

VIG BondMaxx Total Return Bond Investment Fund

P series PLN MONTHLY report - 2026 MAY (made on: 05/31/2026)

INVESTMENT POLICY OF THE FUND

The Fund is a total return investment fund that aims to create a portfolio consisting of bond-type assets through active portfolio management that achieves annualised capital growth for investors higher than the benchmark over a 3-year time horizon. It intends to achieve this objective primarily through asset allocation in global bond markets.

The Fund invests exclusively in bond-type instruments. The Fund's investment universe focuses on developed market government bonds, developed market corporate bonds, local currency emerging market government bonds and hard currency emerging market government and corporate bonds. The primary source of return for the Fund is asset allocation across bond-type asset classes. The asset allocation is based on an "investment clock" approach that uses economic data analysis to determine the position of major regions within a growth cycle. This is complemented by the forecasting of expected movements in real interest rates and inflation expectations, which are also crucial for the allocation across bond markets. Portfolio managers use all these as the basis for making allocation decisions, overweighting the best performing bond asset class in any current economic cycle based on experience and expectations. In the investment process, portfolio managers optimise the interest rate and credit risk of the overall fund and of the exposures to individual bond markets in order to achieve the investment objective.

MARKET SUMMARY

Markets remain focused on ceasefire headlines, but the key issue for emerging markets is the Strait of Hormuz. Until normal and reliable transit resumes, the global economy faces a broad supply shock—not just higher oil prices—driving volatility, inflation, and uncertainty. This marks a sharp reversal from the supportive environment at the start of 2026, when growth was strong, inflation was easing, and liquidity was stable. Since tensions escalated in March, disruptions to trade and strategic commodities have increased inflationary pressures while weighing on growth. Markets appear to be pricing in a quick normalization, but supply-side shocks tend to be persistent. While growth has so far been supported by policy buffers and economic momentum, the risk of higher costs feeding through the broader economy remains significant, particularly for emerging markets facing deteriorating trade balances.

After reducing exposure to the GCC and other markets most vulnerable to the conflict around Iran in March, we have begun selectively rebuilding positions. We have also moved to a neutral stance on emerging-market external debt, as valuations have become less attractive following the recent recovery.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Raiffeisen Bank Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% WIBOR o/n + 0.5%
