

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Global Sustainable Food and Water

a sub-fund of Schroder International Selection Fund SICAV

Class A Accumulation PLN Hedged (LU2484002188)

This fund is managed by Schroder Investment Management (Europe) S.A., which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth by investing in equities of companies worldwide which help the transition towards the sustainable provision of food and water and which the investment manager deems to be sustainable investments.

Investment policy

The fund is actively managed and invests at least 75% of its assets in sustainable investments, which are investments that the investment manager expects to contribute towards the provision of sustainable food and water including water management, agricultural equipment, agricultural inputs, food production, processing, packaging and distribution, food and water retail and recycling.

The fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability Information" on the fund's webpage, accessed via www.schroders.com/en/lu/private-investor/gfc. The fund invests in companies that do not cause significant environmental or social harm and have good governance practices, as determined by the investment manager's rating criteria.

The investment manager may also engage with companies held by the fund to challenge identified areas of weakness on sustainability issues. More details on the investment manager's approach to sustainability and its engagement with companies are available on the website www.schroders.com/en/lu/private-investor/strategic-capabilities/sustainability/disclosures

The fund invests two-thirds of its assets in equities of companies worldwide. The fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or

currencies, investment funds, warrants and money market investments, and hold cash.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.

Benchmark

The fund does not have a target benchmark. The fund's performance should be compared against the MSCI AC World (Net TR) index. The comparator benchmark is only included for performance comparison purposes and does not have any bearing on how the investment manager invests the fund's assets. The fund's investment universe is expected to overlap materially with the components of the comparator benchmark. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the comparator benchmark. The investment manager will invest in companies or sectors not included in the comparator benchmark. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund.

The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy. The performance of this share class is compared against the performance of the equivalent unhedged currency share class.

Dealing frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution policy

This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Risk and reward profile

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

Sustainability risk: The fund has the objective of sustainable investment. This means it may have limited exposure to some companies, industries or sectors and may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the investment manager. The fund may invest in companies that do not reflect the beliefs and values of any particular investor.

Currency risk: The fund may lose value as a result of movements in foreign

exchange rates.

Currency risk / hedged shareclass: The hedging of the share class may not be fully effective and residual currency exposure may remain. The cost associated with hedging may impact performance and potential gains may be more limited than for unhedged share classes.

Derivatives risk: Derivatives may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Charges

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	1.89%
Charges taken from the fund under certain specific conditions	
Performance fee	
None	

Past performance

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure shown here is an estimate of the charges because the fund was launched recently and did not have a year's expenses upon which to calculate the figure. The fund's annual report for each financial year will include detail on the exact charges made.

You can find more information about the charges in Section 3 of the fund's prospectus.

The fund was launched on 05/10/2021.

The shareclass was launched on 15/06/2022.

Performance figures are only available since the launch of the respective share class.

Practical information

Depositary: J.P. Morgan SE.
