

Schroder International Selection Fund Securitised Credit

A Accumulation USD | Data as at 30.09.2025

Fund objectives and investment policy

The fund aims to provide income and capital growth in excess of ICE BofA AA-BBB ABS Index, before fees have been deducted* over a three to five year period by investing in securitised assets issued by entities worldwide. *For the target return after fees for each Share Class please visit the Schroder webpage: <https://www.schroders.com/en/lu/private-investor/investing-with-us/after-fees-performance-targets/>

Above is the Investment Objective of the fund. For details on the fund's Investment Policy please see the KID.

The fund has environmental and/or social characteristics within the meaning of Article 8 of Regulation (EU) 2019/2088 on Sustainability-related Disclosures in the Financial Services Sector (the "SFDR").

Relevant risks associated with an investment in this fund are shown below and should be carefully considered before making any investment. Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of investments to fall as well as rise. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.

A Accumulation USD | Data as at 30.09.2025

Risk considerations

ABS and MBS risk: The fund may invest in mortgage or asset-backed securities. The underlying borrowers of these securities may not be able to pay back the full amount that they owe, which may result in losses to the fund.

Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Credit risk: If a borrower of debt provided by the fund or a bond issuer experiences a decline in financial health, their ability to make payments of interest and principal may be affected, which may cause a decline in the value of the fund.

Currency risk: If the fund's investments are denominated in currencies different to the fund's base currency, the fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates. If the investor holds a share class in a different currency to the base currency of the fund, investors may be exposed to losses as a result of movements in currency rates.

Default risk: If a debt instrument in the portfolio defaults or breaches the debt instrument covenants, this may reduce interest and/or capital repayments and could impact the value of the fund.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used for investment purposes and/or to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

High yield bond risk: High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk meaning greater uncertainty of returns.

Interest rate risk: The fund may lose value as a direct result of interest rate changes.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Market risk: The value of investments can go up and down and an investor may not get back the amount initially invested.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Sustainability risk: The fund has environmental and/or social characteristics. This means it may have limited exposure to some companies, industries or sectors and may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the investment manager. The fund may invest in companies that do not reflect the beliefs and values of any particular investor.

Information relating to changes in fund manager, investment objective, benchmark and corporate action information

The full track record of the previous index has been kept and chain linked to the new one. On 01.05.2021 the ICE BofA 3 Month US Treasury Bill Index +2% replaced the 3-month USD LIBOR +2%. On the 02.01.2024 the target changed from ICE BofA 3 Month US Treasury Bill Index +2% to ICE BofA AA-BBB ABS Index and the comparator changed from ICE BofA US Floating Rate Asset Backed Securities index to Bloomberg Barclays 1-5yr Global Credit index (Hedged to USD).

Benchmarks: (If applicable)

Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark. The target benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the fund aims to provide. The comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the benchmark. The investment manager will invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities.

A Accumulation USD | Data as at 30.09.2025

Source and ratings information

Source of all performance data, unless otherwise stated: Morningstar, bid to bid, net income reinvested, net of fees.

Aggregated SustainEx metric definitions are: Carbon emissions: Environmental and societal cost of carbon emissions (scope 1,2 and 3). Water consumption: Environmental and societal cost of companies' and countries' freshwater withdrawal. Assigned based on reported water usage. Avoided carbon emissions: Environmental and societal benefits of activities and technologies that enable system-wide reductions in carbon emissions, including companies' products and services and country investments in clean energy. Fair pay: Societal benefits or costs of companies over- or under-paying staff relative to local living wages (for regions in which they operate). Alcohol: Societal cost of alcohol consumption (assigned to alcohol producers). Tobacco: Societal cost of smoking (assigned to tobacco producers).

Energy exposure definitions are: Coal exposure: Measures the weight of the portfolio exposed to companies deriving revenue from the mining of thermal coal (including lignite, bituminous, anthracite and steam coal) and its sale to external parties. It excludes: revenue from metallurgical coal; coal mined for internal power generation (e.g. in the case of vertically integrated power producers); intra-company sales of mined thermal coal; and revenue from coal trading. Tar sands exposure: Measures the weight of the portfolio exposed to companies deriving revenue from oil sands extraction for a set of companies that own oil sands reserves and disclose evidence of deriving revenue from oil sands extraction. This factor does not include revenue from non-extraction activities (e.g. exploration, surveying, processing, refining); ownership of oil sands reserves with no associated extraction revenues; revenue from intra-company sales.

*Coverage, which refers to the percentage of indicator data available at month-end for the underlying holdings of the fund and the benchmark, where applicable.

Impact scores: These are generated using Schroders' proprietary tool SustainEx™.

SustainEx™ provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. SustainEx™ utilises and is reliant on third party data (including third party estimates) as well as Schroders' own modelling assumptions, and the outcome may differ from other sustainability tools and measures. Where SustainEx™ relies on data and estimates produced by third parties, Schroders cannot and does not warrant the accuracy, completeness and adequacy of such third party data and estimates. Like any model, SustainEx™ will evolve and develop over time as Schroders continues to assess, refine and add to the metrics and their relative contributions. Generating SustainEx™ scores involves an element of judgment and subjectivity across the different metrics chosen by Schroders, and accordingly Schroders does not accept any liability arising from any inaccuracy or omission in, or the use of or reliance on, SustainEx™ scores. As the model evolves, changes made to how metrics are applied may result in changes to the SustainEx™ score of any issuer and ultimately the overall fund/portfolio score. At the same time, of course, the issuer's SustainEx™ performance might improve or deteriorate. Schroders' proprietary sustainability tools including SustainEx™ may not cover all of a fund/portfolio's holdings from time to time, in which case Schroders may use a range of alternative methods to assess the relevant holding. In addition, certain types of assets (such as cash) are treated as neutral and are therefore not considered by our proprietary tools. Other types of assets such as equity indices and index derivatives may not be considered by our proprietary tools and in such case would be excluded from a product's sustainability score.

Important information

Costs:

Certain costs associated with your investment in the fund may be incurred in a different currency to that of your investment. These costs may increase or decrease as a result of currency and exchange rate fluctuations.

If a performance fee is applicable to this fund, details of the performance fee model and its computation methodology can be found in the fund's prospectus. This includes a description of the performance fee calculation methodology, the dates on which the performance fee is paid and details of how the performance fee is calculated in relation to the fund's performance fee benchmark, which may differ from the benchmark in the fund's investment objective or investment policy.

For further information regarding the costs and charges associated with your investment, please consult the funds' offering documents and annual report.

General:

Nothing in this document should be construed as advice and is therefore not a recommendation to buy or sell shares. An investment in Schroder International Selection Fund ("the "Company") entails risks, which are fully described in the prospectus.

Subscriptions for shares of the Company can only be made on the basis of its latest Key Information Document (the "KID") and prospectus, together with the latest audited annual report (and subsequent unaudited semi-annual report, if published), copies of which can be obtained, free of charge, from Schroder Investment Management (Europe) S.A. An investment concerns the acquisition of shares in the Company, and not the underlying assets. The Company is a Luxembourg-based Société d'Investissement à Capital Variable (SICAV), established for an unlimited period and coordinated with regard to the European regulations and meets the criteria for Undertakings for Collective Investment in Transferable Securities (UCITS). The KIDs are available in Bulgarian, Czech, Danish, Dutch, English, French, Finnish, German, Greek, Hungarian, Icelandic, Latvian, Lithuanian, Norwegian, Polish, Portuguese, Romanian, Slovakian, Spanish and Swedish, and the prospectus are available in English, Flemish, French, German, Spanish, free of charge at www.eifs.lu/schroders. The availability of KIDs in the aforementioned languages is subject to the registration of the fund in the respective jurisdiction. For Luxembourg, these documents may be obtained in English, free of charge, from the following link: www.eifs.lu/schroders.

Schroders may decide to cease the distribution of any fund(s) in any EEA country at any time but we will publish our intention to do so on our website, in line with applicable regulatory requirements.

The fund has environmental and/or social characteristics within the meaning of Article 8 of Regulation (EU) 2019/2088 on Sustainability-related Disclosures in the Financial Services Sector (the "SFDR"). For information on sustainability-related aspects of this fund please go to www.schroders.com
