

# VIG Alfa Absolute Return Investment Fund

A series HUF MONTHLY report - 2025 JULY (made on: 07/31/2025)

## INVESTMENT POLICY OF THE FUND

The aim of the fund is to achieve a substantial yield for investors by taking high risks and making active use of derivative positions. The Fund applies special investment strategies used by hedge funds to establish its strategy. The fund is willing to buy or sell all available investment instruments - domestic and foreign bonds (treasury bonds, discounted treasury bills, bonds issued by the National Bank of Hungary, as well as low-risk bank and corporate bonds expected to bring higher yields than the state securities) Equities and other securities, indices and currencies - provided it sees the opportunity to make substantial gains – up to the maximum limit allowed by the law, which allows double leverage for the Fund. In its investment decisionmaking mechanism, the Fund considers fundamental pricing, technical and behavioral psychological factors To ensure liquidity the Fund aims to hold government securities issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary.

## MARKET SUMMARY

Several factors supported the rise of the US stock market in July: the weakening of the dollar, algorithmic position building due to declining realized volatility, and the continued strong growth narrative in the technology sector, particularly among AI and semiconductor companies. The economic slowdown – for example, weak consumer spending and labor market data, as well as low private sector growth estimates by ADP Research, the global leader in employment performance measurement – did not cause panic.

The passage of the budget bill known as the "Big Beautiful Bill" provided a significant fiscal stimulus, which supported the stock market in the short term but raised concerns among bond market investors about the already controversial sustainability of public debt in the longer term. The yield on the 10-year US government bonds rose, along with the rest of the yield curve, reflecting uncertainty about the solvency of the government.

European markets showed similarly mixed performance. Favorable developments in trade negotiations supported stock indices, but bond markets saw a significant sell-off, mainly due to expectations of a slowdown in interest rate cuts by the European Central Bank. Inflation rose slightly but remains around the 2% target. The ECB's communication remained cautious, but Vice-President De Guindos warned of the dangers of the EUR/USD rate reaching 1.20, which somewhat halted the euro's appreciation.

In July, the fund achieved a positive return, with significant contributions from both the bond and equity portfolios. Among bonds, Hungarian government bonds underperformed, while Romanian euro-denominated government bonds have shown consistent growth since May. Despite this, we have reduced our exposure to them slightly, but they still represent a significant investment. Among equities, our Polish and regional investments also performed well, and we increased our exposure to them last month. However, to mitigate the impact of a potential decline, we purchased put options on overpriced US equities in several steps, thereby hedging half of our total equity exposure.

## GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% ZMAX Index + 1.7%
