

VIG Central European Equity Fund

PLN-IP series MONTHLY report - 2026 MAY (made on: 05/31/2026)
PLN

INVESTMENT POLICY OF THE FUND

The aim of the Fund is to invest on the stock market of the Central and Eastern European Region. It is for investors who would like a share in the long-term performance of listed companies in the region. In the development of the portfolio of this Fund, the priority is to optimise the aggregate risk of the securities added to the Fund. In order to reduce risks, the Fund Manager exercises the highest degree of diligence when selecting the securities to be included in the portfolio. It analyses the risk factors of the securities, and supports its decisions with in-depth calculations.

The Fund purchases stocks issued by companies in Central and Eastern European region (primarily Hungary, the Czech Republic, Poland, Austria, Romania, secondarily Slovenia, Croatia, Slovakia), but it may also invest in the stocks of other developing and developed foreign companies as well as other collective investment securities. Due to the strategy of the Fund, it may also invest in assets denominated in foreign currency. The Fund may hedge some or all of its foreign currency risk using forward currency positions against the target currency. The Fund Manager has the discretionary right to reduce the foreign currency risk of the currency positions differing from the Fund's target currency, based on the market processes by concluding hedge transactions. In addition, the use of equity and index futures is permitted in order to effectively build the Fund's portfolio. To ensure liquidity, the Fund wishes to add government securities issued by member states of the EU, OECD, or G20 to its portfolio.

MARKET SUMMARY

Over the past month, global capital markets have revolved around two themes: one was the further acceleration of the AI infrastructure investment cycle, and the other was the energy and geopolitical risks associated with the war in Iran. The artificial intelligence story drove the semiconductor sector up at a strong pace, with the Philadelphia Semiconductor Index (an index of the 30 largest companies listed on U.S. stock exchanges) has only risen this much above its 200-day moving average in 1995 and at the peak of the 2000 bubble. Analysts are consistently revising AI companies' capex forecasts upward, yet an increasing portion of this financing is coming from debt. Meanwhile, the energy price shock is severely worsening the macroeconomic picture: inflation data for April and May were consistently higher than expected. Expectations of interest rate cuts have faded, and market participants now consider an interest rate hike more likely. A June interest rate hike by the European Central Bank is becoming increasingly likely, while wage dynamics have remained under control for now. The auto sector, which is key to the economy, presents a mixed picture: total sales have been on an upward trend for three months, and the EV market is expanding. The technical ratification of the EU- US trade agreement took place at the end of May, but the actual tariff rates in several sectors are still a matter of debate.

Following a strong April, Central European regional markets again performed well in May. The Fund's return in euros was outstanding, both in absolute terms and relative to the benchmark. The Austrian, Polish, and Romanian markets posted the largest gains, while, by sector, communications, materials, and industrial companies performed well. Erste Bank, Allegro, and Benefit Systems contributed most to the Fund's outperformance, while on the downside, CD Projekt somewhat dampened the Fund's performance. The Fund's total equity exposure was above 100% during the month, with a preference for the Polish and Hungarian markets. The latter is once again trading at a significant discount relative to regional markets, making it the most attractive among regional markets when considering the decline in the Hungarian risk-free rate.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Erste Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% CETOP 5/10/40 Index
