective. In addition, there was a detailed impact assessment of every company via the completion of a proprietary scorecard. The impact scorecard focused on the impact that a company's products and services were expected to have.

The Investment Manager considered different aspects of impact such as: what outcome and UN SDGs the company is contributing to; who is served by the outcome (such as the relevant stakeholder or industry); an assessment of our expected contribution (including Schrodgers influence and engagement); and consideration of impact risks. The assessment included tracking Key Performance Indicators (KPIs) that are used to measure and monitor the company's impact over time via an annual review. Examples of the indicators included, revenues generated via the production or distribution of energy-efficient products, or services using a science or engineering-driven approach to reduce CO2 emissions such as natural refrigerants or eco-friendly heat pumps.

Once these steps were completed, the company and scorecard were then validated and approved by Schrodgers' Impact Assessment Group (IAG), in order for the company to be eligible for inclusion in the Fund's investible universe. The IAG consists of members from Schrodgers' impact and sustainable

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

investment teams and members of the investment team.

As at the end of the reference period, the companies in the Fund were aligned with the following four key impact areas; (1) 39% in health and wellness; (2) 26% in inclusion and diversity; (3) 27% in sustainable infrastructure; and (4) 8% in responsible consumption and production.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	96
Jan 2024 - Dec 2024	97
Jan 2023 - Dec 2023	93
Aug 2022 - Dec 2022	95

### Key impact areas

This table details the alignment with the following four key impact areas, year on year.

Period	(1) Health and wellness	(2) Inclusion and diversity	(3) Sustainable infrastructure	(4) Responsible consumption
Jan 2025 - Dec 2025	39%	26%	27%	8%
Jan 2024 - Dec 2024	42%	26%	20%	12%
Jan 2023 - Dec 2023	41%	23%	18%	18%
Aug 2022 - Dec 2022	37%	22%	29%	12%

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste ratio),  
PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

This was done through the stock selection process in underlying strategies. For example, Schroders' proprietary tool, which was used as part of screening the investment universe and for providing a maximum that can be invested in each company, incorporates several PAIs as a component of its scoring methodology. In assessing an issuer's overall environmental score, PAIs 1, 2 and 3 were included. In assessing an issuer's overall social score, PAIs 12 and 13 were included.

We reviewed the PAI data in the PAI dashboard on a monthly basis during the reference period and flagged adverse impacts of PAIs relevant to our strategy which may be of concern.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 6. In reference to PAI 12 and 13, we engaged with a company in the financial sector.

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	14
Human Rights	2
Natural Capital and Biodiversity	1
Climate Change	21
Diversity and Inclusion	11

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What was the proportion of sustainability-related investments?

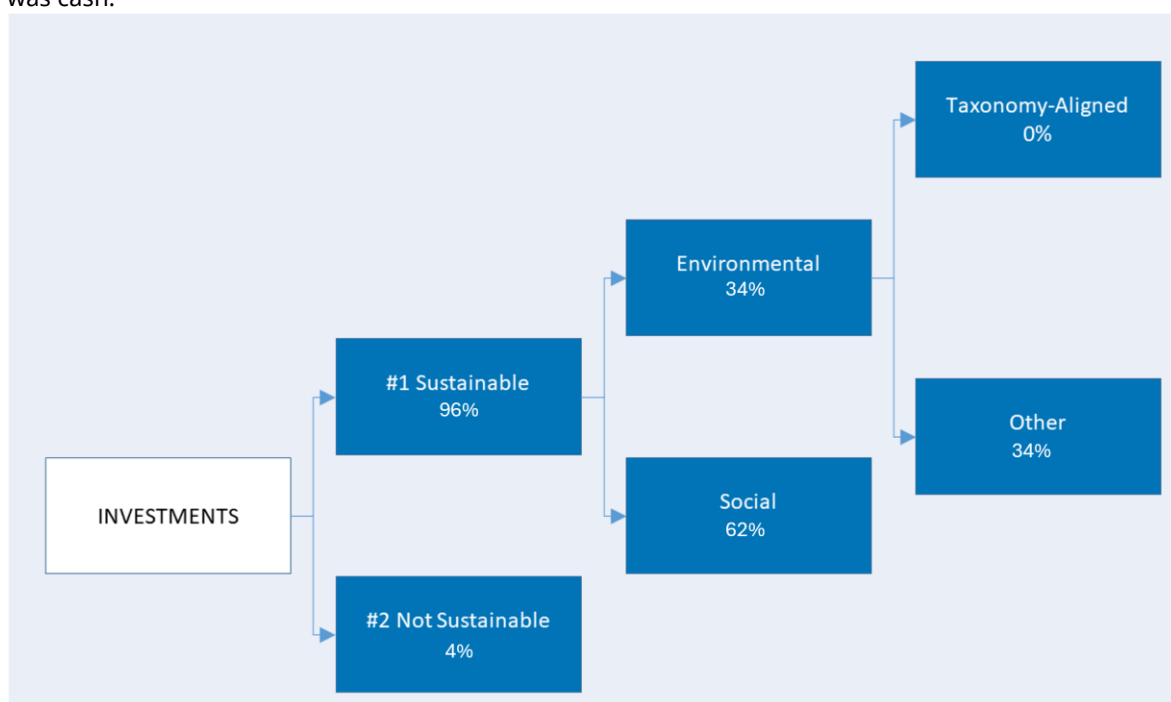

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below, all figures represent the Fund's holdings at the end of the reference period.

#1 Sustainable are investments in small-sized US companies that the Investment Manager expected to contribute towards the advancement of an environmental or social objective linked to one or more of the UN SDGs, and to deliver returns to shareholders over the long term. The Fund invested 96% of its assets in sustainable investments. This percentage represents the Fund's holdings at the end of the reference period. Within this, 34% was invested in sustainable investments with an environmental objective and 62% was invested in sustainable investments with a social objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

**#1 Sustainable** covers sustainable investments with environmental or social objectives

**#2 Not sustainable** includes investments which do not qualify as sustainable investments, including cash

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	13.43
Information Technology	Technology Hardware & Equipment	8.89
Information Technology	Semiconductors & Semiconductor Equipment	1.90
Health Care	Health Care Equipment & Services	17.00
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	6.15
Industrial	Commercial & Professional Services	13.34
Industrial	Capital Goods	9.33
Financial	Banking	7.82
Financial	Insurance	3.69
Materials	Materials	8.25
Cash	Cash	3.56
Consumer Discretionary	Consumer Durables & Apparel	2.78
Consumer Discretionary	Consumer Services	0.38
Utilities	Utilities	2.27
Consumer Staples	Food, Beverage & Tobacco	1.20

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

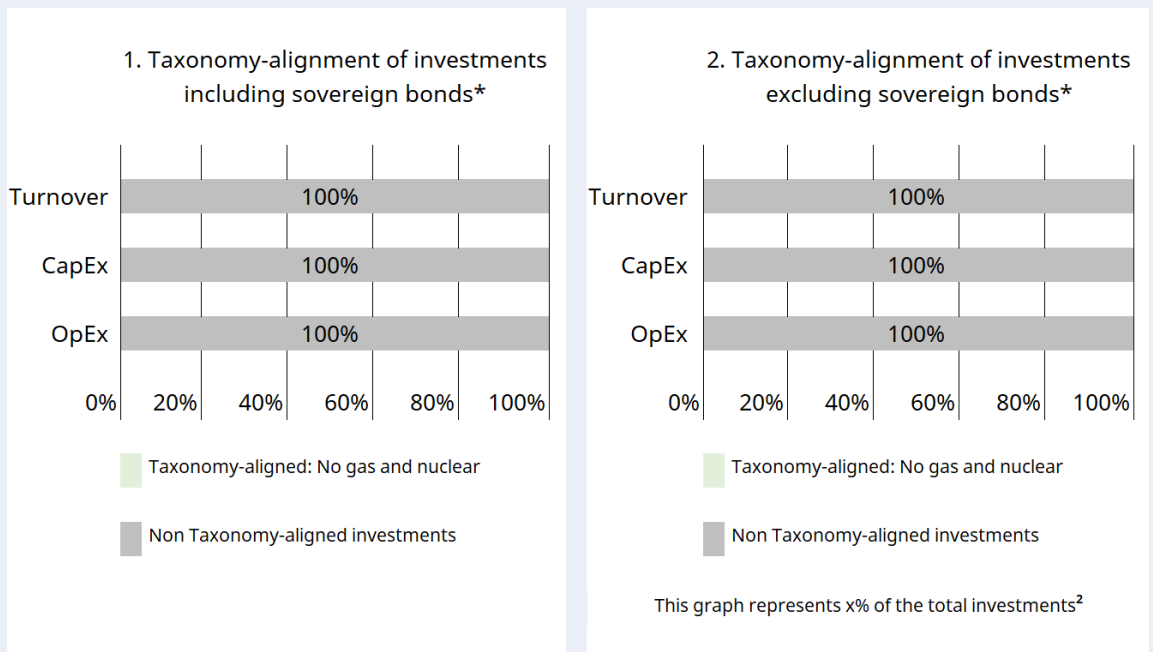

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 34%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 62%.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- The Fund invested in companies that did not cause significant environmental or social harm;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Fund invested at least 90% of its assets in small-sized US companies that the Investment Manager expected to contribute towards the advancement of an environmental or social objective linked to one or more of the UN SDGs, and to deliver returns to shareholders over the long term;
- The Investment Manager divested from a recruitment company because their Diversity, Equity & Inclusion division was not communicating separate results meaning the Investment Manager could not track this metric; and
- The Investment Manager engaged with a sustainable timber company on the role that the company plays in upholding and expanding industry leading sustainable forestry practices. This prompted engagement with multiple stakeholders including the forest certification entity, ESG rating providers and a paper packaging company also held in the Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF QEP Emerging Markets Core

**Legal Entity Identifier :** 54930003F8X2ITJLMY54

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 61% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

On 21 May 2025 the Fund's name changed from Schroder ISF Sustainable Emerging Markets Synergy to Schroder ISF QEP Emerging Markets Core.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets 10/40 (NDR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

On 10 September 2025 Schroder ISF QEP Global Emerging Markets was merged into this Fund.

On 22 December 2025 the Fund's benchmark changed from MSCI Emerging Markets (NDR) index to MSCI Emerging Markets 10/40 (NDR) index.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was -0.2% and the benchmark's sustainability score at the end of the reference period was -3.8%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- Financial Inclusion
- High Salaries

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Innovation

The Investment Manager invested 61% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	61
Jan 2024 - Dec 2024	63
Jan 2023 - Dec 2023	55
Aug 2022 - Dec 2022	51

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark*
Jan 2025 - Dec 2025	-0.2	-3.8
Jan 2024 - Dec 2024	2.0	-3.3
Jan 2023 - Dec 2023	1.5	-2.9
Jan 2022 - Dec 2022	2.8	-3.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

\*On 22 December 2025 the Fund's benchmark changed from MSCI Emerging Markets (NDR) index to MSCI Emerging Markets 10/40 (NDR) index.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend or estimated based on company patent applications.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schrodgers.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Within the proprietary sustainability framework applied within the Fund's quantitative investment process, the following aspects were taken into account:

- Greenhouse gas emissions, greenhouse gas intensity of investment companies (including carbon footprint), exposure to companies active in the fossil fuel sector: PAI 1,2, 3 and 4.
- Activities negatively affecting biodiversity sensitive areas, emissions to water, hazardous waste: PAI 7, 8 and 9.
- Unadjusted gender pay gap, board diversity: PAI 12 and 13.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Automobiles & Auto Parts industry based in South Korea on the subjects of Climate mitigation (PAIs 1, 2 and 3) and Relationship with shareholders (PAI 10). We also held an engagement on the subject of Overarching approach to human rights (PAI 10) with an issuer in the Software & IT Services industry based in China.

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	40
Corporate Governance	16
Human Rights	15
Diversity and Inclusion	10
Human Capital Management	7
Natural Capital and Biodiversity	6

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country

MEDIATEK INCORPORATED TWD10	Information Technology	0.82	Taiwan

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets 10/40 (NDR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

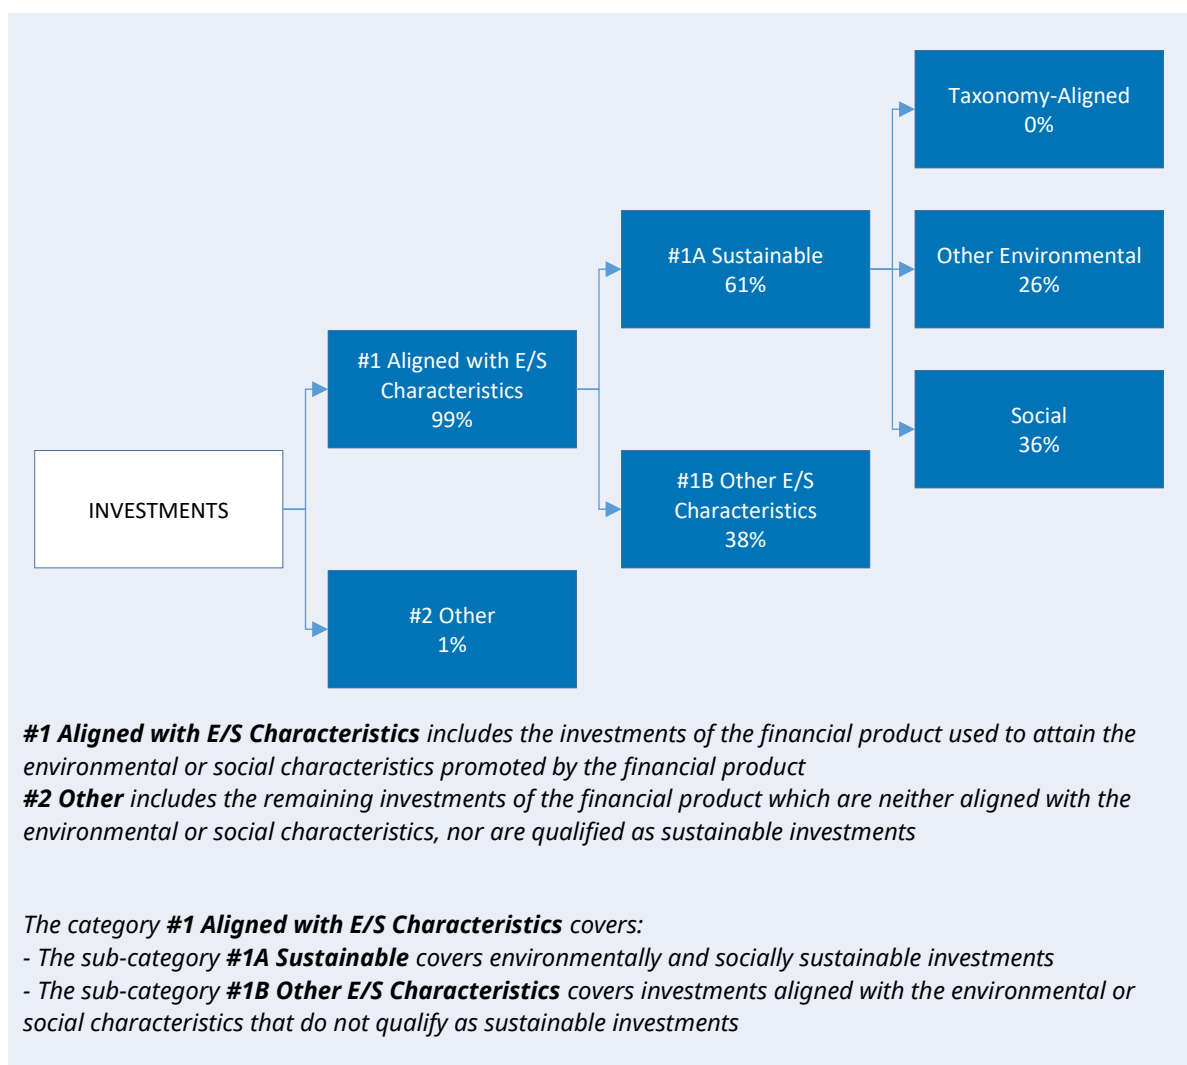

#1A includes the percentage invested in sustainable investments, which is equal to 61%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 26% was invested in sustainable investments with an environmental objective and 36% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

• ***In which economic sectors were the investments made?***

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	13.17
Information Technology	Technology Hardware & Equipment	9.78
Information Technology	Software & Services	1.86
Information Technology	Consumer Discretionary Distribution & Retail	0.15
Financial	Banking	19.70

Cash	Margin Cash	0.07

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 26%.

**What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 36%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF QEP Emerging Markets ex China Core

**Legal Entity Identifier :** 54930047EQ4A8M663C94

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 55% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>	

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

On 21 May 2025 the Fund's name changed from Schroder ISF Sustainable Emerging Markets ex. China Synergy to Schroder ISF QEP Emerging Markets ex. China Core. In January 2025 the Fund changed its benchmark, from MSCI Emerging Markets ex. China (NDR) index to MSCI Emerging Markets ex. China 10/40 (NDR) Index.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets ex. China 10/40 (NDR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was -0.7% and the benchmark's sustainability score at the end of the reference period was -5.0%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- Financial Inclusion
- High Salaries
- Water Access

The Investment Manager invested 55% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	55
Jan 2024 - Dec 2024	57
Jan 2023 - Dec 2023	53

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark*
Jan 2025 - Dec 2025	-0.7	-5.0
Jan 2024 - Dec 2024	2.1	-4.1
Jan 2023 - Dec 2023	1.6	-3.4

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2023 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period. \*In January 2025 the Fund changed its benchmark, from MSCI Emerging Markets ex. China (NDR) index to MSCI Emerging Markets ex. China 10/40 (NDR) Index.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

provision of clean drinking water. Assigned in proportion to company market share of global revenue.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders’ ‘global norms’ breach list which covers:
  - PAI 7 (Activities negatively affecting biodiversity-sensitive areas),
  - PAI 8 (Emissions to water),
  - PAI 9 (Hazardous waste ratio),
  - PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),
  - PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and
  - PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

Within the proprietary sustainability framework applied within the Fund’s quantitative investment process, the following aspects were taken into account:

- Greenhouse gas emissions, greenhouse gas intensity of investment companies (including carbon footprint), exposure to companies active in the fossil fuel sector: PAI 1, 2, 3 and 4.
- Activities negatively affecting biodiversity sensitive areas, emissions to water, hazardous waste: PAI 7, 8 and 9.
- Unadjusted gender pay gap, board diversity: PAI 12 and 13.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

We engaged with an issuer in the Banking Services industry based in India on the subject of Just Transition and Resilience (PAIs 1, 2, 3, 4, 5 and 6). We also held an engagement on the subject of Relationship with shareholders (PAI 10) with an issuer in the Automobiles & Auto Parts industry based in South Korea. Additionally, we engaged with an issuer based in South Africa in the Metals & Mining industry on the subject of Workers (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	28
Corporate Governance	13
Diversity and Inclusion	8
Human Rights	8
Human Capital Management	4
Natural Capital and Biodiversity	3

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	9.26	Taiwan
SAMSUNG ELECTRONICS COMPANY LIMITED KRW100	Information Technology	4.96	South Korea

RELIANCE INDUSTRIES LIMITED INR10 (DEMAT)	Energy	1.34	India
HON HAI PRECISION INDUSTRY COMPANY LIMITED TWD10	Information Technology	1.31	Taiwan
ISHARES MSCI EM EX-CHINA UCITS ETF	Collective Investments	1.23	Ireland
BHARTI AIRTEL LIMITED INR5	Communication Services	1.19	India
MEDIATEK INCORPORATED TWD10	Information Technology	1.19	Taiwan
PETROLEO BRASILEIRO SA PREFERENCE SHARES NPV	Energy	1.02	Brazil
AL RAJHI BANK SAR10	Financial	0.96	Saudi Arabia
DELTA ELECTRONICS INCORPORATED TWD10	Information Technology	0.95	Taiwan
ITAU UNIBANCO HOLDING SA PREFERENCE SHARES NPV	Financial	0.90	Brazil
INFOSYS LIMITED INR5 (DEMAT)	Information Technology	0.88	India

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 96%. The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets ex. China 10/40 (NDR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 55%. To be classified

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

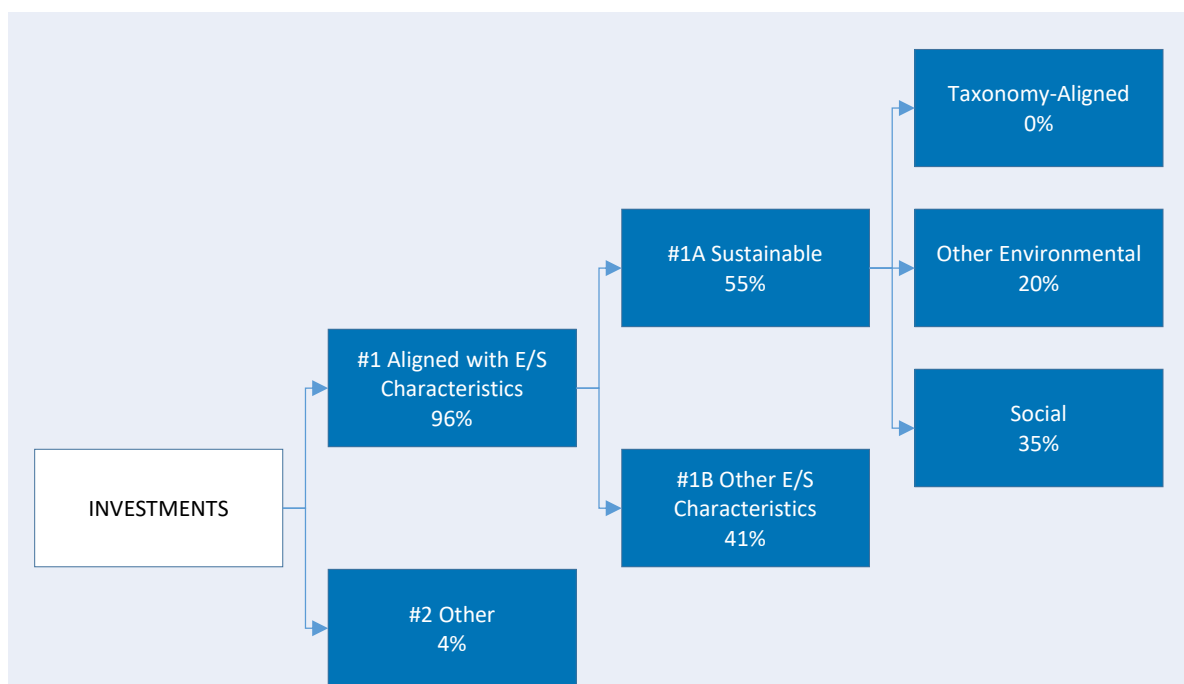

as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 20% was invested in sustainable investments with an environmental objective and 35% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Banking	25.41
Financial	Financial Services	2.62
Financial	Insurance	2.62
Information Technology	Semiconductors & Semiconductor Equipment	14.00
Information Technology	Technology Hardware & Equipment	10.89
Information Technology	Software & Services	2.98
Information Technology	Consumer Discretionary Distribution & Retail	0.23
Industrial	Capital Goods	4.08
Industrial	Transportation	2.94
Industrial	Commercial & Professional Services	0.39
Communication Services	Telecommunication Services	6.17
Communication Services	Media & Entertainment	0.89
Consumer Discretionary	Automobiles & Components	2.83
Consumer Discretionary	Consumer Discretionary Distribution & Retail	2.05
Consumer Discretionary	Consumer Durables & Apparel	1.08
Consumer Discretionary	Consumer Services	0.63
Consumer Staples	Food, Beverage & Tobacco	2.69
Consumer Staples	Household & Personal Products	0.80
Consumer Staples	Consumer Staples Distribution & Retail	0.65
Energy	Integrated Oil & Gas	2.13
Energy	Oil & Gas Refining & Marketing	1.49
Energy	Energy	0.29
Energy	Oil & Gas Exploration & Production	0.10
Materials	Materials	3.56
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	2.17
Health Care	Health Care Equipment & Services	0.70
Utilities	Utilities	2.14
Utilities	Gas Utilities	0.24
Collective Investments	Exchange Traded Funds	1.23
Real Estate	Real Estate Management & Development	1.13
Cash	Cash	0.85

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 20%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 35%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF QEP Global Core

**Legal Entity Identifier :** DKBB2F7UTNGYHT4AM790

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 60% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 2.3% and the benchmark's sustainability score at the end of the reference period was -1.5%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 60% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	60
Jan 2024 - Dec 2024	60
Jan 2023 - Dec 2023	52
Aug 2022 - Dec 2022	46

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	2.3	-1.5
Jan 2024 - Dec 2024	2.2	-1.9
Jan 2023 - Dec 2023	0.7	-2.9
Jan 2022 - Dec 2022	-1.2	-4.7

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

applications; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:  
- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):  
PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).  
PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

Within the proprietary sustainability framework applied within the Fund's quantitative investment process, the following aspects were taken into account:

- Greenhouse gas emissions, greenhouse gas intensity of investment companies (including carbon

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

footprint), exposure to companies active in the fossil fuel sector: PAI 1,2, 3 and 4.

- Activities negatively affecting biodiversity sensitive areas, emissions to water, hazardous waste: PAI 7, 8 and 9.

- Unadjusted gender pay gap, board diversity: PAI 12 and 13.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Metals & Mining industry based in the United Kingdom on the subject of Climate solutions (PAIs 1, 2, 3 and PAI 4 in table 2). We also held an engagement on the subject of Boards and management (PAIs 12 and 13) with an issuer in the Specialty Retailers industry based in Spain. Additionally, we engaged with an issuer based in the United Kingdom in the Personal & Household Products & Services industry on the subject of Workers (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	91
Human Rights	59
Corporate Governance	56
Natural Capital and Biodiversity	34
Human Capital Management	30
Diversity and Inclusion	23

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schrodgers Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI World (Net TR) Index and so the Fund's investments that were scored by Schrodgers' proprietary sustainability tool are included within #1 on the basis that they contributed to

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

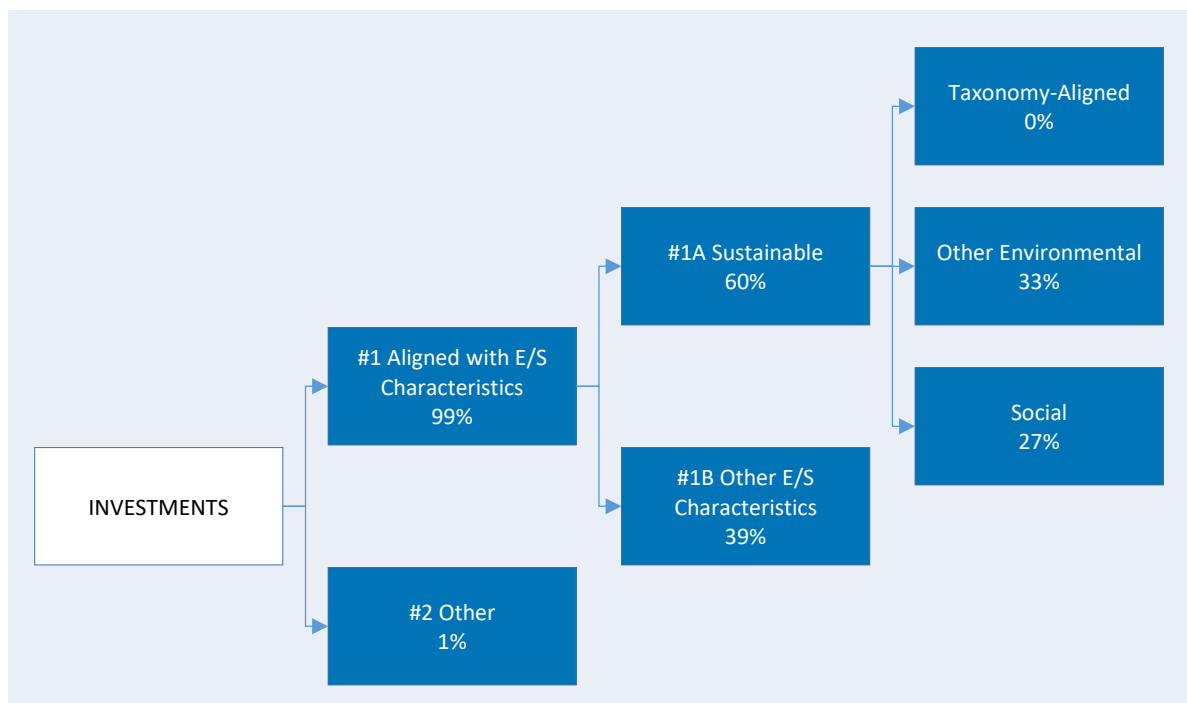

#1A includes the percentage invested in sustainable investments, which is equal to 60%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 33% was invested in sustainable investments with an environmental objective and 27% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	9.92

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 33%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 27%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF QEP Global ESG

**Legal Entity Identifier :** 549300Z3MJ4K5RFG8R15

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 64% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC World ex. Fossil Fuels (Net TR) index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 40% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

On 14 May 2025 Schroder ISF QEP Global ESG ex Fossil Fuels was merged into this Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 3.2% and the benchmark's sustainability score at the end of the reference period was -1.2%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Medicine

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The Investment Manager invested 64% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	64
Jan 2024 - Dec 2024	63
Jan 2023 - Dec 2023	57
Aug 2022 - Dec 2022	58

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark* (%)
Jan 2025 - Dec 2025	3.2	-1.2
Jan 2024 - Dec 2024	2.8	-2.9
Jan 2023 - Dec 2023	1.5	-2.9
Jan 2022 - Dec 2022	1.9	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

\*In January 2025 the Fund's benchmark changed from MSCI AC World (Net TR) index to MSCI AC World ex. Fossil Fuels (Net TR) index.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

Within the proprietary sustainability framework applied within the Fund's quantitative investment process, the following aspects were taken into account:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Greenhouse gas emissions, greenhouse gas intensity of investment companies (including carbon footprint), exposure to companies active in the fossil fuel sector: PAI 1, 2, 3 and 4.
- Activities negatively affecting biodiversity sensitive areas, emissions to water, hazardous waste: PAI 7, 8 and 9.
- Unadjusted gender pay gap, board diversity: PAI 12 and 13.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Banking Services industry based in Canada on the subject of Climate mitigation (PAIs 1, 2 and 3). We also held an engagement on the subject of Workers (PAI 10) with an issuer in the Computers, Phones & Household Electronics industry based in the USA. Additionally, we engaged with an issuer based in Japan in the Consumer Goods Conglomerates industry on the subject of Boards and management (PAIs 12 and 13).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	83
Human Rights	55
Corporate Governance	45
Human Capital Management	29
Natural Capital and Biodiversity	29
Diversity and Inclusion	18

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI AC World ex. Fossil Fuels (Net TR) index and so the Fund's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

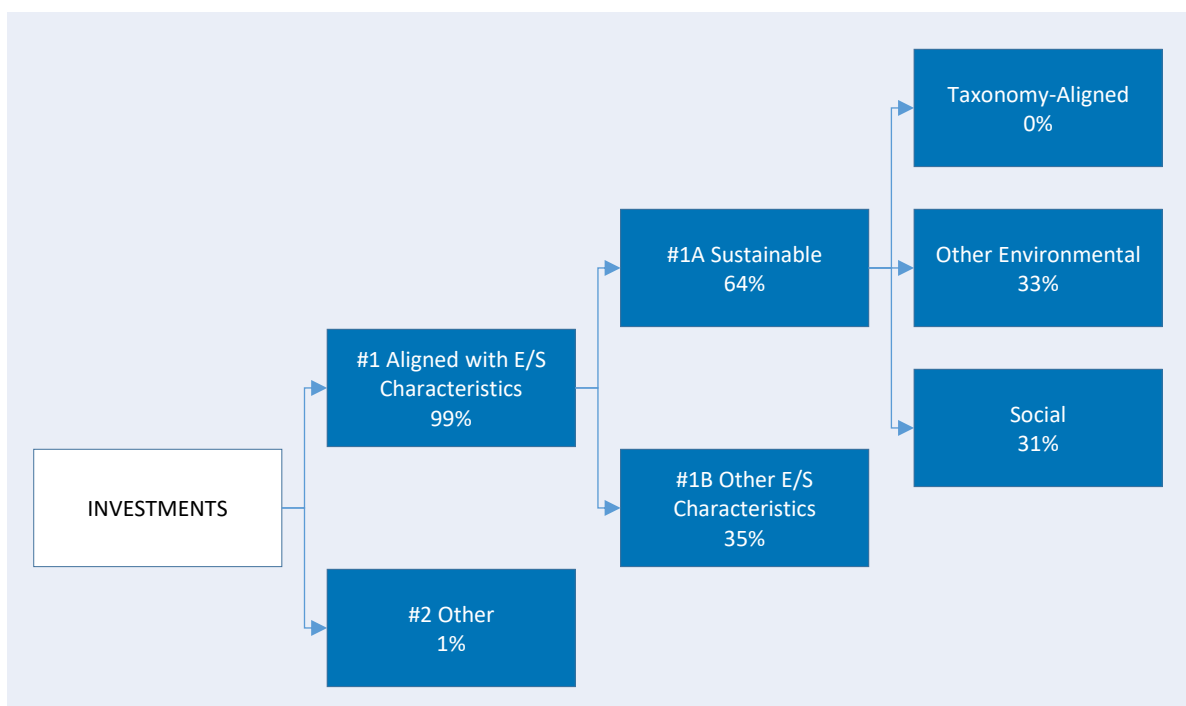

#1A includes the percentage invested in sustainable investments, which is equal to 64%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 33% was invested in sustainable investments with an environmental objective and 31% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	10.84
Information Technology	Software & Services	9.98
Information Technology	Technology Hardware & Equipment	7.43

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 33%.

## **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 31%.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF QEP Global Quality  
**Legal Entity Identifier :** AOE3GPC0XP7JH5DJTH02

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 59% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 1.9% and the benchmark's sustainability score at the end of the reference period was -1.8%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 59% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	59
Jan 2024 - Dec 2024	63
Jan 2023 - Dec 2023	58
Aug 2022 - Dec 2022	57

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	1.9	-1.8
Jan 2024 - Dec 2024	2.5	-2.1
Jan 2023 - Dec 2023	1.0	-2.9
Jan 2022 - Dec 2022	-0.5	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

applications; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:  
- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):  
PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

Within the proprietary sustainability framework applied within the Fund's quantitative investment process, the following aspects were taken into account:

- Greenhouse gas emissions, greenhouse gas intensity of investment companies (including carbon

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

footprint), exposure to companies active in the fossil fuel sector: PAI 1,2, 3 and 4.

- Activities negatively affecting biodiversity sensitive areas, emissions to water, hazardous waste: PAI 7, 8 and 9.

- Unadjusted gender pay gap, board diversity: PAI 12 and 13.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Construction Materials industry based in Germany on the subject of Climate solutions (PAIs 1, 2, 3 and PAI 4 in table 2). We also held an engagement on the subject of Workers (PAI 10) with an issuer in the Specialty Retailers industry based in Spain. Additionally, we engaged with an issuer based in Spain in the Electrical Utilities & IPPs industry on the subject of Purpose, strategy and capital allocation (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	84
Human Rights	52
Corporate Governance	46
Natural Capital and Biodiversity	29
Human Capital Management	24
Diversity and Inclusion	19

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 100%. The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index and so the Fund's investments that were

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

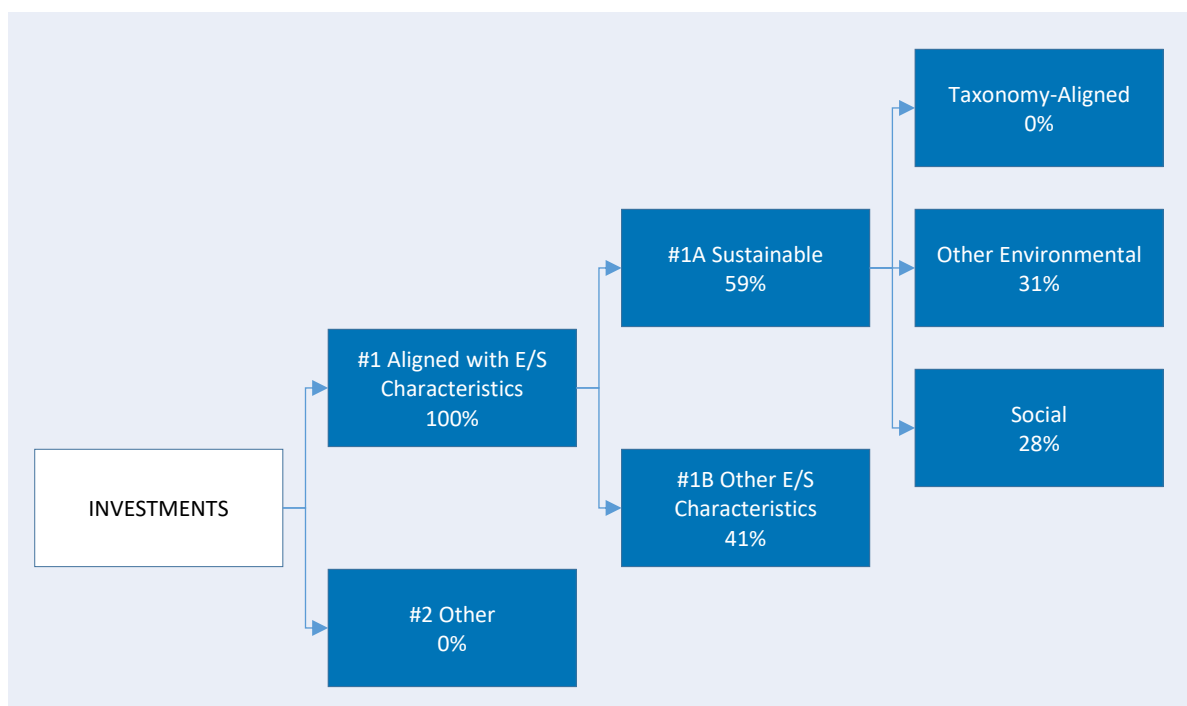

#1A includes the percentage invested in sustainable investments, which is equal to 59%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 31% was invested in sustainable investments with an environmental objective and 28% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 31%.

**What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 28%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Dynamic Income

**Legal Entity Identifier :** 6367003LO6P8ZSCB6R06

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 49% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than a bespoke asset-weighted blend of MSCI World Index (USD), MSCI Emerging Market Index (USD), Bloomberg Global Aggregate Corporate Bond Index (USD), Bloomberg Global High Yield excl. CMBS & EMD 2% Index (USD), ICE BofA US Treasury Index (USD), JPM GBI Emerging Market Index - EM Local (USD), JPM EMBI Index EM Hard Currency (USD), FTSE Global Convertible Bonds Index (USD), based on the Investment Manager's rating system. The component benchmarks (which are each respectively a broad market index) are not reference benchmarks for the purposes of the environmental and social characteristics promoted by the Fund. The blend evolved during the reference period in line with the actual asset allocation of the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 0.0% and the benchmark's sustainability score at the end of the reference period was -1.0%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Connectivity
- High Salaries
- Innovation
- Medicine
- Power Provision

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The Investment Manager invested 49% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	49
Jan 2024 - Dec 2024	55

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	0.0	-1.0
Jan 2024 - Dec 2024	0.6	-1.2

For 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

For 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant Investment Manager where applicable. All PAI indicators are monitored via Schroders PAI dashboard. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators and Schroders' 'global norms' breach list which covers:
  - PAI 7 (Activities negatively affecting biodiversity-sensitive areas),
  - PAI 8 (Emissions to water),
  - PAI 9 (Hazardous waste ratio),
  - PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),
  - PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and
  - PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

This was done through the stock selection process in underlying strategies. For example, Schroders' proprietary tool, which was used as part of screening the investment universe and for providing a maximum that can be invested in each company, incorporates several PAIs as a component of its scoring methodology. In assessing an issuer's overall environmental score, PAIs 1, 2 and 3 were included. In assessing an issuer's overall social score, PAIs 12 and 13 were included.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Other PAIs were considered via active ownership, which was performed indirectly via the underlying Investment Managers. Where applicable, based on the underlying strategies and the relevant Investment Manager's own investment process,

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Oil & Gas industry based in the United Kingdom on the subject of Climate mitigation (PAIs 1, 2 and 3). We also held an engagement on the subject of Transparency, risk and reporting (PAI 10) with an issuer in the Software & IT Services industry based in the USA. Additionally, we engaged with an issuer based in the United Kingdom in the Personal & Household Products & Services industry on the subject of Workers (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	130
Corporate Governance	75
Human Rights	67
Natural Capital and Biodiversity	46
Human Capital Management	35
Diversity and Inclusion	29

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 88%. The Fund maintained a higher overall sustainability score than a bespoke asset-weighted blend of the MSCI World Index (USD), MSCI Emerging Market Index (USD), Bloomberg Global Aggregate Corporate Bond Index (USD), Bloomberg Global High Yield excl. CMBS & EMD 2% Index (USD), ICE BofA US Treasury Index (USD), JPM GBI Emerging Market Index - EM Local (USD), JPM EMBI Index EM Hard Currency (USD), FTSE Global Convertible Bonds Index (USD) and so the Fund's investments that were scored by Schroders'

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 49%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

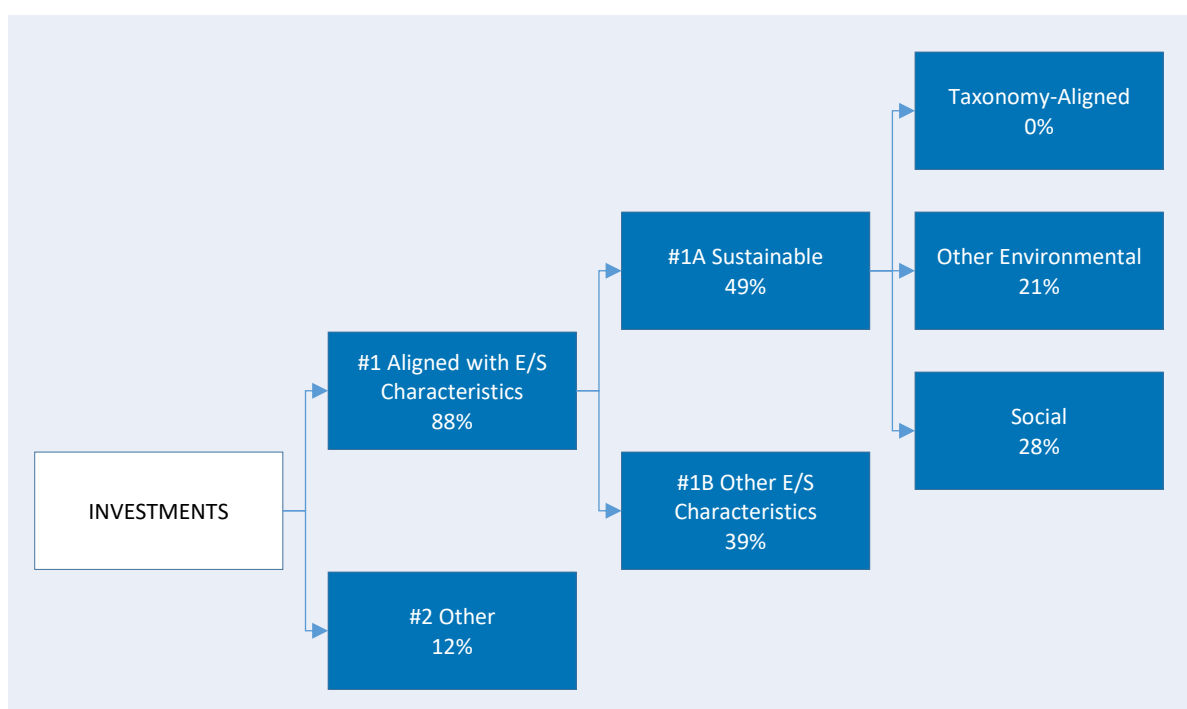

Of the Fund's sustainable investments, 21% was invested in sustainable investments with an environmental objective and 28% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	6.21
Industrial	Real Estate	3.14
Industrial	Healthcare	2.67
Industrial	Telecommunications	2.60
Industrial	Leisure	2.53

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

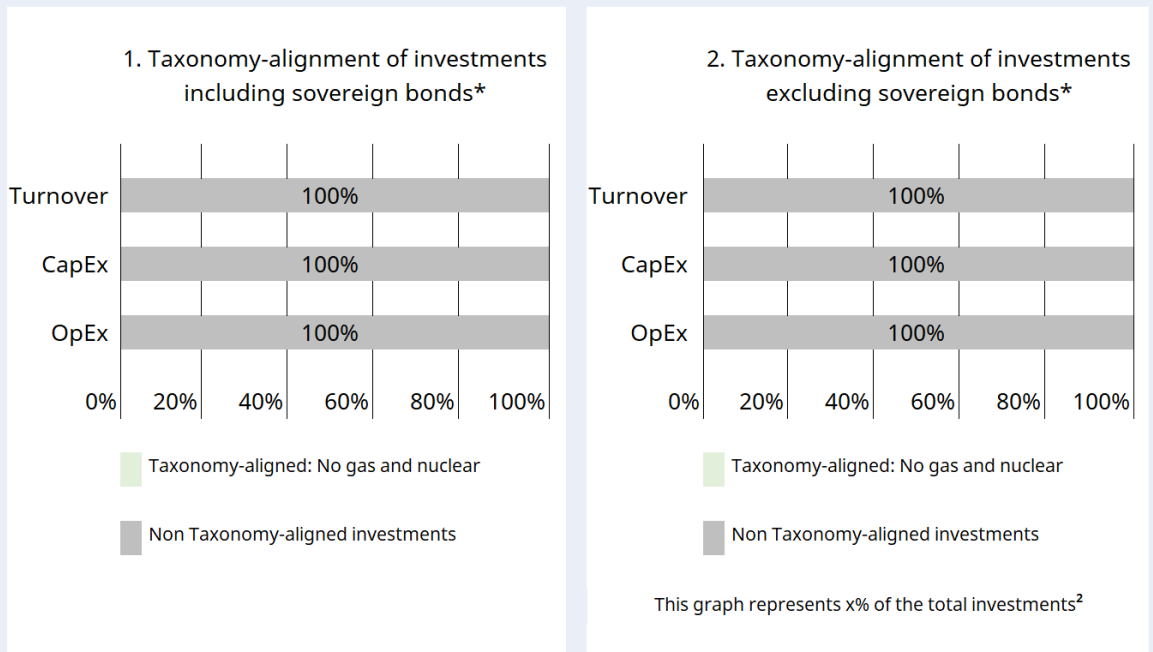

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

• **What was the share of investments made in transitional and enabling activities?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 21%.

**What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 28%.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Dynamic Opportunities

**Legal Entity Identifier :** 5493002E4JUCFUL6QF10

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 47% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

On 08 April 2025 the Fund's name changed from Schroder ISF Sustainable Future Trends to Schroder ISF Dynamic Opportunities.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI World Index (hedged to EUR), MSCI Emerging Market Index (hedged to EUR), Barclays Global Aggregate Corporate Bond Index (hedged to EUR), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to EUR), ICE BofA US Treasury Index (hedged to EUR), JPM GBI Emerging Market Index - EM Local (hedged to EUR), JPM EMBI Index EM Hard Currency (hedged to EUR), Thomson Reuters Global Convertible Bonds Index (hedged to EUR), based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 2.5% and the benchmark's sustainability score at the end of the reference period was -0.8%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- Innovation
- Medicine
- Water Access

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The Investment Manager invested 47% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	47
Jan 2024 - Dec 2024	70
Jan 2023 - Dec 2023	71
Aug 2022 - Dec 2022	65

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	2.5	-0.8
Jan 2024 - Dec 2024	5.2	-1.5
Jan 2023 - Dec 2023	7.9	-2.2
Jan 2022 - Dec 2022	4.0	-2.5

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

Prior to 2024 our methodology to calculate the percentage of sustainable investments did not take into account investments in other funds, which may have resulted in lower figures. In 2024 Schroder Sustainable funds were included within the calculation. This calculation was performed at fund level and not at the level of the individual underlying holdings, so the figure shown may be higher than if the underlying holdings were evaluated. Other non-Schroders funds held were not included in the calculation. From 2025 the underlying holdings of all Schroders funds were individually evaluated and contributed to the Fund's sustainable investment percentage. Non-Schroders funds held were not included in the calculation.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant Investment Manager where applicable. All PAI indicators are monitored via Schroders PAI dashboard. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:
  - PAI 7 (Activities negatively affecting biodiversity-sensitive areas),
  - PAI 8 (Emissions to water),
  - PAI 9 (Hazardous waste ratio),
  - PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),
  - PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

This was done through the stock selection process in underlying strategies. For example, Schroders' proprietary tool, which was used as part of screening the investment universe and for providing a maximum that can be invested in each company, incorporates several PAIs as a component of its scoring methodology. In assessing an issuer's overall environmental score, PAIs 1, 2 and 3 were included. In assessing an issuer's overall social score, PAIs 12 and 13 were included.

Other PAIs were considered via active ownership, which was performed indirectly via the underlying Investment Managers. Where applicable, based on the underlying strategies and the relevant Investment Manager's own investment process,

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Food & Drug Retailing industry based in the United Kingdom on the subject of Climate adaptation (PAIs 1, 2, 3, 4, 5 and 6). We also held an engagement on the subject of Customers and consumers (PAI 10) with an issuer in the Pharmaceuticals industry based in Switzerland. Additionally, we engaged with an issuer based in Spain in the Specialty Retailers industry on the subject of Transparency, risk and reporting (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	70
Human Rights	50
Corporate Governance	37
Natural Capital and Biodiversity	26
Human Capital Management	24
Diversity and Inclusion	16

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 76%. The Fund maintained a higher overall sustainability score than the MSCI World Index (hedged to EUR), MSCI Emerging Market Index (hedged to EUR), Barclays Global Aggregate Corporate Bond Index (hedged to EUR), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to EUR), ICE BofA US Treasury Index (hedged to EUR), JPM GBI Emerging Market Index - EM Local (hedged to EUR), JPM EMBI Index EM Hard Currency (hedged to EUR),

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Thomson Reuters Global Convertible Bonds Index (hedged to EUR) and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 47%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

Of the Fund's sustainable investments, 26% was invested in sustainable investments with an environmental objective and 21% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

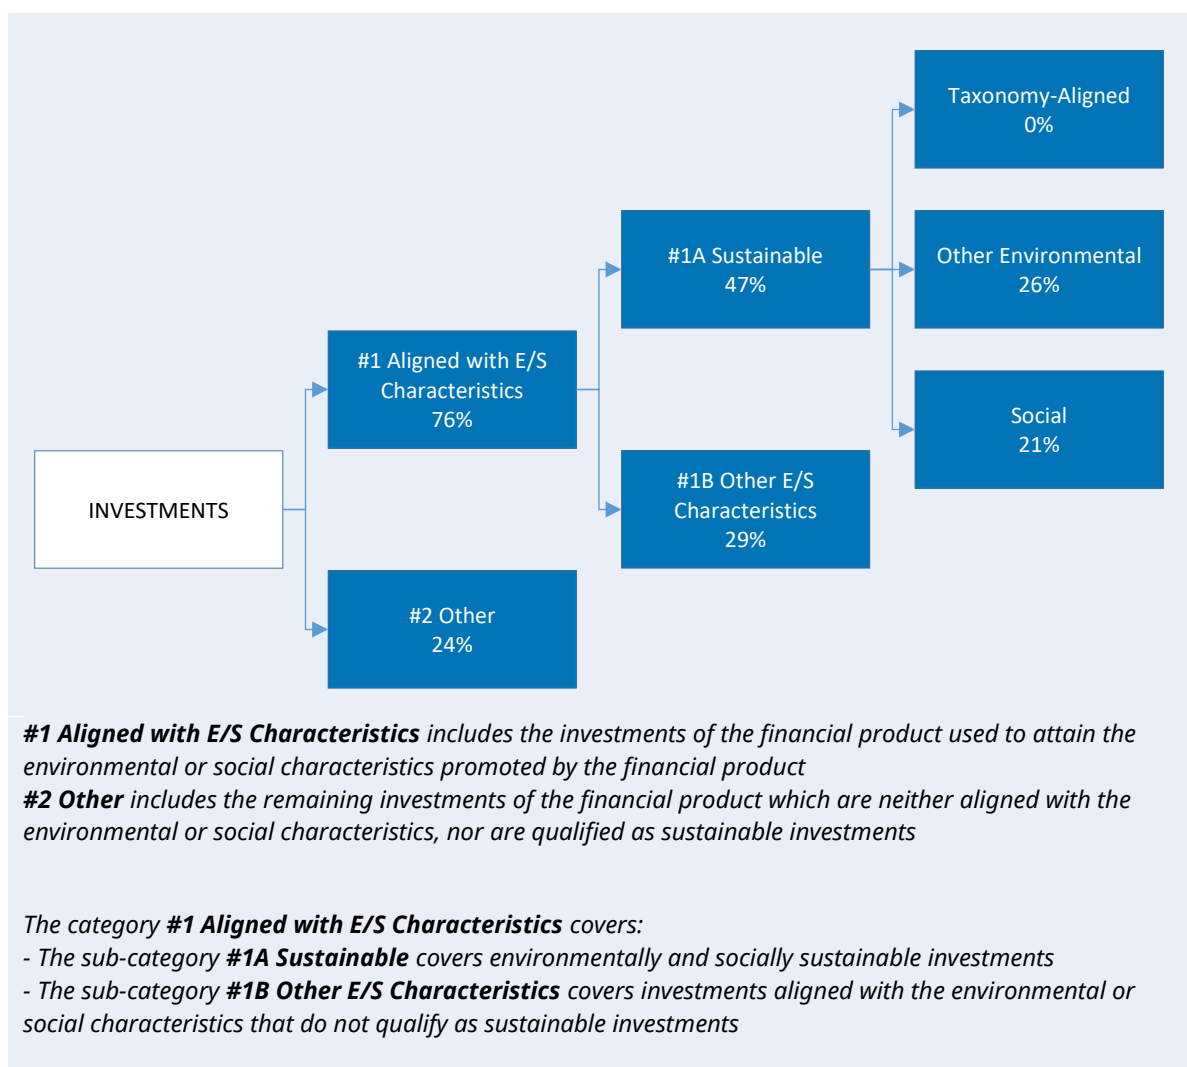

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 26%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 21%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Emerging Markets Multi Asset

**Legal Entity Identifier :** 549300J365DGAM4OUL36

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 44% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the 50% MSCI Emerging Market Index (USD), 16.7% JPM EMBI Index EM Hard Currency (USD), 16.7% JPM GBI Emerging Market Index - EM Local (USD), 16.7% JPM CEMB Index (USD), based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was -0.5% and the benchmark's sustainability score at the end of the reference period was -4.2%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- Financial Inclusion
- High Salaries
- Water Access

As this is our first reporting period, this question is not applicable.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	44
Jan 2024 - Dec 2024	47
Jan 2023 - Dec 2023	36
Aug 2022 - Dec 2022	38

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	-0.5	-4.2
Jan 2024 - Dec 2024	-1.1	-3.6
Jan 2023 - Dec 2023	-0.9	-3.3
Jan 2022 - Dec 2022	-0.9	-3.5

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

Prior to 2024 our methodology to calculate the percentage of sustainable investments did not take into account investments in other funds, which may have resulted in lower figures. In 2024 Schroder Sustainable funds were included within the calculation. This calculation was performed at fund level and not at the level of the individual underlying holdings, so the figure shown may be higher than if the underlying holdings were evaluated. Other non-Schroders funds held were not included in the calculation. From 2025 the underlying holdings of all Schroders funds were individually evaluated and contributed to the Fund's sustainable investment percentage. Other non-Schroders funds held were not included in the calculation.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

communities through telecommunication services;

- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## *How were the indicators for adverse impacts on sustainability factors taken into account?*

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to

PAI 4 (Exposure to companies active in the fossil fuel sector),

PAI 5 (Share of non-renewable energy consumption and production) and

PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste and radioactive waste ratio),

PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant Investment Manager where applicable. All PAI indicators are monitored via Schroders PAI dashboard. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

This was done through the stock selection process in underlying strategies. For example, Schroders'

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

proprietary tool, which was used as part of screening the investment universe and for providing a maximum that can be invested in each company, incorporates several PAIs as a component of its scoring methodology. In assessing an issuer's overall environmental score, PAIs 1, 2 and 3 were included. In assessing an issuer's overall social score, PAIs 12 and 13 were included.

Other PAIs were considered via active ownership, which was performed indirectly via the underlying Investment Managers. Where applicable, based on the underlying strategies and the relevant Investment Manager's own investment process,

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Insurance industry based in China on the subject of Climate adaptation (PAIs 1, 2, 3, 4, 5 and 6). We also held an engagement on the subject of Workers (PAI 10) with an issuer in the Metals & Mining industry based in South Africa. Additionally, we engaged with an issuer based in South Korea in the Automobiles & Auto Parts industry on the subject of Relationship with shareholders (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	31
Corporate Governance	15
Human Rights	13
Human Capital Management	8
Natural Capital and Biodiversity	7
Diversity and Inclusion	6

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 90%. The Fund maintained a higher overall sustainability score than the 50% MSCI Emerging Market Index (USD), 16.7% JPM EMBI Index EM Hard Currency (USD), 16.7% JPM GBI Emerging Market Index - EM Local (USD), 16.7% JPM CEMB Index (USD) and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

individual investment had an overall positive or a negative score).

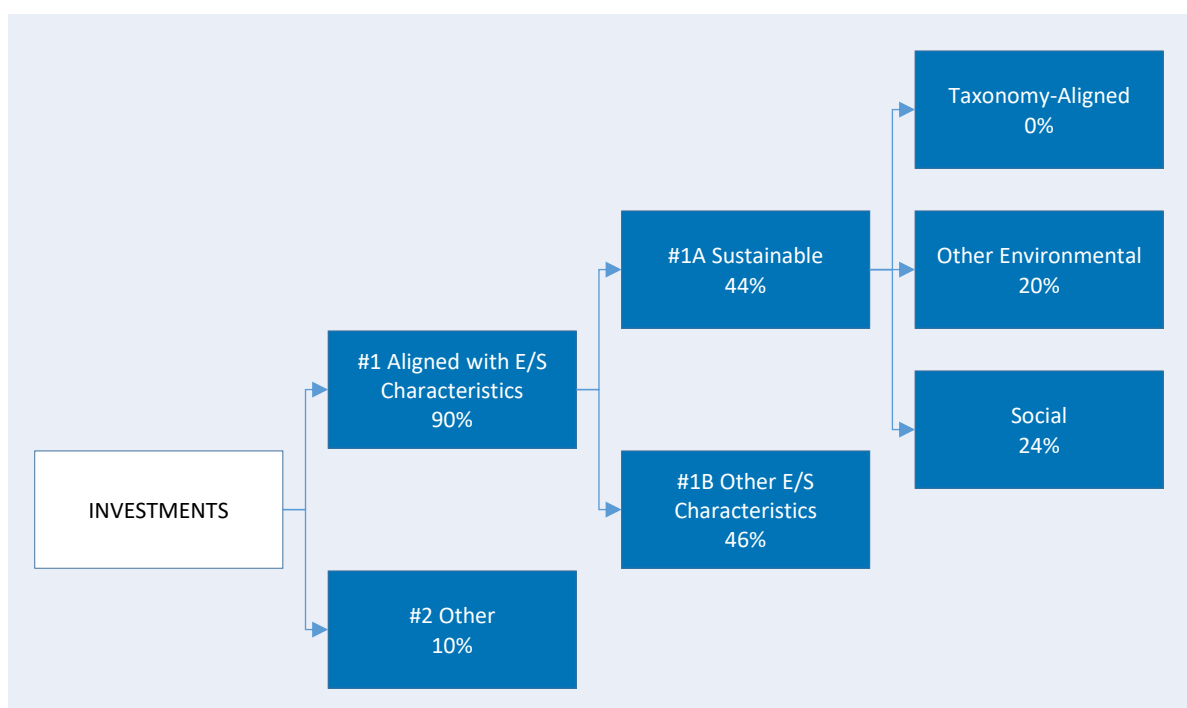

#1A includes the percentage invested in sustainable investments, which is equal to 44%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 20% was invested in sustainable investments with an environmental objective and 24% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Technology & Electronics	5.07
Industrial	Capital Goods	4.27
Industrial	Basic Industry	3.56
Industrial	Retail	2.99

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 20%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 24%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Diversified Growth

**Legal Entity Identifier :** UILX05PRFETP7OQYCX05

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 54% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than a bespoke asset-weighted blend of the MSCI World Index (hedged to EUR), MSCI Emerging Market Index (hedged to EUR), Barclays Global Aggregate Corporate Bond Index (hedged to EUR), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to EUR), ICE BofA US Treasury Index (hedged to EUR), JPM GBI Emerging Market Index - EM Local (hedged to EUR), JPM EMBI Index EM Hard Currency (hedged to EUR), FTSE Global Convertible Bonds Index (hedged to EUR), based on the Investment Manager's rating system. The component benchmarks (which are each respectively a broad market index) are not reference benchmarks for the purposes of the environmental and social characteristics promoted by the Fund. The blend evolved during the reference period in line with the actual asset allocation of the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 1.5% and the benchmark's sustainability score at the end of the reference period was -2.3%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- Education
- High Salaries

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Power Provision

The Investment Manager invested 54% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	54
Jan 2024 - Dec 2024	73
Jan 2023 - Dec 2023	37
Aug 2022 - Dec 2022	47

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	1.5	-2.3
Jan 2024 - Dec 2024	2.0	-2.5
Jan 2023 - Dec 2023	2.0	-3.5
Jan 2022 - Dec 2022	1.8	-3.9

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

Prior to 2024 our methodology to calculate the percentage of sustainable investments did not take into account investments in other funds, which may have resulted in lower figures. In 2024 Schroder Sustainable funds were included within the calculation. This calculation was performed at fund level and not at the level of the individual underlying holdings, so the figure shown may be higher than if the underlying holdings were evaluated. Other non-Schroders funds held were not included in the calculation. From 2025 the underlying holdings of all Schroders funds were individually evaluated and contributed to the Fund's sustainable investment percentage. Non-Schroders funds held were not included in the calculation.

From 1 March 2023, the Fund could invest up to 100% of its assets in open ended investment Funds including other Schroder Funds. As a result, due to our calculation methodology described above the figures are lower for 2023.

## • What were the objectives of the sustainable investments that the financial product partially

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## ***made and how did the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## ***• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schrodgers' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schrodgers' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schrodgers' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to  
PAI 4 (Exposure to companies active in the fossil fuel sector),  
PAI 5 (Share of non-renewable energy consumption and production) and  
PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schrodgers' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant Investment Manager where applicable. All PAI indicators are monitored via Schroders PAI dashboard. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

This was done through the stock selection process in underlying strategies. For example, Schroders' proprietary tool, which was used as part of screening the investment universe and for providing a maximum that can be invested in each company, incorporates several PAIs as a component of its scoring methodology. In assessing an issuer's overall environmental score, PAIs 1, 2 and 3 were included. In assessing an issuer's overall social score, PAIs 12 and 13 were included.

Other PAIs were considered via active ownership, which was performed indirectly via the underlying Investment Managers. Where applicable, based on the underlying strategies and the relevant Investment Manager's own investment process,

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Electrical Utilities & IPPs industry based in Denmark on the subject of Climate adaptation (PAIs 1, 2, 3, 4, 5 and 6). We also held an engagement on the subject of Purpose, strategy and capital allocation (PAI 10) with an issuer in the Investment Banking & Investment Services industry based in the USA. Additionally, we engaged with an issuer based in Germany in the Pharmaceuticals industry on the subject of Sustainable food and water (PAIs 7 and 8).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	208
Corporate Governance	120
Human rights	92
Natural Capital and Biodiversity	67
Human Capital Management	52
Diversity and Inclusion	39

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

specific assets.

summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 87%. The Fund maintained a higher overall sustainability score than a bespoke asset-weighted blend of the MSCI World Index (hedged to EUR), MSCI Emerging Market Index (hedged to EUR), Barclays Global Aggregate Corporate Bond Index (hedged to EUR), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to EUR), ICE BofA US Treasury Index (hedged to EUR), JPM GBI Emerging Market Index - EM Local (hedged to EUR), JPM EMBI Index EM Hard Currency (hedged to EUR), FTSE Global Convertible Bonds Index (hedged to EUR) and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 54%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

Of the Fund's sustainable investments, 28% was invested in sustainable investments with an environmental objective and 26% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

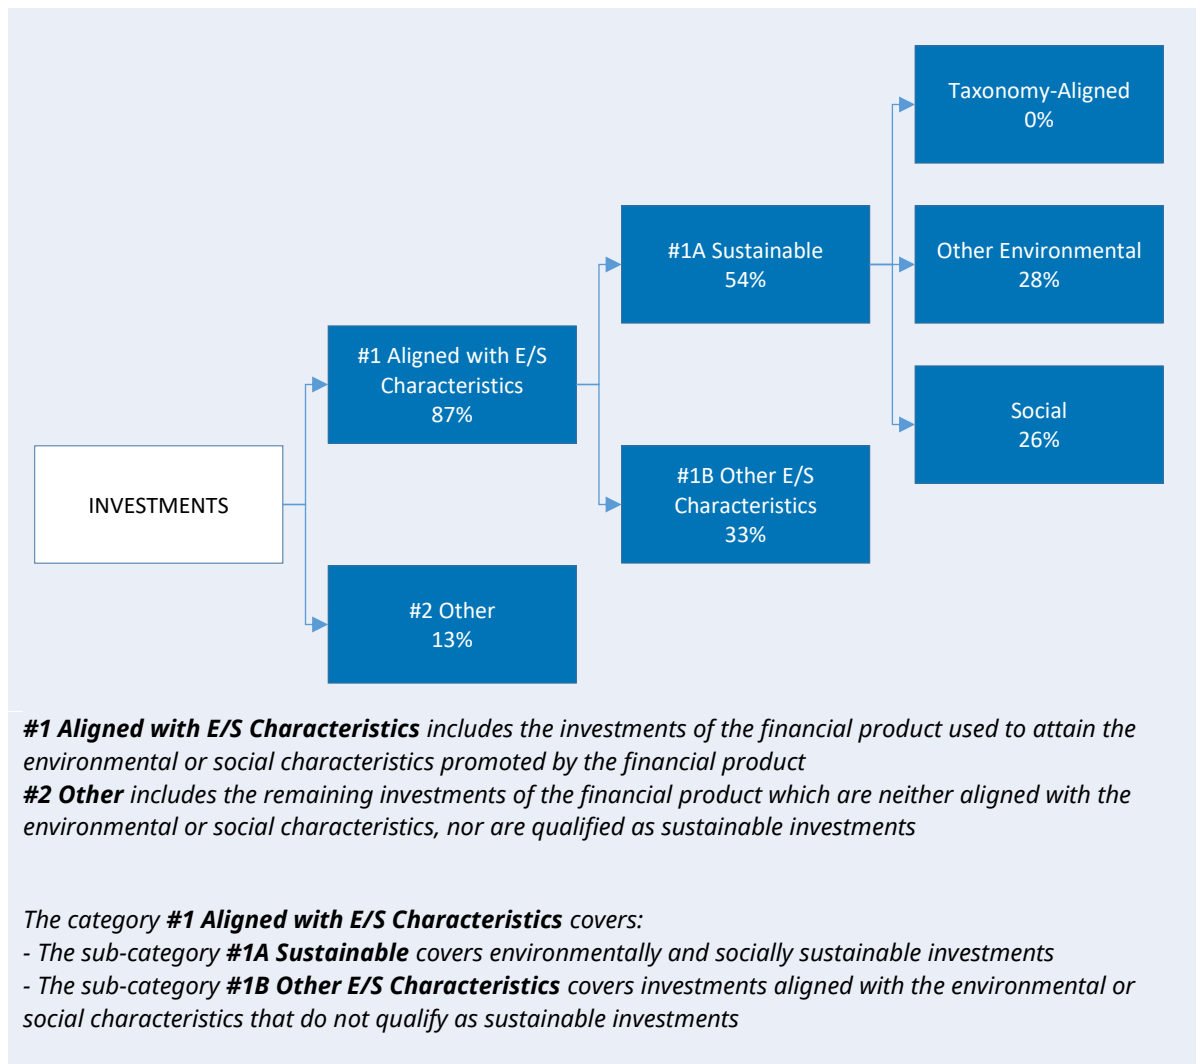

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 28%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 26%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Multi-Asset Balanced

**Legal Entity Identifier :** N7RNP3PDV1GDWKYBBM36

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 49% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than a bespoke asset-weighted blend of the MSCI World Index (hedged to EUR), MSCI Emerging Market Index (hedged to EUR), Barclays Global Aggregate Corporate Bond Index (hedged to EUR), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to EUR), ICE BofA US Treasury Index (hedged to EUR), JPM GBI Emerging Market Index - EM Local (hedged to EUR), JPM EMBI Index EM Hard Currency (hedged to EUR), FTSE Global Convertible Bonds Index (hedged to EUR), based on the Investment Manager's rating system. The component benchmarks (which are each respectively a broad market index) are not reference benchmarks for the purposes of the environmental and social characteristics promoted by the Fund. The blend evolved during the reference period in line with the actual asset allocation of the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 1.2% and the benchmark's sustainability score at the end of the reference period was -1.9%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- Education
- Innovation

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Medicine

The Investment Manager invested 49% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	49
Jan 2024 - Dec 2024	60
Jan 2023 - Dec 2023	59
Aug 2022 - Dec 2022	59

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	1.2	-1.9
Jan 2024 - Dec 2024	2.0	-1.7
Jan 2023 - Dec 2023	1.6	-1.8
Jan 2022 - Dec 2022	2.0	-3.1

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

Prior to 2024 our methodology to calculate the percentage of sustainable investments did not take into account investments in other funds, which may have resulted in lower figures. In 2024 Schroder Sustainable funds were included within the calculation. This calculation was performed at fund level and not at the level of the individual underlying holdings, so the figure shown may be higher than if the underlying holdings were evaluated. Other non-Schroders funds held were not included in the calculation. From 2025 the underlying holdings of all Schroders funds were individually evaluated and contributed to the Fund's sustainable investment percentage. Non-Schroders funds held were not included in the calculation.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant Investment Manager where applicable. All PAI indicators are monitored via Schroders PAI dashboard. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:  
- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:  
PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste ratio),  
PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

Other PAIs were considered via active ownership, which was performed indirectly via the underlying Investment Managers. Where applicable, based on the underlying strategies and the relevant Investment Manager's own investment process,

PAIs were considered through integration in the investment research, stock selection and portfolio construction parts of the investment process. For example, in assessing an issuer's overall environmental score, PAIs 1, 2, 3, 4, 5 and 6 were included. In assessing an issuer's overall social score, PAIs 12 and 13 were included.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Banking Services industry based in the United Kingdom on the subject of Climate mitigation (PAIs 1, 2 and 3). We also held an engagement on the subject of Workers (PAI 10) with an issuer in the Computers, Phones & Household Electronics industry based in the USA. Additionally, we engaged with an issuer based in the USA in the Professional & Commercial Services industry on the subject of Boards and management (PAIs 12 and 13).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	111
Human Rights	71
Corporate Governance	55
Natural Capital and Biodiversity	41
Human Capital Management	34
Diversity and Inclusion	22

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 79%. The Fund maintained a higher overall sustainability score than a bespoke asset-weighted blend of the MSCI World Index (hedged to EUR), MSCI Emerging Market Index (hedged to EUR), Barclays Global Aggregate Corporate Bond Index (hedged to EUR), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to EUR), ICE BofA US Treasury Index (hedged to EUR), JPM GBI Emerging Market Index - EM Local (hedged to EUR), JPM EMBI Index EM Hard Currency (hedged to EUR), FTSE Global Convertible Bonds Index (hedged to EUR) and so

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 49%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

Of the Fund's sustainable investments, 26% was invested in sustainable investments with an environmental objective and 23% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

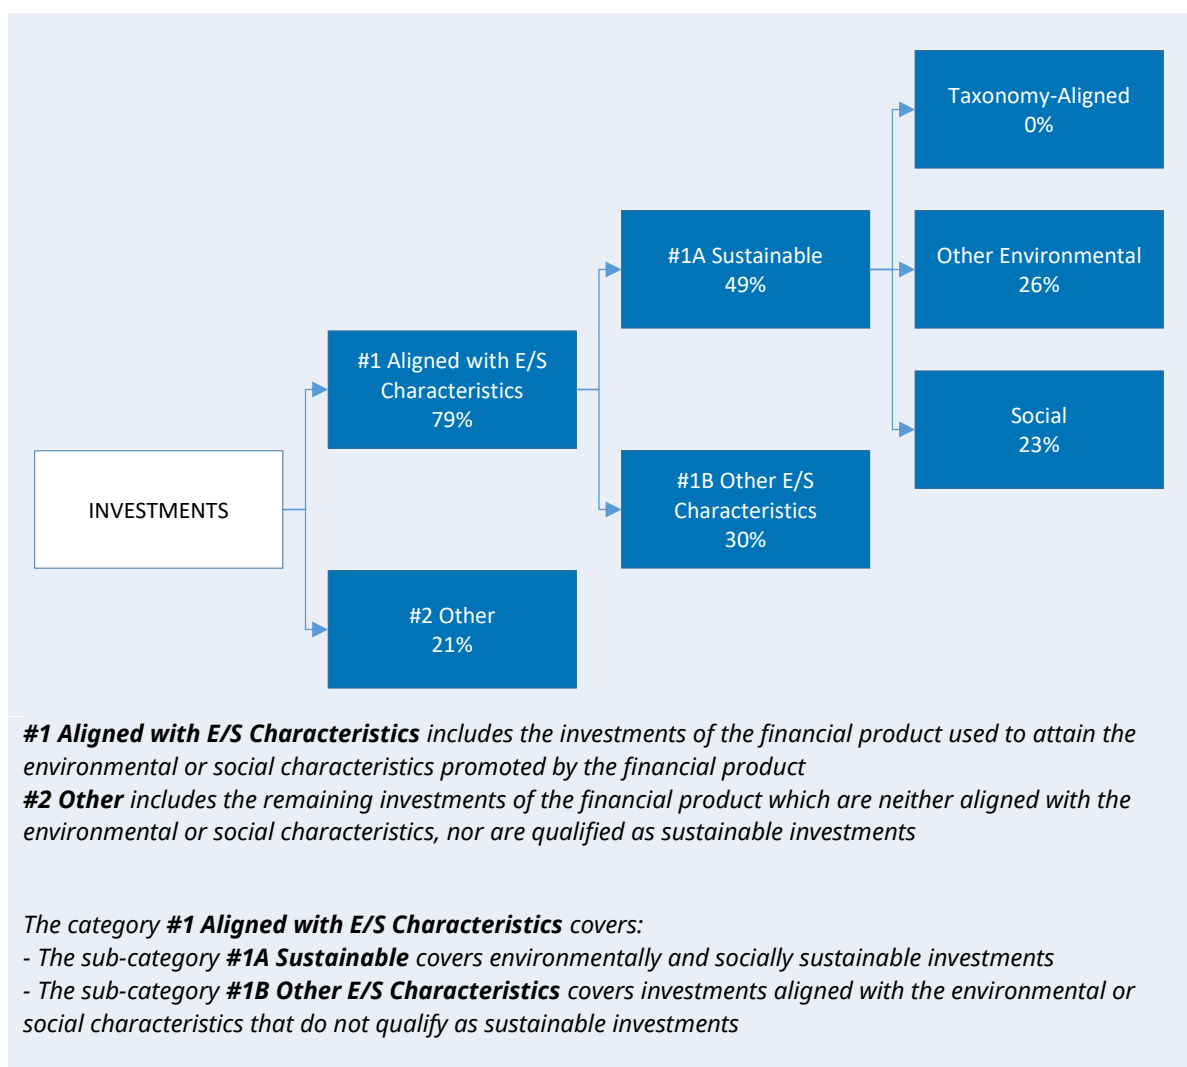

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 26%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 23%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Multi-Asset Income

**Legal Entity Identifier :** 9P2R2H6H0KS8FL2XQC82

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 52% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the 30% MSCI AC World Index (USD), 40% Barclays Global Aggregate Corporate Bond Index (USD) and 30% Barclays Global High Yield excl CMBS & EMG 2% Index (USD), based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was -0.1% and the benchmark's sustainability score at the end of the reference period was -3.0%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Connectivity
- Contraception
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 52% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	52
Jan 2024 - Dec 2024	53
Jan 2023 - Dec 2023	45
Aug 2022 - Dec 2022	42

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	-0.1	-3.0
Jan 2024 - Dec 2024	0.4	-2.9
Jan 2023 - Dec 2023	0.5	-4.1
Jan 2022 - Dec 2022	0.4	-4.5

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

Prior to 2024 our methodology to calculate the percentage of sustainable investments did not take into account investments in other funds, which may have resulted in lower figures. In 2024 Schroder Sustainable funds were included within the calculation. This calculation was performed at fund level and not at the level of the individual underlying holdings, so the figure shown may be higher than if the underlying holdings were evaluated. Other non-Schroders funds held were not included in the calculation. From 2025 the underlying holdings of all Schroders funds were individually evaluated and contributed to the Fund's sustainable investment percentage. Other non-Schroders funds held were not included in the calculation.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schrodgers' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant Investment Manager where applicable. All PAI indicators are monitored via Schroders PAI dashboard. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

This was done through the stock selection process in underlying strategies. For example, Schroders' proprietary tool, which was used as part of screening the investment universe and for providing a maximum that can be invested in each company, incorporates several PAIs as a component of its scoring methodology. In assessing an issuer's overall environmental score, PAIs 1, 2 and 3 were included. In assessing an issuer's overall social score, PAIs 12 and 13 were included.

Other PAIs were considered via active ownership, which was performed indirectly via the underlying Investment Managers. Where applicable, based on the underlying strategies and the relevant Investment Manager's own investment process,

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Oil & Gas industry based in the USA on the subject of Climate mitigation (PAIs 1, 2 and 3). We also held an engagement on the subject of Transparency, risk and reporting (PAI 10) with an issuer in the Oil & Gas industry based in Canada. Additionally, we engaged with an issuer based in Canada in the Textiles & Apparel industry on the subject of Workers (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	137
Corporate Governance	80
Human Rights	70
Natural Capital and Biodiversity	48
Human Capital Management	38
Diversity and Inclusion	29

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schrodgers Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 89%. The Fund maintained a higher overall sustainability score than the 30% MSCI AC World Index (USD), 40% Barclays Global Aggregate Corporate Bond Index (USD) and 30% Barclays Global High Yield excl CMBS & EMG 2% Index (USD) and so the Fund's investments that were scored by Schrodgers' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

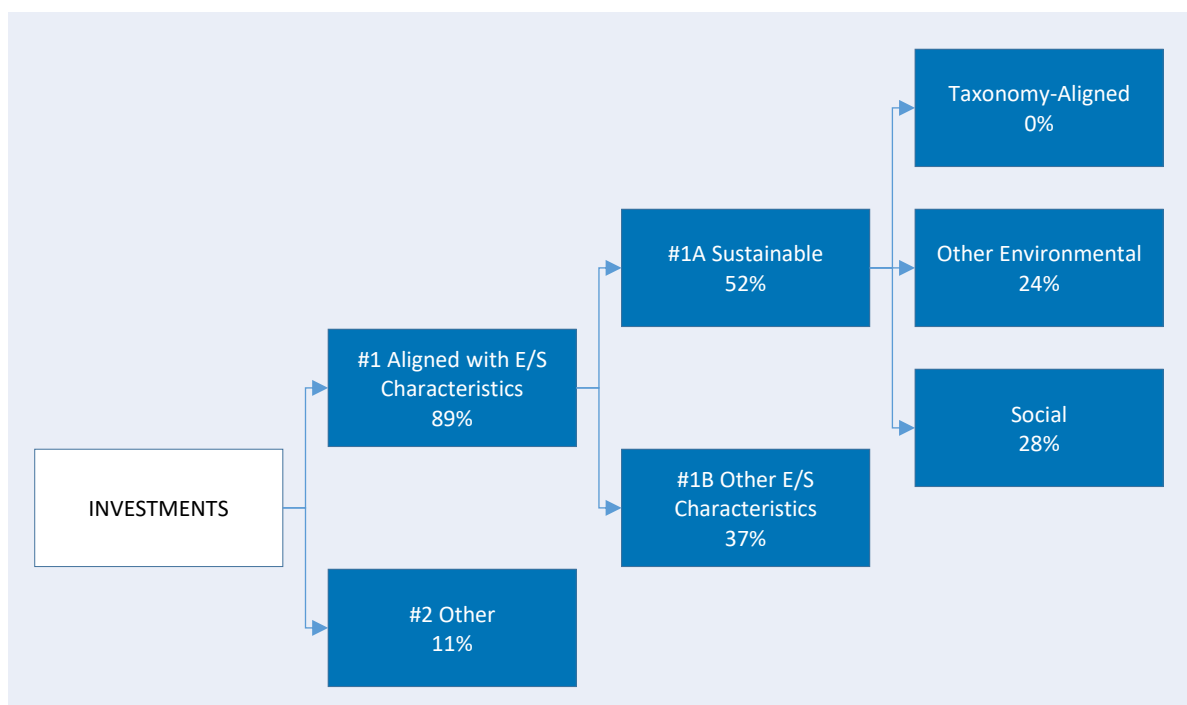

#1A includes the percentage invested in sustainable investments, which is equal to 52%. To be classified as a sustainable investment an investment must have demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

Of the Fund's sustainable investments, 24% was invested in sustainable investments with an environmental objective and 28% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	5.28
Industrial	Healthcare	3.44
Industrial	Real Estate	3.36
Industrial	Telecommunications	2.41
Industrial	Leisure	2.04

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 24%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 28%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Target Return

**Legal Entity Identifier :** 549300HN4V7MFDKU097

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 53% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than a bespoke asset-weighted blend of the MSCI World Index (hedged to USD), MSCI Emerging Market Index (unhedged), Bloomberg Global Aggregate Corporate Bond Index (hedged to USD), Bloomberg Global High Yield excl. CMBS & EMD 2% Index (hedged to USD), ICE BofA US Treasury Index (hedged to USD), JPM GBI Emerging Market Index - EM Local (unhedged) and JPM EMBI Index EM Hard Currency (hedged to USD), based on the Investment Manager's rating system. The component benchmarks (which are each respectively a broad market index) are not reference benchmarks for the purposes of the environmental and social characteristics promoted by the Fund. The blend evolved during the reference period in line with the actual asset allocation of the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 0.3% and the benchmark's sustainability score at the end of the reference period was -2.4%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- Innovation
- Medicine

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Power Provision

The Investment Manager invested 53% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	53
Jan 2024 - Dec 2024	67
Jan 2023 - Dec 2023	43
Aug 2022 - Dec 2022	43

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	0.3	-2.4
Jan 2024 - Dec 2024	1.0	-2.5
Jan 2023 - Dec 2023	1.3	-3.4
Jan 2022 - Dec 2022	1.4	-3.5

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant Investment Manager where applicable. All PAI indicators are monitored via Schroders PAI dashboard. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:
  - PAI 7 (Activities negatively affecting biodiversity-sensitive areas),
  - PAI 8 (Emissions to water),
  - PAI 9 (Hazardous waste ratio),
  - PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),
  - PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

This was done through the stock selection process in underlying strategies. For example, Schroders' proprietary tool, which was used as part of screening the investment universe and for providing a maximum that can be invested in each company, incorporates several PAIs as a component of its scoring methodology. In assessing an issuer's overall environmental score, PAIs 1, 2 and 3 were included. In assessing an issuer's overall social score, PAIs 12 and 13 were included.

Greenhouse gas emissions, carbon footprint, Greenhouse gas intensity: PAI 1, 2 and 15. At the portfolio level, the Fund considered the above PAIs within their asset class valuations and return forecasts. The team incorporate climate risk in their top-down asset allocation decisioning, applying climate change adjustments to their forecasts.

Other PAIs were considered via active ownership, which was performed indirectly via the underlying Investment Managers. Where applicable, based on the underlying strategies and the relevant Investment Manager's own investment process,

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Food & Tobacco industry based in Switzerland on the subject of Just Transition and Resilience (PAIs 1, 2, 3, 4, 5 and 6). We also held an engagement on the subject of Customers and consumers (PAI 10) with an issuer in the Pharmaceuticals industry based in Switzerland. Additionally, we engaged with an issuer based in the United Kingdom in the Pharmaceuticals industry on the subject of Transparency, risk and reporting (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	86
Human Rights	55
Corporate Governance	49
Natural Capital and Biodiversity	26
Human Capital Management	24
Diversity and Inclusion	20

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

During the reference period the top 15 investments were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

SISF EURO CR CONVTVN SRT DUR I ACC	Collective Investments	0.88	Luxembourg

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 79%. The Fund maintained a higher overall

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

sustainability score than the MSCI World Index (hedged to USD), MSCI Emerging Market Index (unhedged), Bloomberg Global Aggregate Corporate Bond Index (hedged to USD), Bloomberg Global High Yield excl. CMBS & EMD 2% Index (hedged to USD), ICE BofA US Treasury Index (hedged to USD), JPM GBI Emerging Market Index - EM Local (unhedged) and JPM EMBI Index EM Hard Currency (hedged to USD) and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 53%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

Of the Fund's sustainable investments, 37% was invested in sustainable investments with an environmental objective and 17% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

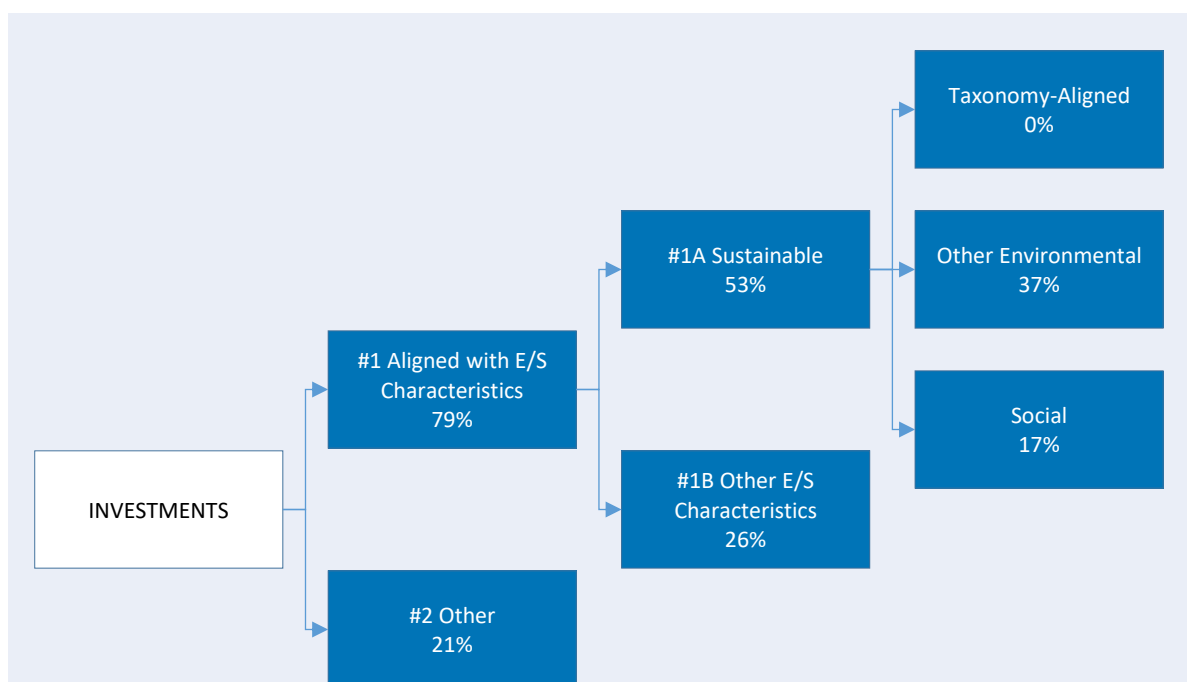

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Collective Investments	Unit Trusts	34.32
Collective Investments	Other	2.51
Collective Investments	Exchange Traded Funds	0.73
Financial	Banking	8.74
Financial	Financial Services	5.34
Financial	Insurance	2.13
Cash Equivalents	Treasury Bills	10.01
Cash Equivalents	Commercial Paper	1.88

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 37%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 17%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Multi-Asset Growth and Income

**Legal Entity Identifier :** D57GRPRBLPPG0AOY4K34

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 49% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the 30% MSCI AC World Index (USD), 30% Barclays Global High Yield excl CMBS & EMG 2% index (USD), 30% FTSE Convertible Global Focus index (USD) and 10% Barclays Global Aggregate Bond Index (USD), based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025. On 10 December 2025 Schroder ISF Sustainable Multi-Asset Income was merged into the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 0.4% and the benchmark's sustainability score at the end of the reference period was -1.1%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 49% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	49
Jan 2024 - Dec 2024	56
Jan 2023 - Dec 2023	48
Aug 2022 - Dec 2022	49

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	0.4	-1.1
Jan 2024 - Dec 2024	1.5	-1.0
Jan 2023 - Dec 2023	0.5	-1.1
Jan 2022 - Dec 2022	-0.3	-1.5

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

Prior to 2024 our methodology to calculate the percentage of sustainable investments did not take into account investments in other funds, which may have resulted in lower figures. In 2024 Schroder Sustainable funds were included within the calculation. This calculation was performed at fund level and not at the level of the individual underlying holdings, so the figure shown may be higher than if the underlying holdings were evaluated. Other non-Schroders funds held were not included in the calculation. From 2025 the underlying holdings of all Schroders funds were individually evaluated and contributed to the Fund's sustainable investment percentage. Other non-Schroders funds held were not included in the calculation.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant Investment Manager where applicable. All PAI indicators are monitored via Schroders PAI dashboard. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste ratio),  
PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

This was done through the stock selection process in underlying strategies. For example, Schroders' proprietary tool, which was used as part of screening the investment universe and for providing a maximum that can be invested in each company, incorporates several PAIs as a component of its scoring methodology. In assessing an issuer's overall environmental score, PAIs 1, 2 and 3 were included. In assessing an issuer's overall social score, PAIs 12 and 13 were included.

Other PAIs were considered via active ownership, which was performed indirectly via the underlying Investment Managers. Where applicable, based on the underlying strategies and the relevant Investment Manager's own investment process,

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Banking Services industry based in the United Kingdom on the subject of Climate Change (PAIs 1, 2, 3, 4, 5 and 6). We also held an engagement on the subject of Communities (PAI 10) with an issuer in the Oil & Gas industry based in France. Additionally, we engaged with an issuer based in the United Kingdom in the Oil & Gas industry on the subject of Purpose, strategy and capital allocation (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	132
Corporate Governance	81
Human Rights	69
Natural Capital and Biodiversity	49
Human Capital Management	34
Diversity and Inclusion	29

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 90%. The Fund maintained a higher overall sustainability score than the 30% MSCI AC World Index (USD), 30% Barclays Global High Yield excl CMBS & EMG 2% index (USD), 30% FTSE Convertible Global Focus index (USD) and 10% Barclays Global Aggregate Bond Index (USD) and so the Fund's investments that were scored by Schroders' proprietary

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 49%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

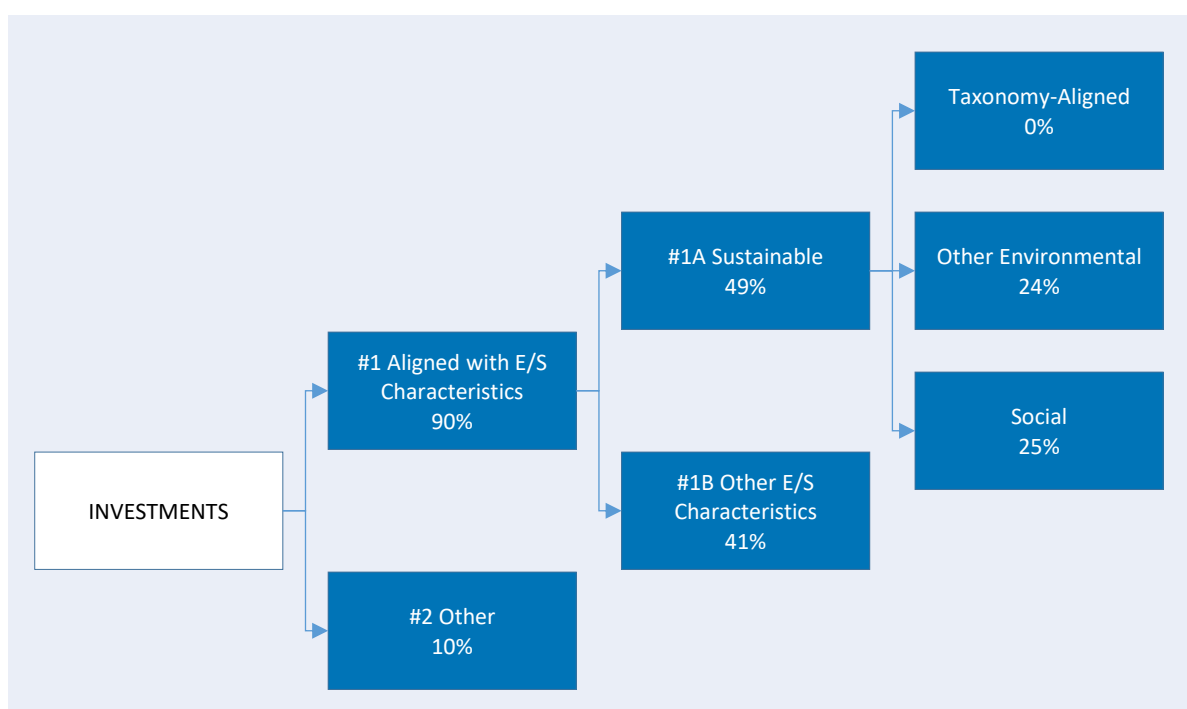

Of the Fund's sustainable investments, 24% was invested in sustainable investments with an environmental objective and 25% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Technology & Electronics	11.56
Industrial	Capital Goods	7.31
Industrial	Leisure	4.30
Industrial	Basic Industry	3.61
Industrial	Healthcare	2.84

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 24%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 25%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 – 25 November 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Multi-Asset Total Return

**Legal Entity Identifier :** 549300NT1L407KR1IF71

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 63% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 25 November 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than a bespoke asset-weighted blend of MSCI World Index (hedged to USD), MSCI Emerging Market Index (hedged to USD), Barclays Global Aggregate Corporate Bond Index (hedged to USD), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to USD), ICE BofA US Treasury Index (hedged to USD), JPM GBI Emerging Market Index - EM Local (hedged to USD), JPM EMBI Index EM Hard Currency (hedged to USD), FTSE Global Convertible Bonds Index (hedged to USD), based on the Investment Manager's rating system. The component benchmarks (which are each respectively a broad market index) are not reference benchmarks for the purposes of the environmental and social characteristics promoted by the Fund. The blend evolved during the reference period in line with the actual asset allocation of the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 25 November 2025 when the Fund was liquidated.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 0.7% and the benchmark's sustainability score at the end of the reference period was -1.9%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- Education
- Innovation

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 25 November 2025

- Medicine

The Investment Manager invested 63% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Oct 2025	63
Jan 2024 - Dec 2024	69
Sep 2023 - Dec 2023	31

### Sustainable score

*This table details the percentage of assets invested in sustainable score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Oct 2025	0.7	-1.9
Jan 2024 - Dec 2024	1.5	-2.2
Sep 2023 - Dec 2023	0.6	-3.0

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

For 2023 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

Prior to 2024 our methodology to calculate the percentage of sustainable investments did not take into account investments in other funds, which may have resulted in lower figures. From 2024 Schroder Sustainable funds are included within the calculation. This calculation is performed at fund level and not at the level of the individual underlying holdings, so the figure shown may be higher than if the underlying holdings were evaluated. Other non-Schroders funds held are not included in the calculation. From 2025 the underlying holdings of all Schroders funds were individually evaluated and contributed to the Fund's sustainable investment percentage. Non-Schroders funds held were not included in the calculation.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 25 November 2025

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schrodgers' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 25 November 2025

priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:  
- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):  
PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 25 November 2025

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant Investment Manager where applicable. All PAI indicators are monitored via Schroders PAI dashboard. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders’ ‘global norms’ breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

This was done through the stock selection process in underlying strategies. For example, Schroders’ proprietary tool, which was used as part of screening the investment universe and for providing a maximum that can be invested in each company, incorporates several PAIs as a component of its scoring methodology. In assessing an issuer’s overall environmental score, PAIs 1, 2 and 3 were included. In assessing an issuer’s overall social score, PAIs 12 and 13 were included.

Other PAIs were considered via active ownership, which was performed indirectly via the underlying Investment Managers. Where applicable, based on the underlying strategies and the relevant Investment Manager’s own investment process,

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Specialty Retailers industry based in the United Kingdom on the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 25 November 2025

subject of Climate adaptation (PAIs 1, 2, 3, 4, 5 and 6). We also held an engagement on the subject of Workers (PAI 10) with an issuer in the Food & Drug.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	76
Human Rights	47
Corporate Governance	36
Natural Capital and Biodiversity	27
Human Capital Management	23
Diversity and Inclusion	14

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

SISF SECURITISED CREDIT I ACCUMULATION	Collective Investments	1.00	Luxembourg

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 92%. The Fund maintained a higher overall sustainability score than a bespoke asset-weighted blend of MSCI World Index (hedged to USD), MSCI Emerging Market Index (hedged to USD), Barclays Global Aggregate Corporate Bond Index (hedged to

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 25 November 2025

USD), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to USD), ICE BofA US Treasury Index (hedged to USD), JPM GBI Emerging Market Index - EM Local (hedged to USD), JPM EMBI Index EM Hard Currency (hedged to USD), FTSE Global Convertible Bonds Index (hedged to USD), based on the Investment Manager's rating system. The component benchmarks (which are each respectively a broad market index) are not reference benchmarks for the purposes of the environmental and social characteristics promoted by the Fund. The blend evolved during the reference period in line with the actual asset allocation of the Fund.

#1A includes the percentage invested in sustainable investments, which is equal to 63%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

Of the Fund's sustainable investments, 46% was invested in sustainable investments with an environmental objective and 17% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

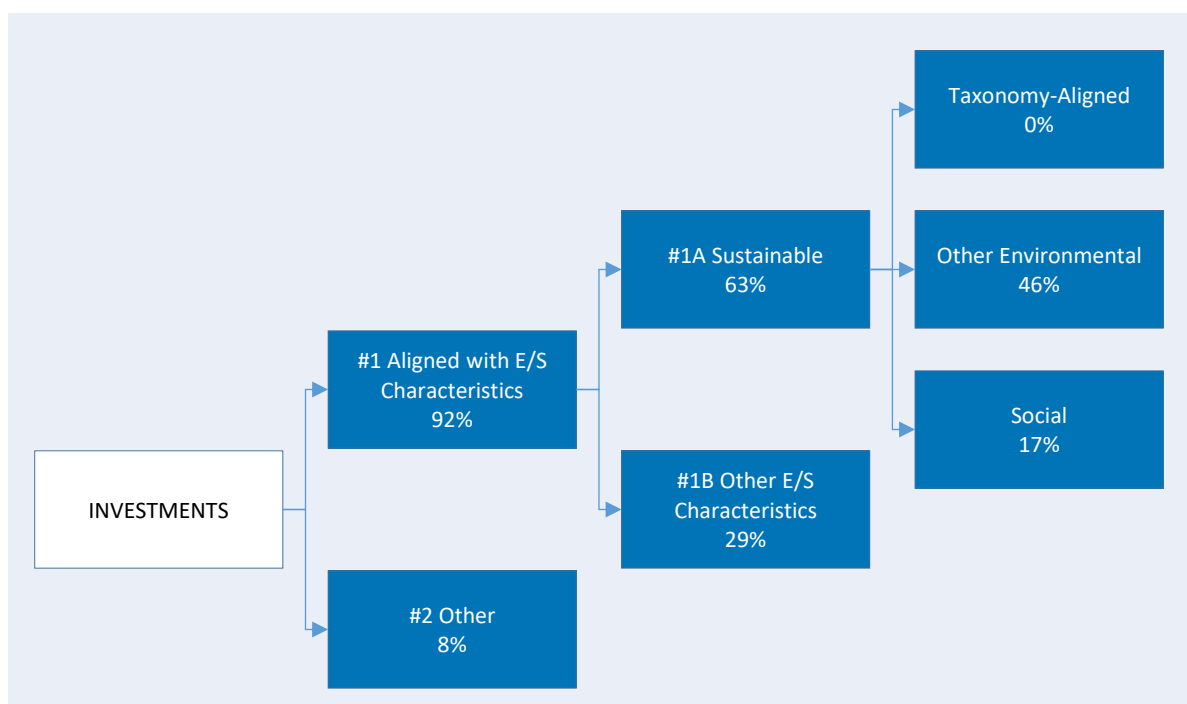

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 25 November 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 25 November 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

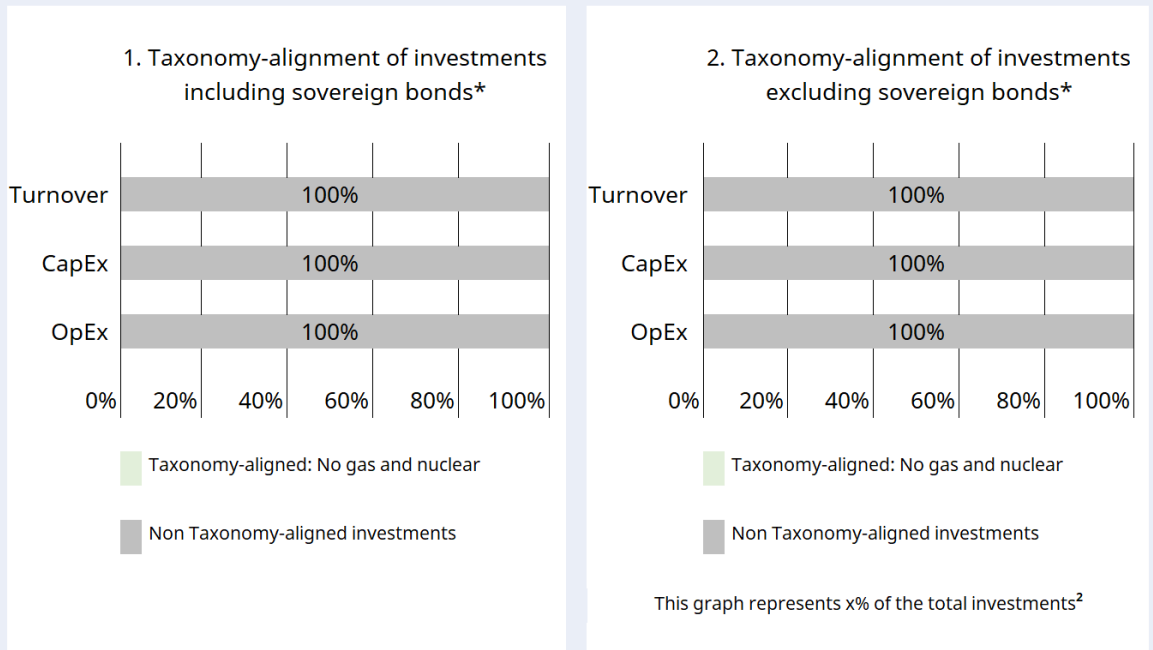

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 25 November 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### • *What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?*

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 46%.

### • *What was the share of socially sustainable investments?*

The share of sustainable investments with a social objective was 17%.

### • *What investments were included under "other", what was their purpose and were there*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 25 November 2025

## any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 25 November 2025

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Emerging Markets Debt Total Return

**Legal Entity Identifier :** TLC5LFN105XXSK6FZ338

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input type="checkbox"/> with a social objective
	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the 50% JPM GBI-EM Diversified Index and 50% JPM EMBI Diversified Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was -2.1% and the benchmark's sustainability score at the end of the reference period was -3.7%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- Refugees: the estimated societal benefits associated with hosting refugees. Assigned by multiplying the number of refugees accepted per country, netted by people displaced internally and internationally, by the estimated benefit per refugee; and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

run economic growth.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ***...and compared to previous periods?***

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

• ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

• ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

This question is not applicable for this Fund.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

***How were the indicators for adverse impacts on sustainability factors taken into account?***

This question is not applicable for this Fund.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

This question is not applicable for this Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders’ ‘global norms’ breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

PAI data is less meaningful in the context of an emerging markets sovereign focused strategy, as during the reference period there was limited PAI data available. Over time, we anticipate that this data will improve which will allow us to further assess the consideration of PAIs.

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company’s overall environmental score.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

period are:

We engaged with an issuer in the Government Activity industry based in Malaysia on the subject of Climate Change (PAIs 1, 2, 3, 4, 5 and 6). We also held an engagement on the subject of Transparency, risk and reporting (PAI 10) with an issuer in the Government Activity industry based in Mexico. Additionally, we engaged with an issuer based in Chile in the Government Activity industry on the subject of Nature-related risk and management (PAIs 7, 8 and 9).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	3
Corporate Governance	2
Human Capital Management	2
Diversity and Inclusion	1
Natural Capital and Biodiversity	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 97%. The Fund maintained a higher overall sustainability score than the 50% JPM GBI-EM Diversified Index and 50% JPM EMBI Diversified Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

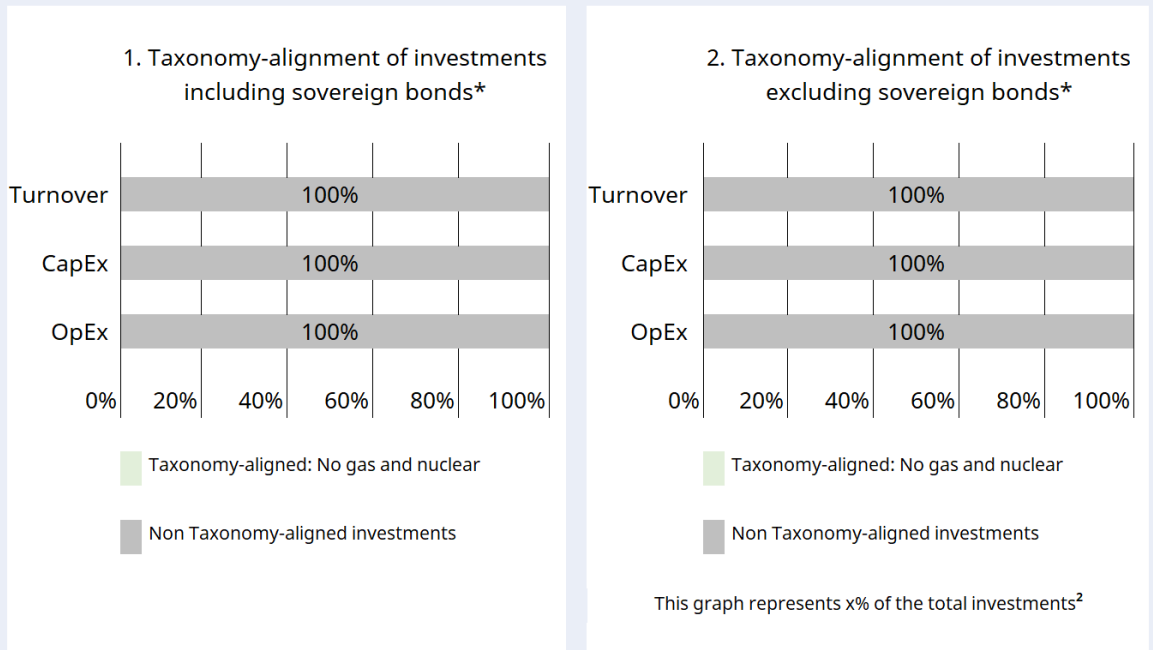

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

This question is not applicable for this Fund.

## • **What was the share of socially sustainable investments?**

This question is not applicable for this Fund.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf> ). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF EURO Credit Conviction Short Duration

**Legal Entity Identifier :** 549300GRJ5K0KUG41F58

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 60% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the ICE BofA Euro Corporate (1-5 Y)(BBB), based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 2.0% and the benchmark's sustainability score at the end of the reference period was -1.4%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Contraception
- High Salaries
- Medicine
- Power Provision

The Investment Manager invested 60% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	60
Jan 2024 - Dec 2024	59
Jan 2023 - Dec 2023	52
Aug 2022 - Dec 2022	50

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	2.0	-1.4
Jan 2024 - Dec 2024	1.2	-2.4
Jan 2023 - Dec 2023	1.2	-2.2
Jan 2022 - Dec 2022	5.3	

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

\* On the 21 September 2023, the Fund committed to maintaining a higher overall sustainability score than the ICE BofA 1-5 Year BBB Euro Corporate Total Return Index, based on the Investment Manager's rating system. As a result a Benchmark figure for 2022 is not displayed and the 2023 is a weighted average of the last four months of the year.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.
- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schrodgers' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

We also considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with a bank based in the United Kingdom about climate oversight, including their response to climate risks and expanding financed emission targets (PAIs 1, 2, 3, 4, 5 and 6). We also held an engagement on the subject of boards and management (PAIs 12 and 13) with an electric utility company also based in the United Kingdom. Additionally, we engaged with the German government on nature, including the future of green finance and ESG-labelled bonds (PAIs 7, 8 and 9).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	43
Corporate Governance	35
Human Rights	11
Natural Capital and Biodiversity	10
Human Capital Management	7
Diversity and Inclusion	3

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 86%. The Fund maintained a higher overall sustainability score than the ICE BofA Euro Corporate (1-5 Y)(BBB) and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 60%. To be classified as a sustainable investment an asset must meet one of the following:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

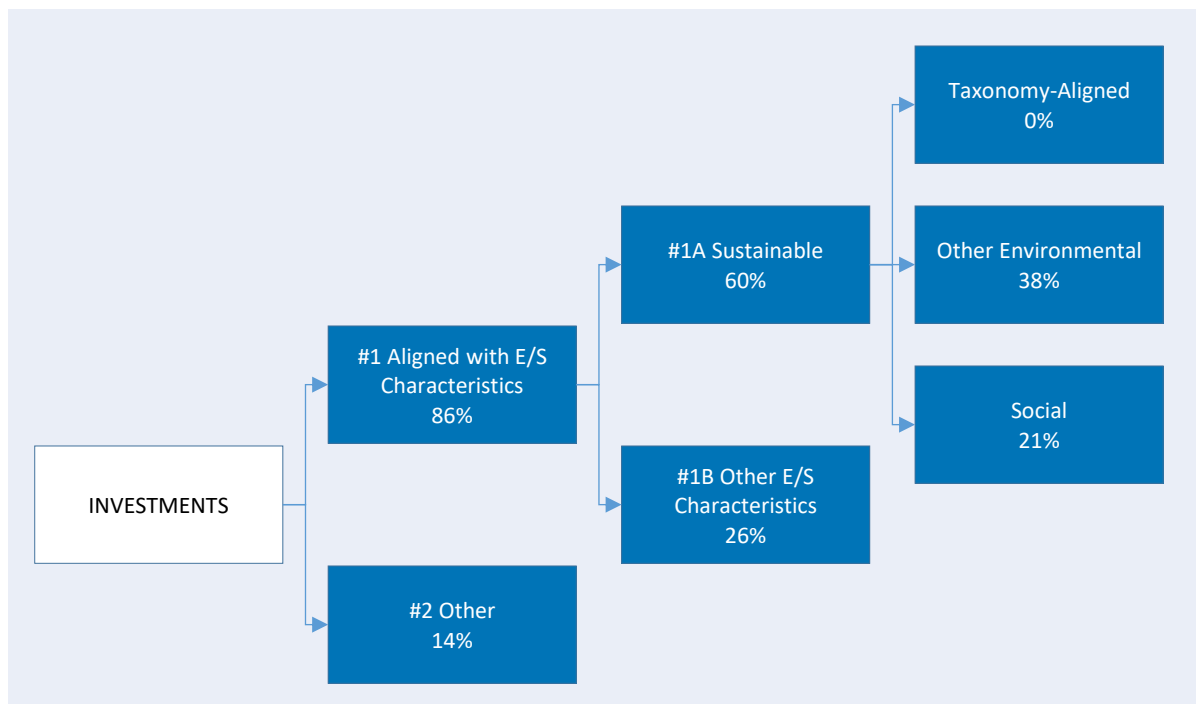

Of the Fund's sustainable investments, 38% was invested in sustainable investments with an environmental objective and 21% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure** (OpEx) reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 38%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 21%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager considered sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF European Alpha Absolute Return

**Legal Entity Identifier :** 549300FIRE2DG9WO1K16

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 63% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>	

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The percentage of sustainable investments shown (which are all long positions, as short positions are not deemed to be sustainable investments) represents the sustainable investments as a proportion of the long exposure of the Fund during the reference period. This is in line with the pre-contractual disclosure for the Fund, where the Fund committed to invest at least 10% of its long exposure in sustainable investments.

For additional context, the percentage of sustainable investments as a proportion of the gross exposure of the Fund during the reference period was 34%. The gross exposure includes both long and short positions and this figure is provided for consistency with the basis of the other calculations in the asset allocation section below.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a positive absolute sustainability score, based on Schroders' proprietary tool.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool. The Fund's long and short positions contribute differently to the aggregate score. Long positions with positive scores and short positions with negative scores both contribute positively towards the aggregate score, while long positions with negative scores and short positions with positive scores both detract from the aggregate score.

The Fund also invested at least 10% of its long exposure in sustainable investments during the reference period. The long exposure excludes cash and cash equivalents.

The Fund used derivatives extensively to implement its investment strategy and to meet the environmental and/or social characteristics promoted by the Fund. Long and short derivative positions contributed differently to the Fund's overall sustainability score as described. Equity and index derivatives (excluding options) are scored in the same way as physical holdings, on a look-through basis, and also contributed to the Fund's overall sustainability score.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 12.8%. This means that the Fund's score at the end of the reference period was higher than zero. The sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Alcohol
- Avoided Emissions
- High Salaries

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Innovation

- Tobacco

Any Societal or Environmental costs listed above were scored negatively, yet contributed positively to the sustainability score of the Fund. This is because they represent short positions, and short positions with negative scores contribute positively towards the aggregate sustainability score of the Fund.

The Fund committed to invest at least 10% of its long exposure in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool and in line with this commitment the Fund invested 63% of its long exposure in sustainable investments (which are all long positions, as short positions are not deemed to be sustainable investments) as at the end of the reference period. For additional context, the Investment Manager invested 34% of the Fund's gross exposure in sustainable investments. This represents the percentage of sustainable investments as a proportion of the gross exposure of the Fund. The gross exposure includes both long and short positions and this figure is provided for consistency with the basis of the calculations in the asset allocation section below.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (Gross)	Fund (Long)	Period	Fund (%)
Jan 2025 - Dec 2025	34	63	Jan 2025 - Dec 2025	12.8
Jan 2024 - Dec 2024	28	57	Jan 2024 - Dec 2024	17.9
Jan 2023 - Dec 2023	31	65	Jan 2023 - Dec 2023	20.8
Aug 2022 - Dec 2022	31	63	Jan 2022 - Dec 2022	34.7

### Sustainability score

*This table details the Fund's sustainability score, year on year*

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's long portfolio that was invested in sustainable investments,

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions - the estimated environmental and societal benefits of activities and technologies that enable system-wide reductions in carbon emissions, including companies' products and services and country investments in clean energy. Assigned in proportion to the social benefit from avoided emissions which is attributed per unit of the product or service that delivers the emission savings;

- High Salaries - the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Innovation - the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

Sanitation; the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**Principal adverse impacts** are the

**• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded single name long positions in companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded, from its long exposure, single name long positions in companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders’ ‘global norms’ breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company’s overall environmental score.

As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

We engaged with an issuer in the Freight & Logistics Services industry based in Germany on the subject of Workers (PAI 10). We also held an engagement on the subject of Climate oversight (PAIs 1, 2, 3, 4, 5 and 6) with an issuer in the Machinery, Tools, Heavy Vehicles, Trains & Ships industry based in Germany.

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	6
Human Rights	3
Diversity and Inclusion	1
Human Capital Management	1
Natural Capital and Biodiversity	1

The engagements shown may include engagements assigned to short positions, cash, derivatives, collective investment schemes, debt and repos held by the Fund. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments, based on net exposure (as a % of NAV), were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country
KERRY GROUP PLC	Consumer Staples	3.37	Ireland
HISCOX LTD	Financials	3.24	United Kingdom
IMI PLC	Industrials	3.13	United Kingdom
KONINKLIJKE KPN NV	Communication Services	3.04	Netherlands
FLUTTER ENTERTAINMENT PLC	Consumer Discretionary	2.72	United States
DNB BANK	Financials	2.65	Norway
KINGSPAN GROUP PLC	Industrials	2.63	Ireland
SAGE GROUP PLC	Information Technology	2.56	United Kingdom
NEXT PLC	Consumer Discretionary	2.52	United Kingdom
RYANAIR HOLDINGS PLC	Industrials	2.40	Italy
RELX PLC	Industrials	2.36	United Kingdom
ANTOFAGASTA PLC	Materials	2.27	Chile
PRYSMIAN	Industrials	2.25	Italy
SIRIUS REAL ESTATE LIMITED LTD	Real Estate	2.22	Germany

The list above is based on the average of the Fund's net exposure as a % of NAV at each quarter-end during the reference period.. The % of NAV aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of NAV aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of NAV aligned to economic sectors due to the differing calculation

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

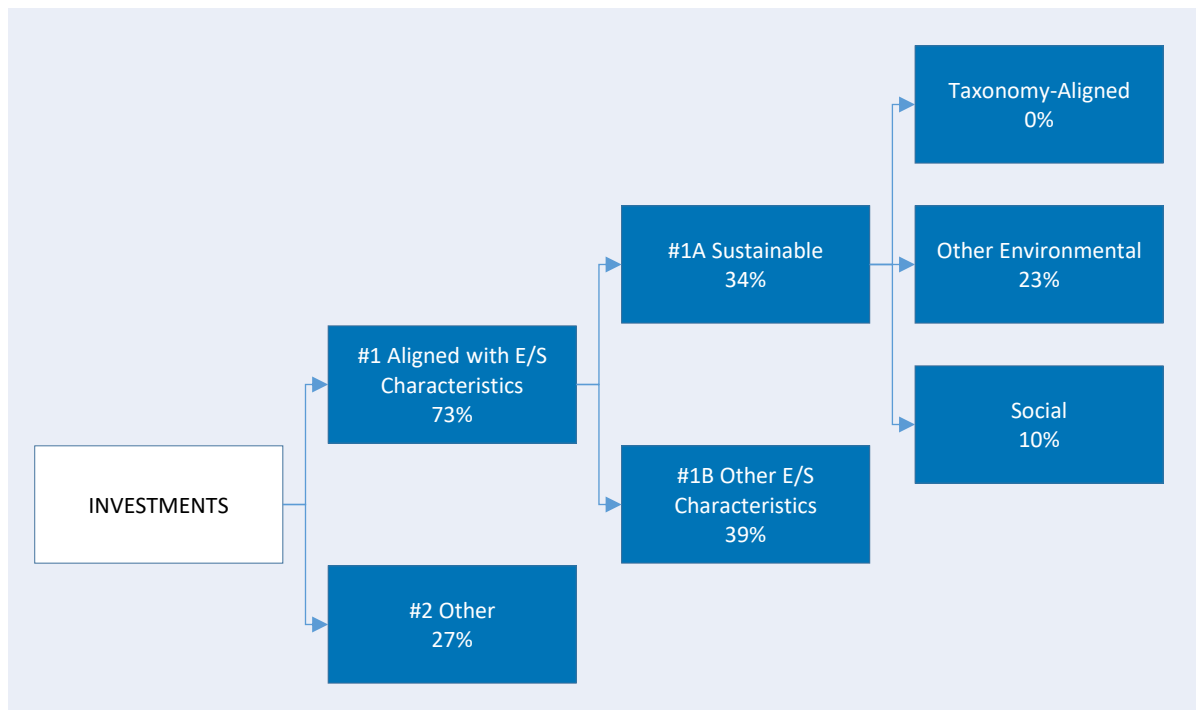

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 73% of gross exposure. The Fund maintained a positive absolute sustainability score, and so the Fund's investments (both long and short) that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). Long positions with positive scores and short positions with negative scores both contributed positively towards the aggregate score, while long positions with negative scores and short positions with positive scores both detracted from the aggregate score. Also included within #1 is the proportion of gross exposure that was invested in sustainable investments, as indicated in #1A.

During the reference period, the Fund invested 34% of its gross exposure in sustainable investments. The gross exposure includes both long and short positions but the percentage only includes long positions as short positions are not deemed to be sustainable investments. Within this, 23% was invested in sustainable investments with an environmental objective and 10% was invested in sustainable investments with a social objective. However, the Fund committed to invest at least 10% of its long positions in sustainable investments. During the reference period the Fund invested 63% of its long exposure in sustainable investments. Within this, 44% was invested in sustainable investments with an environmental objective and 19% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score. Cash and cash equivalents were excluded from #2 Other due to the long / short nature of the Fund's investment strategy.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

The percentages shown above are calculated as a proportion of gross exposure for consistency purposes. However, the Fund committed to invest at least 10% of its long exposure in sustainable investments and during the reference period the Fund invested 63% of its long positions in sustainable investments.

Exposures have been provided on a look through basis for index futures, index options, TRS positions and CFD baskets where possible and netted at the issuer level. There may be instances where a proxy has been used.

This netting was applied before determining whether an exposure was long or short, and before calculating the gross exposure.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors, based on gross and net exposure (as a % of NAV):

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets (Net)	% Assets (Gross)
Industrials	Capital Goods	10.31	33.20
Industrials	Commercial & Professional Services	5.17	5.93
Industrials	Transportation	-1.97	9.28
Financials	Banks	-3.32	12.96
Financials	Financial Services	-6.94	9.35
Financials	Insurance	3.75	8.17

The list above is based on the average of the Fund's gross and net exposure as a % of NAV at each quarter end during the reference period. The % of NAV aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of NAV aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of NAV aligned to economic sectors due to the differing calculation methodologies of these alternative data sources.

Exposures have been provided on a look through basis for index futures, index options, TRS positions and CFD baskets where possible and netted at the issuer level. There may be instances where a proxy has been used.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

**- turnover**  
reflecting the share of revenue from green activities of investee companies

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental

### • *What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

During the reference period based on data at the end of the reference period, the Fund invested 23% of its gross exposure in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy. This percentage is provided for consistency with the basis of the calculations in the asset allocation section above. The Fund invested 44% of its long exposure in sustainable investments with an environmental objective that were not aligned with the Taxonomy.

## What was the share of socially sustainable investments?

During the reference period based on data at the end of the reference period, the Fund invested 10% of its gross exposure in sustainable investments with a social objective. This percentage is provided for consistency with the basis of the calculations in the asset allocation section above. The Fund invested 19% of its long exposure in sustainable investments with a social objective.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes investments that were not scored by Schroders' proprietary sustainability tools and so did not contribute towards the Fund's sustainability score.

Cash and cash equivalents were excluded from #2 Other due to the long / short nature of the Fund's investment strategy.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • How does the reference benchmark differ from a broad market index?

This question is not applicable for this Fund.

### • How did this financial product perform with regard to the sustainability indicators to determine

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

***the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

***• How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

***• How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF EURO Bond

**Legal Entity Identifier :** 61XW5S6PT0DGAORX3X38

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 68% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg EURO Aggregate Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 2.4% and the benchmark's sustainability score at the end of the reference period was 1.9%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Education
- Financial Inclusion
- High Salaries
- Power Provision

The Investment Manager invested 68% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	68
Jan 2024 - Dec 2024	74
Jan 2023 - Dec 2023	73
Aug 2022 - Dec 2022	78

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	2.4	1.9
Jan 2024 - Dec 2024	2.9	1.5
Jan 2023 - Dec 2023	1.7	1.3
Jan 2022 - Dec 2022	3.2	1.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

populations. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and

- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to

PAI 4 (Exposure to companies active in the fossil fuel sector),

PAI 5 (Share of non-renewable energy consumption and production) and

PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste and radioactive waste ratio),

PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises***

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## ***and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:
  - PAI 7 (Activities negatively affecting biodiversity-sensitive areas),
  - PAI 8 (Emissions to water),
  - PAI 9 (Hazardous waste ratio),
  - PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),
  - PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and
  - PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

For sovereign issuers, PAIs 15 (GHG intensity) and 16 (investee countries subject to social violation) are highly relevant and were considered when assessing the suitability of various countries' debt for the portfolio.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Banking Services industry based in France on the subject of Climate mitigation (PAIs 1, 2 and 3). We also held an engagement on the subject of Executive remuneration (PAIs 10, 12 and 13) with an issuer in the Banking Services industry based in Italy. Additionally, we engaged with an issuer based in Italy in the Government Activity industry on the subject of Nature-related risk and management (PAIs 7, 8 and 9).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	38
Corporate Governance	21
Human Rights	12
Natural Capital and Biodiversity	11
Diversity and Inclusion	9
Human Capital Management	5

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 85%. The Fund maintained a higher overall sustainability score than the Bloomberg EURO Aggregate Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 68%. To be classified

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

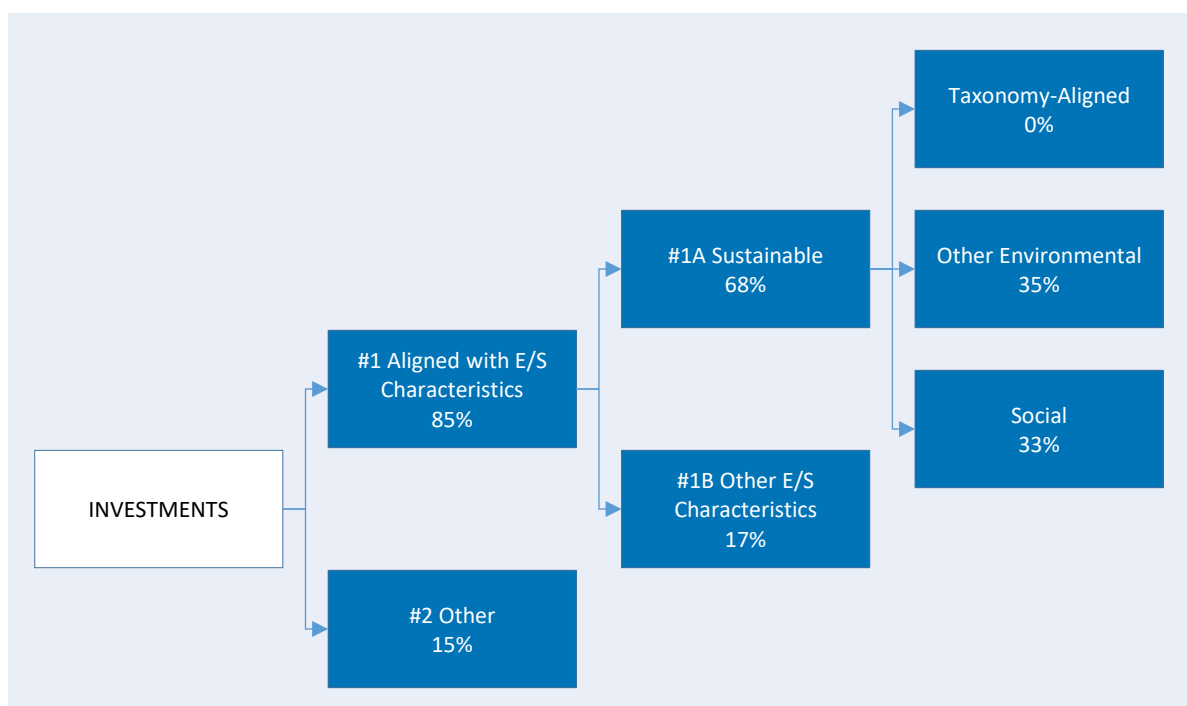

Of the Fund's sustainable investments, 35% was invested in sustainable investments with an environmental objective and 33% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR)

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 35%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 33%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

## Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF EURO Government Bond

**Legal Entity Identifier :** GQO6F0370CMTJBILPZ30

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 88% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Euro Government Index, based on the Investment Manager's rating system\*. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

*\*Please note that at the point in time reported on, the Fund's score was lower than the benchmark's score. However, as stated in the pre-contractual disclosure, we monitor compliance of this characteristic by reference to the weighted average score of the Fund compared against the weighted average score of the benchmark over the previous six month period based on month-end data, and we confirm that the Fund was compliant during the reference period.*

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • How did the sustainability indicators perform?

The Fund's sustainability score at the end of the reference period was 2.2% and the benchmark's sustainability score at the end of the reference period was 2.3%. As noted above, this data is shown at a point in time, however the Fund maintained a higher overall sustainability score than the benchmark over the reference period in line with our compliance monitoring framework. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Clean Energy
- Education
- International Aid
- Refugees

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## - Socio-Political Stability

The Investment Manager invested 88% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

### • ...and compared to previous periods?

#### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	88
Jan 2024 - Dec 2024	93
Jan 2023 - Dec 2023	97
Aug 2022 - Dec 2022	97

#### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	2.2	2.3
Jan 2024 - Dec 2024	2.4	2.3
Jan 2023 - Dec 2023	2.5	2.3
Jan 2022 - Dec 2022	2.7	2.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

### • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- International Aid: the estimated societal benefits associated with humanitarian aid following natural disasters or conflicts and financial support for economic development of underdeveloped economies. Assigned in proportion to total net Official Development Assistance (ODA) receipts;
- Refugees: the estimated societal benefits associated with hosting refugees. Assigned by multiplying the number of refugees accepted per country, netted by people displaced internally and internationally, by the estimated benefit per refugee; and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schrodgers' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:  
- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:  
PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste ratio),  
PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

For sovereign issuers, PAIs 15 (GHG intensity) and 16 (investee countries subject to social violation) are highly relevant and were considered when assessing the suitability of various countries' debt for the portfolio.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Government Activity industry based in Italy on the subject of Nature-related risk and management (PAIs 7, 8 and 9). We also held an engagement on the subject of Transparency, risk and reporting (PAI 10) with an issuer in the Government Activity industry based in the United Kingdom. Additionally, we engaged with an issuer based in Belgium in the Government Activity industry on the subject of Climate oversight (PAIs 1, 2, 3, 4, 5 and 6).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	2
Natural Capital and Biodiversity	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 94%. The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Euro Government Index\* and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

\*As stated above, please note that at the point in time reported on, the Fund's score was lower than the benchmark's score. However the Fund maintained a higher overall sustainability score than the benchmark over the reference period in line with our compliance monitoring framework.

#1A includes the percentage invested in sustainable investments, which is equal to 88%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

Of the Fund's sustainable investments, 20% was invested in sustainable investments with an environmental objective and 69% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

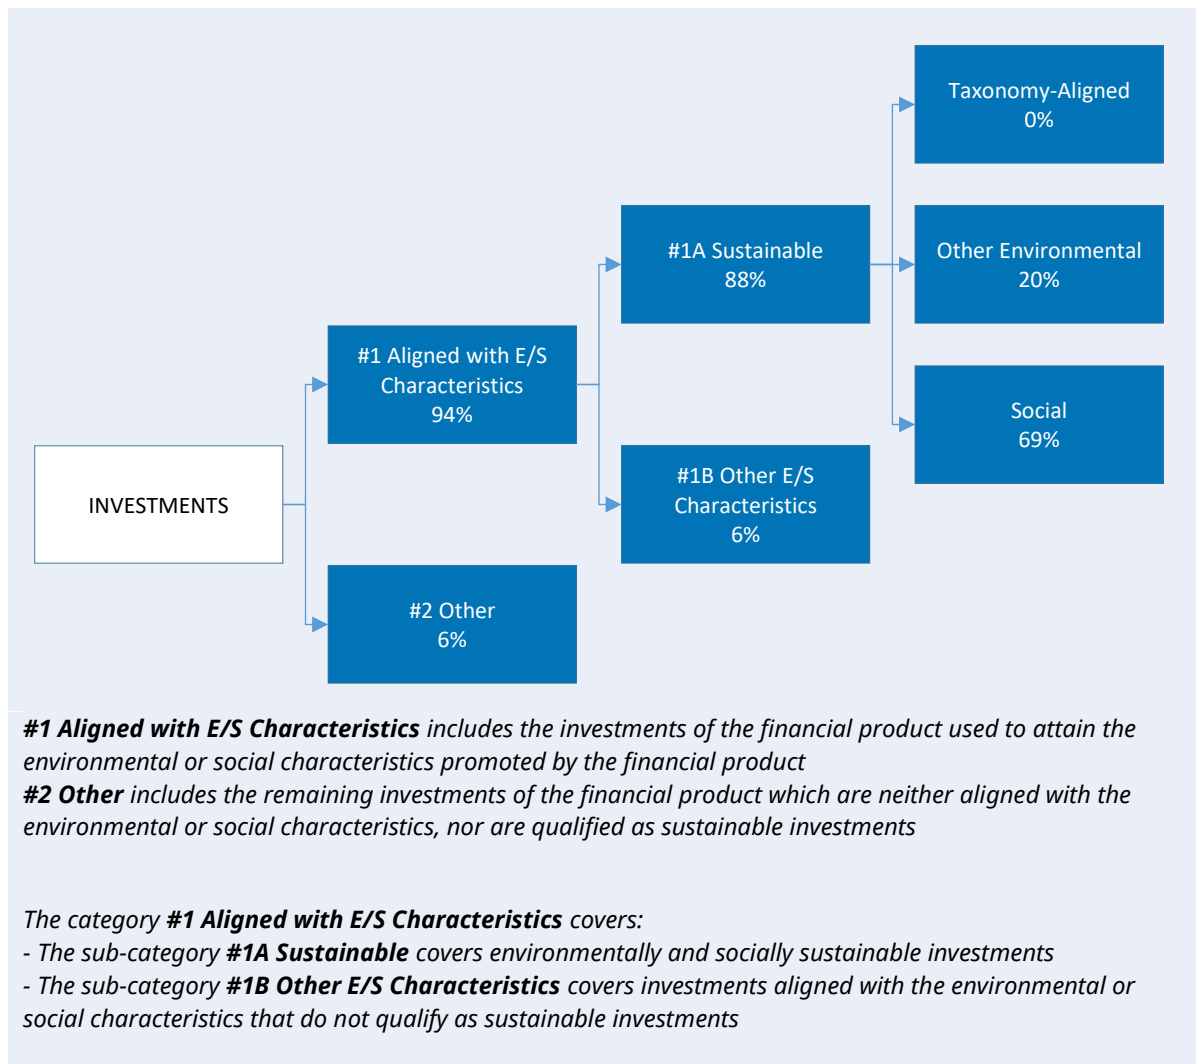

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets
Sovereign (Developed)		73.85
Financial	Banking	5.32
Financial	Financial Services	0.38
Foreign Sovereign		4.90
EMD Sovereign		4.16
Agency		3.86
Supranational		2.89
Local Authority		2.47
Government Guaranteed		1.51
Cash Equivalents	Treasury Bills	1.41
Covered	Covered Bonds	0.23
Derivatives	Interest Rate Derivatives	0.02
Cash	Margin Cash	0.47
Cash	Cash	-1.46

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have

## • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

greenhouse gas emission levels corresponding to the best performance.

## • How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 20%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 69%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

***promoted?***

***• How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

***• How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF EURO Short Term Bond

**Legal Entity Identifier :** LKIIDMHWTJNCPJTJ3M14

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 72% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Euro Aggregate (1-3 Y) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 2.0% and the benchmark's sustainability score at the end of the reference period was 1.7%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Clean Energy
- Education
- Financial Inclusion
- High Salaries
- Socio-Political Stability

The Investment Manager invested 72% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	72
Jan 2024 - Dec 2024	67
Jan 2023 - Dec 2023	68
Aug 2022 - Dec 2022	66

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	2.0	1.7
Jan 2024 - Dec 2024	1.4	0.8
Jan 2023 - Dec 2023	1.0	0.5
Jan 2022 - Dec 2022	1.9	0.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

populations. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and

- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to  
PAI 4 (Exposure to companies active in the fossil fuel sector),  
PAI 5 (Share of non-renewable energy consumption and production) and  
PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:  
- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

For sovereign issuers, PAIs 15 (GHG intensity) and 16 (investee countries subject to social violation) are highly relevant and were considered when assessing the suitability of various countries' debt for the portfolio.

We also considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Banking Services industry based in the United Kingdom on the subject of Climate mitigation (PAIs 1, 2 and 3). We also held an engagement on the subject of Executive remuneration (PAIs 10, 12 and 13) with an issuer in the Banking Services industry based in Italy. Additionally, we engaged with an issuer based in Italy in the Government Activity industry on the subject of Nature-related risk and management (PAIs 7, 8 and 9).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	23
Corporate Governance	12
Human Rights	7
Natural Capital and Biodiversity	4
Human Capital Management	3
Diversity and Inclusion	3

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schrodgers Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 86%. The Fund maintained a higher overall sustainability score than the Bloomberg Euro Aggregate (1-3 Y) Index and so the Fund's investments that were scored by Schrodgers' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#1A includes the percentage invested in sustainable investments, which is equal to 72%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

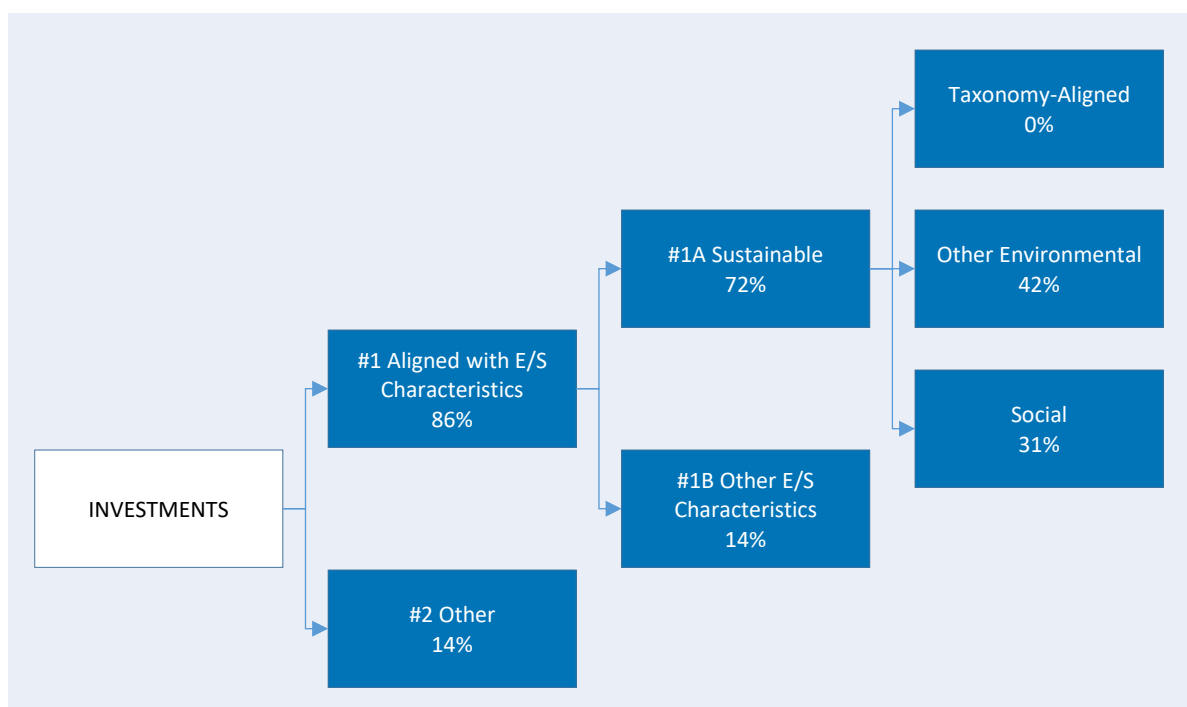

Of the Fund's sustainable investments, 42% was invested in sustainable investments with an environmental objective and 31% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## - capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

## - operational expenditure (OpEx)

reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 42%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 31%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Bond

**Legal Entity Identifier :** ITFMVE39JEIQ35YCI721

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 62% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Global Aggregate Bond Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 0.7% and the benchmark's sustainability score at the end of the reference period was 0.3%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Clean Energy
- Connectivity
- Education
- Patents
- Socio-Political Stability

The Investment Manager invested 62% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	62
Jan 2024 - Dec 2024	65
Jan 2023 - Dec 2023	60
Sep 2022 - Dec 2022	65

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	0.7	0.3
Jan 2024 - Dec 2024	1.2	0.2
Jan 2023 - Dec 2023	0.6	-0.1
Jan 2022 - Dec 2022	1.3	-0.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Education: the estimated societal benefits of a country's education spend per school age capita;
- Patents: the estimated societal benefits associated with governments conducting in-house Research and Development (R&D) and also finance R&D in various sectors of the economy. Assigned in proportion to the social benefits of innovation to countries using resident patent application data from the World Intellectual Property Organisation (WIPO); and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schrodgers' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schrodgers.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to

PAI 4 (Exposure to companies active in the fossil fuel sector),

PAI 5 (Share of non-renewable energy consumption and production) and

PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste and radioactive waste ratio),

PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:  
- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

For sovereign issuers, PAIs 15 (GHG intensity) and 16 (investee countries subject to social violation) are highly relevant and were considered when assessing the suitability of various countries' debt for the portfolio.

We also considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Banking Services industry based in the United Kingdom on the subject of Climate mitigation (PAIs 1, 2 and 3). We also held an engagement on the subject of Transparency, risk and reporting (PAI 10) with an issuer in the Government Activity industry based in Mexico. Additionally, we engaged with an issuer based in Chile in the Government Activity industry on the subject of Nature-related risk and management (PAIs 7, 8 and 9).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	46
Corporate Governance	29
Human Rights	25
Diversity and Inclusion	12
Natural Capital and Biodiversity	11
Human Capital Management	10

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 86%. The Fund maintained a higher overall sustainability score than the Bloomberg Global Aggregate Bond Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#1A includes the percentage invested in sustainable investments, which is equal to 62%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

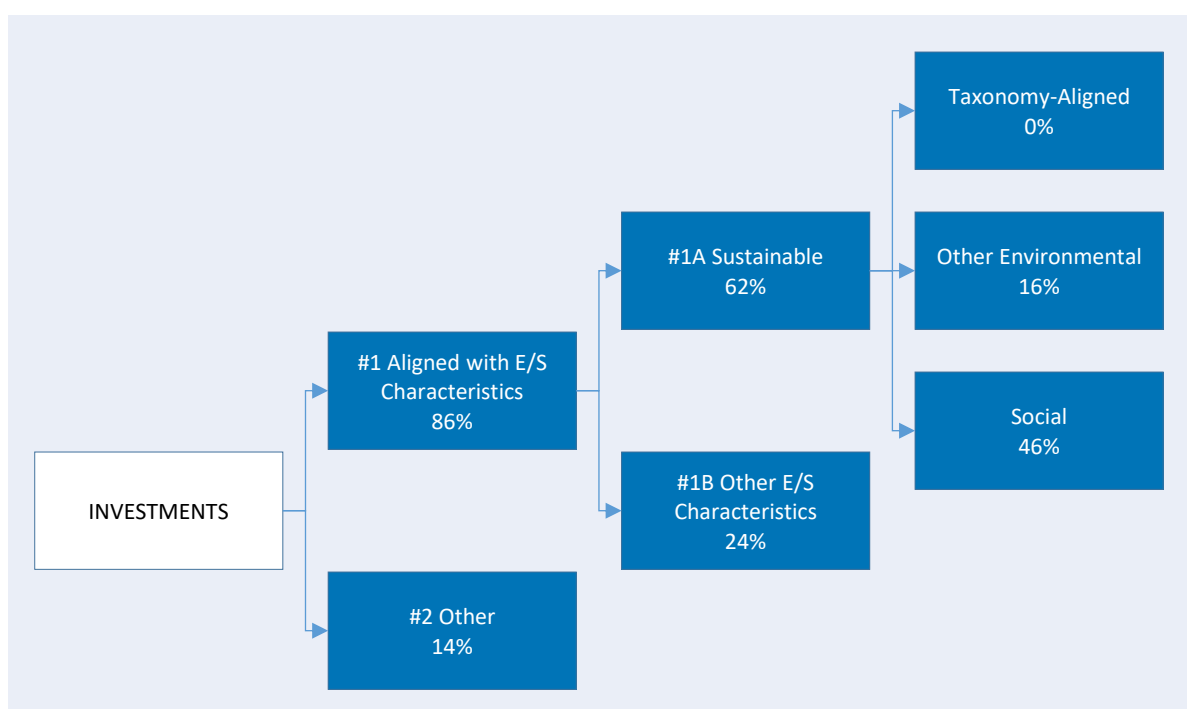

Of the Fund's sustainable investments, 16% was invested in sustainable investments with an environmental objective and 46% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 16%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 46%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Inflation Linked Bond

**Legal Entity Identifier :** RUBFC6653PDCGJDLQB12

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 91% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Global Governments Inflation-Linked EUR Hedged Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 2.0% and the benchmark's sustainability score at the end of the reference period was 1.5%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Education
- International Aid
- Socio-Political Stability
- University Education
- Water Access

The Investment Manager invested 91% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	91
Jan 2024 - Dec 2024	96
Jan 2023 - Dec 2023	99
Aug 2022 - Dec 2022	97

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	2.0	1.5
Jan 2024 - Dec 2024	3.6	1.6
Jan 2023 - Dec 2023	2.9	1.8
Jan 2022 - Dec 2022	1.8	1.3

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Education: the estimated societal benefits of a country's education spend per school age capita;
- International Aid: the estimated societal benefits associated with humanitarian aid following natural disasters or conflicts and financial support for economic development of underdeveloped economies. Assigned in proportion to total net Official Development Assistance (ODA) receipts;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth;

- University Education: the estimated societal benefits associated with the level of education, including tertiary and international education. Assigned in proportion to net international student figures; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to  
PAI 4 (Exposure to companies active in the fossil fuel sector),  
PAI 5 (Share of non-renewable energy consumption and production) and  
PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:  
- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

For sovereign issuers, PAIs 15 (GHG intensity) and 16 (investee countries subject to social violation) are highly relevant and were considered when assessing the suitability of various countries' debt for the portfolio.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Banking Services industry based in Canada on the subject of Climate mitigation (PAIs 1, 2 and 3). We also held an engagement on the subject of Transparency, risk and reporting (PAI 10) with an issuer in the Government Activity industry based in the United Kingdom. Additionally, we engaged with an issuer based in France in the Multiline Utilities industry on the subject of Communities (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	21
Corporate Governance	11
Human Rights	5
Human Capital Management	3
Diversity and Inclusion	2
Natural Capital and Biodiversity	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 93%. The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Global Governments Inflation-Linked EUR Hedged

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 91%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

Of the Fund's sustainable investments, 41% was invested in sustainable investments with an environmental objective and 50% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

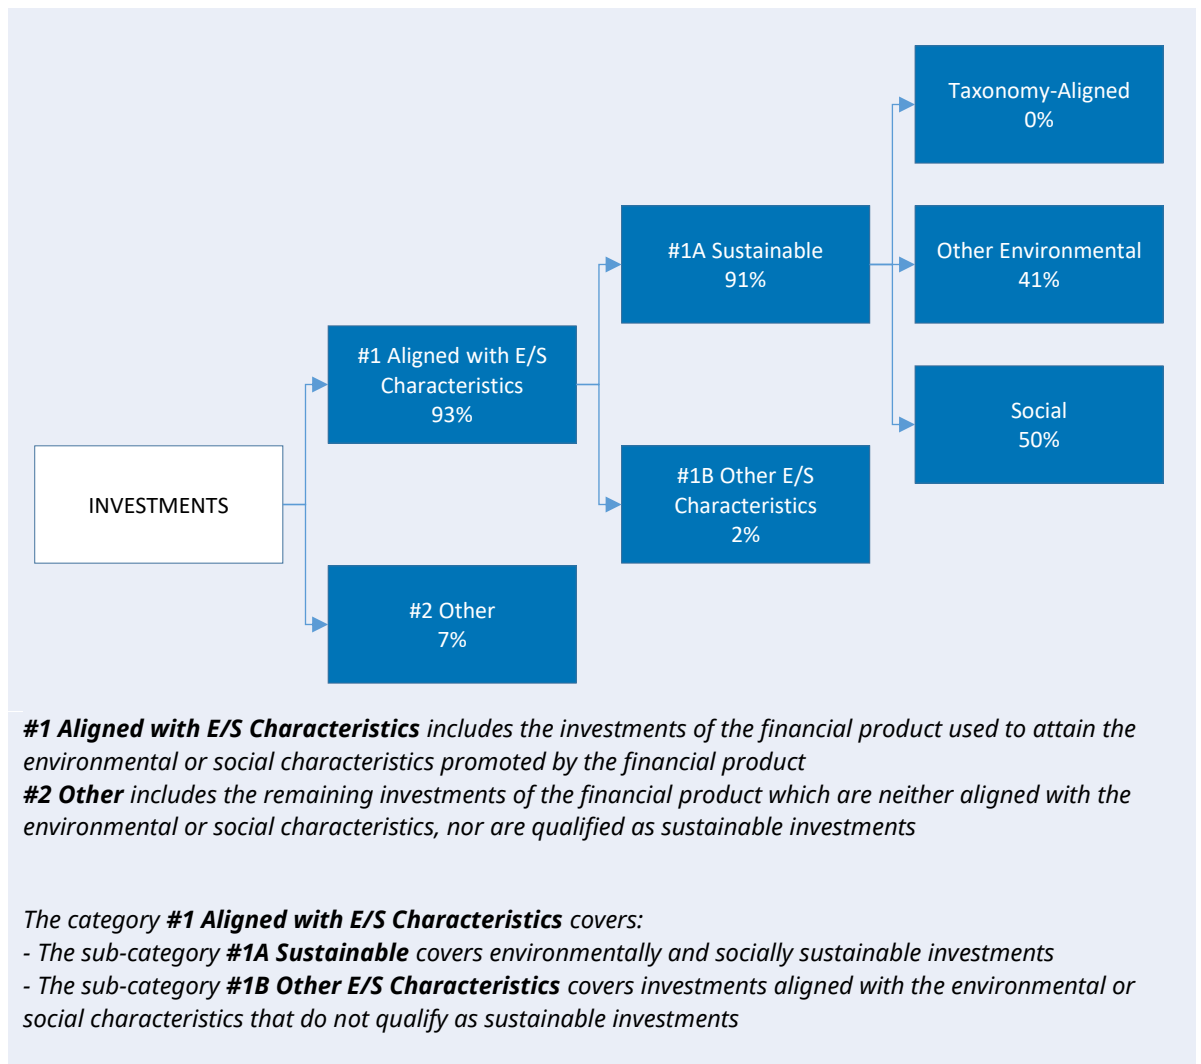

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure** (OpEx) reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 41%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 50%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 – 5 November 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable US Dollar Short Duration Bond

**Legal Entity Identifier :** 549300SQ2F1F5L1C1W23

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 62% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 5 November 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg US Govt/Credit 1-3 Year Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 40% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 5 November 2025 when the Fund was liquidated.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 3.6% and the benchmark's sustainability score at the end of the reference period was 0.0%. In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Education
- High Salaries
- Sanitation
- Water Access

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 5 November 2025

The Investment Manager invested 62% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Oct 2025	62
Jan 2024 - Dec 2024	63
Jan 2023 - Dec 2023	59
Aug 2022 - Dec 2022	62

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Oct 2025	3.6	0.0
Jan 2024 - Dec 2024	2.0	-1.3
Jan 2023 - Dec 2023	1.8	-2.1
Jan 2022 - Dec 2022	3.6	-2.3

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 5 November 2025

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schrodgers.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schrodgers' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 5 November 2025

Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 5 November 2025

used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators and Schroders' 'global norms' breach list which covers:
  - PAI 7 (Activities negatively affecting biodiversity-sensitive areas),
  - PAI 8 (Emissions to water),
  - PAI 9 (Hazardous waste ratio),
  - PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),
  - PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and
  - PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 5 November 2025

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

We also considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Banking Services industry based in the United Kingdom on the subject of Climate mitigation (PAIs 1, 2 and 3). We also held an engagement on the subject of Executive remuneration (PAIs 10, 12 and 13) with an issuer in the Banking Services industry based in France. Additionally, we engaged with an issuer based in the USA in the Water & Related Utilities industry on the subject of Sustainable food and water (PAIs 7 and 8).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	10
Corporate Governance	4
Natural Capital and Biodiversity	3
Diversity and Inclusion	3
Human Rights	2
Human Capital Management	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 5 November 2025

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings as at the final month end during the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 85%. The Fund maintained a higher overall sustainability score than the Bloomberg US Govt/Credit 1-3 Year Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 62%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 5 November 2025

scored by Schroders' proprietary tool.

- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

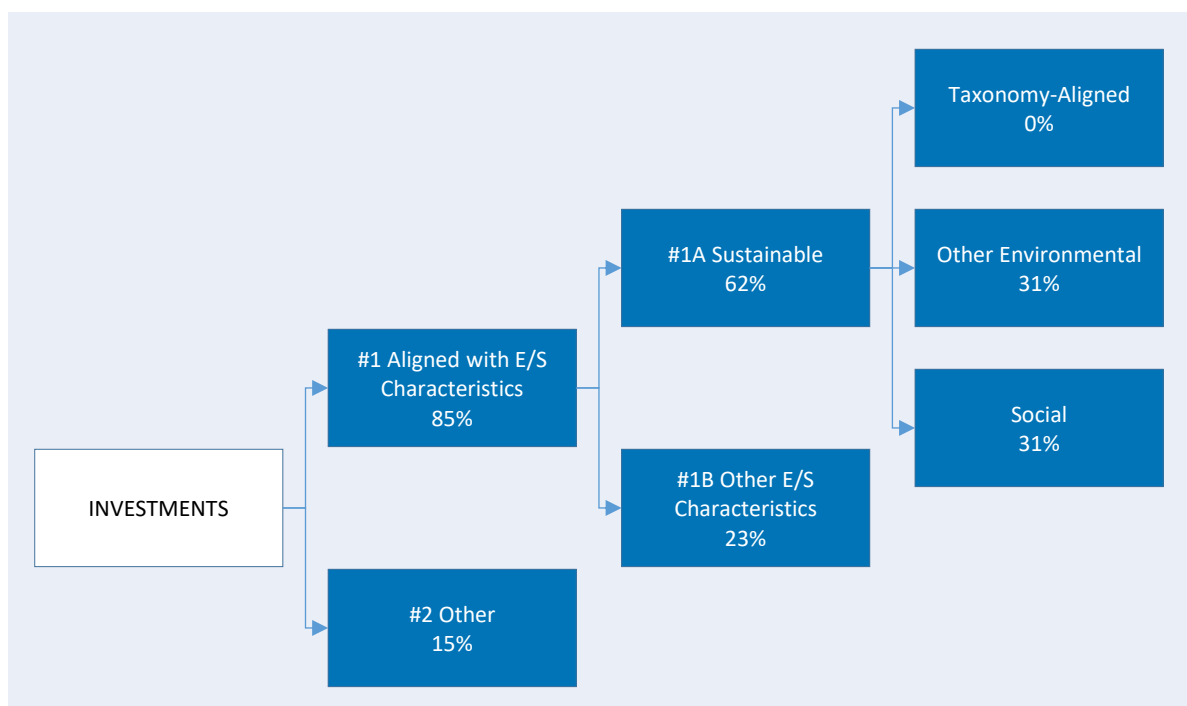

Of the Fund's sustainable investments, 31% was invested in sustainable investments with an environmental objective and 31% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 5 November 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 5 November 2025

Foreign Sovereign		0.33

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 5 November 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 5 November 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 31%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 31%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 5 November 2025

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 5 November 2025

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF US Dollar Bond

**Legal Entity Identifier :** GB3IPB54OX2RMO1Y4781

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 56% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg US Aggregate Bond (TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary tool.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was -0.1% and the benchmark's sustainability score at the end of the reference period was -1.2%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- Education
- High Salaries
- Water Access

The Investment Manager invested 56% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	56
Jan 2024 - Dec 2024	63
Jan 2023 - Dec 2023	59
Aug 2022 - Dec 2022	62

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	-0.1	-1.2
Jan 2024 - Dec 2024	2.0	-1.3
Jan 2023 - Dec 2023	1.8	-2.1
Jan 2022 - Dec 2022	3.6	-2.3

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## *How were the indicators for adverse impacts on sustainability factors taken into account?*

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Banking Services industry based in the United Kingdom on the subject of Climate oversight (PAIs 1, 2, 3, 4, 5 and 6). We also held an engagement on the subject of Corporate Governance (PAIs 10, 12 and 13) with an issuer in the Government Activity industry based in Colombia. Additionally, we engaged with an issuer based in the USA in the Oil & Gas Related Equipment and Services industry on the subject of Communities (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	17
Corporate Governance	9
Human Rights	6
Human Capital Management	4
Natural Capital and Biodiversity	3
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 77%. The Fund maintained a higher overall sustainability score than the Bloomberg US Aggregate Bond (TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 56%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

scored by Schroders' proprietary tool.

- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

Of the Fund's sustainable investments, 24% was invested in sustainable investments with an environmental objective and 32% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 24%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 32%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 15 September 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF AAA Flexible ABS

**Legal Entity Identifier :** 636700GQ961ANWAO0935

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input type="checkbox"/> with a social objective
	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 15 September 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund only invested in assets deemed above a minimum threshold based on the Investment Manager's rating system. Securities were ranked across Environmental, Social and Governance factors using a scorecard system and were awarded points on a 100-point /100 percent scale. These scores were then translated into a scoring system of 1- star - 5-stars, with a score of 5-stars deemed the highest.

The Investment Manager ensured that at least 80% of the assets in the Fund were ranked in the top 3 Sustainability categories (3, 4, 5-stars) and 100% of the assets were invested in those ranked 2-stars or higher.

The reference period for this Fund is from when the fund was launched on 15 September 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Investment Manager used different sustainability indicators to score each investment in the Fund depending on the specific asset-type, e.g. whether the underlying secured assets were mortgages or commercial real estate or another asset type. Indicators were either quantitative, data-oriented measures or information provided following engagement with issuers. Indicators included but were not limited to environmental metrics such as environmental transition risk or physical risk, social metrics such as predatory lending risk or consumer education effort and governance metrics such as risk retention or clarity of roles. 0.1% of the assets in the Fund were ranked as 5-stars, 27.4% were ranked as 4-stars and 71.2% were ranked as 3-stars, measured at the end of the reference period. Compliance with the minimum required score was monitored daily via our automated compliance controls.

### • *...and compared to previous periods?*

As this is our first reporting period, this question is not applicable.

### • *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

### • *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

# SFDR Periodic Report (continued)

Reference Period: 15 September 2025 - 31 December 2025

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

This question is not applicable for this Fund.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

This question is not applicable for this Fund.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

This question is not applicable for this Fund.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

As stated in the pre-contractual disclosure for the Fund, the Investment Manager was not able to adequately consider the principal adverse impacts on sustainability factors as these metrics only applied to investments in companies, sovereign debt and real estate. Due to the nature of the Fund’s assets, the Investment Manager could only consider adverse impacts applicable to this asset class. The Investment Manager considered adverse impacts relevant to the strategy in the following way:

- The Investment Manager ensured that investments were aligned with the UN Principles for Responsible Investment (“PRI”). All investments were compliant with industry standards, fair, and fit-for purpose;
- The Investment Manager’s rating system considered adverse impacts on society such as the asset footprint on the environment or impact on climate change;

# SFDR Periodic Report (continued)

Reference Period: 15 September 2025 - 31 December 2025

- Investments that could not meet minimum standards related to social, environmental or governance concerns were excluded from the portfolio. The list of excluded sectors was reviewed, updated and published quarterly.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **15 Sep 2025 to 31 Dec 2025**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

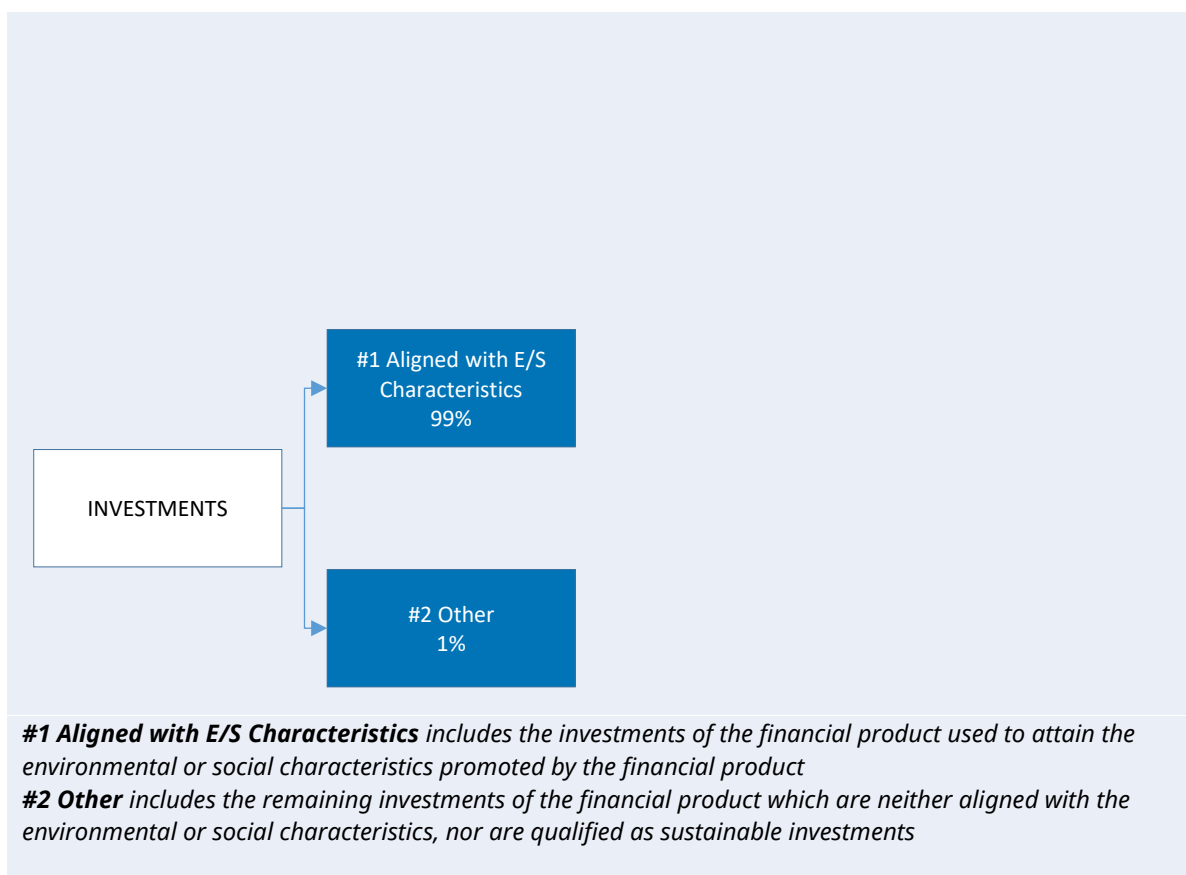

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. This means investments that were ranked in the top 3 Sustainability categories according to the Investment Manager's rating criteria.

#2 Other includes investments that were treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or

# SFDR Periodic Report (continued)

Reference Period: 15 September 2025 - 31 December 2025

managing the Fund more efficiently. #2 also includes investments that were not aligned with the environmental or social characteristics of the Fund as they were not ranked in the top 3 Sustainability categories according to the Investment Manager's rating criteria.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Securitized	Asset Backed	47.31
Securitized	Collateralized Mortgage Obligation	29.53
Securitized	Mortgage Backed	20.37
Securitized	Commercial Mortgage Backed	2.12
Cash Equivalents	Treasury Bills	10.76
Derivatives	FX Derivatives	-0.62
Cash	Margin Cash	0.37
Cash	Cash	-9.85

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR)

# SFDR Periodic Report (continued)

Reference Period: 15 September 2025 - 31 December 2025

maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 15 September 2025 - 31 December 2025

## - capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

## - operational expenditure

(OpEx) reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

# SFDR Periodic Report (continued)

Reference Period: 15 September 2025 - 31 December 2025

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This question is not applicable for this Fund.

## What was the share of socially sustainable investments?

This question is not applicable for this Fund.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes investments that were treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes investments that were not aligned with the environmental or social characteristics of the Fund as they were not ranked in the top 3 Sustainability categories according to the Investment Manager's rating criteria.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 15 September 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- At least 80% of the assets in the Fund were ranked in the top 3 Sustainability categories (3, 4, 5-stars) and the Investment Manager invested 100% of its assets in those ranked 2-stars or higher based on the Investment Manager's rating system;
- To the extent possible the Investment Manager assessed good governance of the special purpose vehicles (SPVs – the structures holding the assets) and assessed the fiduciary behaviour of parties to the structure; and
- Securitised markets and the markets for private financing are less standardised with respect to ESG metrics as there is no third-party scoring and reporting is in a non-standard format. Engagement activities focused on deriving information, to understand where sub-sectors and companies were in their evolution, to improve transparency, to assess social, environmental or alignment characteristics to reward and incentivise / more correctly risk price for externalities, to identify those more likely to achieve levels of governance, social policy or environmental advantage that were aligned with our own standards, particularly where the market has not correctly differentiated.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

# SFDR Periodic Report (continued)

Reference Period: 15 September 2025 - 31 December 2025

- *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

**Legal Entity Identifier :** 549300WDWBV63KONLL52

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input type="checkbox"/> with a social objective
	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund only invested in assets deemed above a minimum threshold based on the Investment Manager's rating system. Securities were ranked across Environmental, Social and Governance factors using a scorecard system and were awarded points on a 100-point /100 percent scale. These scores were then translated into a scoring system of 1- star – 5-stars, with a score of 5-stars deemed the highest.

The Investment Manager ensured that at least 80% of the assets in the Fund were ranked in the top 3 Sustainability categories (3, 4, 5-stars) and 100% of the assets were invested in those ranked 2-stars or higher.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • How did the sustainability indicators perform?

The Investment Manager used different sustainability indicators to score each investment in the Fund depending on the specific asset-type, e.g. whether the underlying secured assets were mortgages or commercial real estate or another asset type. Indicators were either quantitative, data-oriented measures or information provided following engagement with issuers. Indicators included but were not limited to environmental metrics such as environmental transition risk or physical risk, social metrics such as predatory lending risk or consumer education effort and governance metrics such as risk retention or clarity of roles. 3.4% of the assets in the Fund were ranked as 5-stars, 44.8% were ranked as 4-stars and 50.2% were ranked as 3-stars, measured at the end of the reference period. Compliance with the minimum required score was monitored daily via our automated compliance controls.

### • ...and compared to previous periods?

#### Proprietary star ratings

This table details the percentage of assets invested in accordance with the proprietary star ratings, year on year.

Period	5-stars (%)	4-stars (%)	3-stars (%)
Jan 2025 – Dec 2025	3	45	50
Jan 2024 – Dec 2024	5	42	51
Jan 2023 – Dec 2023	11	31	58
Sep 2022 – Dec 2022	20	28	48

From 2022 to 2024 the percentage of assets in each category were calculated as an average of quarter-end data.

From 2025 the percentages represent the Fund's holdings at the end of the reference period.

### • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

This question is not applicable for this Fund.

***How were the indicators for adverse impacts on sustainability factors taken into account?***

This question is not applicable for this Fund.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

This question is not applicable for this Fund.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

As stated in the pre-contractual disclosure for the Fund, the Investment Manager was not able to adequately consider the principal adverse impacts on sustainability factors as these metrics only applied to investments in companies, sovereign debt and real estate. Due to the nature of the Fund’s assets, the Investment Manager could only consider adverse impacts applicable to this asset class. The Investment Manager considered adverse impacts relevant to the strategy in the following way:

- The Investment Manager ensured that investments were aligned with the UN Principles for Responsible Investment (“PRI”). All investments were compliant with industry standards, fair, and fit-for purpose;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- The Investment Manager's rating system considered adverse impacts on society such as the asset footprint on the environment or impact on climate change;

- Investments that could not meet minimum standards related to social, environmental or governance concerns were excluded from the portfolio. The list of excluded sectors was reviewed, updated and published quarterly.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

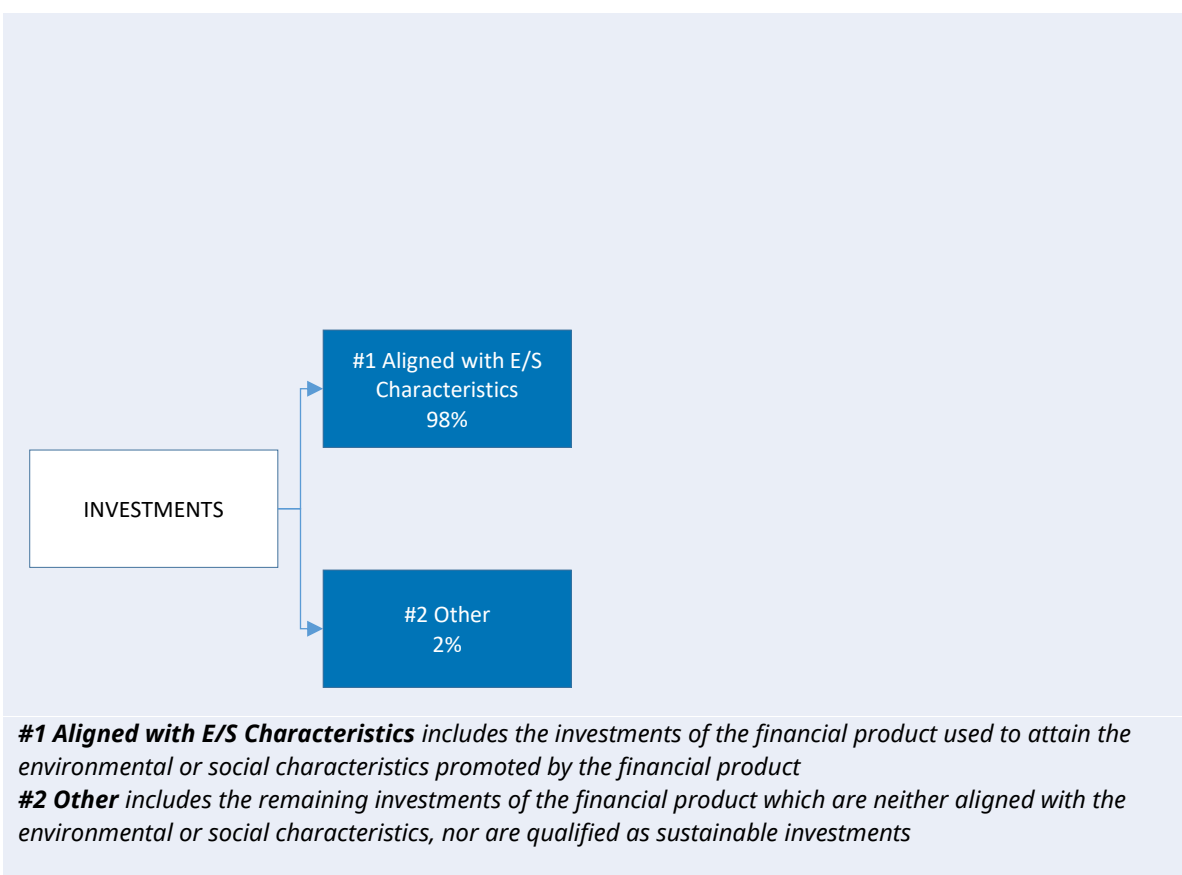

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. This means investments that were ranked in the top 3 Sustainability categories according to the Investment Manager's rating criteria. This figure represents the Fund's holdings at the end of the reference period.

#2 Other includes investments that were treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes investments that were not aligned with the environmental or social characteristics of the Fund as they were not ranked in the top 3 Sustainability categories according to the Investment Manager's rating criteria.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets
Securitized	Collateralized Mortgage Obligation	46.15
Securitized	Asset Backed	41.06
Securitized	Mortgage Backed	5.58
Securitized	Commercial Mortgage Backed	2.10
Cash Equivalents	Treasury Bills	9.57
Collective Investments	Unit Trusts	1.76
Financial	Financial Services	0.59
Derivatives	FX Derivatives	-0.28
Cash	Margin Cash	0.19
Cash	Cash	-6.72

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

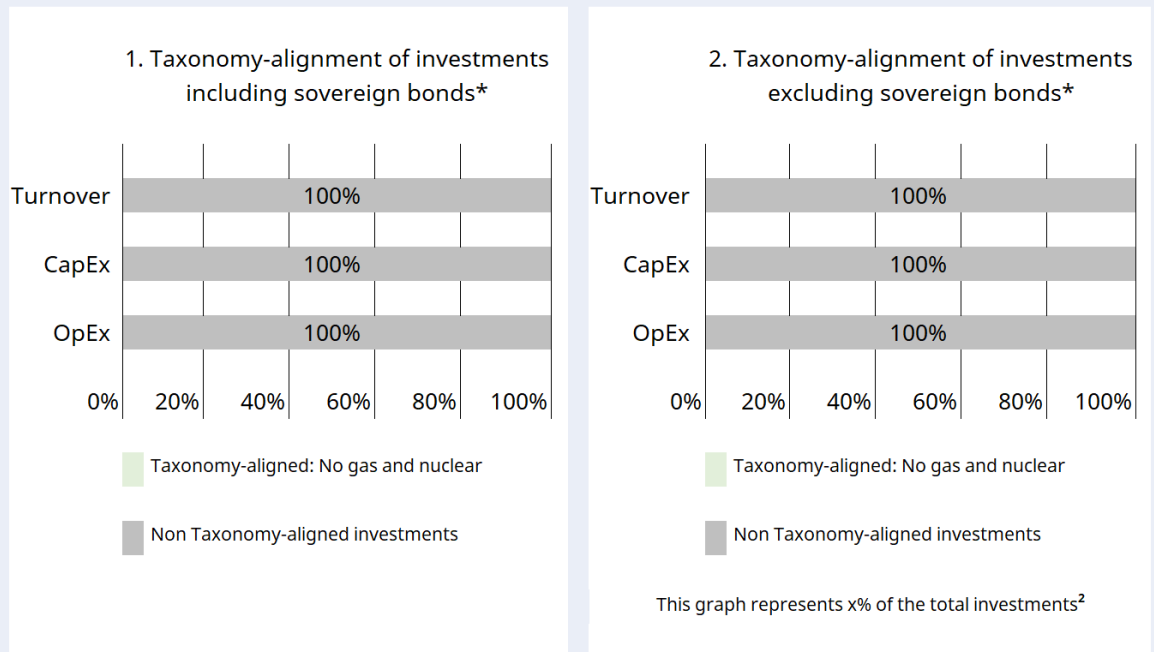

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

greenhouse gas emission levels corresponding to the best performance.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

This question is not applicable for this Fund.

**What was the share of socially sustainable investments?**

This question is not applicable for this Fund.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes investments that were treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes investments that were not aligned with the environmental or social characteristics of the Fund as they were not ranked in the top 3 Sustainability categories according to the Investment Manager's rating criteria.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- At least 80% of the assets in the Fund were ranked in the top 3 Sustainability categories (3, 4, 5-stars) and the Investment Manager invested 100% of its assets in those ranked 2-stars or higher based on the Investment Manager's rating system;
- To the extent possible the Investment Manager assessed good governance of the special purpose vehicles (SPVs – the structures holding the assets) and assessed the fiduciary behaviour of parties to the structure; and
- Securitised markets and the markets for private financing are less standardised with respect to ESG metrics as there is no third-party scoring and reporting is in a non-standard format. Engagement activities focused on deriving information, to understand where sub-sectors and companies were in their evolution, to improve transparency, to assess social, environmental or alignment characteristics to reward and incentivise / more correctly risk price for externalities, to identify those more likely to achieve levels of governance, social policy or environmental advantage that were aligned with our own standards, particularly where the market has not correctly differentiated.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • How does the reference benchmark differ from a broad market index?

This question is not applicable for this Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Asian Credit Opportunities

**Legal Entity Identifier :** 549300T8YDW23OK28X19

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 68% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the JP Morgan Asia Credit Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 2.7% and the benchmark's sustainability score at the end of the reference period was -3.2%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- Financial Inclusion
- High Salaries
- Power Provision

The Investment Manager invested 68% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	68
Jan 2024 - Dec 2024	52
Jan 2023 - Dec 2023	47
Aug 2022 - Dec 2022	47

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	2.7	-3.2
Jan 2024 - Dec 2024	1.2	-2.5
Jan 2023 - Dec 2023	1.2	-2.9
Jan 2022 - Dec 2022	3.4	-2.3

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Banking Services industry based in the United Kingdom on the subject of Climate mitigation (PAIs 1, 2 and 3). We also held an engagement on the subject of Corporate Governance (PAIs 10, 12 and 13) with an issuer in the Government Activity industry based in Colombia. Additionally, we engaged with an issuer based in the Netherlands in the Software & IT Services industry on the subject of Circular economy, pollution and waste (PAI 9).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	15
Corporate Governance	10
Natural Capital and Biodiversity	4
Human Capital Management	3
Diversity and Inclusion	2
Human Rights	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 95%. The Fund maintained a higher overall sustainability score than the JP Morgan Asia Credit Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 68%. To be classified

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

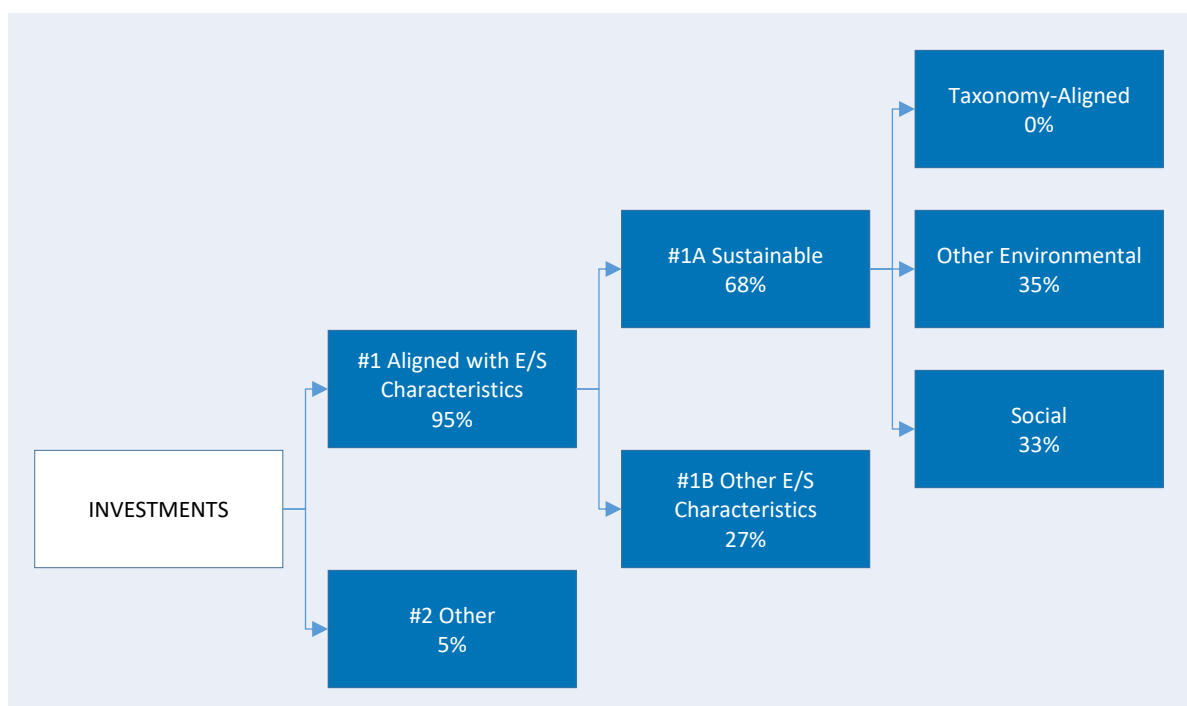

Of the Fund's sustainable investments, 35% was invested in sustainable investments with an environmental objective and 33% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

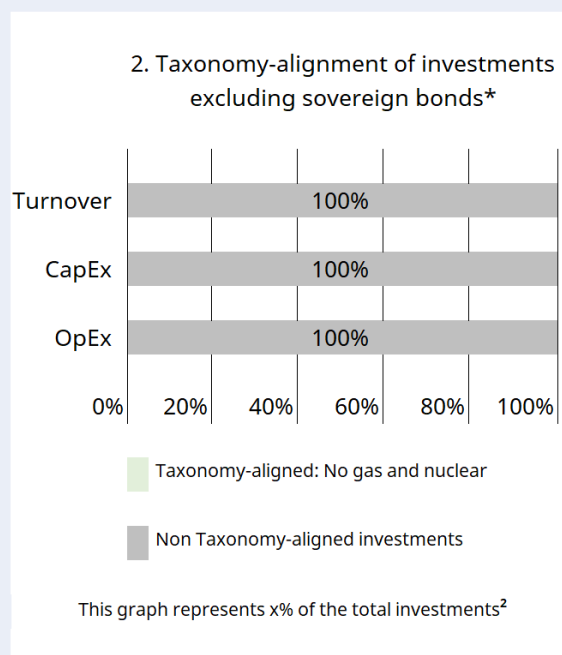

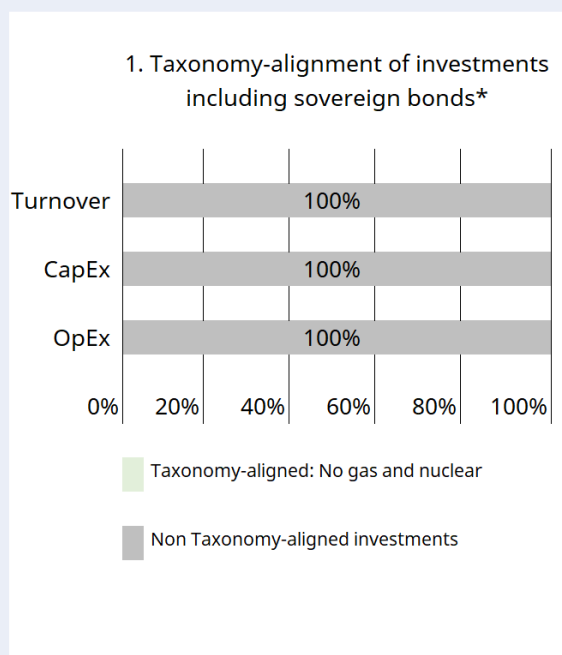

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 35%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 33%.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund’s engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question ‘How did this financial product consider principal adverse impacts on sustainability factors?’. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Asian Local Currency Bond

**Legal Entity Identifier :** 549300KCHS55SNB1JYW85

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 29% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the iBoxx Asian Local Currency Bond Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary tool.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was -0.9% and the benchmark's sustainability score at the end of the reference period was -1.2%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Clean Energy
- Education
- Patents
- Socio-Political Stability

The Investment Manager invested 29% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	29
Jan 2024 - Dec 2024	28
Jan 2023 - Dec 2023	30
Sep 2022 - Dec 2022	33

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	-0.9	-1.2
Jan 2024 - Dec 2024	-0.6	-1.3
Jan 2023 - Dec 2023	-0.7	-1.3
Jan 2022 - Dec 2022	-0.7	-1.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- Patents: the estimated societal benefits associated with governments conducting in-house Research and Development (R&D) and also finance R&D in various sectors of the economy. Assigned in proportion to the social benefits of innovation to countries using resident patent application data from the World Intellectual Property Organisation (WIPO); and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators and Schroders' 'global norms' breach list which covers:
  - PAI 7 (Activities negatively affecting biodiversity-sensitive areas),
  - PAI 8 (Emissions to water),
  - PAI 9 (Hazardous waste ratio),
  - PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),
  - PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and
  - PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

The combination of the Investment Manager's fundamental and quantitative analysis helped to provide a comprehensive view on ESG factors on a country, sector and issuer level. That said, due to a lower availability of PAI indicators for many issuers in Asia, some PAIs may be less meaningful in the context of an Asia focused strategy. Over time we anticipate that this data will improve which will allow us to further assess the consideration of PAIs.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Software & IT Services industry based in the Netherlands on the subjects of Climate mitigation (PAIs 1, 2 and 3) and Circular economy, pollution and waste (PAI 9). We also held an engagement on the subject of Corporate Governance (PAIs 10, 12 and 13) with an issuer in the Government Activity industry based in Colombia.

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	12
Corporate Governance	7
Human Capital Management	3
Natural Capital and Biodiversity	3
Human Rights	1
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 95%. The Fund maintained a higher overall sustainability score than the iBoxx Asian Local Currency Bond Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#1A includes the percentage invested in sustainable investments, which is equal to 29%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

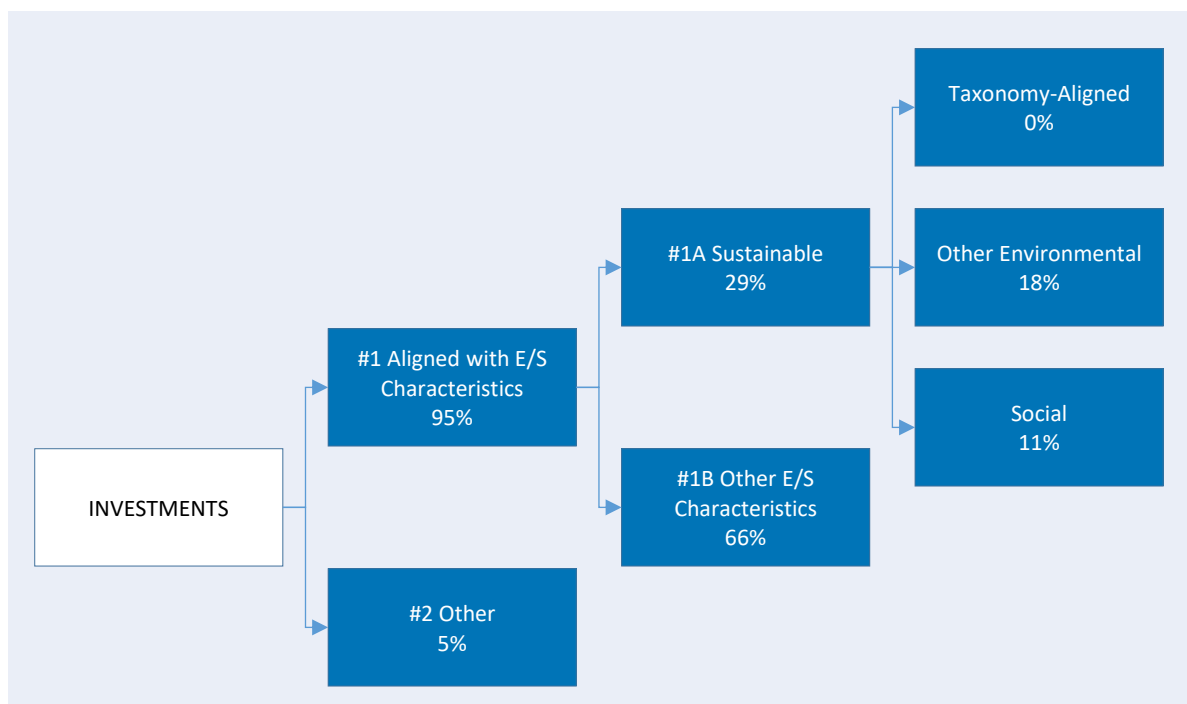

Of the Fund's sustainable investments, 18% was invested in sustainable investments with an environmental objective and 11% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 18%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 11%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF BlueOrchard Emerging Markets Climate Bond

**Legal Entity Identifier :** 5493007XCI1VSIJ1FK02

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> 94%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund invested at least 80% of its assets, in securities issued by governments and companies worldwide, including emerging market countries, that contributed towards the UN SDG of taking action to combat climate change. The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

The Investment Manager selected companies from a universe of eligible companies that were determined as meeting the Investment Manager's impact criteria. The impact criteria included an assessment of the company's contribution to the UN SDGs alongside the Investment Manager's assessment of the company via its proprietary scorecard. The investment process was aligned with the Operating Principles for Impact Management.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund invested 94% of its assets in sustainable investments. This percentage represents the Fund's holdings at the end of the reference period. The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager considered the extent to which the issuer's revenues, business activities, or the use of proceeds of a purpose bond contribute to an environmental objective, and specific sustainability key performance indicators to assess the investment's contribution to an environmental objective. The Investment Manager used different sustainability indicators to measure the impact contribution at an investee company level. In particular, the Investment Manager used a proprietary sustainability tool to verify that every bond included in the investment universe had satisfactory ESG and impact scores and was aligned to the Fund's investment objective of combatting climate change. There was a detailed impact assessment of every company and/or bond (as applicable) via the completion of a proprietary scorecard. The impact scorecard focused on the impact that a bond is expected to have.

The Investment Manager considered different aspects of impact such as: what outcome and UN SDGs the bond or company is contributing to; who is served by the outcome (such as the relevant stakeholder or industry); an assessment of our expected contribution (including the Investment Manager's influence and engagement); and consideration of impact risks. The assessment included tracking Key Performance Indicators (KPIs) that are used to measure and monitor the company's or the bond's positive contribution over time via an annual review.

Once these steps were completed, the bond's or company's impact scorecard and the company's ESG scorecard (as applicable) were validated and approved by the BlueOrchard Sustainability & Impact (S&I) team, in order for the company or bond to be eligible for inclusion in the Fund's investible universe. The S&I team is independent from the investment teams, and is responsible for the consistent application of impact and ESG assessments and scorecards and that all investments meet minimum ESG and impact

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

ratings, as set out in BlueOrchard's ESG & Impact Policy.

The Fund generated a positive impact as demonstrated by indicators attributable to the portfolio, which included but were not limited to creating an estimated reduction of 41,118 tons of greenhouse gas emissions (tCO<sub>2</sub>e), generating an estimated 63,077 MWh of renewable energy with financed renewable energy assets, installing an estimated 52 MW of renewable energy capacity and saving an estimated 3,714 MWh of energy with green buildings and energy efficiency projects. These figures are estimated based on publicly available data and are applicable to the reference period.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	94
Jan 2024 - Dec 2024	95
Jan 2023 - Dec 2023	94
Jan 2022 - Dec 2022	94

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

### Estimated renewable energy capacity installed

*This table details the Fund's average estimated MW of renewable energy capacity installed, year on year.*

Period	MW of renewable energy capacity installed
Jan 2025 - Dec 2025	52
Jan 2024 - Dec 2024	79
Jan 2023 - Dec 2023	130
Jan 2022 - Dec 2022	113

### Estimated CO<sub>2</sub> emissions reduction

*This table details the Fund's average estimated tons of CO<sub>2</sub> emissions reduction, year on year.*

Period	Tons of CO <sub>2</sub> emissions reduction
Jan 2025 - Dec 2025	41,118
Jan 2024 - Dec 2024	103,747
Jan 2023 - Dec 2023	143,538
Jan 2022 - Dec 2022	221,494

### Estimated energy saved

*This table details the Fund's average estimated MWh of energy saved, year on year.*

Period	MWh of energy saved
Jan 2025 - Dec 2025	3,714
Jan 2024 - Dec 2024	8,963
Jan 2023 - Dec 2023	32,426
Jan 2022 - Dec 2022	16,202

### Estimated renewable energy generated

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

*This table details the Fund's average estimated MWh of renewable energy generated, year on year.*

Period	MWh of renewable energy generated
Jan 2025 - Dec 2025	63,077
Jan 2024 - Dec 2024	109,475
Jan 2023 - Dec 2023	109,109
Jan 2022 - Dec 2022	152,768

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund did not directly invest in the sectors included in BlueOrchard's Public Asset Exclusion List: [https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy\\_PublicAssets.pdf](https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy_PublicAssets.pdf)
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to  
PAI 4 (Exposure to companies active in the fossil fuel sector),  
PAI 5 (Share of non-renewable energy consumption and production) and  
PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:  
- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

PAIs were included within the BlueOrchard proprietary ESG scorecard which is one of the necessary

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

steps to assess issuers and approve them for the strategy's sustainable investment universe. PAIs 1-14 were included in the BlueOrchard proprietary ESG scorecard within relevant ESG sections and guided the ESG analysis along with other ESG factors such as good governance metrics to determine an overall ESG score.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Insurance industry based in France on the subject of Climate adaptation (PAIs 1, 2, 3, 4, 5 and 6). We also held an engagement on the subject of Transparency, risk and reporting (PAI 10) with an issuer in the Government Activity industry based in Mexico. Additionally, we engaged with an issuer based in Indonesia in the Banking Services industry on the subject of Deforestation (PAIs 7 and 8).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	19
Corporate Governance	8
Natural Capital and Biodiversity	6
Human Capital Management	4
Human Rights	2
Diversity and Inclusion	2

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

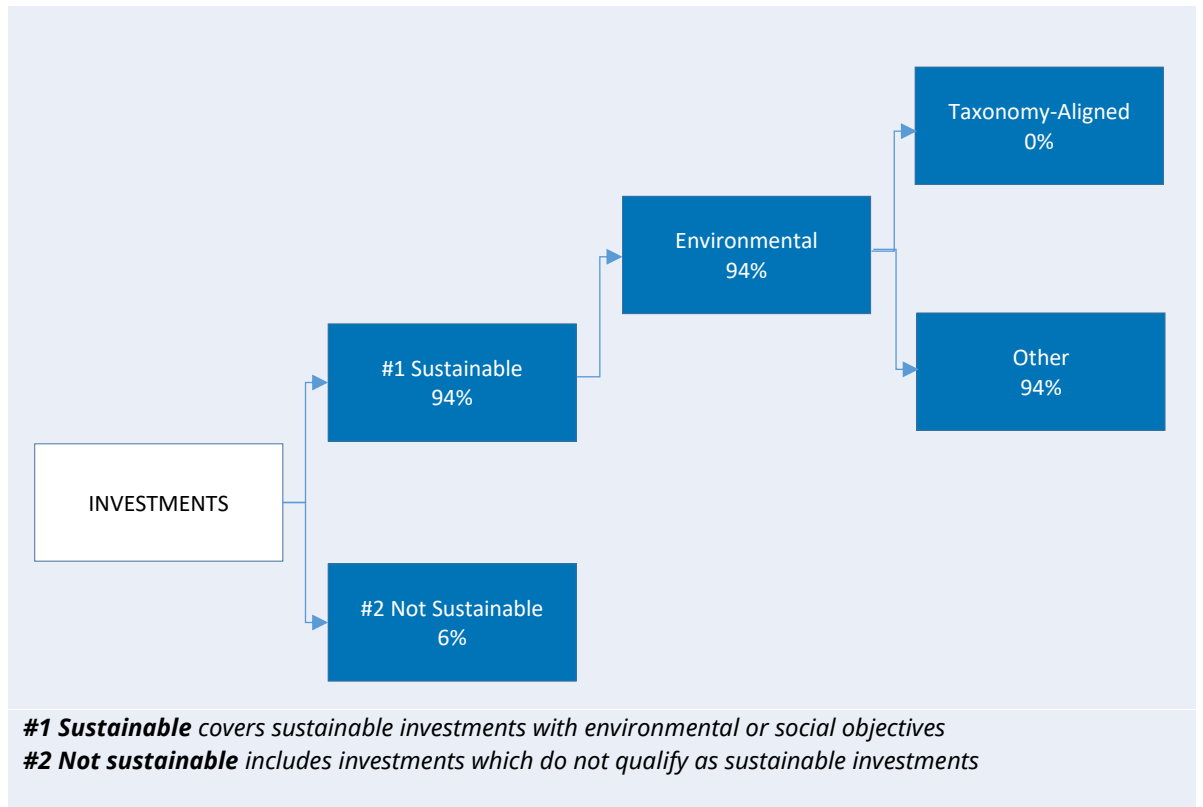

The Fund's investments that were used to meet its sustainable investment objective are summarised below, all figures represent the Fund's holdings at the end of the reference period.

#1 Sustainable are investments in securities issued by governments and companies worldwide, including emerging market countries, that contributed towards the UN SDG of taking action to combat climate change. The Fund invested 94% of its assets in sustainable investments. All the sustainable investments had an environmental objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## • *What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?*

All sustainable investments made by the Fund had environmental objectives that were not aligned with the EU Taxonomy.

## • *What was the share of socially sustainable investments?*

There were no sustainable investments with a social objective.

## • *What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- The Fund invested in companies that did not cause significant environmental or social harm;
- The Fund invested at least 80% of its assets in securities issued by governments and companies worldwide, including emerging market countries, that contributed towards the UN SDG of taking action to combat climate change;
- The Investment Manager utilised its proprietary framework to help assess good governance practices of investee companies;
- The Investment Manager engaged with certain issuers held in the portfolio and on average aimed to meet or speak with company management at least at the bond's issuance or at the time of the investment. During these meetings sustainability topics (such as net zero and the energy transition) were regularly discussed alongside impact disclosure and reporting plans to voice the Investment Manager's objectives in terms of sustainability data, and any concerns on insufficient reporting; and
- During the reference period the Investment Manager conducted 35 dedicated sustainability engagements across the investible universe on a number of different topics, including but not limited to climate change, disclosure and reporting, and corporate governance.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF BlueOrchard Emerging Markets Impact Bond

**Legal Entity Identifier :** 5493002UVX4QP1OMYB39

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 30%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	<input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 64%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund invested at least 80% of its assets, in securities issued by governments, government agencies, supra-nationals and companies of emerging market countries that contribute towards the advancement of one or more of the UN SDGs by contributing positively towards social development and environmental themes. The Fund invested at least 5% of its assets in sustainable investments with an environmental objective and at least 50% of its assets in sustainable investments with a social objective.

The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. The Fund invested in fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies with the aim to foster financial inclusion and provide decisive funding to economically vulnerable communities globally as well as fixed and floating rate securities related to sustainable infrastructure projects and clean energy initiatives.

The Investment Manager selected companies from a universe of eligible companies that were determined as meeting the Investment Manager's impact criteria. The impact criteria included an assessment of the company's contribution to the UN SDGs alongside the Investment Manager's assessment of the company via its proprietary scorecard. The investment process was aligned with the Operating Principles for Impact Management.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund invested 94% of its assets in sustainable investments. This percentage represents the Fund's holdings at the end of the reference period. The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager considered the extent to which the issuer's revenues, business activities, or the use of proceeds of a purpose bond contribute to an environmental objective, and specific sustainability key performance indicators to assess the investment's contribution to an environmental objective. The Investment Manager used different sustainability indicators to measure the impact contribution at an investee company level. In particular, the Investment Manager used a proprietary sustainability tool to verify that every bond included in the investment universe had satisfactory ESG and impact scores and was aligned to the Fund's investment objective of combatting climate change. There was a detailed impact assessment of every company and/or bond (as applicable) via the completion of a proprietary scorecard. The impact scorecard focused on the impact that a bond is expected to have.

The Investment Manager considered different aspects of impact such as: what outcome and UN SDGs the bond or company is contributing to; who is served by the outcome (such as the relevant stakeholder or industry); an assessment of our expected contribution (including the Investment Manager's influence

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

and engagement); and consideration of impact risks. The assessment included tracking Key Performance Indicators (KPIs) that are used to measure and monitor the company's or the bond's positive contribution over time via an annual review.

Once these steps were completed, the bond's or company's impact scorecard and the company's ESG scorecard (as applicable) were validated and approved by the BlueOrchard Sustainability & Impact (S&I) team, in order for the company or bond to be eligible for inclusion in the Fund's investible universe. The S&I team is independent from the investment teams, and is responsible for the consistent application of impact and ESG assessments and scorecards and that all investments meet minimum ESG and impact ratings, as set out in BlueOrchard's ESG & Impact Policy.

For sustainable investments with a social objective, indicators included but were not limited to providing access to finance to 106,306 people, supporting 55,742 women and minorities, reaching 524,661 number of beneficiaries patients and students, providing 1,055,872 households with access to connectivity, and supporting 33,521 number of micro/ small/medium enterprises. For sustainable investments with an environmental objective, indicators included but were not limited to creating an estimated reduction of 251,552 tons of greenhouse gas emissions (tCO<sub>2</sub>e), generating an estimated 288,950MWh of renewable energy with financed renewable energy assets, and installing an estimated 181MW of renewable energy capacity. These figures are estimated based on publicly available data and are applicable to the reference period.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	94
Jan 2024 - Dec 2024	96
Jan 2023 - Dec 2023	93

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

### Environmental Indicators

*This table details the Environmental Indicator figures, year on year.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Period	Tons of CO <sub>2</sub> emissions reduction	MW of renewable energy capacity installed	MWh of renewable energy generated
Jan 2025 - Dec 2025	251,552	181	288,950
Jan 2024 - Dec 2024	190,915	504	124,068
Jan 2023 - Dec 2023	166,722	651	120,717

## Social Indicators

*This table details the Social Indicator figures, year on year.*

Period	People provided with access to Finance	Household connectivity provided	Micro/ small / Medium enterprises supported
Jan 2025 - Dec 2025	106,306	1,055,872	33,521
Jan 2024 - Dec 2024	68,230	544,195	21,272

Jan 2023 - Dec 2023	16,829	59,516

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-

### • **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

corruption and anti-bribery matters.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund did not directly invest in the sectors included in BlueOrchard's Public Asset Exclusion List: [https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy\\_PublicAssets.pdf](https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy_PublicAssets.pdf)
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),
- PAI 8 (Emissions to water),
- PAI 9 (Hazardous waste and radioactive waste ratio),
- PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),
- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and
- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

PAIs were included within the BlueOrchard proprietary ESG scorecard which is one of the necessary steps to assess issuers and approve them for the strategy's sustainable investment universe. PAIs 1-14 were included in the BlueOrchard proprietary ESG scorecard within relevant ESG sections and guided the ESG analysis along with other ESG factors such as good governance metrics to determine an overall ESG score.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Government Activity industry based in Indonesia on the subject of Corporate Governance (PAIs 10, 12 and 13). We also held an engagement on the subject of Climate Change (PAIs 1, 2, 3, 4, 5 and 6) with an issuer in the Government Activity industry based in Colombia. Additionally, we engaged with an issuer based in Chile in the Government Activity industry on the subject of Nature-related risk and management (PAIs 7, 8 and 9).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	8
Corporate Governance	7
Diversity and Inclusion	3

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Human Capital Management	2
Human Rights	2
Natural Capital and Biodiversity	2

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country
EUROPEAN BANK FOR RECONSTRUCTION A SR MTN 4.25% 13 Mar 2034	Supranational	1.30	United Kingdom

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What was the proportion of sustainability-related investments?

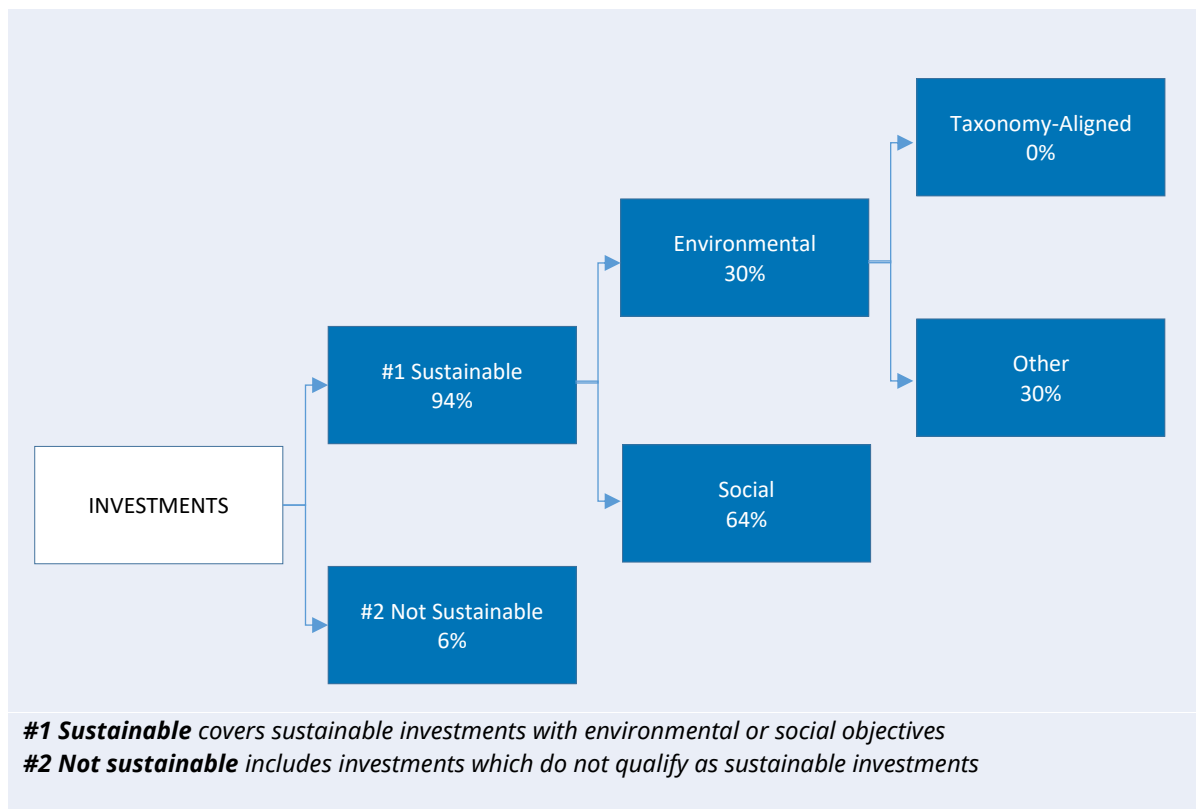

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below, all figures represent the Fund's holdings at the end of the reference period.

#1 Sustainable are investments in securities issued by governments, government agencies, supranationals and companies of emerging market countries that contribute towards the advancement of one or more of the UN SDGs by contributing positively towards social development and environmental themes. The Fund invested 94% of its assets in sustainable investments. This percentage represents the Fund's holdings at the end of the reference period. Within this, 30% was invested in sustainable investments with an environmental objective and 64% was invested in sustainable investments with a social objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

### • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

**- turnover**  
reflecting the share of revenue from green activities of investee companies

**- capital expenditure**  
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure** (OpEx)  
reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 30%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 64%.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- The Fund invested in companies that did not cause significant environmental or social harm;
- The Fund invested at least 80% of its assets in securities issued by governments, government agencies, supra-nationals and companies of emerging market countries that contribute towards the advancement of one or more of the UN SDGs by contributing positively towards social development and environmental themes;
- The Investment Manager utilised its proprietary framework to help assess good governance practices of investee companies;
- The Investment Manager engaged with certain issuers held in the portfolio and on average aimed to meet or speak with company management at least at the bond's issuance or at the time of the investment. During these meetings sustainability topics (such as net zero and the energy transition) were regularly discussed alongside impact disclosure and reporting plans to voice the Investment Manager's objectives in terms of sustainability data, and any concerns on insufficient reporting; and
- During the reference period the Investment Manager conducted 26 dedicated sustainability engagements across the investible universe on a number of different topics, including but not limited to

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

climate change, disclosure and reporting, and corporate governance.

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Carbon Neutral Credit

**Legal Entity Identifier :** 54930083X6X1LLU8U819

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : 98%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : __%	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund aimed to achieve aggregate carbon neutrality within its investment portfolio by investing its assets in sustainable investments, which were fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies worldwide that in the Investment Manager's view contributed towards the objective of carbon emission reduction by one or a combination of the following: (i) being carbon neutral; (ii) aiming for, and being on track to achieve, 80% emission reductions or equivalent by 2030; (iii) having Science Based Targets initiative (SBTi) decarbonisation targets; (iv) otherwise demonstrating a contribution to the reduction of carbon emissions (and companies within (iv) may include those that provide products or services which enable decarbonisation). All companies held by the Fund were deemed to be sustainable investments by the Investment Manager.

Aggregate carbon neutrality means achieving net zero carbon emissions intensity by balancing investments in (a) issuers that generate carbon emissions, but that have stated goals to reduce such emissions with (b) issuers that contribute to reducing carbon emissions.

The Fund's objective includes a reduction in carbon emissions, which means that it aims for low carbon emissions, consistent with the long-term objectives of the Paris Agreement on limiting global warming. The Investment Manager sought to ensure reduction in carbon emissions by investing in issuers as described in (i) – (iv) above. Companies from sectors with heavy scope 3 emissions were also required to have scope 3 emissions reduction targets or a commitment to reduce scope 3 emissions.

The Investment Manager periodically assessed whether an issuer's carbon reduction pathway is consistent with the criteria through which it earlier qualified for investment by the Fund and sought to identify cases where it may deviate. The Investment Manager also sought to identify situations where an issuer's emissions reduction targets did not keep pace with the emissions reduction trajectory for that sector and reviewed any major changes in the emissions profile of an issuer, for example due to mergers or acquisitions. These considerations led to divestment by the Investment Manager of at least 3 companies during the reference period.

The Fund invested at least 80% of its assets in sustainable investments during the reference period. The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which were cash and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund invested 98% of its assets in sustainable investments. This percentage represents the Fund's holdings at the end of the reference period.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The Investment Manager used specific sustainability key performance indicators to positively screen the sustainable investment universe as well as measure the contribution at an investee company level.

The carbon emissions intensity to sales indicator (tonnes of CO<sub>2</sub>e per \$mn sales), as measured by Scope 1 and 2 carbon intensity using data from a third-party provider, aggregated at portfolio level, reflects the pathway of attaining the sustainable investment objective, before considering avoided emissions. Scope 1 emissions are direct emissions from owned or controlled sources. Scope 2 emissions are indirect emissions from the generation of purchased energy.

Through investments in issuers with low carbon intensity, as well as those actively reducing emissions and targeting carbon reductions across various sectors, the Fund's Scope 1 and 2 carbon intensity remained significantly lower than that of the global credit universe. Over 2025, carbon intensity at the Fund level increased slightly but remained well below the global benchmark.

At the end of the reference period, the Fund's projected net carbon intensity—measured using third-party data for Scope 1 and 2 emissions—was zero.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within these exclusionary criteria.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	98
Jan 2024 - Dec 2024	100
Jan 2023 - Dec 2023	98
Jan 2022 - Dec 2022	97

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

### Net carbon intensity

*This table details the projected net carbon intensity by 2025, year on year.*

Period	Projected net carbon intensity (scope 1 & 2) tCO <sub>2</sub> e/\$mn
Jan 2025 - Dec 2025	0
Jan 2024 - Dec 2024	0
Jan 2023 - Dec 2023	0
Jan 2022 - Dec 2022	0

## • How did the sustainable investments not cause significant harm to any sustainable investment objective?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),
- PAI 8 (Emissions to water),
- PAI 9 (Hazardous waste and radioactive waste ratio),
- PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders’ ‘global norms’ breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered.

For example, PAI 1 and 3 and PAI 4 from Annex 1 Table 2 were also monitored for ongoing security selection, in line with the sustainability objective of the Fund.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

We engaged with an electric utility company based in Italy about climate solutions (PAIs 1, 2, 3 and PAI 4 in table 2). We also held an engagement about transparency, risk and reporting (PAI 10) with a bank based in Switzerland. Additionally, we engaged with an issuer based in Spain providing banking services about nature-related risk and management (PAIs 7, 8 and 9).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	63
Corporate Governance	34
Human Rights	23
Diversity and Inclusion	14
Human Capital Management	13
Natural Capital and Biodiversity	13

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

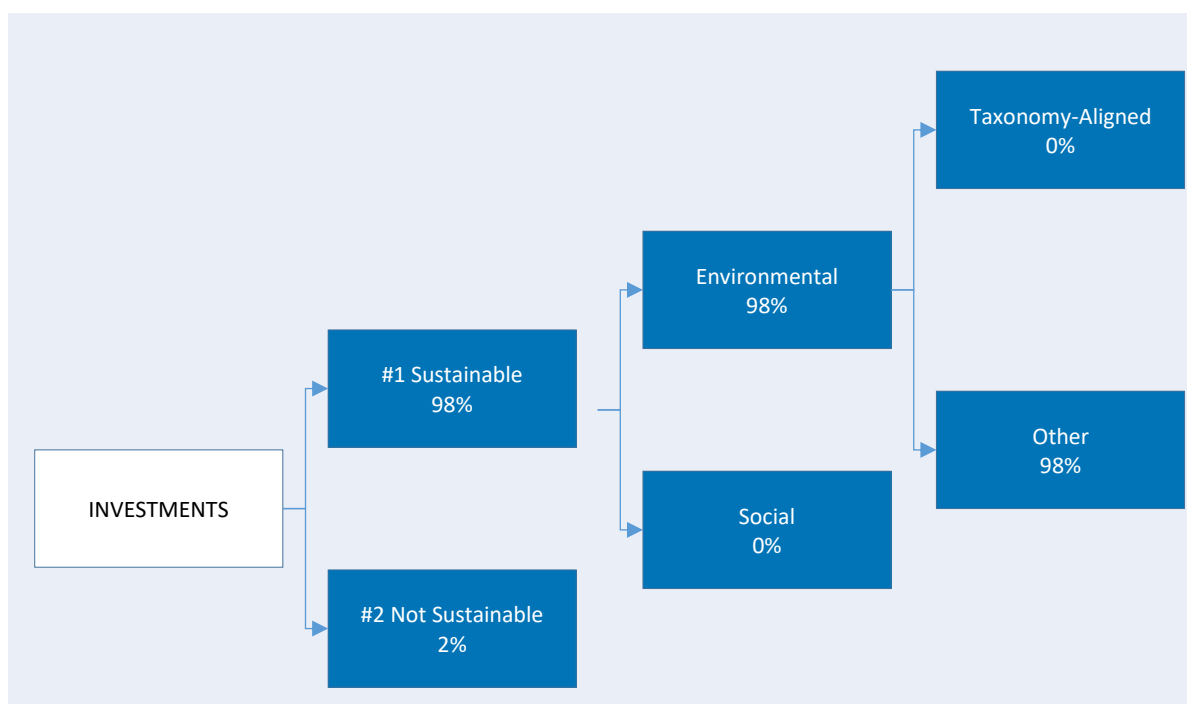

### • What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below, all figures represent the Fund's holdings at the end of the reference period.

#1 Sustainable are investments in fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies worldwide that in the Investment Manager's view contributed towards the objective of carbon emission reduction by one or a combination of the following: (i) being carbon neutral; (ii) aiming for, and being on track to achieve, 80% emission reductions or equivalent by 2030; (iii) having Science Based Targets initiative (SBTi) decarbonisation targets; and/ or (iv) otherwise demonstrating a contribution to the reduction of carbon emissions.

The Fund invested 98% of its assets in sustainable investments. All the sustainable investments had an environmental objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Sustainable** covers sustainable investments with environmental or social objectives  
**#2 Not sustainable** includes investments which do not qualify as sustainable investments

• ***In which economic sectors were the investments made?***

During the reference period investments were made in the following economic sectors:

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

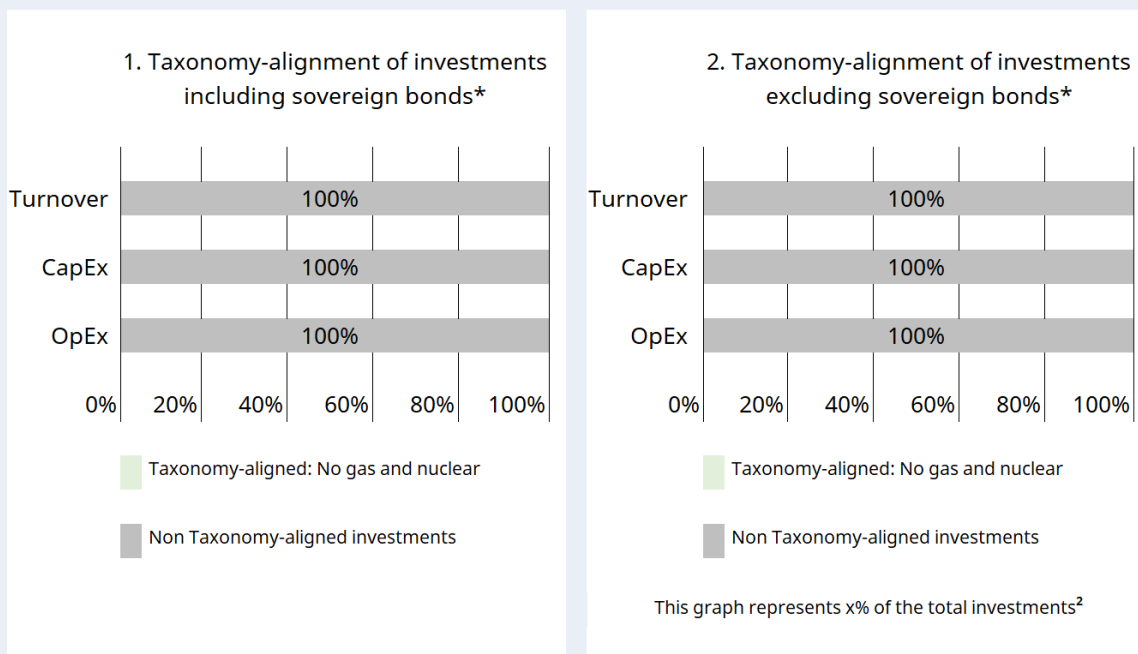

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • *How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### • *What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?*

All sustainable investments made by the Fund had environmental objectives that were not aligned with the EU Taxonomy.

### • *What was the share of socially sustainable investments?*

There were no sustainable investments with a social objective.

### • *What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- The Fund invested in companies that did not cause significant environmental or social harm;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Fund was actively managed and invested at least 80% of its assets in sustainable investments, which are investments that contributed towards the objective of carbon emission reduction;
- Analysis and engagements were undertaken, and in at least three instances these efforts led to a decision not to invest in certain companies. Although these companies met the Fund's environmental objectives, the Investment Manager determined—following engagement—that it was not appropriate to continue holding these positions; and
- The Fund undertook a number of diverse engagements during the reference period. The Investment Manager undertook targeted engagements on companies to reduce their carbon emissions, use more renewable energy and commit to comprehensive carbon reduction pathways. Engagements were also carried out to gain insight and request improvements on topics including biodiversity and natural capital climate adaptation, human rights, corporate governance and human capital management.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF China Local Currency Bond

**Legal Entity Identifier :** HPREJ5FHRTCLC11ND15

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input type="checkbox"/> with a social objective
	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the iBoxx ALBI China Onshore Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was -1.1% and the benchmark's sustainability score at the end of the reference period was -1.3%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth; and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Training: the estimated societal benefit associated with a more highly skilled workforce, both to the company and society. Assigned based on company spending on employee training.

## • ...and compared to previous periods?

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	-1.1	-1.3
Jan 2024 - Dec 2024	-1.2	-1.7
Jan 2023 - Dec 2023	-0.4	-1.7
Jan 2022 - Dec 2022	-0.7	-1.8

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

## • How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

This question is not applicable for this Fund.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## How were the indicators for adverse impacts on sustainability factors taken into account?

This question is not applicable for this Fund.

## Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders’ ‘global norms’ breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company’s overall environmental score.

The combination of the Investment Manager’s fundamental and quantitative analysis helped to provide a comprehensive view on ESG factors on a country, sector and issuer level. That said, due to a lower availability of PAI indicators for many issuers in Asia, some PAIs may be less meaningful in the context of an Asia focused strategy. Over time we anticipate that this data will improve which will allow us to

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

further assess the consideration of PAIs.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Software & IT Services industry based in China on the subjects of Climate mitigation (PAIs 1, 2 and 3) and Health, safety and wellbeing (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	1
Human Capital Management	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

Financial	Banking	1.49
Cash	Cash	1.40
Local Authority	Transportation	0.90
Derivatives	FX Derivatives	0.08
Derivatives	Interest Rate Derivatives	-0.10

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

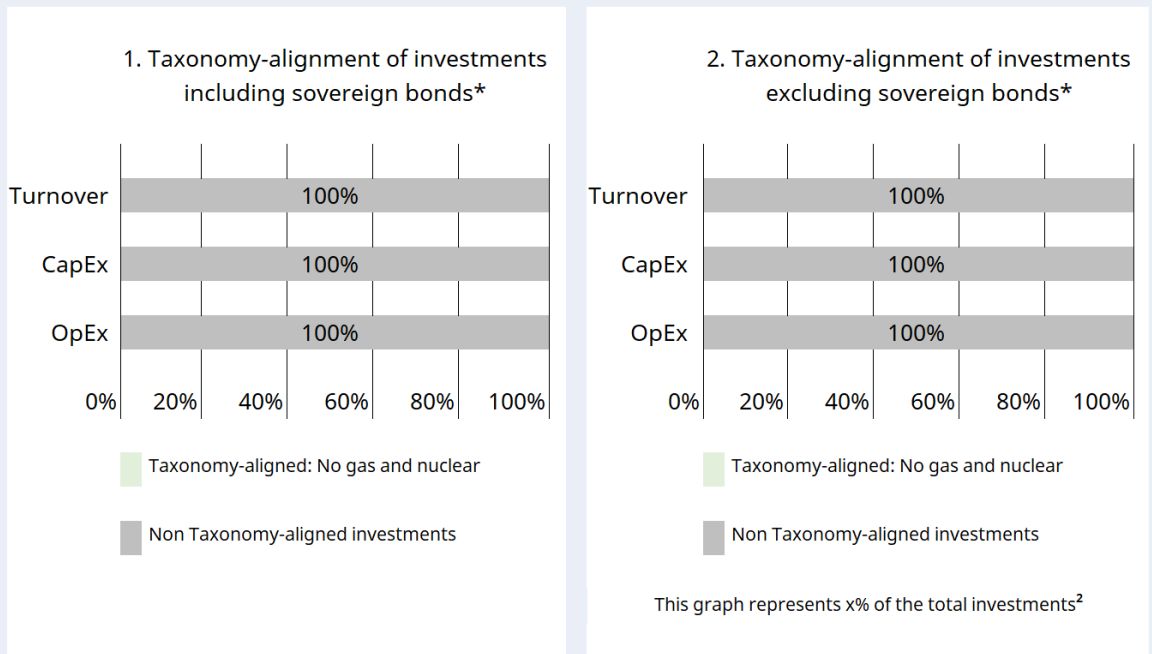

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

greenhouse gas emission levels corresponding to the best performance.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

This question is not applicable for this Fund.

**What was the share of socially sustainable investments?**

This question is not applicable for this Fund.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schrodgers' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schrodgers' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schrodgers'

Reference Period: 1 January 2025 - 31 December 2025

proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

***promoted?***

This question is not applicable for this Fund.

This question is not applicable for this Fund.

***• How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Emerging Markets Local Currency Bond

**Legal Entity Identifier :** 549300V3X0D0HRKP2Z47

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input type="checkbox"/> with a social objective
	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the JP Morgan GBI-EM Global Diversified Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was -1.7% and the benchmark's sustainability score at the end of the reference period was -2.5%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- Infrastructure: the estimated societal benefits associated with investment in infrastructure. Assigned in proportion to a country's infrastructure spend via gross capital formation (GCF) data;
- Refugees: the estimated societal benefits associated with hosting refugees. Assigned by multiplying the number of refugees accepted per country, netted by people displaced internally and internationally, by the estimated benefit per refugee; and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

run economic growth.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ***...and compared to previous periods?***

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

• ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

• ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

This question is not applicable for this Fund.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

***How were the indicators for adverse impacts on sustainability factors taken into account?***

This question is not applicable for this Fund.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

This question is not applicable for this Fund.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

PAI data is less meaningful in the context of an emerging markets sovereign focused strategy, as during the reference period there was limited PAI data available. Over time, we anticipate that this data will improve which will allow us to further assess the consideration of PAIs.

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

For sovereign issuers, PAIs 15 (GHG intensity) and 16 (investee countries subject to social violation) are highly relevant and were considered when assessing the suitability of various countries' debt for the portfolio.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Government Activity industry based in Colombia on the subjects of Corporate Governance (PAIs 10, 12 and 13) and Climate Change (PAIs 1, 2, 3, 4, 5 and 6). Additionally, we engaged with an issuer based in Chile in the Government Activity industry on the subject of Natural Capital and Biodiversity (PAIs 7, 8 and 9).

A summary of the Fund's full engagement activity during the reference period, including the relevant

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

engagement theme, is shown below:

Engagement theme	#Issuer
Corporate Governance	5
Climate Change	4
Natural Capital and Biodiversity	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schrodgers Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

alternative data sources.

## What was the proportion of sustainability-related investments?

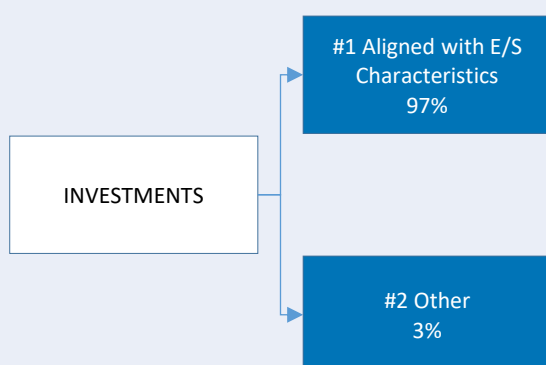

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 97%. The Fund maintained a higher overall sustainability score than the JP Morgan GBI-EM Global Diversified Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

### • *In which economic sectors were the investments made?*

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets
EMD Sovereign		82.43
EMD Sovereign	Financial Services	1.26
Supranational		6.96
Collective Investments	Unit Trusts	4.69
Cash Equivalents	Treasury Bills	3.09
Cash	Cash	1.39
Cash	Margin Cash	0.07
Derivatives	FX Derivatives	0.10
Derivatives	Interest Rate Derivatives	0.01

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have

## • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

greenhouse gas emission levels corresponding to the best performance.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

This question is not applicable for this Fund.

**What was the share of socially sustainable investments?**

This question is not applicable for this Fund.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schrodgers' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schrodgers' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schrodgers'

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • How does the reference benchmark differ from a broad market index?

This question is not applicable for this Fund.

### • How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF EURO Corporate Bond

**Legal Entity Identifier :** 4EKHGXD69UZIZADPEK36

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 61% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Euro Corporate Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary tool.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 1.9% and the benchmark's sustainability score at the end of the reference period was -1.6%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Financial Inclusion
- High Salaries
- Medicine
- Power Provision

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The Investment Manager invested 61% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	61
Jan 2024 - Dec 2024	54
Jan 2023 - Dec 2023	51
Aug 2022 - Dec 2022	49

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	1.9	-1.6
Jan 2024 - Dec 2024	2.1	-2.4
Jan 2023 - Dec 2023	1.3	-3.1
Jan 2022 - Dec 2022	3.7	-3.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

We also considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the oil & gas industry based in Canada about climate mitigation (PAIs 1, 2 and 3). We also held an engagement about boards and management (PAIs 12 and 13) with an issuer in the oil & gas industry based in France. Additionally, we engaged with an issuer based in the Netherlands in the software & IT services industry about circular economy, pollution and waste (PAI 9).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	55
Corporate Governance	42
Human Rights	18
Natural Capital and Biodiversity	15
Diversity and Inclusion	11
Human Capital Management	10

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 89%. The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Euro Corporate Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#1A includes the percentage invested in sustainable investments, which is equal to 61%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

Of the Fund's sustainable investments, 39% was invested in sustainable investments with an environmental objective and 21% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure** (OpEx) reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 39%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 21%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager considered sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF EURO Credit Conviction

**Legal Entity Identifier :** 549300JJL34Z2HKTT336

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 63% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the iBoxx EUR Corporates BBB (TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 2.0% and the benchmark's sustainability score at the end of the reference period was -0.7%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Financial Inclusion
- High Salaries
- Medicine
- Power Provision

The Investment Manager invested 63% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	63
Jan 2024 - Dec 2024	55
Jan 2023 - Dec 2023	50
Aug 2022 - Dec 2022	49

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	2.0	-0.7
Jan 2024 - Dec 2024	2.1	-2.0
Jan 2023 - Dec 2023	1.3	-2.1
Jan 2022 - Dec 2022	4.3	-3.5

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schrodgers' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

We also considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with a provider of waste, water and energy solutions in France on the subject of climate mitigation (PAIs 1, 2 and 3). We also held an engagement about executive remuneration (PAIs 10, 12 and 13) with an issuer in the pharmaceuticals industry based in Belgium. Additionally, we engaged with the UK government on nature-related risk and management topics (PAIs 7, 8 and 9).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	40
Corporate Governance	34
Human Rights	11
Natural Capital and Biodiversity	10
Human Capital Management	8
Diversity and Inclusion	4

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 87%. The Fund maintained a higher overall sustainability score than the iBoxx EUR Corporates BBB (TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 63%. To be classified as a sustainable investment an asset must meet one of the following:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

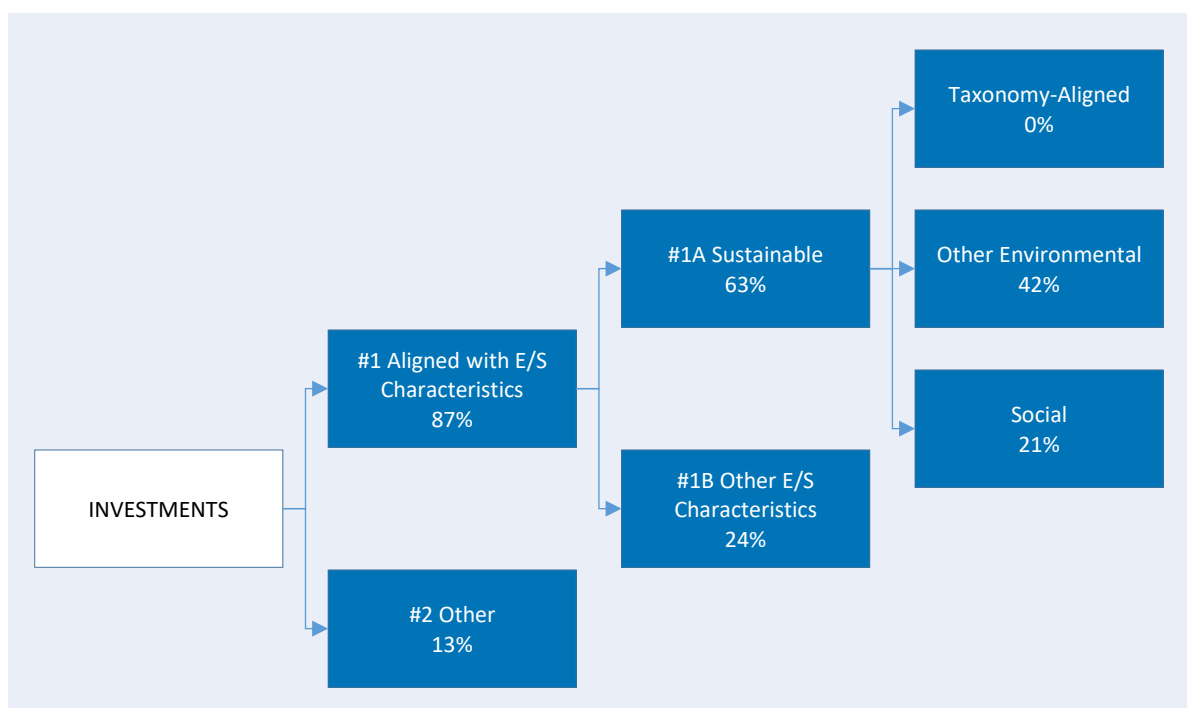

Of the Fund's sustainable investments, 42% was invested in sustainable investments with an environmental objective and 21% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets

the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

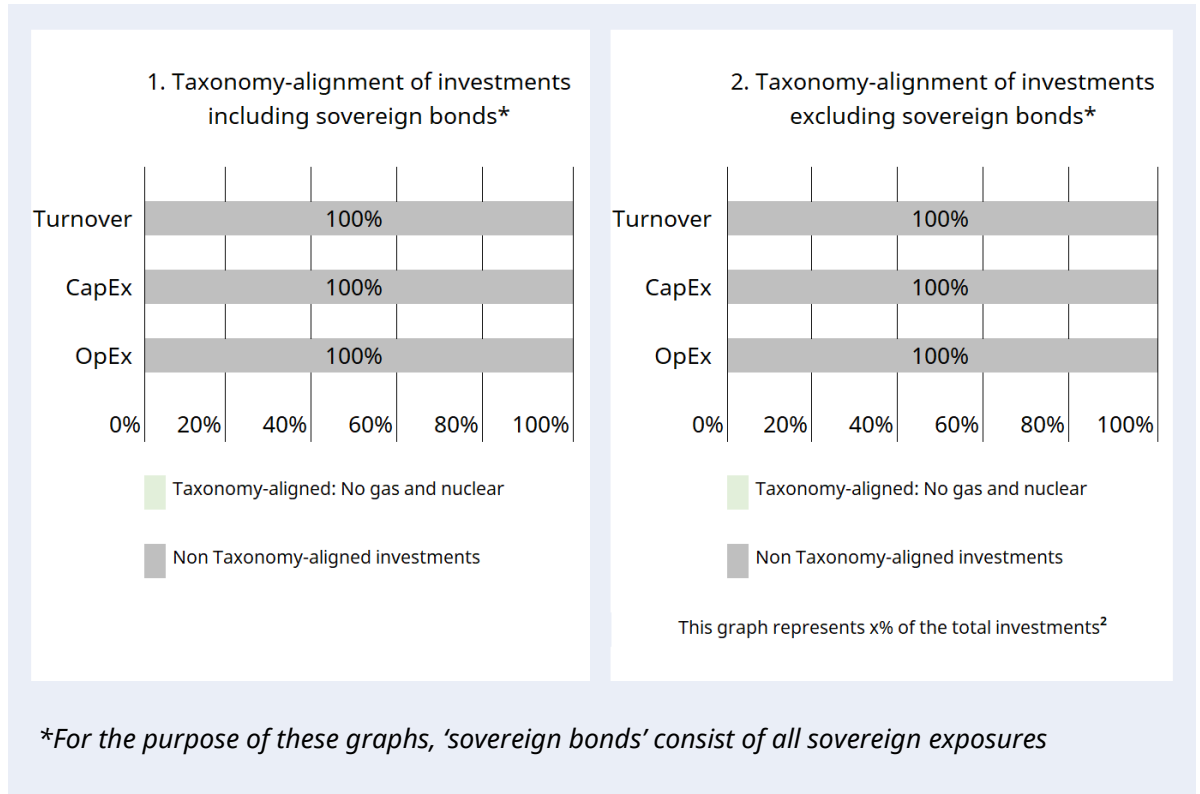

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 42%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 21%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager considered sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF EURO High Yield  
**Legal Entity Identifier :** FDQ3U0BX0ZTSLH0GBR19

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 59% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Euro High Yield Constrained Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 4.4% and the benchmark's sustainability score at the end of the reference period was 4.3%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- Contraception
- High Salaries
- Medicine

The Investment Manager invested 59% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	59
Jan 2024 - Dec 2024	60
Jan 2023 - Dec 2023	57
Aug 2022 - Dec 2022	56

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	4.4	4.3
Jan 2024 - Dec 2024	3.8	3.6
Jan 2023 - Dec 2023	3.2	0.4
Jan 2022 - Dec 2022	3.0	1.0

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schrodgers' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schrodgers.com/en-lu/lu/individual/fund-centre>

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste and radioactive waste ratio),

PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

We also considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an multinational sustainable energy company based in Denmark on the subject of climate adaptation (PAIs 1, 2, 3, 4, 5 and 6). We also held an engagement on the subject of transparency, risk and reporting (PAI 10) with a financial services company based in Switzerland. Additionally, we engaged with German pharmaceutical issuer on nature-related risk and management topics (PAIs 7, 8 and 9).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	18
Climate Change	18
Natural Capital and Biodiversity	7
Human Capital Management	4
Human Rights	3
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schrodgers Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 79%. The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Euro High Yield Constrained Index and so the Fund's investments that were scored by Schrodgers' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 59%. To be classified as a sustainable investment an asset must meet one of the following:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

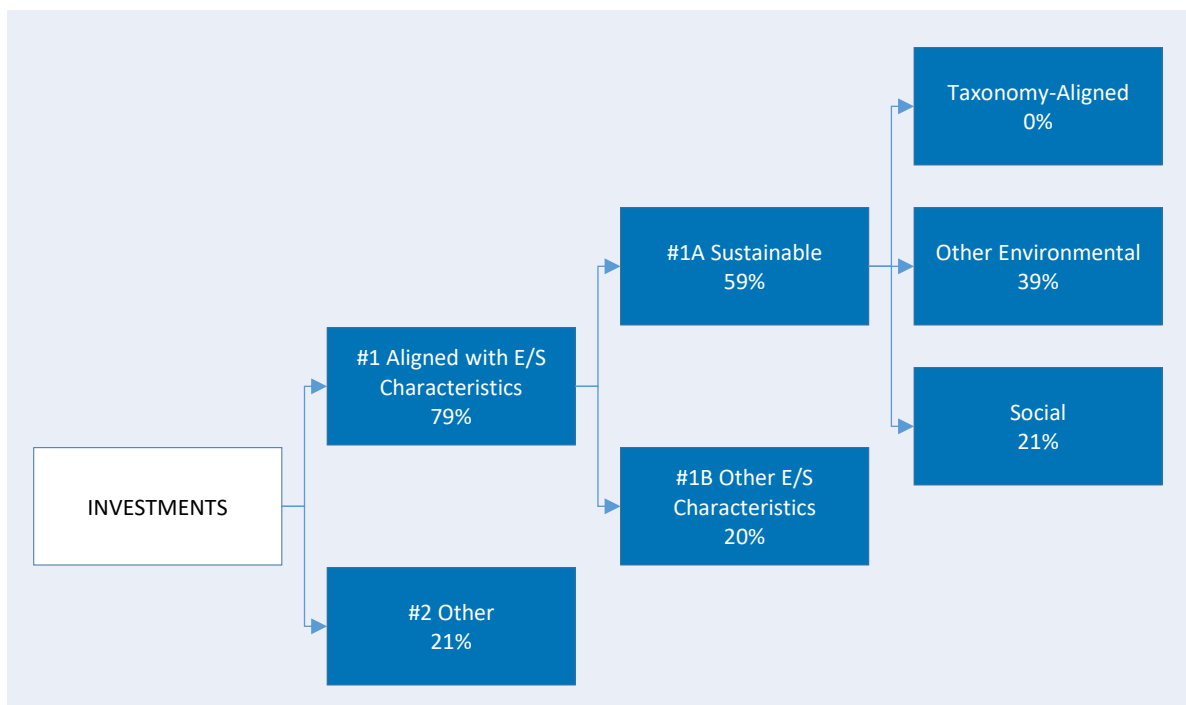

Of the Fund's sustainable investments, 39% was invested in sustainable investments with an environmental objective and 21% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets
Industrial	Healthcare	9.95
Industrial	Real Estate	9.39

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 39%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 21%.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager considered sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund’s engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question ‘How did this financial product consider principal adverse impacts on sustainability factors?’. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Corporate Bond

**Legal Entity Identifier :** 1YK3XMIPDXWQ8KR0SJ46

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 49% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Global Aggregate - Corporate Index Hedged to USD, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary tool.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was -0.6% and the benchmark's sustainability score at the end of the reference period was -4.5%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Connectivity
- Financial Inclusion
- High Salaries
- Power Provision
- Water Access

The Investment Manager invested 49% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	49
Jan 2024 - Dec 2024	46
Jan 2023 - Dec 2023	41
Aug 2022 - Dec 2022	34

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	-0.6	-4.5
Jan 2024 - Dec 2024	0.6	-4.7
Jan 2023 - Dec 2023	0.0	-6.6
Jan 2022 - Dec 2022	0.2	-6.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to

PAI 4 (Exposure to companies active in the fossil fuel sector),

PAI 5 (Share of non-renewable energy consumption and production) and

PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste and radioactive waste ratio),

PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

We also considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Oil & Gas industry based in Canada on the subject of Climate adaptation (PAIs 1, 2, 3, 4, 5 and 6). We also held an engagement on the subject of Transparency, risk and reporting (PAI 10) with an issuer in the Government Activity industry based in Mexico. Additionally, we engaged with an issuer based in the USA in the Computers, Phones & Household Electronics industry on the subject of Overarching approach to human rights (PAI 10).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

<b>Engagement Theme</b>	<b># Issuers</b>
Climate Change	69
Corporate Governance	41
Human Rights	23
Human Capital Management	12
Diversity and Inclusion	11
Natural Capital and Biodiversity	11

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 88%. The Fund maintained a higher overall sustainability score than the Bloomberg Global Aggregate - Corporate Index Hedged to USD and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 49%. To be classified as a sustainable investment an asset must meet one of the following:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

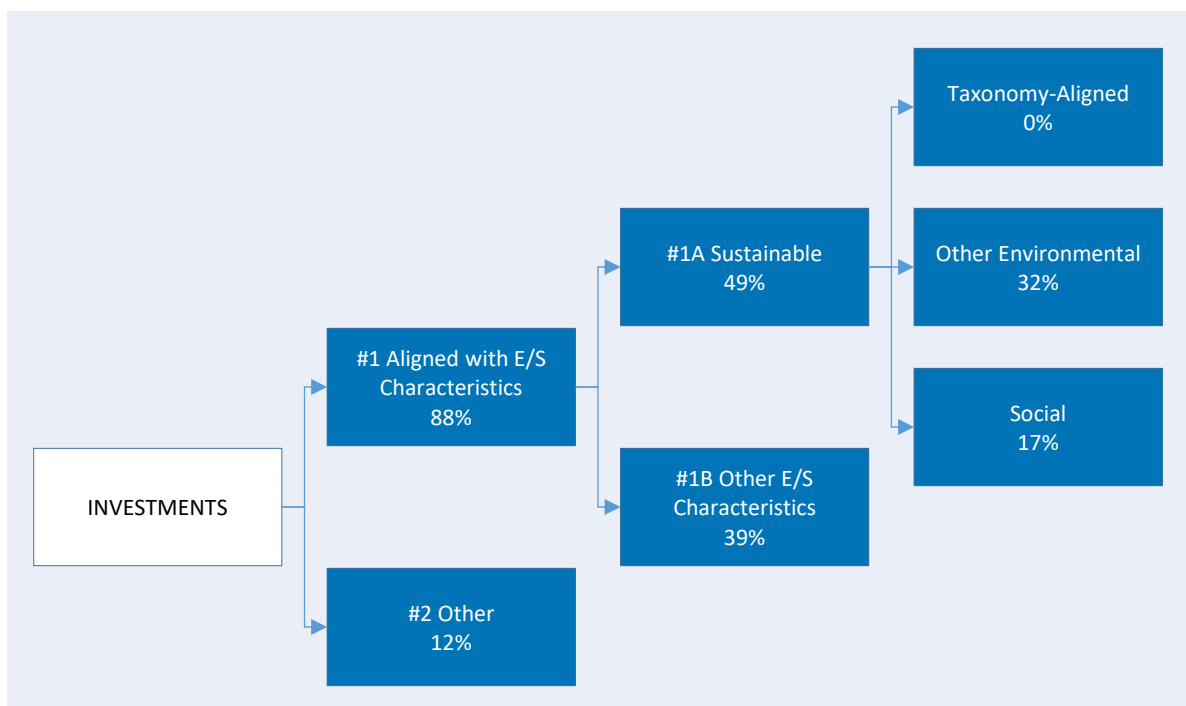

Of the Fund's sustainable investments, 32% was invested in sustainable investments with an environmental objective and 17% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes investments that are treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 32%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 17%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes investments that are treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Credit High Income

**Legal Entity Identifier :** GLW6BQ1WNCTANKN6GW68

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 58% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse ex Treasury BBB+ to CCC+ USD, EUR, GBP Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary tool.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 1.0% and the benchmark's sustainability score at the end of the reference period was -4.0%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Contraception
- Education
- Financial Inclusion
- Medicine
- Water Access

The Investment Manager invested 58% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	58
Jan 2024 - Dec 2024	62
Jan 2023 - Dec 2023	48
Aug 2022 - Dec 2022	38

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	1.0	-4.0
Jan 2024 - Dec 2024	0.6	-3.7
Jan 2023 - Dec 2023	1.7	-5.3
Jan 2022 - Dec 2022	1.1	-6.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Education: the estimated societal benefits of a country's education spend per school age capita;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to

PAI 4 (Exposure to companies active in the fossil fuel sector),

PAI 5 (Share of non-renewable energy consumption and production) and

PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste and radioactive waste ratio),

PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Banking Services industry based in the USA on the subjects of Nature-related risk and management (PAIs 7, 8 and 9) and Executive remuneration (PAIs 10, 12 and 13). Additionally, we engaged with an issuer based in the USA in the Banking Services industry on the subject of Climate mitigation (PAIs 1, 2 and 3).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	20
Climate Change	17
Human Capital Management	6
Natural Capital and Biodiversity	5
Human Rights	3
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 76%. The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse ex Treasury BBB+ to CCC+ USD, EUR, GBP Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 58%. To be classified as a sustainable investment an asset must meet one of the following:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

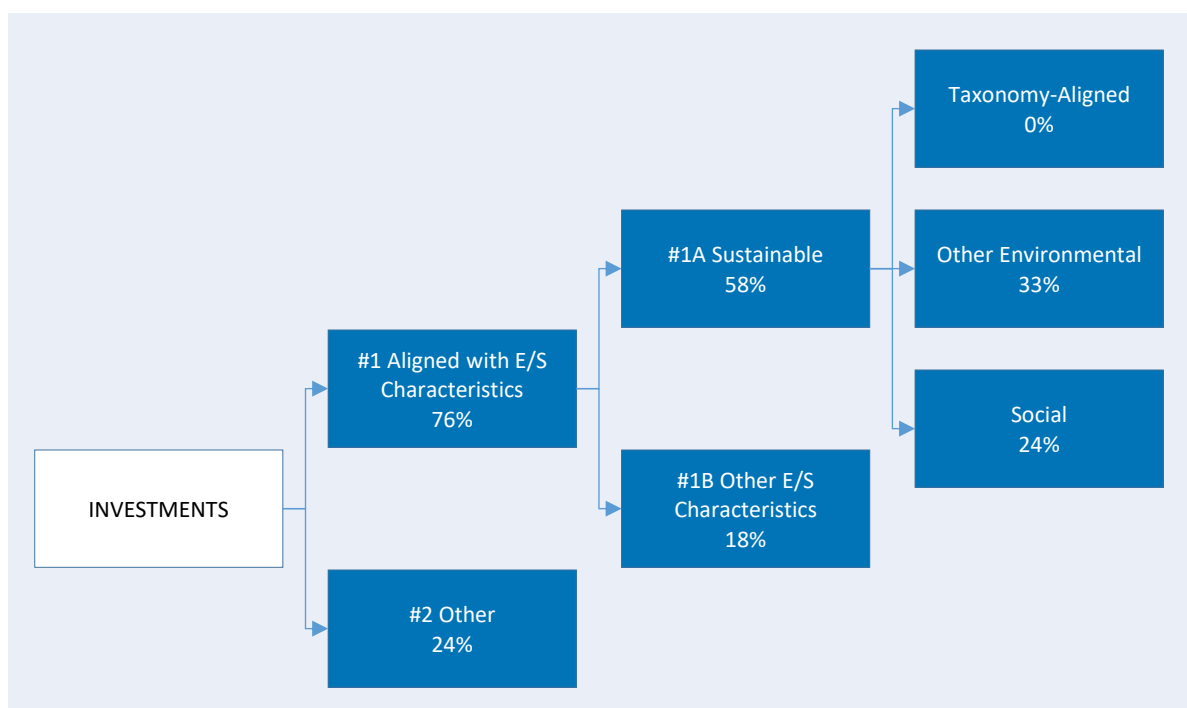

Of the Fund's sustainable investments, 33% was invested in sustainable investments with an environmental objective and 24% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 33%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 24%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager considered sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Credit Income

**Legal Entity Identifier :** 5493009U5NQCD335Y052

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 64% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse ex Treasury A+ to B- USD Hedged Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary tool.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 0.2% and the benchmark's sustainability score at the end of the reference period was -4.4%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Connectivity
- Education
- Financial Inclusion
- High Salaries
- Medicine

The Investment Manager invested 64% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	64
Jan 2024 - Dec 2024	61
Jan 2023 - Dec 2023	50
Aug 2022 - Dec 2022	44

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	0.2	-4.4
Jan 2024 - Dec 2024	0.5	-4.6
Jan 2023 - Dec 2023	0.2	-6.0
Jan 2022 - Dec 2022	1.4	-5.8

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Education: the estimated societal benefits of a country's education spend per school age capita;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

Reference Period: 1 January 2025 - 31 December 2025

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators and Schroders' 'global norms' breach list which covers:
  - PAI 7 (Activities negatively affecting biodiversity-sensitive areas),
  - PAI 8 (Emissions to water),
  - PAI 9 (Hazardous waste ratio),
  - PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),
  - PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and
  - PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

We also considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Banking Services industry based in Canada on the subject of Climate mitigation (PAIs 1, 2 and 3). We also held an engagement on the subject of Boards and management (PAIs 12 and 13) with an issuer in the Banking Services industry based in South Korea. Additionally, we engaged with an issuer based in the United Kingdom in the Government Activity industry on the subject of Nature-related risk and management (PAIs 7, 8 and 9).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	92
Corporate Governance	61
Human Rights	33
Natural Capital and Biodiversity	24
Diversity and Inclusion	17
Human Capital Management	17

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 82%. The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse ex Treasury A+ to B- USD Hedged Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 64%. To be classified as a sustainable investment an asset must meet one of the following:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

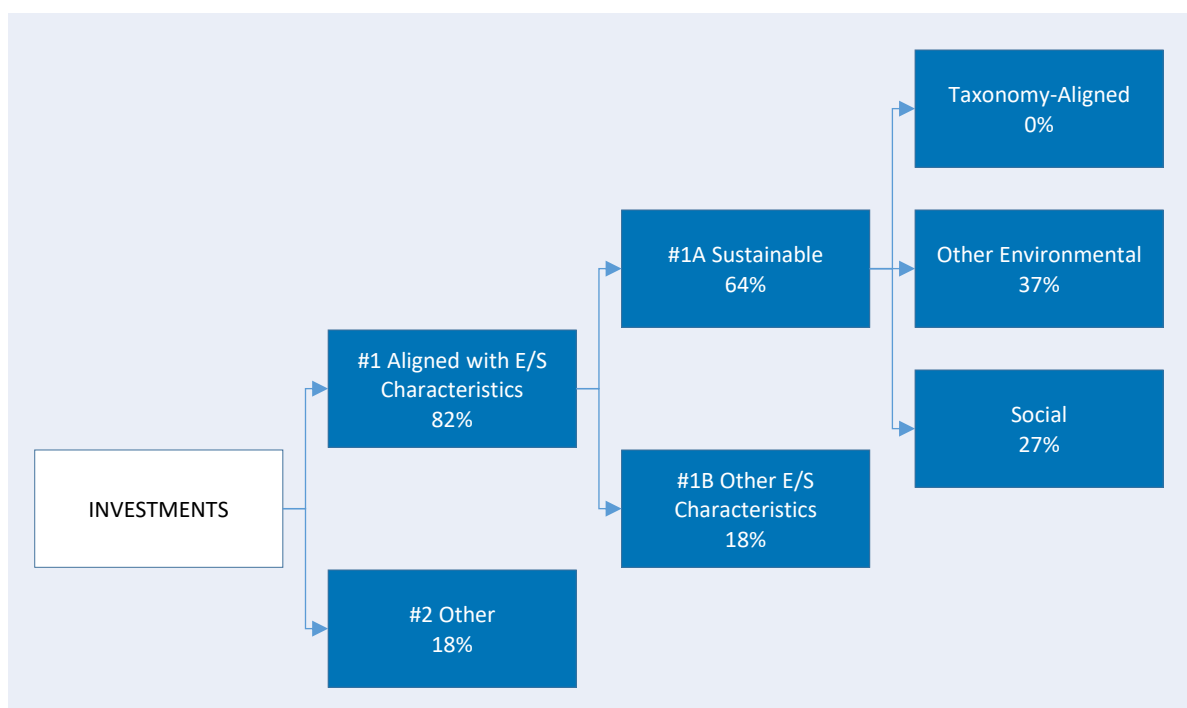

Of the Fund's sustainable investments, 37% was invested in sustainable investments with an environmental objective and 27% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## - capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

## - operational expenditure (OpEx)

reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 37%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 27%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager considered sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global High Yield

**Legal Entity Identifier :** M6LM7N6UFRSLZ1MG8Z19

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 43% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Global HYxCMBSxEMG Index USD Hedged 2% cap, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary tool.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was -1.0% and the benchmark's sustainability score at the end of the reference period was -2.2%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Connectivity
- Contraception
- High Salaries
- Innovation
- Medicine

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The Investment Manager invested 43% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	43
Jan 2024 - Dec 2024	42
Jan 2023 - Dec 2023	39
Aug 2022 - Dec 2022	39

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	-1.0	-2.2
Jan 2024 - Dec 2024	0.4	-0.9
Jan 2023 - Dec 2023	-0.4	-1.6
Jan 2022 - Dec 2022	-0.2	-1.7

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

communities through telecommunication services;

- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

We also considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Software & IT Services industry based in the Netherlands on the subjects of Climate oversight (PAIs 1, 2, 3, 4, 5 and 6) and Circular economy, pollution and waste (PAI 9). We also held an engagement on the subject of Transparency, risk and reporting (PAI 10) with an issuer in the Financial Technology (Fintech) & Infrastructure industry based in France.

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

<b>Engagement Theme</b>	<b># Issuers</b>
Climate Change	27
Corporate Governance	23
Natural Capital and Biodiversity	8
Human Rights	5
Human Capital Management	5
Diversity and Inclusion	2

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schrodgers Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 81%. The Fund maintained a higher overall sustainability score than the Bloomberg Global HYxCMBsxEMG Index USD Hedged 2% cap and so the Fund's investments that were scored by Schrodgers' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 43%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

scored by Schroders' proprietary tool.

- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

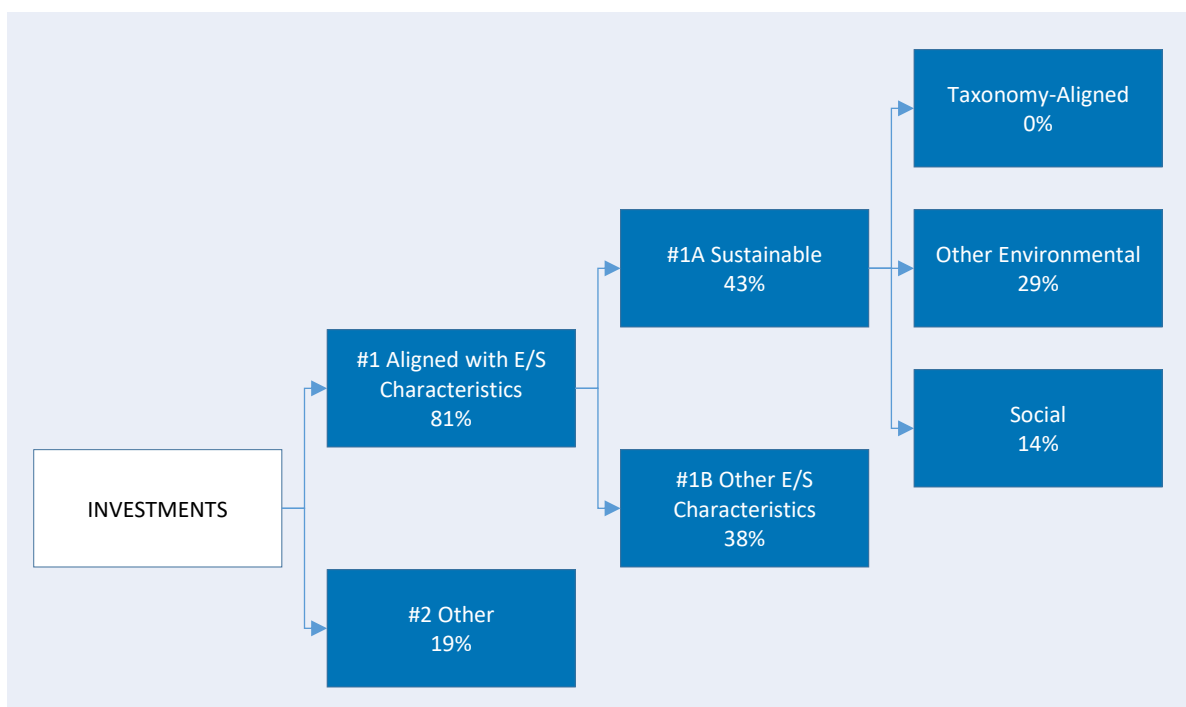

Of the Fund's sustainable investments, 29% was invested in sustainable investments with an environmental objective and 14% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes investments that are treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 29%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 14%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes investments that are treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 – 14 October 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Sustainable Convertible Bond

**Legal Entity Identifier :** 5493006DE43UTCSDK432

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 81% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 14 October 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the FTSE Global Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 50% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2025 to 14 October 2025 when the Fund was liquidated.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the end of the reference period was 4.6% and the benchmark's sustainability score at the end of the reference period was 1.0%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- High Salaries
- Innovation
- Medicine
- Water Access

The Investment Manager invested 81% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 14 October 2025

investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

Jan 2023 - Dec 2023	6.9	1.5
Jan 2022 - Dec 2022	6.0	1.3

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

For 2025 the percentage of sustainable investments was calculated as at the final month end during the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

For 2025 the Sustainability score is calculated with respect to the Fund's holdings at the final month end during the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 14 October 2025

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 14 October 2025

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 14 October 2025

PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schrodgers' 'global norms' breach list were not categorised as sustainable investments. Schrodgers' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schrodgers' 'global norms' breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 14 October 2025

from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Insurance industry based in China on the subject of Climate adaptation (PAIs 1, 2, 3, 4, 5 and 6). We also held an engagement on the subject of Investment in the workforce (PAI 10) with an issuer in the Automobiles & Auto Parts industry based in the USA. Additionally, we engaged with an issuer based in the USA in the Water & Related Utilities industry on the subject of Sustainable food and water (PAIs 7 and 8).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	7
Human Capital Management	4
Corporate Governance	2
Natural Capital and Biodiversity	2
Human Rights	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 14 October 2025

environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the FTSE Global Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 81%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

Of the Fund's sustainable investments, 40% was invested in sustainable investments with an environmental objective and 40% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

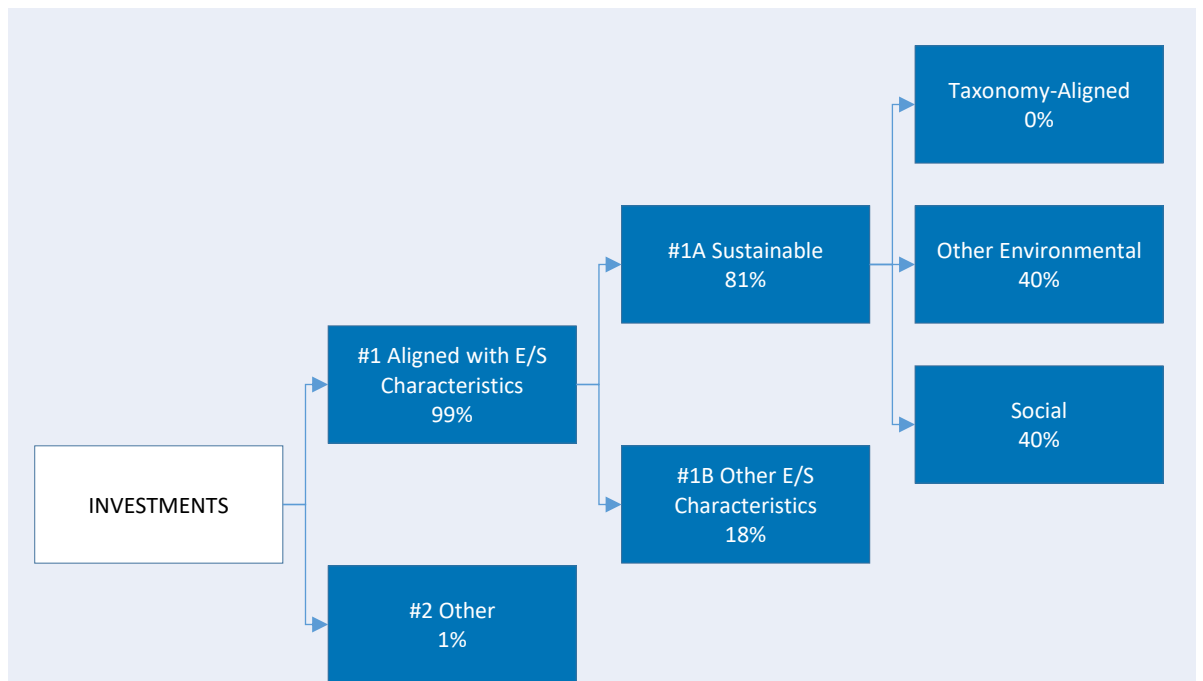

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 14 October 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 14 October 2025

Sector	Sub-Sector	% Assets
Industrial	Technology & Electronics	31.04
Industrial	Healthcare	7.67
Industrial	Real Estate	6.66
Industrial	Basic Industry	5.9
Industrial	Capital Goods	4.94
Industrial	Leisure	4.94
Industrial	Retail	4.88
Industrial	Services	4.39
Industrial	Automotive	3.89
Industrial	Media & Entertainment	1.69
Industrial	Transportation	1.12
Financial	Financial Services	10.98
Financial	Insurance	2.57
Financial	Banking	2.05
Utilities	Non-Electric Utilities	1.1
Utilities	Electric - Generation	0.86
Unassigned	Unassigned	1.23

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 14 October 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

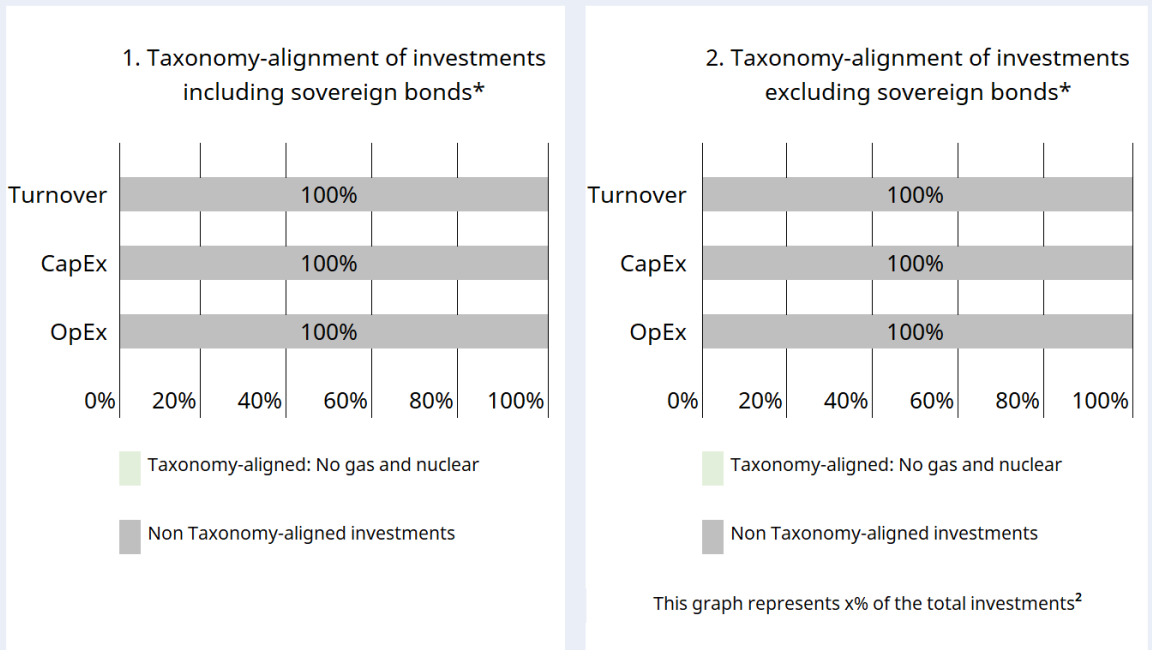

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 14 October 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 40%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 40%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 14 October 2025

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 14 October 2025

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Securitised Credit  
**Legal Entity Identifier :** 549300JBQIOS7PKT3U55

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input type="checkbox"/> with a social objective
	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund only invested in assets deemed above a minimum threshold based on the Investment Manager's rating system. Securities were ranked across Environmental, Social and Governance factors using a scorecard system and were awarded points on a 100-point /100 percent scale. These scores were then translated into a scoring system of 1- star – 5-stars, with a score of 5-stars deemed the highest.

The Investment Manager ensured that at least 80% of the assets in the Fund were ranked in the top 3 Sustainability categories (3, 4, 5-stars) and 100% of the assets were invested in those ranked 2-stars or higher.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • How did the sustainability indicators perform?

The Investment Manager used different sustainability indicators to score each investment in the Fund depending on the specific asset-type, e.g. whether the underlying secured assets were mortgages or commercial real estate or another asset type. Indicators were either quantitative, data-oriented measures or information provided following engagement with issuers. Indicators included but were not limited to environmental metrics such as environmental transition risk or physical risk, social metrics such as predatory lending risk or consumer education effort and governance metrics such as risk retention or clarity of roles. 1.3% of the assets in the Fund were ranked as 5-stars, 39.3% were ranked as 4-stars and 57.9% were ranked as 3-stars, measured at the end of the reference period. Compliance with the minimum required score was monitored daily via our automated compliance controls.

### • ...and compared to previous periods?

#### Proprietary star ratings

*This table details the percentage of assets invested in accordance with the proprietary star ratings, year on year.*

Period	5-stars (%)	4-stars (%)	3-stars (%)
Jan 2025 – Dec 2025	1	39	58
Jan 2024 – Dec 2024	2	31	67
Jan 2023 – Dec 2023	15	35	49
Jan 2022 – Dec 2022	15	30	52

From 2022 to 2024 the percentage of assets in each category were calculated as an average of quarter-end data.

From 2025 the percentages represent the Fund's holdings at the end of the reference period.

### • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

This question is not applicable for this Fund.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

This question is not applicable for this Fund.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

This question is not applicable for this Fund.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

As stated in the pre-contractual disclosure for the Fund, the Investment Manager was not able to adequately consider the principal adverse impacts on sustainability factors as these metrics only applied to investments in companies, sovereign debt and real estate. Due to the nature of the Fund's assets, the Investment Manager could only consider adverse impacts applicable to this asset class. The Investment Manager considered adverse impacts relevant to the strategy in the following way:

- The Investment Manager ensured that investments were aligned with the UN Principles for Responsible Investment (“PRI”). All investments were compliant with industry standards, fair, and fit-for purpose;
- The Investment Manager's rating system considered adverse impacts on society such as the asset

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

footprint on the environment or impact on climate change;

- Investments that could not meet minimum standards related to social, environmental or governance concerns were excluded from the portfolio. The list of excluded sectors was reviewed, updated and published quarterly.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schrodgers Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

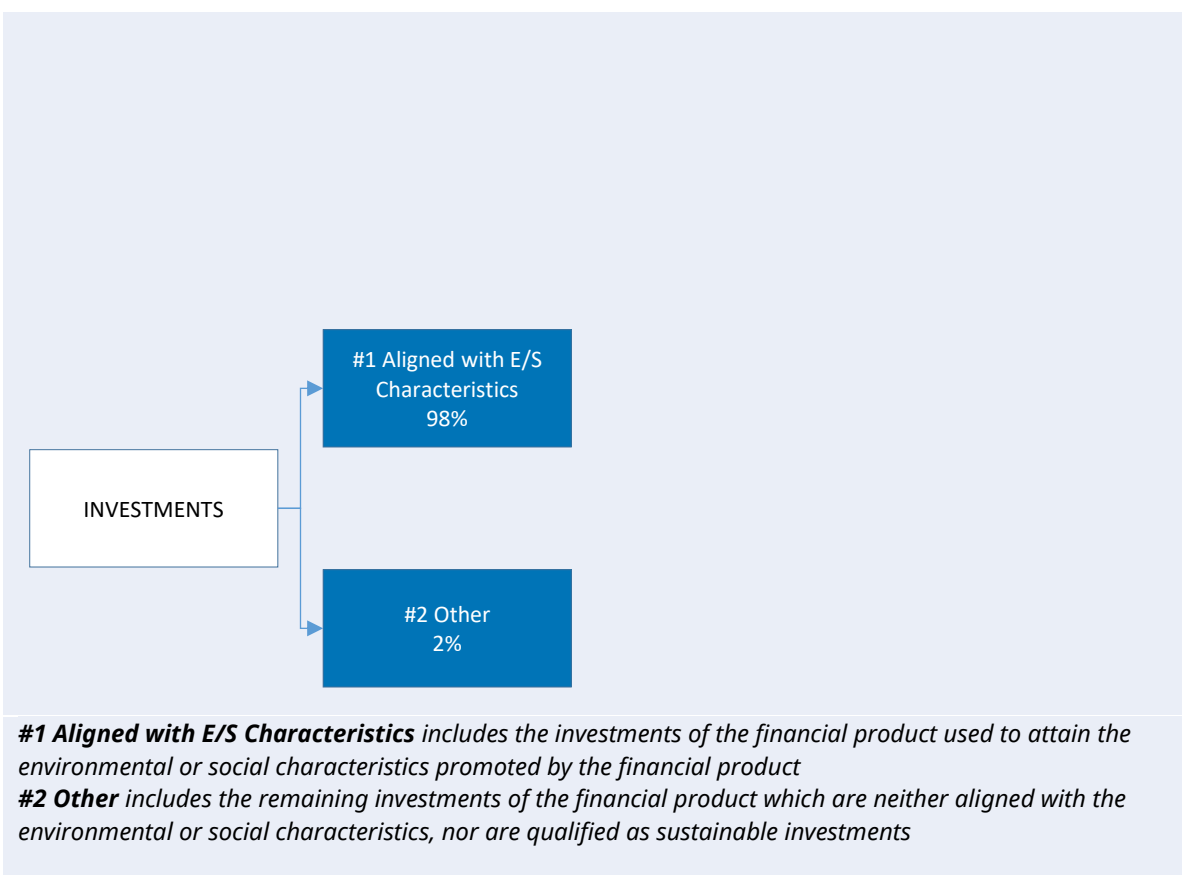

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

environmental or social characteristics, which is equal to 98%. This means investments that were ranked in the top 3 Sustainability categories according to the Investment Manager's rating criteria. This figure represents the Fund's holdings at the end of the reference period.

#2 Other includes investments that were treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes investments that were not aligned with the environmental or social characteristics of the Fund as they were not ranked in the top 3 Sustainability categories according to the Investment Manager's rating criteria.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Sector	Sub-Sector	% Assets
Securitized	Asset Backed	43.35
Securitized	Collateralized Mortgage Obligation	38.37
Securitized	Mortgage Backed	12.48
Securitized	Commercial Mortgage Backed	1.63
Cash Equivalents	Treasury Bills	14.21
Collective Investments	Unit Trusts	1.53
Financial	Financial Services	0.65
Industrial	Transportation	0.24
Derivatives	FX Derivatives	-0.41
Cash	Margin Cash	0.23
Cash	Cash	-12.28

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have

## • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

greenhouse gas emission levels corresponding to the best performance.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

This question is not applicable for this Fund.

**What was the share of socially sustainable investments?**

This question is not applicable for this Fund.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes investments that were treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes investments that were not aligned with the environmental or social characteristics of the Fund as they were not ranked in the top 3 Sustainability categories according to the Investment Manager’s rating criteria.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- At least 80% of the assets in the Fund were ranked in the top 3 Sustainability categories (3, 4, 5-stars) and the Investment Manager invested 100% of its assets in those ranked 2-stars or higher based on the Investment Manager's rating system;
- To the extent possible the Investment Manager assessed good governance of the special purpose vehicles (SPVs – the structures holding the assets) and assessed the fiduciary behaviour of parties to the structure; and
- Securitised markets and the markets for private financing are less standardised with respect to ESG metrics as there is no third-party scoring and reporting is in a non-standard format. Engagement activities focused on deriving information, to understand where sub-sectors and companies were in their evolution, to improve transparency, to assess social, environmental or alignment characteristics to reward and incentivise / more correctly risk price for externalities, to identify those more likely to achieve levels of governance, social policy or environmental advantage that were aligned with our own standards, particularly where the market has not correctly differentiated.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • How does the reference benchmark differ from a broad market index?

This question is not applicable for this Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 – 9 October 2025

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Social Impact Credit

**Legal Entity Identifier:** 549300YH78G2CDHL6585

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 21%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	<input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 77%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 9 October 2025

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund invested at least 80% of its assets, in fixed and floating rate securities issued by governments, government agencies, supra nationals and companies worldwide that the Investment Manager expected to contribute positively towards social development themes. These themes included but were not limited to:

- Sustainable Infrastructure (such as connectivity, sustainable power and clean water)
- Economic Inclusion (such as training, gender equality, workforce diversity, access to finance and quality work)
- Health and Wellbeing (such as medicine and healthcare services)

The Fund invested at least 67% of its assets in sustainable investments with a social objective. The Fund also invested in social, sustainability and green bonds, which are bonds that are specifically designed to address social challenges. The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

The Investment Manager selected companies from a universe of eligible companies that were determined as meeting the Investment Manager's impact criteria. The impact criteria included an assessment of the company's contribution to the UN SDGs alongside the Investment Manager's assessment of the company via its proprietary scorecard. The investment process was aligned with the Operating Principles for Impact Management.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective

The reference period for this Fund is 1 January 2025 to 9 October 2025 when the Fund was liquidated.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund invested 98% of its assets in sustainable investments. This percentage represents the Fund's holdings at the end of the reference period. The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager considered the extent to which the issuer's revenues, business activities or the use of proceeds of a purpose bond contributes to an environmental or social objective (as applicable), and specific sustainability key performance indicators to assess the investment's contribution to a social objective. The Investment Manager used different sustainability indicators to measure the impact contribution. In particular, the Investment Manager applied quantitative and/or qualitative criteria to identify companies that are expected to contribute positively towards the attainment of one or more UN SDGs, such as Quality Education (SDG 4), Gender Empowerment (SDG 5) and Quality Work (SDG 8). Examples of the indicators included, but were not limited to, female representation in the workforce and percentage of women in managerial positions. In addition, there was a detailed impact assessment of every company, country or bond (as applicable) via the completion of a proprietary scorecard. The impact scorecard focuses on the impact that a company, country or bond is expected to have.

The Investment Manager considered different aspects of impact such as: what outcome and UN SDGs the company, country or bond is contributing to; who is served by the outcome (such as the relevant

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 9 October 2025

stakeholder or industry); an assessment of our expected contribution (including Schroders' influence and engagement); and consideration of impact risks. The assessment included tracking Key Performance Indicators (KPIs) that are used to measure and monitor the company's, country's or bond's impact over time via an annual review.

Once these steps were completed, the impact scorecard was then validated and approved by Schroders' Impact Assessment Group (IAG), in order for the company or sovereign or bond to be eligible for inclusion in the Fund's investible universe. The IAG consists of members from Schroders' impact and sustainable investment teams and members of the investment team. At the end of the reference period, approximately 11.2% of the Fund's NAV was invested in companies that were expected to contribute towards Quality Education (SDG 4), as measured by, but not limited to, numbers of students reached, education institute supported or grants for education. The Fund also invested in companies that were expected to contribute towards other UN SDGs including, but not limited to, Decent Work and economic growth (SDG 8), Good Health and Wellbeing (SDG 3), Affordable and Clean Energy (SDG 7) and Digital Inclusion (SDG 9).

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 – Sep 2025	98
Jan 2024 - Dec 2024	100
Jan 2023 - Dec 2023	100
Jan 2022 - Dec 2022	98

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

For 2025 the percentage of sustainable investments was calculated as at the final month end during the reference period.

### SDG Alignment

*This table details the percentage of assets aligned with SDGs, year on year.*

Period	Quality Education (SDG 4) (%)	Good Health and Wellbeing (SDG 3) (%)	Inclusion (SDG 10 and 5) (%)
Jan 2025 – Sep 2025	11	24	6
Jan 2024 - Dec 2024	10	24	6
Jan 2023 - Dec 2023	25	29	7
Jan 2022 - Dec 2022	28	-	-

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 9 October 2025

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 9 October 2025

Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 9 October 2025

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with a French insurer about climate adaptation (PAIs 1, 2, 3, 4, 5 and 6). We also engaged on transparency, risk and reporting (PAI 10) with a Social bond issuing Swedish bank. Additionally, we engaged with social bond issuing Chilean government on the subject of Natural Capital and Biodiversity (PAIs 7, 8 and 9).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	11
Corporate Governance	10
Natural Capital and Biodiversity	4
Diversity and Inclusion	3

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 9 October 2025

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below, all figures represent the Fund's holdings at the end of the reference period.

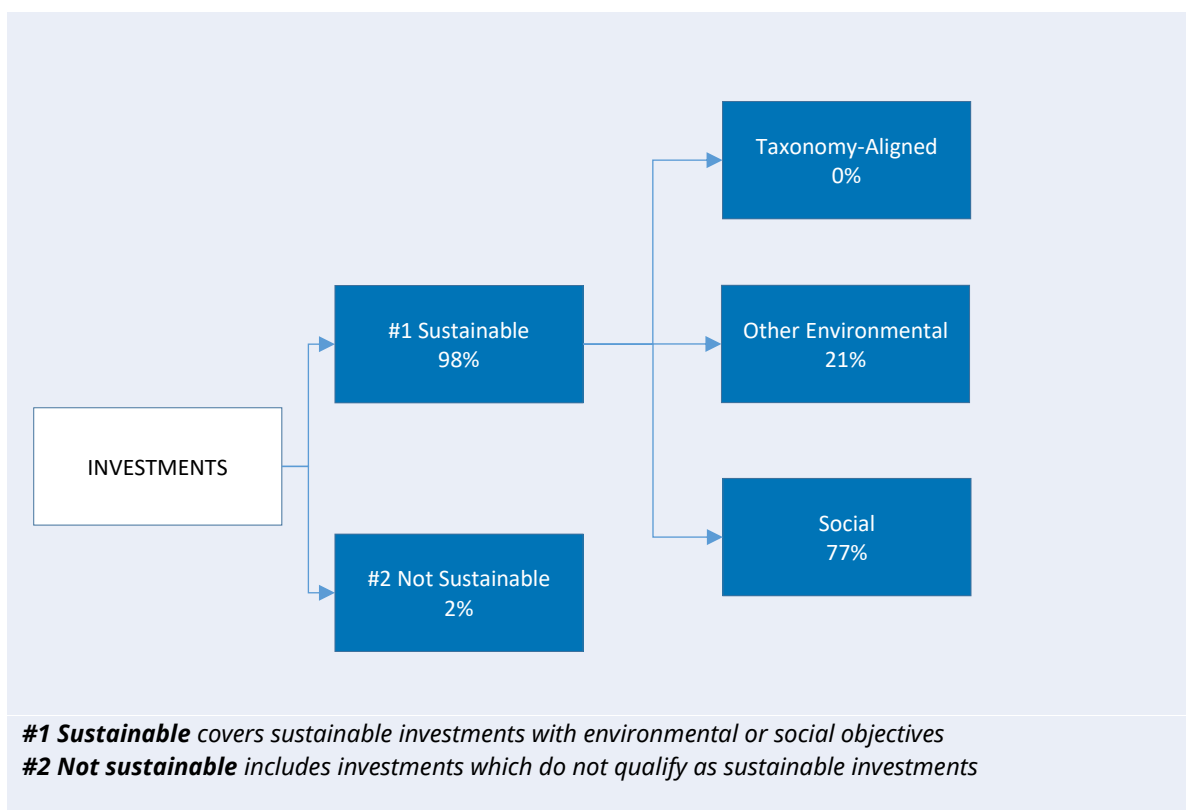

#1 Sustainable are investments in fixed and floating rate securities issued by governments, government agencies, supra nationals and companies worldwide that the Investment Manager expected to

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 9 October 2025

contribute positively towards social development themes. The Fund invested 98% of its assets in sustainable investments. Within this, 21% was invested in sustainable investments with an environmental objective and 77% was invested in sustainable investments with a social objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 9 October 2025

Sector	Sub-Sector	% Assets
Industrial	Healthcare	16.53
Industrial	Telecommunications	7.88
Industrial	Media & Entertainment	5.26
Industrial	Services	4.83
Industrial	Real Estate	3.62
Industrial	Basic Industry	3.23
Industrial	Technology & Electronics	2.64
Industrial	Consumer Goods	1.44
Industrial	Leisure	1.12
Industrial	Transportation	1.11
Industrial	Retail	0.84
Industrial	Automotive	0.67
Industrial	Capital Goods	0.35
Financial	Banking	21.23
Financial	Financial Services	5.61
Financial	Insurance	2.54
Utilities	Non-Electric Utilities	7.39
Utilities	Electric - Generation	1.09
Foreign Sovereign		7.51
Agency		1.79
Agency	Financial Services	0.96
Supranational		1.27

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 9 October 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

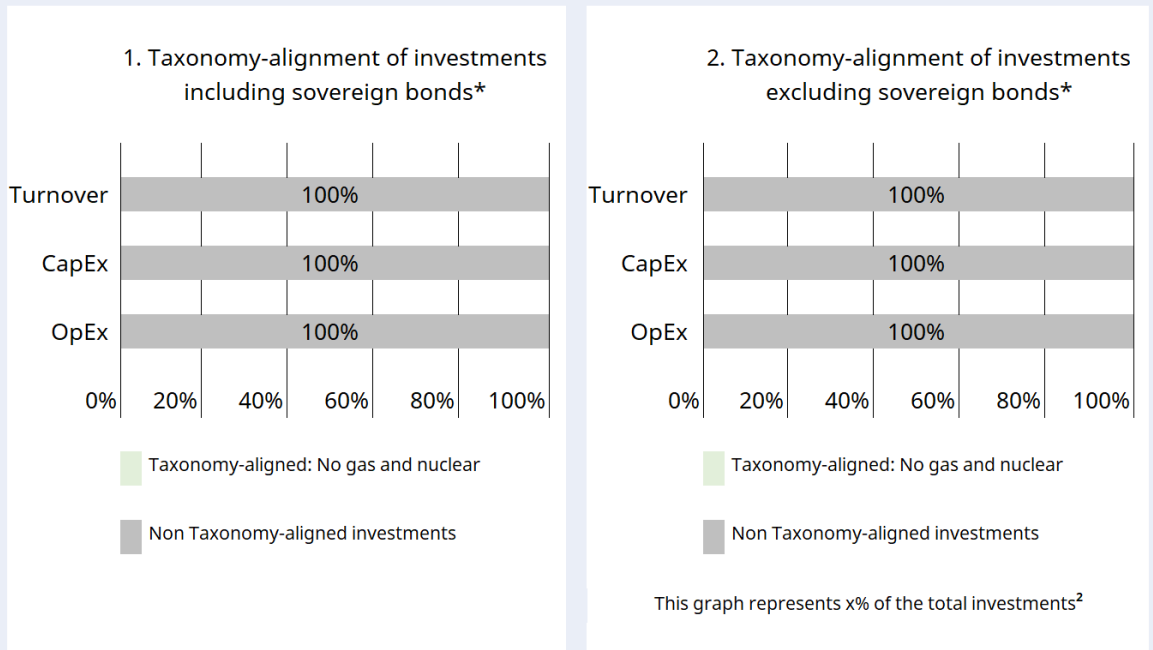

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 9 October 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 21%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 77%.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 9 October 2025

## What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- The Fund invested in companies that did not cause significant environmental or social harm;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Fund invested at least 80% of its assets in fixed and floating rate securities issued by governments, government agencies, supra nationals and companies worldwide that the Investment Manager expected to contribute positively towards social development themes. The Investment Manager also analysed and invested in selective social bonds with social objectives;
- The Investment Manager undertook a number of engagements on holdings in the Fund during the reference period, that focused on diverse set of topics such as inclusion and quality education, corporate governance and diversity, sustainable food and water, impact formulation, disclosure, health, safety and wellbeing, nature related risk and management, and climate transition and net zero targets; and
- The Investment Manager utilised Schroders' proprietary tool and analysis to select companies which have forward looking social and sustainability targets as well as have forward looking research and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 9 October 2025

development expenditure, for example in the healthcare sector, aimed at positive social impact.

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 8 April 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Strategic Bond

**Legal Entity Identifier :** Q3NPQRTNZ48H5X7KI692

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 65% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 8 April 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse ex Treasury A+ to B-USD Hedged index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 8 April 2025 to 31 December 2025.

### Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

#### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was -0.2% and the benchmark's sustainability score at the end of the reference period was -4.4%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Education
- Financial Inclusion
- High Salaries
- Medicine
- Power Provision

The Investment Manager invested 65% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 8 April 2025 - 31 December 2025

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

• **...and compared to previous periods?**

As this is our first reporting period, this question is not applicable.

• **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Education: the estimated societal benefits of a country's education spend per school age capita;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental,

• **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining.

# SFDR Periodic Report (continued)

Reference Period: 8 April 2025 - 31 December 2025

social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to  
PAI 4 (Exposure to companies active in the fossil fuel sector),  
PAI 5 (Share of non-renewable energy consumption and production) and  
PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global

# SFDR Periodic Report (continued)

Reference Period: 8 April 2025 - 31 December 2025

Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

# SFDR Periodic Report (continued)

Reference Period: 8 April 2025 - 31 December 2025

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

For sovereign issuers, PAIs 15 (GHG intensity) and 16 (investee countries subject to social violation) are highly relevant and were considered when assessing the suitability of various countries' debt for the portfolio.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Banking Services industry based in France on the subject of Climate mitigation (PAIs 1, 2 and 3). We also held an engagement on the subject of Executive remuneration (PAIs 10, 12 and 13) with an issuer in the Banking Services industry based in Italy. Additionally, we engaged with an issuer based in Italy in the Government Activity industry on the subject of Nature-related risk and management (PAIs 7, 8 and 9).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
------------------	-----------

# SFDR Periodic Report (continued)

Reference Period: 8 April 2025 - 31 December 2025

Climate Change	37
Corporate Governance	31
Human Rights	23
Human Capital Management	13
Diversity and Inclusion	10
Natural Capital and Biodiversity	10

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 8 April 2025 - 31 December 2025

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 79%. The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse ex Treasury A+ to B-USD Hedged index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 65%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

Of the Fund's sustainable investments, 37% was invested in sustainable investments with an environmental objective and 27% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

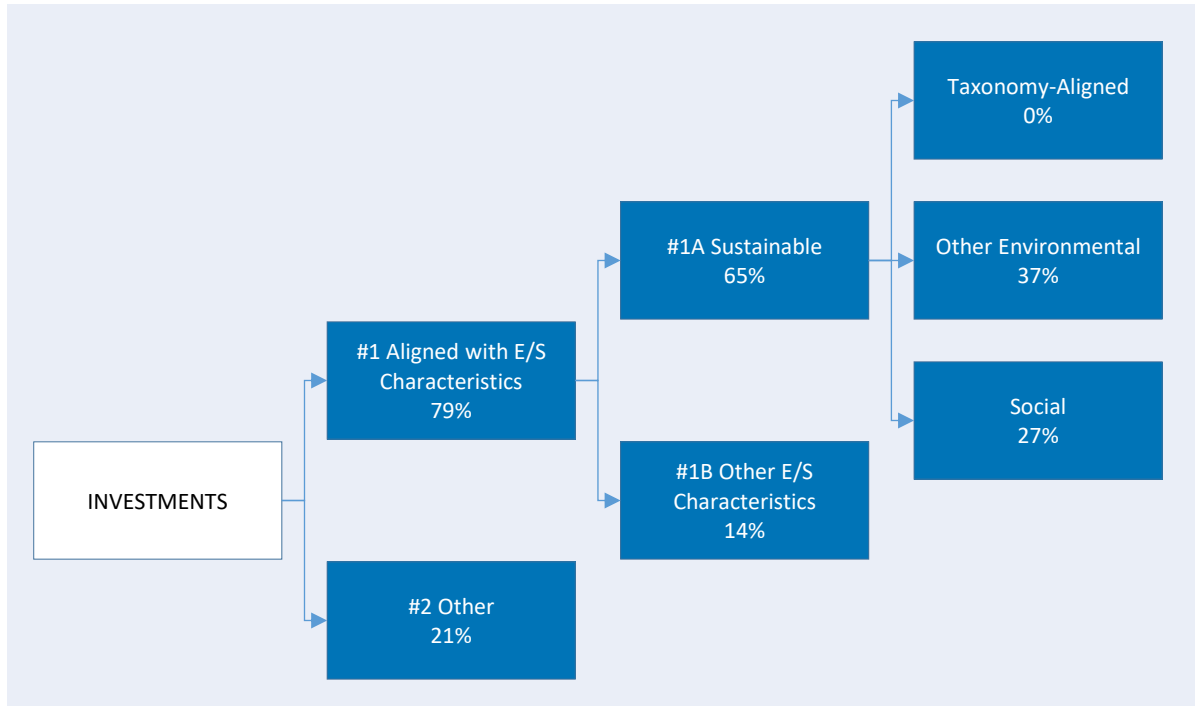

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 8 April 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these

# SFDR Periodic Report (continued)

Reference Period: 8 April 2025 - 31 December 2025

alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 8 April 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 8 April 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 37%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 27%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 8 April 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

# SFDR Periodic Report (continued)

Reference Period: 8 April 2025 - 31 December 2025

• *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Strategic Credit

**Legal Entity Identifier :** 549300402PQWGGYQR877

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 65% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a positive absolute sustainability score, based on Schroders' proprietary tool.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary tool.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 2.2%. This means that the Fund's score at the end of the reference period was higher than zero. The sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Connectivity
- Contraception
- Financial Inclusion
- High Salaries
- Medicine

The Investment Manager invested 65% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	65
Jan 2024 - Dec 2024	54
Jan 2023 - Dec 2023	46
Aug 2022 - Dec 2022	47

### Sustainability score

This table details the Fund's sustainability score, year on year

Period	Fund (%)
Jan 2025 - Dec 2025	2.2
Jan 2024 - Dec 2024	1.6
Jan 2023 - Dec 2023	2.5
Jan 2022 - Dec 2022	3.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## *How were the indicators for adverse impacts on sustainability factors taken into account?*

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to

PAI 4 (Exposure to companies active in the fossil fuel sector),

PAI 5 (Share of non-renewable energy consumption and production) and

PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste and radioactive waste ratio),

PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

We also considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Banking Services industry based in the United Kingdom on the subject of Climate oversight (PAIs 1, 2, 3, 4, 5 and 6). We also held an engagement on the subject of Boards and management (PAIs 12 and 13) with an issuer in the Electrical Utilities & IPPs industry based in the United Kingdom. Additionally, we engaged with an issuer based in the United Kingdom in the Government Activity industry on the subject of Nature-related risk and management (PAIs 7, 8 and 9).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	26
Corporate Governance	24
Natural Capital and Biodiversity	8
Human Capital Management	4
Diversity and Inclusion	2
Human Rights	2

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 88%. The Fund maintained a positive absolute sustainability score, and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 65%. To be classified as a sustainable investment an asset must meet one of the following:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

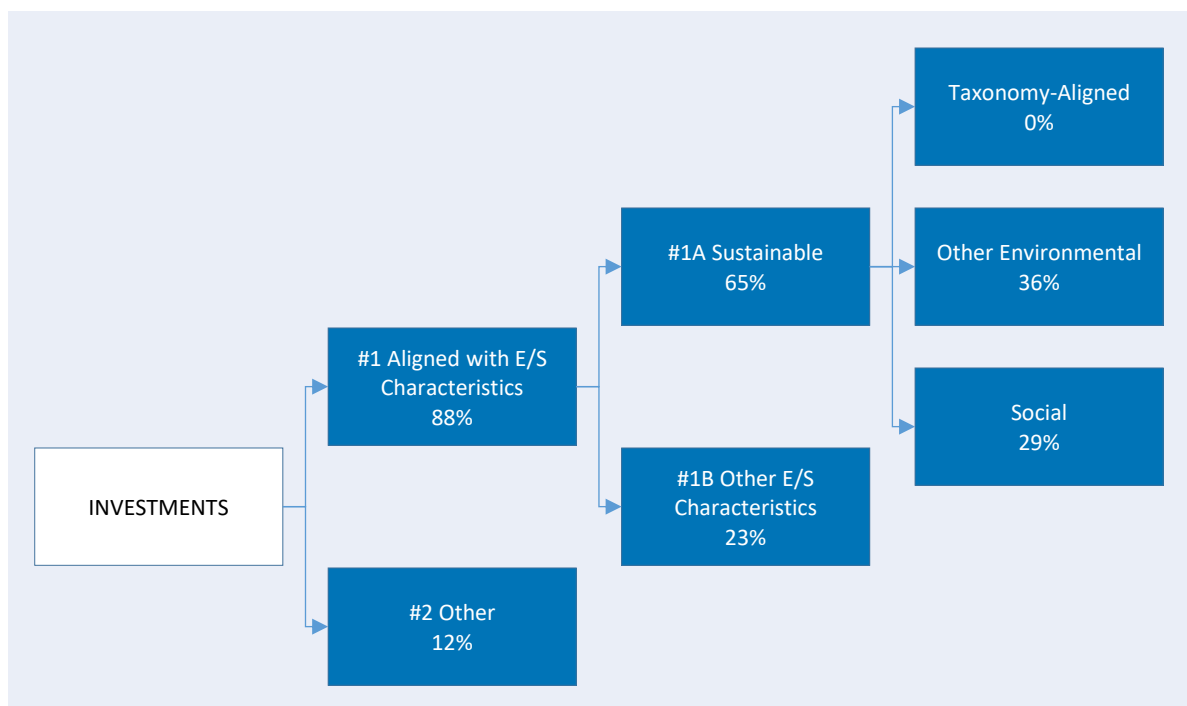

Of the Fund's sustainable investments, 36% was invested in sustainable investments with an environmental objective and 29% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure** (OpEx) reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## *previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 36%.

## **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 29%.

## **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable Euro Credit

**Legal Entity Identifier :** 5493003OZ3JFD52K6J04

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 83% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the ICE Bank of America Merrill Lynch Euro Corporate Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 55% of its assets in sustainable investments during the reference period. The fund also invested at least 10% of its assets in green, social and sustainable bonds.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 6.4% and the benchmark's sustainability score at the end of the reference period was -1.6%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- Fair Pay
- Power Provision
- Water Access

The Investment Manager invested 83% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2025 - Dec 2025	83
Jan 2024 - Dec 2024	75
Jan 2023 - Dec 2023	64
Aug 2022 - Dec 2022	63

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	6.4	-1.6
Jan 2024 - Dec 2024	5.8	-2.4
Jan 2023 - Dec 2023	4.3	-3.1
Jan 2022 - Dec 2022	6.9	-3.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period. From 2025 the sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Fair pay: the estimated societal benefits of companies over-paying staff relative to local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNG) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to
  - PAI 4 (Exposure to companies active in the fossil fuel sector),
  - PAI 5 (Share of non-renewable energy consumption and production) and
  - PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),
- PAI 8 (Emissions to water),
- PAI 9 (Hazardous waste and radioactive waste ratio),
- PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),
- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and
- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators and Schroders' 'global norms' breach list which covers:
  - PAI 7 (Activities negatively affecting biodiversity-sensitive areas),
  - PAI 8 (Emissions to water),
  - PAI 9 (Hazardous waste ratio),
  - PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),
  - PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and
  - PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

During the reference period, PAIs were also considered through integration in the investment process.

Greenhouse gas emissions, carbon footprint, greenhouse gas intensity of investment companies, activities negatively affecting biodiversity-sensitive areas: PAI 1, 2, 3 and 7 are considered into this fund through Schroders' proprietary tool and subsequent sustainability assessments. The proprietary tool incorporates several PAIs as a component of its scoring methodology and sustainability assessments. As part of our analysis, we consider how a firm is managing its environmental footprint (including its impact on the climate), its negative impact on biodiversity, as well as its potential exposure to the effects of long-term climate change. Certain PAIs may be more relevant for different issuers, sectors, or industries and therefore we assess companies based on ESG performance and PAIs on a sector-relevant basis. While no single metric determines the overall assessment of a company's environmental score, the Investment Manager evaluated a variety of different metrics to determine whether a company is adequately managing its climate and environmental risks.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the electrical utilities industry based in Italy about climate mitigation (PAIs 1, 2 and 3). We also held an engagement about Governance, and capital allocation (PAI 10) with a German electricity transmission utility. Additionally, we engaged with an US pharmaceutical company about circular economy, pollution and waste (PAI 9).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	76
Corporate Governance	42
Human Rights	24
Natural Capital and Biodiversity	22
Diversity and Inclusion	15
Human Capital Management	13

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 95%. The Fund maintained a higher overall sustainability score than the ICE Bank of America Merrill Lynch Euro Corporate Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

#1A includes the percentage invested in sustainable investments, which is equal to 83%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

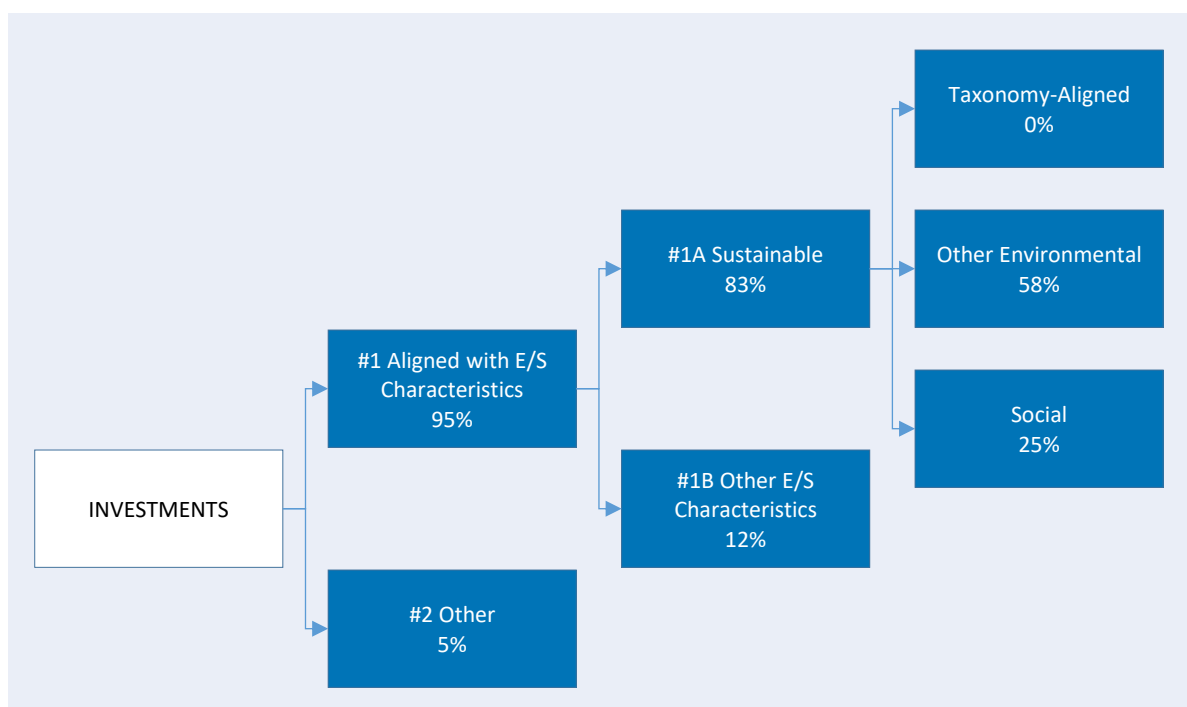

Of the Fund's sustainable investments, 58% was invested in sustainable investments with an environmental objective and 25% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Real Estate	7.12
Industrial	Healthcare	5.65
Industrial	Telecommunications	4.78

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 58%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 25%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable Global Credit Income Short Duration

**Legal Entity Identifier :** 5493006ZQNNBQCGW4K92

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 71% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse 1-5 year TR ex-Treasury A+ to B- EUR hedged Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invested at least 40% of its assets in sustainable investments until 31 March 2025. The Fund then invested at least 50% of its assets in sustainable investments from 1 April 2025 to the end of the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary tool.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 1.7% and the benchmark's sustainability score at the end of the reference period was -3.5%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Connectivity
- Education
- Financial Inclusion
- High Salaries

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Medicine

The Investment Manager invested 71% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	71
Jan 2024 - Dec 2024	65
Jan 2023 - Dec 2023	60
Aug 2022 - Dec 2022	52

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	1.7	-3.5
Jan 2024 - Dec 2024	2.5	-3.8
Jan 2023 - Dec 2023	3.0	-5.1
Jan 2022 - Dec 2022	3.8	-5.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## *How were the indicators for adverse impacts on sustainability factors taken into account?*

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

We also considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Banking Services industry based in Canada on the subject of Climate mitigation (PAIs 1, 2 and 3). We also held an engagement on the subject of Purpose, strategy and capital allocation (PAI 10) with an issuer in the Investment Banking & Investment Services industry based in the USA. Additionally, we engaged with an issuer based in the USA in the Diversified Retail industry on the subject of Circular economy, pollution and waste (PAI 9).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	48
Corporate Governance	32
Human Rights	17
Natural Capital and Biodiversity	15
Diversity and Inclusion	13
Human Capital Management	8

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 81%. The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse 1-5 year TR ex-Treasury A+ to B- EUR hedged Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 71%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

scored by Schroders' proprietary tool.

- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

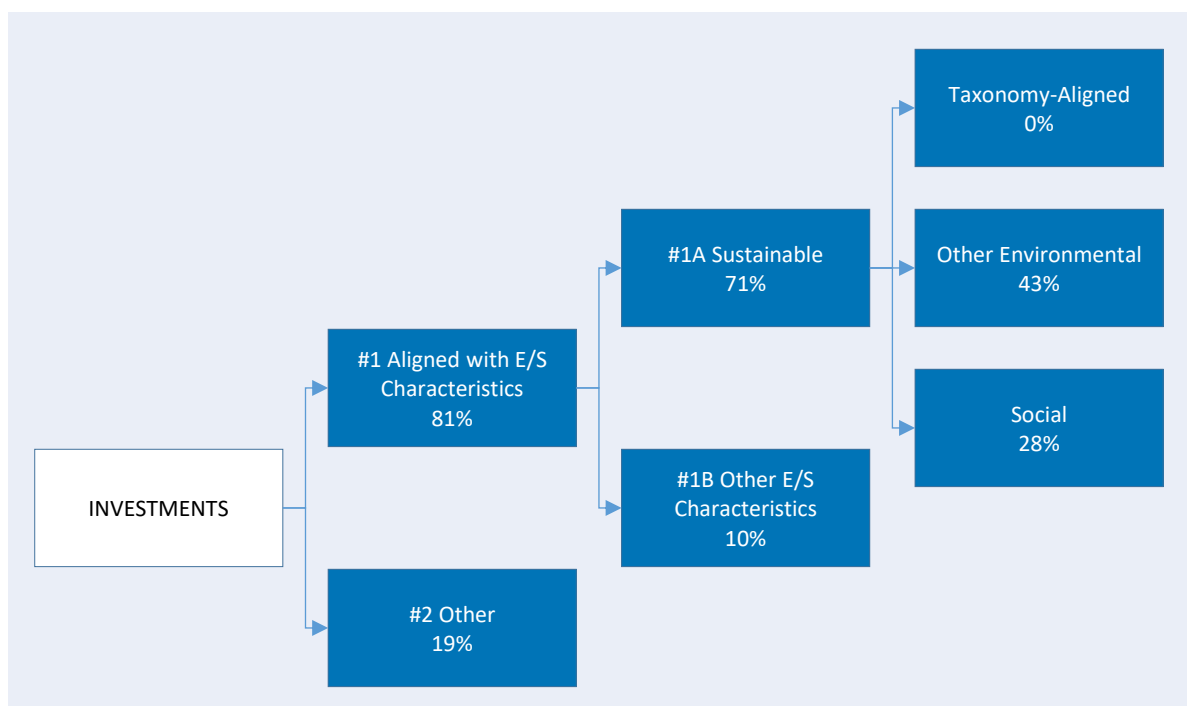

Of the Fund's sustainable investments, 43% was invested in sustainable investments with an environmental objective and 28% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

Cash Equivalents	Treasury Bills	0.12
Government Guaranteed		0.08

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 43%.

**What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 28%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

• *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable Global Multi Credit

**Legal Entity Identifier :** 549300N4PLUJQQE2N097

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 64% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse (TR) ex Treasury A+ to B- Index, USD Hedged, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invested at least 40% of its assets in sustainable investments until 31 March 2025. The Fund then invested at least 50% of its assets in sustainable investments from 1 April 2025 to the end of the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 5.9% and the benchmark's sustainability score at the end of the reference period was -4.4%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Water Access

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The Investment Manager invested 64% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	64
Jan 2024 - Dec 2024	57
Jan 2023 - Dec 2023	52
Aug 2022 - Dec 2022	49

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	5.9	-4.4
Jan 2024 - Dec 2024	5.9	-4.6
Jan 2023 - Dec 2023	2.5	-6.0
Jan 2022 - Dec 2022	4.4	-5.8

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period.

For 2023 and 2024 the percentage is calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

From 2022 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:
  - PAI 7 (Activities negatively affecting biodiversity-sensitive areas),
  - PAI 8 (Emissions to water),
  - PAI 9 (Hazardous waste ratio),
  - PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),
  - PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and
  - PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

We also considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with a bank based in the United Kingdom about climate oversight (PAIs 1, 2, 3, 4, 5 and 6). We also held an engagement on the subject of purpose, strategy and capital allocation (PAI 10) with an investment bank based in the USA. Additionally, we engaged with the UK government on nature-related risk and management topics (PAIs 7, 8 and 9).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	46
Corporate Governance	35
Human Rights	22
Diversity and Inclusion	11
Natural Capital and Biodiversity	10
Human Capital Management	9

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 87%. The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse (TR) ex Treasury A+ to B- Index, USD Hedged and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 64%. To be classified as a sustainable investment an asset must meet one of the following:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

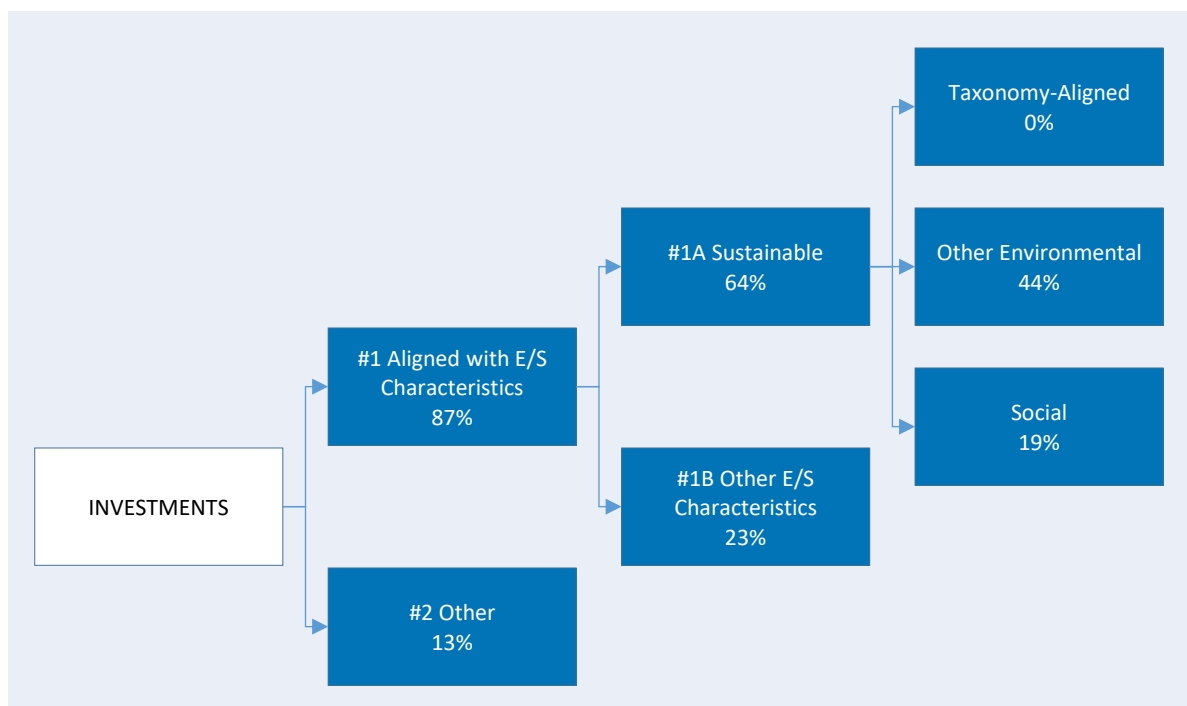

Of the Fund's sustainable investments, 44% was invested in sustainable investments with an environmental objective and 19% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 44%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 19%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 – 15 October 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable Global Sovereign Bond

**Legal Entity Identifier :** 549300TDFLMR98OUAQ49

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 93% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 15 October 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Global Treasury EUR hedged index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 40% of its assets in sustainable investments until 31 March 2025 and invested at least 50% of its assets in sustainable investments from 1 April 2025 to the end of the reference period.

The reference period for this Fund is 1 January 2025 to 15 October 2025 when the Fund was liquidated.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 3.0% and the benchmark's sustainability score was 1.4%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Clean Energy
- Education
- International Aid
- Patents
- Socio-Political Stability

The Investment Manager invested 93% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments as at the final month end during the reference

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 15 October 2025

period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Sep 2025	93
Jan 2024 - Dec 2024	95
Sep 2023 - Dec 2023	97

### Sustainable score

*This table details the percentage of assets invested in sustainable score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Sep 2025	3.0	1.4
Jan 2024 - Dec 2024	3.5	1.5
Sep 2023 - Dec 2023	3.7	1.7

For 2023 and 2024 the percentage of sustainable investments calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the final month end during the reference period.

From 2023 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

For 2025 the Sustainability score is calculated with respect to the Fund's holdings at the final month end during the reference period.

## • **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 15 October 2025

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- International Aid: the estimated societal benefits associated with humanitarian aid following natural disasters or conflicts and financial support for economic development of underdeveloped economies. Assigned in proportion to total net Official Development Assistance (ODA) receipts;
- Patents: the estimated societal benefits associated with governments conducting in-house Research and Development (R&D) and also finance R&D in various sectors of the economy. Assigned in proportion to the social benefits of innovation to countries using resident patent application data from the World Intellectual Property Organisation (WIPO); and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schrodgers.com/en-lu/lu/individual/fund-centre>.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 15 October 2025

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 15 October 2025

(Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators and Schroders' 'global norms' breach list which covers:
  - PAI 7 (Activities negatively affecting biodiversity-sensitive areas),
  - PAI 8 (Emissions to water),
  - PAI 9 (Hazardous waste ratio),
  - PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),
  - PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and
  - PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 15 October 2025

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

The nature of this Fund is such that it does not invest in corporate bonds and hence in practice corporate exclusions are less important than for other Funds. Nonetheless, the exclusions above were formally applied. The investment process for this strategy incorporates the exclusion of sovereign issuers who fail to meet our sustainable criteria on environmental, social or developmental grounds. During the reference period a number of sovereign issuers were excluded on grounds of insufficient progress or aspiration on environmental improvements (which relates to PAI 15 - GHG intensity) or of an unsatisfactory approach to achieving the UN SDGs or allowing basic social freedoms (which relate to PAI 16 - investee countries subject to social violations).

During the reference period, PAIs were also considered through integration in the investment process. As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

For sovereign issuers, PAIs 15 (GHG intensity) and 16 (investee countries subject to social violation) are highly relevant and were considered when assessing the suitability of various countries' debt for the portfolio.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Government Activity industry based in Mexico on the subject of Transparency, risk and reporting (PAI 10). We also held an engagement on the subject of Nature-related risk and management (PAIs 7, 8 and 9) with an issuer in the Government Activity industry based in Italy. Additionally, we engaged with an issuer based in Germany in the Government Activity industry on the subject of Climate mitigation (PAIs 1, 2 and 15).

There tend to be fewer opportunities to engage with sovereign issuers, as opposed to corporate issuers (in which this Fund does not invest).

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	3
Natural Capital and Biodiversity	3
Corporate Governance	3
Human Rights	2

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

US TREASURY BOND 2.25% 15 Aug 2049	Sovereign (Developed)	1.62	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings as at the final month end during the reference period.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 15 October 2025

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 95%. The Fund maintained a higher overall sustainability score than the Bloomberg Global Treasury EUR hedged index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 93%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

Of the Fund's sustainable investments, 60% was invested in sustainable investments with an environmental objective and 33% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits"

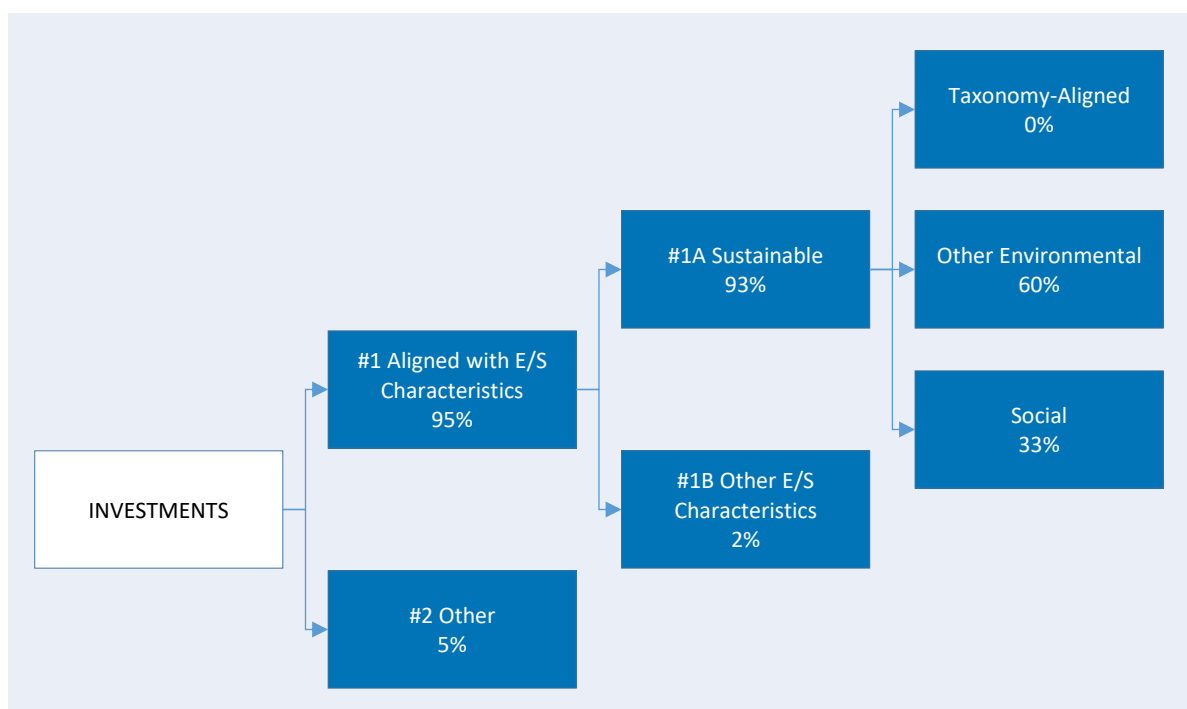

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 15 October 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Sovereign (Developed)		69.3
Supranational		14.28
Cash Equivalents	Treasury Bills	3.92
Government Guaranteed		3.53
EMD Sovereign		3.25
Local Authority		2.19
Foreign Sovereign		0.92
Agency		0.22

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 15 October 2025

elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 15 October 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 15 October 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 60%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 33%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 15 October 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 15 October 2025

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 – 5 November 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable US Dollar Corporate Bond

**Legal Entity Identifier :** 549300PT9R3Q0O6WKS27

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 72% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 5 November 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg US Corporate Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invested at least 40% of its assets in sustainable investments until 31 March 2025. The Fund then invested at least 50% of its assets in sustainable investments from 1 April 2025 to the end of the reference period.

The reference period for this Fund is 1 January 2025 to 5 November 2025 when the Fund was liquidated.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 5.4% and the benchmark's sustainability score was -5.6%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Connectivity
- Contraception
- Medicine
- Sanitation
- Water Access

The Investment Manager invested 72% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments as at the final month end during the reference

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 5 November 2025

period. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Oct 2025	72
Jan 2024 - Dec 2024	65
Sep 2023 - Dec 2023	67

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Oct 2025	5.4	-5.6
Jan 2024 - Dec 2024	5.5	-6.0
Sep 2023 - Dec 2023	6.7	-8.6

For 2023 and 2024 the percentage of sustainable investments calculated as an average based on quarter-end data.

For 2025 the percentage of sustainable investments was calculated as at the final month end during the reference period.

For 2023 to 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

For 2025 the Sustainability score is calculated with respect to the Fund's holdings at the final month end during the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 5 November 2025

- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue;
- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 5 November 2025

Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to

PAI 4 (Exposure to companies active in the fossil fuel sector),

PAI 5 (Share of non-renewable energy consumption and production) and

PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste and radioactive waste ratio),

PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives).

PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises***

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 5 November 2025

## ***and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

- PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

- PAI 8 (Emissions to water),

- PAI 9 (Hazardous waste ratio),

- PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

- PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

- PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 5 November 2025

emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company's overall environmental score.

We also considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Water & Related Utilities industry based in the USA on the subjects of Climate adaptation (PAIs 1, 2, 3, 4, 5 and 6) and Sustainable food and water (PAIs 7 and 8). We also held an engagement on the subject of Purpose, strategy and capital allocation (PAI 10) with an issuer in the Investment Banking & Investment Services industry based in the USA.

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	5
Corporate Governance	3
Human Rights	3
Diversity and Inclusion	2
Human Capital Management	1
Natural Capital and Biodiversity	1

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings as at the final month end during the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the Bloomberg US Corporate Index, and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 72%. To be classified as a sustainable investment an asset must meet one of the following:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 5 November 2025

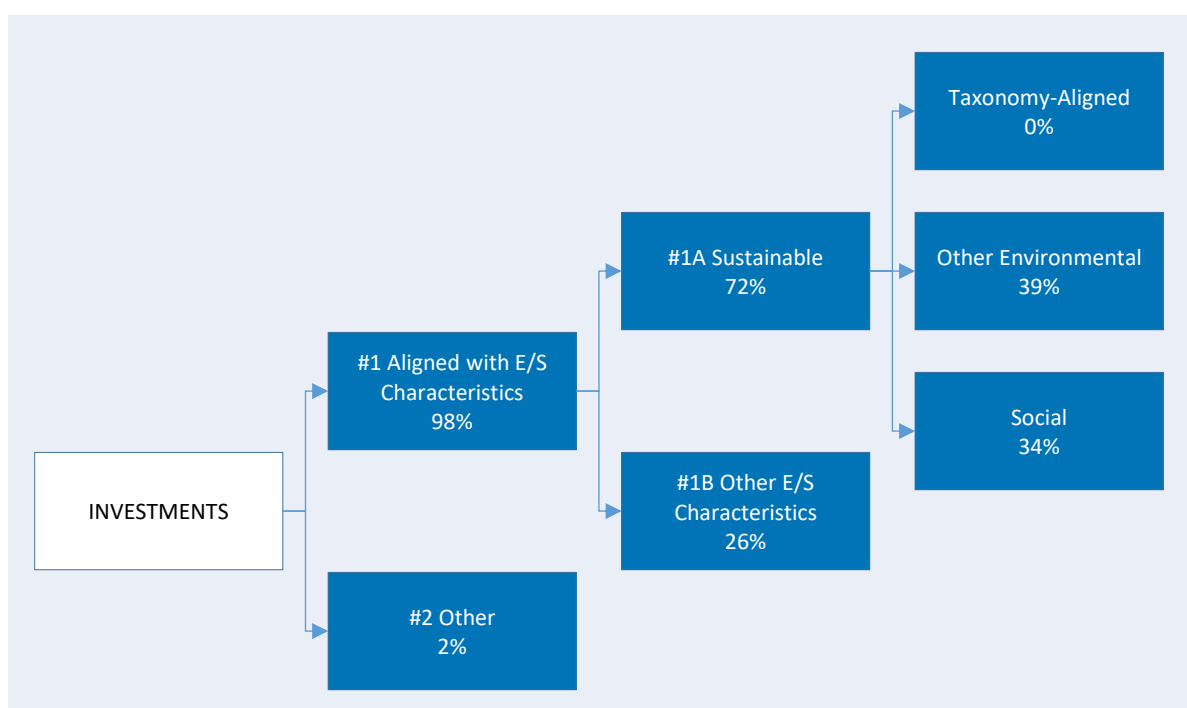

Of the Fund's sustainable investments, 39% was invested in sustainable investments with an environmental objective and 34% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes investments that are treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 5 November 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 5 November 2025

Sector	Sub-Sector	% Assets
Industrial	Healthcare	11.56
Industrial	Capital Goods	5.89
Industrial	Consumer Goods	5.77
Industrial	Real Estate	5.41
Industrial	Technology & Electronics	5.24
Industrial	Basic Industry	4.66
Industrial	Retail	3.88
Industrial	Telecommunications	3.50
Industrial	Media & Entertainment	2.24

Utilities	Non-Electric Utilities	3.16
Utilities	Electric - Integrated	2.13
Utilities	Electric - Generation	1.93
Utilities	Electric - Distr/Trans	1.81
Cash Equivalents	Treasury Bills	3.20
Industrial	Healthcare	11.56

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 5 November 2025

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 5 November 2025

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 39%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 34%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 5 November 2025

#2 Other includes investments that are treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 – 5 November 2025

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2025 - 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable US Dollar High Yield

**Legal Entity Identifier :** 549300XZ2TNRMX4VI765

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 58% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg US High Yield Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invested at least 40% of its assets in sustainable investments until 31 March 2025. The Fund then invested at least 50% of its assets in sustainable investments from 1 April 2025 to the end of the reference period.

The reference period for this Fund is 1 January 2025 to 31 December 2025.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score at the end of the reference period was 5.0% and the benchmark's sustainability score at the end of the reference period was -3.9%. In each case the sustainability score is calculated as described above.

The top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund at the end of the reference period were:

- Connectivity
- Contraception
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 58% of the Fund's assets in sustainable investments. This figure represents the percentage of sustainable investments at the end of the reference period. Sustainable

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

investments are measured by reference to the sustainability score in Schroders' proprietary tool.

Any assets classified as green, social and / or sustainable bonds were also considered sustainable investments.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2025 - Dec 2025	58
Jan 2024 - Dec 2024	60

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2025 - Dec 2025	5.0	-3.9
Jan 2024 - Dec 2024	6.1	-2.1

For 2024 the percentage of sustainable investments was calculated as an average based on quarter-end data.

From 2025 the percentage of sustainable investments was calculated as at the end of the reference period.

For 2024 Sustainability scores were calculated as a weighted average of the Fund's holdings over the last six months of the reference period.

From 2025 the Sustainability score is calculated with respect to the Fund's holdings at the end of the reference period.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment met at least one of the following criteria:

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.
- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

to the average living wage;

- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at the end of the reference period. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage

<https://www.schrodgers.com/en-lu/lu/individual/fund-centre>

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schrodgers' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This framework is subject to ongoing review, particularly as the availability and quality of the data evolves. Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:  
- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons).

Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):  
PAI 7 (Activities negatively affecting biodiversity-sensitive areas),  
PAI 8 (Emissions to water),  
PAI 9 (Hazardous waste and radioactive waste ratio),  
PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises),  
PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and  
PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. All PAI indicators were monitored via Schroders PAI dashboard. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators and Schroders' 'global norms' breach list which covers:

PAI 7 (Activities negatively affecting biodiversity-sensitive areas),

PAI 8 (Emissions to water),

PAI 9 (Hazardous waste ratio),

PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises),

PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and

PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process.

As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) as well as PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

reduction initiatives) were included as part of a company's overall environmental score.

As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. Some examples of engagements during the reference period are:

We engaged with an issuer in the Investment Banking & Investment Services industry based in Switzerland on the subject of Transparency, risk and reporting (PAI 10). We also held an engagement on the subject of Climate mitigation (PAIs 1, 2 and 3) with an issuer in the Banking Services industry based in France.

A summary of the Fund's full engagement activity during the reference period, including the relevant engagement theme, is shown below:

<b>Engagement Theme</b>	<b># Issuers</b>
Climate Change	9
Corporate Governance	4
Human Capital Management	2
Natural Capital and Biodiversity	2
Human Rights	2
Diversity and Inclusion	2

The engagements shown relate to engagements with companies and issuers. Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2025 to 31 Dec 2025**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below; all figures represent the Fund's holdings at the end of the reference period.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 87%. The Fund maintained a higher overall sustainability score than the Bloomberg US High Yield Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had an overall positive or a negative score).

#1A includes the percentage invested in sustainable investments, which is equal to 58%. To be classified as a sustainable investment an asset must meet one of the following:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

- The asset demonstrated a net positive effect across a range of environmental or social objectives as scored by Schroders' proprietary tool.

- The asset has been classified as either a green, social or sustainable bond using a third-party data source.

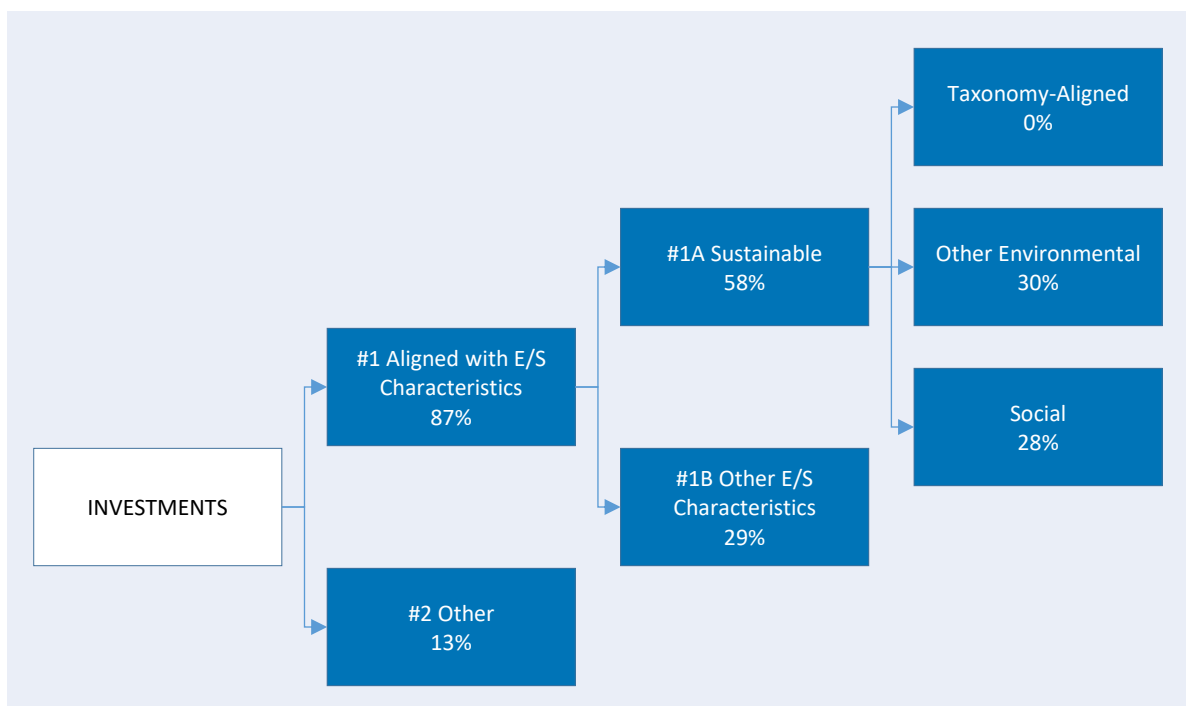

Of the Fund's sustainable investments, 30% was invested in sustainable investments with an environmental objective and 28% was invested in sustainable investments with a social objective. These percentages may not sum to the percentage of sustainable investments, due to rounding.

A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

Any green and social bonds were always classified as having an environmental or social objective respectively.

#1B includes all investments scored by Schroders proprietary tool that were not sustainable investments.

#2 Other includes investments that are treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Healthcare	13.96
Industrial	Media & Entertainment	11.95
Industrial	Retail	7.90
Industrial	Capital Goods	7.62
Industrial	Telecommunications	6.42
Industrial	Automotive	6.09
Industrial	Technology & Electronics	4.28
Industrial	Real Estate	4.25
Industrial	Basic Industry	3.90
Industrial	Consumer Goods	3.77
Industrial	Services	3.55
Industrial	Leisure	2.24
Industrial	Transportation	0.60
Industrial	Gas-Distribution	0.21
Industrial	Oil Refining & Marketing	0.07
Financial	Financial Services	8.91
Financial	Banking	4.08
Financial	Insurance	3.09
Utilities	Electric - Generation	3.51
Utilities	Electric - Integrated	0.82
Utilities	Non-Electric Utilities	0.44
Cash	Cash	2.25
Cash	Margin Cash	0.39
Derivatives	Credit Derivatives	-0.28

The list above represents the average of the Fund's holdings at each quarter-end during the reference period. The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2025 - 31 December 2025

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 30%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 28%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes investments that are treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

Reference Period: 1 January 2025 - 31 December 2025

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*
