

# HSBC Global Investment Funds - Indian Equity

Share Class AC

As at 30 September 2020

## Investment Aim

The Fund seeks long-term total return (meaning capital growth and income) by investing in a portfolio of shares (or securities that are similar to shares) of Indian companies. The companies issuing these shares have a registered office and official stock-market listing in India, or carry out most of their business there. In normal market conditions, at least 90% of the Fund's assets are invested in such companies. There aren't restrictions on the market values of the companies held in the Fund. The Fund will not invest more than 30% of its assets in a combination of participation notes and convertible securities. See the Prospectus for a full description of the investment objectives and derivative usage.

## Risk Disclosure

It is important to remember that the value of investments can go down as well as up and you may not get back the amount originally invested. Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up. Investments in emerging markets are by their nature higher risk and potentially more volatile than those inherent in some established markets. This fund invests predominantly in one geographic area; therefore any decline in the economy of this area may affect the prices and value of the underlying assets. Stock market investments should be viewed as a medium to long term investment and should be held for at least five years. For a full list of risks, please refer to the Prospectus and KIID.
