Net Asset Value of PLN series:	36,474,454 PLN
Net Asset Value per unit:	1.223921 PLN

### INVESTMENT POLICY OF THE FUND:

The fund's investment objective is to provide investors with a higher return than that attainable in the domestic money market, primarily by investing in the bond market of the Central and Eastern European region. The fund's bond investments are mainly concentrated in the corporate and mortgage bond markets, but government securities issued in foreign currency are also potential investment targets. Forint-denominated Hungarian government securities are only held for liquidity management purposes. The fund may also buy into other investment funds that invest in the above markets. The achievement of a higher return than would be attainable in the Hungarian government securities market is made possible by the better diversification, the additional yield from the premiums of the bonds, and, in a favourable market environment, by the price gains resulting from the narrowing of the premiums. The fund's general risk level and the asset allocation between the three main areas of investment is determined on the basis of a regular market analysis and situational analysis relating to four main aspects (fundamentals, valuation levels, market sentiment, technical factors). The in-depth analysis is also an important factor in the selection of the individual securities by region, sector and interest risk. In the course of selecting the individual securities, a thorough financial analysis is also essential to determine the creditworthiness of the issuer. Risk management and the regular monitoring of the issuers are of key importance to the fund. When compiling the fund's portfolio we aim to achieve a moderate risk profile, primarily purchasing investment-grade securities. The fund only buys lower-rated instruments in limited proportions. The fund may only conclude derivative transactions for the purpose of hedging or ensuring an efficient portfolio structure. The fund may also hold unleveraged collective investments linked to derivative indexes. The fund also has the option of taking on a substantial currency exposure, which will ordinarily be fully hedged, although depending on market circumstances the fund may even have an open currency position. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term.

Asset	Type	Counterparty / issuer	Maturity
Magyar Fejlesztési Bank Zrt. 2020/10 6,25% USD	interest-bearing	Magyar Fejlesztési Bank Zrt. (HU)	2020.10.21
MOL 2023/04/28 2,625%	interest-bearing	MOL Nyrt. (HU)	2023.04.28
D191120	zero coupon	Államrögzőség Kezelő Központ Zrt. (HU)	2019.11.20

### MARKET SUMMARY:

Risk appetite returned to markets once again in October as expectations that the US and China were edging towards agreeing on "phase one" of their trade deal, earnings season broadly bettering expectations, the Fed announcing that it would resume securities purchases to grow its balance sheet and even the latest twist in Brexit developments all combining to help to boost sentiment. The risk on sentiment has driven EM sovereign yield spreads by 10 basispoints lower. The main outperformer was Argentina where the market was waiting for the official results of the general elections. As the country was preparing for that, the market has calmed a bit and that took Argentine yields lower by 68 basispoints. In our region Ukraine was the main outperformer with spreads tightening by 46 basispoints. We increased out Hungarian forint duration and initiated treasury longs.

### ASSET ALLOCATION OF THE FUND ON 10/31/2019
