The value of shares in the Fund and income received from it can go down as well as up, and investors may not get back the full amount invested.

Performance details provided are in share class currency, include the reinvested dividends gross of tax and are net of management fees. Sales charges, taxes and other locally applied costs have not been deducted. The fund's returns may increase or decrease as a result of changes to foreign exchange rates.

Up to date performance figures can be found on our website.

When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

This share class will attempt to hedge the currency risk between the base currency of the Fund and the currency of the share class, although there can be no guarantee that it will be successful in doing so.

What are the Risks?

The Fund does not offer any capital guarantee or protection and you may not get back the amount invested. The Fund is subject to the following risks which are materially relevant: **Emerging markets risk:** the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues. **Foreign Currency risk:** the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations. **Liquidity risk:** the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Such risk may be triggered by (but not limited to) unexpected events such as environmental disasters or pandemics. Reduced liquidity may have a negative impact on the price of the assets.

Complete information on the risks of investing in the Fund are set out in the Fund's prospectus.

Glossary

Ongoing Charges Figure (OCF): The Ongoing Charges Figure (OCF) includes the fees paid to the management company, the investment manager and the depository, as well as certain other expenses. The OCF is calculated by taking the relevant main material costs paid out over the 12-month period indicated and dividing them by the average net assets over the same period. The OCF does not include all expenses paid by the fund (for example, it does not include what the fund pays for buying and selling securities). For a comprehensive list of the types of costs deducted from fund assets, see the prospectus. For recent all-in annual costs, as well as hypothetical performance scenarios that show the effects that different levels of return could have on an investment in the fund, where applicable, see the KID. **Comparator:** Benchmark is used for comparing Fund performance, but is not a constraint to Fund Investment.

Weighted Average Market Capitalization: A determination of a company's value, calculated by multiplying the total number of company stock shares outstanding by the price per share. For a portfolio, the value represents a weighted average based on the stocks held. **Price to Book:** The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds. **Price to Earnings (12-Month Trailing)** is the share price of a stock, divided by its per-share earnings over the past year. For a portfolio, the value represents a weighted average of the stocks it holds. **Price to Cash Flow:** Supplements price/earnings ratio as a measure of relative value for a stock. For a portfolio, the value represents a weighted average of the stocks it holds. **Standard Deviation:** Measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

The Fund is actively managed and may deviate materially from that of the benchmark(s).

Intended retail investor Investors who understand the risks of the Fund and plan to invest for at least 5 years. The Fund may appeal to investors who are looking for long-term investment growth, are interested in exposure to equity markets in Latin America as part of a diversified portfolio, have a high risk profile and can tolerate significant short-term changes in the share price.

Product availability The Fund is available to all investors with at least basic investment knowledge, through a wide range of distribution channels, with or without the need for advice.

Performance: The share class shown has adopted a hedging strategy intended to reduce the effect of exchange rate movements between the currency of the Fund's investment strategy and the currency of the share class. The benchmark returns displayed are shown in the reference currency of the Fund's investment strategy USD, while share class returns are shown in the reference currency of share class PLN. As a result, the returns shown above reflect the effect of the hedging strategy and one can compare the returns of the Fund (net of fees) relative to its benchmark index without the impact of exchange rate movements on index returns.
